

IN THE UNITED STATES DISTRICT COURT  
SOUTHERN DISTRICT OF ALABAMA  
MOBILE DIVISION

HAWK TECHNOLOGY SYSTEMS, LLC,

Plaintiff,

v.

Civil Action No. \_\_\_\_\_

CITY OF MOBILE and  
LADD-PEEBLES STADIUM,

Defendants.

**ORIGINAL COMPLAINT FOR PATENT INFRINGEMENT**

COMES NOW, Plaintiff, Hawk Technology Systems, LLC, files this Complaint for patent infringement against Defendants, City of Mobile and Ladd-Peebles Stadium, and alleges as follows:

**NATURE OF THE ACTION**

1. This is a civil action for patent infringement arising under 35 U.S.C. §§ 271, 281, 283, 284, and 285 to prevent and enjoin Defendants, City of Mobile and Ladd-Peebles Stadium, from infringing United States Patent No. 10,499,091 (the "'091 Patent"), attached hereto as Exhibit "A" and incorporated by reference, and to recover damages, attorneys' fees, and costs.

**PARTIES**

2. Hawk Technology Systems, LLC ("Hawk"), is a limited liability company organized and existing under the laws of the state of Florida and maintains its principal place of business at 2 South Biscayne Blvd., Suite 3800, Miami, Florida 33131.

3. Defendant, City of Mobile, is a municipal corporation formed under the laws and rules of the State of Alabama, and is located in the City of Mobile. The City of Mobile may be served with process by and through it's City Clerk, Lisa C. Lambert, Government Plaza - South Tower, 9<sup>th</sup> Floor, 205 Government Street, Mobile, Alabama 36633.

4. Defendant, Ladd-Peebles Stadium ("LPS") is a property owned and operated by Defendant, City of Mobile, and managed by a Board of Directors, operating in Mobile County, Alabama. Ladd-Peebles Stadium may be served with process by and through the City Clerk of Mobile, Lisa C. Lambert, Government Plaza - South Tower, 9<sup>th</sup> Floor, 205 Government Street, Mobile, Alabama 36633.

#### **JURISDICTION AND VENUE**

5. Pursuant to 28 U.S.C. §§ 1331 and 1338 (a), this Court has original jurisdiction over the subject matter of this action because this is an action arising under the Patent Laws of the United States, 35 U.S.C. § 1 et. seq.

6. This Court has personal jurisdiction over Defendants because Defendants operates, conducts, engages in and/or carries on business in this district.

7. Venue is proper in this district under federal law including 28 U.S.C. §§ 1391(b)-(c) and 1400(b) and *TC Heartland LLC v. Kraft Foods Group Brands LLC*, 137 S. Ct. 1517 (2017).

#### **GENERAL ALLEGATIONS**

8. Hawk Technology Systems was formed in 2012 to commercialize the inventions of its founder, Barry Schwab.

9. On December 3, 2019, the United States Patent and Trademark Office, after a fair and full examination, duly issued the '091 Patent, entitled "HIGH QUALITY, REDUCED DATA RATE STEAMING VIDEO PRODUCTION AND MONITORING SYSTEM."

10. Mr. Ken Washino and Mr. Schwab invented what is claimed by the '091 Patent.

11. Mr. Washino and Mr. Schwab have collaborated on myriad pioneering inventions resulting in patents in the areas of video production, transmission, archiving, and downloading, and even digital cinema.

12. Mr. Schwab also is a named inventor on more than forty patents, ranging from consumer products to secure network computing.

13. Hawk has the right to exclude others and to enforce, sue and recover damages for past and future infringement of the '091 Patent.

14. Claim 1 of the '091 Patent states:

A method of viewing, on a remote viewing device of a video surveillance system, multiple simultaneously displayed and stored video images, comprising the steps of:

receiving video images at a personal computer based system from a plurality of video sources, wherein each of the plurality of video sources comprises a camera of the video surveillance system;

digitizing any of the images not already in digital form using an analog-to-digital converter;

displaying one or more of the digitized images in separate windows on a personal computer based display device, using a first set of temporal and spatial parameters associated with each image in each window;

converting one or more of the video source images into a selected video format in a particular resolution, using a second set of temporal and spatial parameters associated with each image;

contemporaneously storing at least a subset of the converted images in a storage device in a network environment;

providing a communications link to allow an external viewing device to access the storage device;

receiving, from a remote viewing device remotely located remotely from the video surveillance system, a request to receive one or more specific streams of the video images;

transmitting, either directly from one or more of the plurality of video sources or from the storage device over the communication link to the remote viewing device, and in the selected video format in the particular resolution, the selected video format being a progressive video format which has a frame rate of less than substantially 24 frames per second using a third set of temporal and spatial parameters associated with each image, a version or versions of one or more of the video images to the remote viewing device, wherein the communication link traverses an external broadband connection between the remote computing device and the network environment; and

displaying only the one or more requested specific streams of the video images on the remote computing device.

See Ex. A at 8:31-9:5.

15. Claim 6 of the '091 Patent states A method of viewing, on a remote viewing device of a video surveillance system, multiple simultaneously displayed and stored video images, comprising the steps of:

receiving video images at a personal computer based system from a plurality of video sources, wherein each of the plurality of video sources comprises a camera of the video surveillance system;

digitizing any of the images not already in digital form using an analog-to-digital converter;

displaying one or more of the digitized images in separate windows on a personal computer based display device, using a first set of temporal and spatial parameters associated with each image in each window;

converting one or more of the video source images into a selected video format in a particular resolution, using a second set of temporal and spatial parameters associated with each image;

contemporaneously storing at least a subset of the converted images in a storage device in a network environment;

providing a communications link to allow an external viewing device to access the storage device;

receiving, from a remote viewing device remotely located remotely from the video surveillance system, a request to receive one or more specific streams of the video images;

transmitting, either directly from one or more of the plurality of video sources or from the storage device over the communication link traversing the Internet to the remote viewing device, and in the selected video format in the particular resolution, the selected video format being a progressive video format which has a frame rate of less than substantially 24 frames per second using a third set of temporal and spatial parameters associated with each image, a version or versions of one or more of the video images to the remote viewing device; and

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
