Attorneys for Defendant MONSANTO COMPANY

UNITED STATES DISTRICT COURT

NORTHERN DISTRICT OF CALIFORNIA

IN RE: ROUNDUP PRODUCTS LIABILITY LITIGATION	MDL No. 2741 Case No. 3:16-md-02741-VC
This document relates to:	
Nicole Soltyka et al., v. Monsanto Co., Case No. 3:22-cv- 05734-VC	

MONSANTO COMPANY'S ANSWER TO PLAINTIFF'S COMPLAINT

Pursuant to Rule 12 of the Federal Rules of Civil Procedure, Defendant Monsanto Company ("Monsanto"), by and through its counsel, respectfully responds by generally denying all allegations contained in plaintiff's Complaint ("the Complaint"), except as set forth below. As defined in the Complaint and as used in this Answer, Monsanto refers to Monsanto Company, a United States based company incorporated in Delaware, and not to other Monsanto-affiliated companies. Silence as to any allegations shall constitute a denial.

In response to the allegations in the unnumbered paragraph under the section titled "INTRODUCTION," Monsanto denies that any exposure to Roundup®-branded products can cause non-Hodgkin's lymphoma ("NHL"). Monsanto admits that plaintiff purports to bring an action for damages allegedly related to exposure to Roundup®-branded products but denies any liability to plaintiff. Monsanto denies the remaining allegations in the section titled "INTRODUCTION."

- 1 -

- 1. Monsanto lacks information or knowledge sufficient to form a belief as to the truth of the allegations in paragraph 1 and therefore denies those allegations.
- 2. Monsanto lacks information or knowledge sufficient to form a belief as to the truth of the allegations in paragraph 2 and therefore denies those allegations.
- 3. Monsanto lacks information or knowledge sufficient to form a belief as to the truth of the allegations in the first sentence of paragraph 3 and therefore denies those allegations. The remaining allegations in paragraph 3 set forth conclusions of law for which no response is required.
- 4. Monsanto lacks information or knowledge sufficient to form a belief as to the truth of the allegations in paragraph 4 and therefore denies those allegations.
 - 5. Monsanto denies the allegations in paragraph 5.
- 6. Monsanto lacks information or knowledge sufficient to form a belief as to the truth of the allegations in paragraph 6 and therefore denies those allegations.
- 7. Monsanto denies that any exposure to Roundup®-branded products can cause NHL and other serious illnesses and therefore denies those allegations in paragraph 7. Monsanto states, however, that the scientific studies upon which the International Agency for Research on Cancer ("IARC") purported to base its evaluation of glyphosate were all publicly available before March 2015. Monsanto lacks information or knowledge sufficient to form a belief as to the truth of the remaining allegations in paragraph 7 and therefore denies those allegations.
- 8. Monsanto admits the allegations in the first and last sentences of paragraph 8. The remaining allegations in paragraph 8 are vague and conclusory and comprise attorney characterizations and are accordingly denied.
- 9. In response to the allegations in paragraph 9, Monsanto admits that it was the entity that discovered the herbicidal properties of glyphosate and that Monsanto has manufactured Roundup®-branded products that have glyphosate as the active ingredient, but notes that Monsanto has not been the only manufacturer of glyphosate-based herbicides. Monsanto also admits that certain of these herbicides contain POEA and adjuvants and that the United States

18 19

20 21

22

23 24

25

26 27 28 Environmental Protection Agency ("EPA") has classified surfactants and adjuvants as inert. In response to the final sentence of paragraph 9, Monsanto admits that certain scientific, manufacturing, marketing, and sales decisions regarding Roundup®-branded products were made in the State of Missouri, but states that the terms "important" and "business decisions" are vague and ambiguous, and therefore Monsanto denies the same. Monsanto denies the remaining allegations in the final sentence of paragraph 9.

