

CLAIM CHART FOR US PATENT NO. 10,499,091 as applied to Eagle Eye

Patent Claim Language	Application to Eagle Eye
<p>1. A method of viewing, on a remote viewing device of a video surveillance system, multiple simultaneously displayed and stored video images, comprising the steps of:</p> <p>[1.0]</p>	<p>System diagram:</p>  <p>The diagram illustrates a central cloud service connected to various components. At the top, a smartphone and tablet are connected to the cloud, which in turn connects to a laptop. The cloud is surrounded by several service labels: Video Analytics (CLVR), Easy User Management, Wide Angle and Night View, Continuous Recording, Motion Detection Alerts, Cloud Storage up to 30 Days, Records HD Video 1080p, and Plug and Play Cameras. A vertical scale between the cloud and the cameras indicates resolution levels from Low to High. At the bottom, two camera icons are shown, one of which is labeled 'Plug and Play Cameras'.</p> <p>Eagle Eye – Combo Bridge Brochure, Page 2</p>

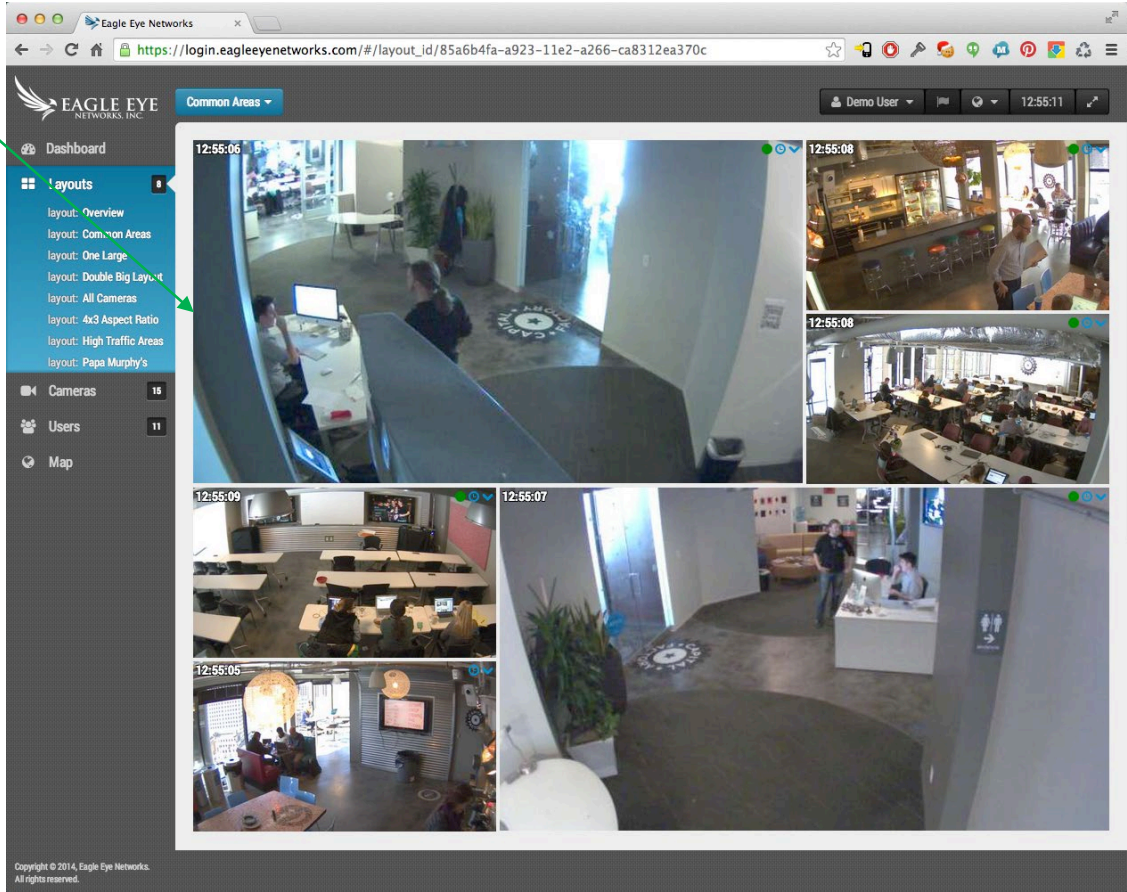

CLAIM CHART FOR US PATENT NO. 10,499,091 as applied to Eagle Eye

Patent Claim Language	Application to Eagle Eye
<p>digitizing any of the images not already in digital form using an analog-to-digital converter;</p> <p>[1.2}</p>	<p>These units are capable of accepting signals from either Analog or Digital cameras.</p> <p>Video Formats</p> <p>The video system is based on h264 video and AAC audio. These streams are encapsulated in different formats for compatibility with different playback modes</p> <ul style="list-style-type: none"> • FLV: the native format for the system. Playable in any Flash player and by VLC etc. • Live HTTP Streaming m3u: M3U files are index files into a mpegts data stream. The system will generate ts urls on approximately a 2 second basis (depending on key frame rate of the underlying video). Note, due to the polling nature of m3u for "live" streams, you can only use now relative requests for streaming (where the streamid is used to maintain transaction state). So "/asset/play/video.m3u?t=stream_34567890332244567;e=+300000;c=12345678" will create a five minute stream, but "/asset/play/video.m3u?t=-50000;e=+300000" will not. • ts: MPEG Transport Stream format video and audio. Intended for playback via http streaming in concert with m3u transactions, per the HTTP Live Streaming functionality of iOS and android. You can list multiple streams for a single video (typically for different resolutions/bandwidth). • mp4: MPEG4 files have very broad playback compatibility - all major video player are compatible. However, mp4 is NOT a streamable format, so it is only used for download functionality and will return an error if the video is live. • m3u8: Use the M3U8 play list format. Use this for mobile devices as it uses the HTTP layer to stream MPEG TS files with instructions in the M3U8 playlist file. Continue polling for this playlist until the playlist indicates it is complete. <p>Eagle Eye – API Guide, Page 67</p>

