ALDEN PELKER (MD BAR) Senior Counsel 9 Department of Justice Computer Crime & Intellectual Property Section 10 1301 New York Avenue NW, Suite 600 Washington, D.C. 20005 11 Telephone: (202) 514-1026 catherine.pelker@usdoj.gov 12 13 Attorneys for United States of America 14 UNITED STATES DISTRICT COURT 15 NORTHERN DISTRICT OF CALIFORNIA 16 SAN FRANCISCO DIVISION 17 18 IN THE MATTER OF THE SEARCH OF CASE NO. 16-MC-80263-RS CONTENT STORED AT PREMISES CONTROLLED BY GOOGLE INC. AND AS FURTHER DESCRIBED IN STIPULATION AND JOINT REQUEST TO ATTACHMENT A **CLOSE MATTER ADMINISTRATIVELY:** 20 ORDER 21 22 23 This stipulation is entered into between the United States of America, acting through the United 24 States Attorney's Office and the United States Department of Justice, Computer Crime & Intellectual Property Section (the "Government"), and Google LLC ("Google"), through their authorized 25 26 representatives. 27 WHEREAS, the parties have agreed to a resolution of all issues in and related to this case and 28 | the proceedings related to Google's compliance with the search warrant issued by the Honorable Laurel

Beeler, United States Magistrate Judge for the Northern District of California, on June 30, 2016, captioned "In the Matter of the Search of CONTENT RELATED TO BTC-E THAT IS STORED AT 2 PREMISES CONTROLLED BY GOOGLE INC. AND FURTHER DESCRIBED IN ATTACHMENT 3 A," Case No. 3-16-70816; 4 5 WHEREAS, the resolution includes an Agreed Facts and Procedural History, attached hereto as Attachment A, and an Agreement between the parties, attached hereto as Attachment B. The Agreement 6 involves continued and ongoing enhancements to Google's legal process compliance program, which is 7 8 intended to achieve timely and complete responses to certain legal process in compliance with 9 applicable laws, while permitting Google to safeguard users' privacy and limit Government access to 10 user data except for responses to valid legal process and only to the extent authorized by law; and WHEREAS, Google estimates that it has spent more than \$90 million on additional resources, 11 systems, and staffing to implement improvements to its legal process compliance program, including in 12 13 response to these proceedings. In light of these significant expenditures, the parties agree that no further remedial compensation is warranted. 14 15 THEREFORE, IT IS HEREBY STIPULATED AND AGREED, by and between the undersigned parties, through their respective counsel, that this matter is fully resolved, and the parties 16 jointly request that the Court close this case administratively. 17 18 DATED: October 24, 2022 Respectfully submitted, 19 STEPHANIE M. HINDS United States Attorney 20 21 LLOYD FARNHAM Assistant United States Attorney 22 23 JOHN LYNCH Chief, Computer Crime & Intellectual 24 **Property Section** 25 U.S. Department of Justice 26 27 Senior Counsel 28

DATED: October 21, 2022 WILMER CUTLER PICKERING HALE AND DORR LLP MARK D. FLANAGAN Attorneys for Google LLC ORDER CLOSING MATTER ADMINISTRATIVELY Based on the above stipulation of the parties and considering the Agreed Facts and Procedural History, attached hereto as Attachment A, and the Agreement of the parties, attached hereto as Attachment B, the Court HEREBY ORDERS this matter closed, all issues having been resolved by the parties. This Court retains jurisdiction to resolve disputes regarding the resolution of this matter as set forth in the Agreement of the parties. IT IS SO ORDERED. DATED: October 25, 2022 Chief Judge, United States District Court

ATTACHMENT A AGREED FACTS AND PROCEDURAL HISTORY

- 1. On June 30, 2016, the Honorable Laurel Beeler, U.S. Magistrate Judge for the Northern District of California, issued a search warrant pursuant to the Stored Communications Act ("SCA"), captioned "In the Matter of the Search of Content Related to BTC-e that is Stored at Premises Controlled by Google Inc. and further described in attachment A," Case No. 16-70816-MISC-LB, ("the Warrant") requiring Google to produce materials relevant to the investigation of an illegal cryptocurrency exchange called BTC-e and its administrators. On July 6, 2016, Homeland Security Investigations Special Agent Michael Delaney served the Warrant on Google.
- 2. On July 14, 2016, the Second Circuit Court of Appeals issued its opinion in *In the Matter* of Warrant to Search a Certain E-Mail Account Controlled and Maintained by Microsoft Corp., 829 F. 3d 197 (2nd Cir. 2016) (the "Microsoft Decision"). That decision held that SCA search warrants did not reach data stored outside the United States.
- 3. Following the Microsoft Decision, Google temporarily halted processing of the Warrant. The Microsoft Decision was issued by the Second Circuit, in which Google operates but is not headquartered; however, in the absence of contrary Court of Appeals authority directly on point, Google conducted a legal analysis and decided to follow the Microsoft Decision in all Circuits, including the Ninth Circuit and the Northern District of California.
- 4. At the time of the Microsoft Decision, in order to optimize performance, reliability, and other efficiencies, Google stored certain data in an intelligent network, which moved component parts of data seamlessly and automatically between locations. As a result, Google could not always determine the country in which certain data was stored at a given time. Following the Microsoft Decision, Google determined that in response to United States search warrants, Google was required to produce only data that it could confirm was located in the United States. However, at the time, Google's legal export tools would collect information from across Google's servers without regard to location and save the data within the United States. Google believed that using its legal export tools to retrieve the data in connection with the Warrant would exceed the scope of the SCA's reach as interpreted by the Microsoft 28 | Decision and thus started developing location-aware tooling.

- 6. On September 27, 2016, SA Delaney contacted Google asking for the status of Google's response to the Warrant, acknowledging the "large volume of information" it requested from Google and requesting a "partial or rolling production" if not all responsive records were available. On September 28, 2016, Google produced some data and documents that it was able to ascertain were stored in the United States in response to the Warrant. In its first production, Google acknowledged its production was only a partial response to the Warrant and that the produced responsive records were retrieved from "Google's U.S. servers," citing the Microsoft Decision. On October 3, 2016, HSI SA Delaney contacted Google to ask whether responsive data were omitted from Google's production because they were stored outside of the United States, what types of responsive data were stored in foreign countries, and in which countries such data were stored. On October 12, 2016, HSI SA Delaney and a Google representative discussed the Warrant. At that time, Google indicated that certain data responsive to the Warrant were stored outside of the United States, and that Google would only produce data stored in the United States in response to the Warrant consistent with its interpretation of the Microsoft Decision.
- 7. On November 18, 2016, Google supplemented its production to the Government based on new location-aware tooling it had developed since its first production. On November 21, 2016, Google wrote a letter to the Government providing updates on the production. In particular, Google stated that while it produced "all information it confirmed to be stored in the United States," it did not produce other responsive data whose location Google could not determine and could not confirm to be in the United States, consistent with Google's interpretation of the Microsoft Decision.
- 8. The Government informed Google that its incomplete production was not satisfactory, and that if Google did not fully comply, the Government would petition the Court to hold Google in contempt. On December 6, 2016, Google filed a Motion to Quash the Warrant.
 - 9. On January 13, 2017, the Government filed an Opposition to the Motion to Quash and

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