- 10. Monsanto denies the allegations in paragraph 10.
- 11. The allegations in paragraph 11 set forth conclusions of law for which no response is required.
- 12. The allegations in paragraph 12 set forth conclusions of law for which no response is required. To the extent that a response is deemed required, Monsanto admits the allegations in paragraph 12 based upon the allegations in plaintiff's Complaint.
- 13. The allegations in paragraph 13 set forth conclusions of law for which no response is required.
- 14. The allegations in paragraph 14 set forth conclusions of law for which no response is required.
- 15. Monsanto admits the allegations in the first two sentences of paragraph 15. In response to the third sentence of paragraph 15, Monsanto admits that certain Roundup®-branded herbicides contain POEA and adjuvants and that EPA has classified surfactants and adjuvants as inert. In response to the last sentence of paragraph 15, Monsanto admits that glyphosate was one of the world's most widely used herbicides in 2013, but notes that Monsanto has not been the only manufacturer of glyphosate-based herbicides. Monsanto lacks information or knowledge sufficient to form a belief as to the accuracy of the specific numbers and statistics cited in the remaining sentences of paragraph 15 and therefore denies those allegations.
- 16. In response to the allegations in paragraph 16, Monsanto admits that its headquarters are in St. Louis County, Missouri, and that it is incorporated in Delaware. Monsanto admits that it and its affiliated companies have operations and offices in countries around the

12

15

14

17

16

18 19

20 21

22 23

world. Monsanto admits that it has been a producer of glyphosate-based herbicides but lacks sufficient information regarding the business of other glyphosate producers to admit or deny the allegation as written in the second sentence of paragraph 16. Monsanto admits that it has been the leading producer of seeds that contain the Roundup Ready® trait and that use of crops with the Roundup Ready[®] trait substantially improve a farmer's ability to control weeds. Monsanto lacks information or knowledge sufficient to form a belief as to the accuracy of the specific numbers and statistics provided in the remaining sentences of paragraph 16 and therefore denies those allegations.

- 17. Monsanto admits the allegations in the first sentence of paragraph 17. Monsanto admits that certain studies have reported that glyphosate is found at de minimis levels significantly below regulatory safety limits in various locations and media. Monsanto otherwise denies the remaining allegations in paragraph 17.
- 18. Monsanto admits the allegations in the first sentence of paragraph 18. Monsanto denies the allegations in the second sentence of paragraph 18 to the extent they suggest that the International Agency for Research on Cancer ("IARC") based its evaluation on a complete or accurate assessment of the scientific research regarding glyphosate.
- 19. Monsanto admits the allegations in the first sentence of paragraph 19. Monsanto denies the allegations in the second sentence of paragraph 19.
- In response to the allegations in paragraph 20, Monsanto admits that the IARC working group classified glyphosate under Group 2A. Monsanto denies the remaining allegations in paragraph 20.
 - 21. Monsanto denies the allegations in paragraph 21.
- 22. In response to paragraph 22, Monsanto admits that glyphosate repeatedly has been found to be safe to humans and the environment by regulators in the United States and around the world and further admits that it has labeled glyphosate products as approved by regulatory bodies consistent with those findings. Monsanto also admits that the EPA repeatedly has concluded pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act ("FIFRA") that

|-

glyphosate-based herbicides create no unreasonable risk to human health or to the environment when used in accordance with the label. To the extent that paragraph 22 alleges that Monsanto has labeled glyphosate-based or Roundup®-branded herbicides in any manner different or in addition to such regulatory approval, Monsanto denies such allegations.

- 23. In response to the allegations in paragraph 23, Monsanto admits that glyphosate is an herbicide that is used to kill invasive plants and weeds. The remaining allegations in paragraph 23 are vague and ambiguous and Monsanto lacks information or knowledge sufficient to form a belief as to the truth of the remaining allegations in paragraph 23 and therefore denies those allegations.
- 24. Monsanto admits the allegations in the first sentence of paragraph 24. Monsanto denies the allegations in the second sentence of paragraph 24 because the impact of glyphosate on treated plants varies depending upon the amount of glyphosate applied and the type of plant. Monsanto denies the allegations in the third sentence of paragraph 24 to the extent that it suggests that glyphosate is present in any plants at anything other than *de minimis* amounts well within regulatory safety levels, as determined by EPA.
- 25. In response to the allegations in paragraph 25, Monsanto admits that farmers have safely used Roundup®-branded products since the 1970s. Monsanto denies the remaining allegations in paragraph 25.
- 26. Monsanto admits the allegations in the first two sentences of paragraph 26 and admits that it has marketed Roundup®-branded products in accord with EPA's regulatory determinations under FIFRA. Monsanto otherwise denies the remaining allegations in paragraph 26.
- 27. In response to the allegations in paragraph 27, Monsanto admits that certain Roundup®-branded herbicides contain POEA and adjuvants, that EPA has classified surfactants and adjuvants as inert, and that the specific surfactants and adjuvants used in Roundup®-branded herbicides like those in other manufacturers' herbicide products are protected by EPA as "trade secrets." Monsanto notes that EPA has determined that the surfactants used in Roundup®-

 branded herbicides do not pose an unreasonable risk to human health. Monsanto denies the remaining allegations in paragraph 27.