CLAIM CHART FOR US PATENT NO. 10,499,091 as applied to Eagle Eye

Patent Claim Language	Application to Eagle Eye
<p>displaying one or more of the digitized images in separate windows on a personal computer based display device, using a first set of temporal and spatial parameters associated with each image in each window; [1.3}</p>	<p>Exemplary multi-camera screen display for the System; this is user-configurable (evidently, the selection of the screen layout will impact the spatial parameters for the displayed images):</p>  <p>The screenshot shows a web browser window with the URL https://login.eagleeyenetworks.com/#/layout_id/85a6b4fa-a923-11e2-a266-ca8312ea370c. The interface features a sidebar menu with options like 'Dashboard', 'layouts', 'Cameras', 'Users', and 'Map'. The 'layouts' menu is expanded, showing options such as 'Overview', 'Common Areas', 'One Large', 'Double Big Layout', 'All Cameras', '4x3 Aspect Ratio', 'High Traffic Areas', and 'Papa Murphy's'. The main content area displays a grid of camera feeds from different locations, including a reception desk, a bar area, and a dining room. Each feed includes a timestamp and control icons. A copyright notice at the bottom reads 'Copyright © 2014, Eagle Eye Networks. All rights reserved.'</p> <p>Eagle Eye – API Guide, Page 86</p>

CLAIM CHART FOR US PATENT NO. 10,499,091 as applied to Eagle Eye

Patent Claim Language	Application to Eagle Eye
<p>converting one or more of the video source images into a selected video format in a particular resolution, using a second set of temporal and spatial parameters associated with each image;</p> <p>[1.4}</p> <p>Note: <i>The computer storage format is a "container" for the audio and video information, which is encoded in some compression codec. Popular computer storage formats include MOV, AVI, etc.</i></p>	<p>The camara streams must be converted into a recordable format, based on user selection for how each camara's output is to be handled.</p> <p>RECORDING FEATURES</p> <ul style="list-style-type: none"> • Video encrypted in transit & at rest • Fully cloud managed • Intelligent Bandwidth Management with local buffering • Full frame rate on 720p & 1080p cameras • Optional audio recording <p>Eagle Eye – Combo Bridge Brochure, Page 1</p>

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