- 28. The allegations in paragraph 28 set forth conclusions of law for which no response is required.
- 29. In response to the allegations in paragraph 29, Monsanto admits that EPA requires registrants of herbicides to submit extensive data in support of the human health and environmental safety of their products and further admits that EPA will not register or approve the labeling of herbicides that do not satisfy the requirements set forth in FIFRA. The remaining allegations in paragraph 29 set forth conclusions of law for which no response is required.
- 30. The allegations in paragraph 30 set forth conclusions of law for which no response is required.
- 31. In response to the allegations in paragraph 31, Monsanto admits that Roundup®-branded products are registered by EPA for manufacture, sale, and distribution in the United States and are registered by the State of California for sale and distribution.
- 32. In response to the allegations in paragraph 32, Monsanto admits that EPA requires registrants of herbicides to submit extensive data in support of the human health and environmental safety of their products and further admits that EPA will not register or approve the labeling of herbicides that do not satisfy the requirements set forth in FIFRA. Monsanto states that the term "the product tests" in the last sentence of paragraph 32 is vague and ambiguous, and Monsanto therefore denies the same. The remaining allegations in paragraph 32 set forth conclusions of law for which no response is required.
- 33. Monsanto denies the allegations in paragraph 33 to the extent they suggest that EPA only evaluates the safety of pesticide products on the date of their initial registration. Monsanto admits that EPA is in the process of conducting regulatory review of various pesticide products, but Monsanto lacks information or knowledge sufficient to form a belief as to the truth of the allegations in paragraph 33 regarding such pesticide products generally. The remaining allegations in paragraph 33 set forth conclusions of law for which no response is required.

34. In response to the allegations in paragraph 34, Monsanto admits that EPA has undertaken a regulatory review of glyphosate and further admits that EPA has not released its findings. Monsanto states, however, that: (a) in September 2016, EPA's Office of Pesticide Programs ("OPP") issued a 227-page evaluation of glyphosate's carcinogenic potential, concluding that "[t]he strongest support is for [the descriptor] 'not likely to be carcinogenic to humans' at doses relevant to human health risk assessment"; and (b) at the same time, EPA posted an October 2015 final report by its standing Cancer Assessment Review Committee ("CARC"), in which CARC endorsed EPA's existing classification of glyphosate as "Not Likely to be Carcinogenic to Humans."²

35. In response to the allegations in paragraph 35, Monsanto admits that an EPA review committee classified glyphosate as Class C in 1985 based on limited data and that EPA changed its classification of glyphosate to Group E based upon a full evaluation of the scientific evidence, including but not limited to three animal carcinogenicity studies. Monsanto admits that plaintiff has accurately quoted from one passage in an EPA document in 1991 with respect to the designation of an agent as Group E, but states that EPA repeatedly has concluded that glyphosate does not pose any cancer risk to humans. In addition to the conclusions in the two EPA OPP reports and the EPA CARC Final Report discussed above, other specific findings of safety include:

• "In June 1991, EPA classified glyphosate as a Group E [carcinogen]—one that shows evidence of non-carcinogenicity for humans—based on the lack of convincing evidence of carcinogenicity in adequate studies." EPA, *Glyphosate: Reregistration Eligibility Decision (RED) Facts*, 2 (Sept. 1993), http://archive.epa.gov/pesticides/reregistration/web/pdf/0178fact.pdf.

- "No evidence of carcinogenicity." Glyphosate; Pesticide Tolerances, 67 Fed. Reg. 60,934, 60,943 (Sept. 27, 2002) (to be codified at 40 C.F.R. pt. 180).
 "Glyphosate, has no carcinogenic potential." Glyphosate: Pesticide Tolerance, 69 Fed.
- "Glyphosate has no carcinogenic potential." Glyphosate; Pesticide Tolerance, 69 Fed. Reg. 65,081, 65,086 (Nov. 10, 2004) (to be codified at 40 C.F.R. pt. 180).
- "There is [an] extensive database available on glyphosate, which indicate[s] that glyphosate is not mutagenic, not a carcinogen, and not a developmental or reproductive toxicant." Glyphosate; Pesticide Tolerances, 73 Fed. Reg. 73,586, 73,589 (Dec. 3, 2008) (to be codified at 40 C.F.R. pt. 180).
- "EPA has concluded that glyphosate does not pose a cancer risk to humans." 78 Fed. Reg. 25,396, 25,398 (May 1, 2013) (to be codified at 40 C.F.R. pt. 180).
- "In 2014, EPA reviewed over 55 epidemiological studies conducted on the possible cancer and non-cancer effects of [g]lyphosate. Our review concluded that this body of research does not provide evidence to show that [g]lyphosate causes cancer and does not warrant any change in the EPA's cancer classification for [g]lyphosate." *Agriculture Biotechnology: A Look at Federal Regulation and Stakeholder Perspectives: Hearing Before the S. Comm. on Agr., Nutrition, & Forestry*, 114th Cong. (2015) (statement of Dr. William Jordan, Deputy Director of EPA's Office of Pesticide Programs), http://www.ag.senate.gov/templates/watch.cfm?id=74793e67-5056-a055-64af-0e55900753b4, at time stamp 55:05 56:20.

Monsanto denies the remaining allegations in paragraph 35.

- 36. In response to the allegations in paragraph 36, Monsanto admits that it along with a large number of other companies and governmental agencies was defrauded by two chemical testing laboratories, and that Monsanto had hired both of these laboratories to conduct testing on glyphosate. Monsanto states that only one of these laboratories was hired to conduct toxicity tests of glyphosate. Monsanto denies that EPA's registration of glyphosate or any glyphosate-based herbicides is based upon any invalid Industrial Bio-Test ("IBT") studies. To the extent that the allegations in paragraph 36 are intended to suggest that Monsanto was anything other than a victim of this fraud, such allegations are denied.
- 37. In response to the allegations in paragraph 37, Monsanto admits that IBT Laboratories was hired to conduct toxicity studies in connection with the registration of a Roundup®-branded product. Monsanto denies that EPA's regulatory approval of such product is based upon any fraudulent or false IBT studies.
- 38. Monsanto denies the allegations in paragraph 38 to the extent they suggest that EPA performed an inspection of IBT Laboratories solely or specifically in connection with studies

conducted on glyphosate. Monsanto admits that EPA performed an audit of IBT Laboratories to investigate that laboratory's fraudulent and/or improper testing procedures in connection with services provided to a broad number of private and governmental entities and that this inspection included a review of studies IBT conducted on glyphosate. Monsanto was one of several pesticide manufacturers who had used IBT test results. The audit found some toxicology studies conducted with the original Roundup® herbicide to be invalid. As a result, Monsanto repeated all required studies in accordance with applicable EPA testing guidelines. Monsanto denies that EPA's registration of glyphosate or any glyphosate-based herbicides is based upon any invalid IBT studies. To the extent that the allegations in paragraph 38 are intended to suggest that Monsanto was anything other than a victim of this fraud, such allegations also are denied.

- 39. In response to the allegations in paragraph 39, Monsanto admits that three IBT employees were convicted of the charge of fraud, but Monsanto denies that any of the individuals were convicted based upon studies conducted on glyphosate or glyphosate-based herbicides.
- 40. In response to the allegations in paragraph 40, Monsanto admits that it along with numerous other private companies hired Craven Laboratories as an independent laboratory to conduct residue studies for Monsanto agricultural products. Monsanto further admits that it was defrauded by Craven Laboratories and that, as a result, Monsanto repeated the studies conducted at Craven Laboratories at a substantial cost. To the extent that the allegations in paragraph 40 are intended to suggest that Monsanto was anything other than a victim of this fraud, Monsanto denies those allegations.
 - 41. Monsanto denies the allegations in paragraph 41.
- 42. In response to the allegations in paragraph 42, Monsanto admits that Roundup®-branded products are highly valued by customers because of their efficacy and safety. Monsanto also admits that the patent for glyphosate expired in the United States in 2000. The remaining allegations in paragraph 42 are vague and conclusory, comprise attorney characterizations, and are accordingly denied.

43. In response to the allegations in paragraph 43, Monsanto admits that following the development of Roundup® Ready seeds, it began to sell them in the 1990s and that such seeds are now widely used by farmers in the United States and worldwide. Monsanto lacks information or knowledge sufficient to form a belief as to the accuracy of the specific numbers cited in paragraph 43 and accordingly denies those allegations. The remaining allegations in paragraph 43 are vague and conclusory and comprise attorney characterizations, and are accordingly denied.

- 44. In response to the allegations in paragraph 44, Monsanto admits that glyphosate is one of the world's largest herbicides by sales volume, but Monsanto denies any suggestion that it has been the only company that has sold glyphosate or glyphosate-based herbicides. Monsanto lacks information or knowledge sufficient to form a belief as to the accuracy of the specific numbers cited in paragraph 44 and accordingly denies the same. The remaining allegations in paragraph 44 are vague and conclusory and comprise attorney characterizations, and are accordingly denied.
- 45. In response to the allegations in paragraph 45, Monsanto admits that the New York Attorney General ("NYAG") filed a lawsuit against Monsanto in 1996 alleging false and misleading advertising of Roundup®-branded products. This lawsuit was subsequently resolved without any admission of wrongdoing by Monsanto. Monsanto states that none of the NYAG's allegations related in any way to a purported or alleged risk of cancer. To the extent the subparts of paragraph 45 purport to quote a document, the document speaks for itself and thus does not require any further response. The remaining allegations in paragraph 45 are vague and conclusory and comprise attorney characterizations, and are accordingly denied.
- 46. In response to the allegations in paragraph 46, Monsanto admits it entered into an assurance of discontinuance with the NYAG. The assurance speaks for itself and thus does not require any further response. The remaining allegations in paragraph 46 are vague and conclusory and comprise attorney characterizations, and are accordingly denied.
 - 47. Monsanto denies the allegations in paragraph 47.

- 48. In response the allegations in paragraph 48, Monsanto admits that the French court ruled that Monsanto had falsely advertised its herbicide Roundup® as "biodegradable" and that it "left the soil clean," but denies the allegations to the extent they suggest that this ruling was in any way related to plaintiff's claims here that glyphosate can cause cancer. Monsanto denies the remaining allegations in paragraph 48.
- 49. In response to the allegations in paragraph 49, Monsanto denies that IARC follows stringent procedures for the evaluation of a chemical agent. Monsanto lacks information or knowledge sufficient to form a belief as to the accuracy of the specific numbers cited in paragraph 49, which are not limited as of any specified date, and accordingly denies the same.
- 50. In response to the allegations in paragraph 50, Monsanto admits that IARC sets forth in its Preamble the procedures that it claims to follow in its carcinogenicity evaluations. Monsanto denies the remaining allegations in paragraph 50.
- 51. Monsanto denies any suggestion that IARC reviewed the full body of scientific research in conducting its evaluation of glyphosate or that IARC reliably reviewed the studies that it cited in its glyphosate monograph. Monsanto lacks information or knowledge sufficient to form a belief as to the truth of the remaining allegations in paragraph 51 and therefore denies those allegations.
- 52. Monsanto denies any suggestion that IARC reviewed the full body of scientific research in conducting its evaluation of glyphosate or that IARC reliably reviewed the studies that it cited in its glyphosate monograph. Monsanto lacks information or knowledge sufficient to form a belief as to the truth of the remaining allegations in paragraph 52 and therefore denies those allegations.
- 53. Monsanto denies the allegations in paragraph 53 to the extent that they suggest that IARC had previously assessed glyphosate. Monsanto admits that IARC classified glyphosate as a Group 2A agent in March 2015.
- 54. In response to the allegations in paragraph 54, Monsanto admits that IARC issued its monograph for glyphosate, Monograph 112, on July 29, 2015, and that a draft of the

monograph was prepared by a "working group" of individuals selected by IARC who met over a one week period in March 2015 to consider glyphosate along with a number of other substances. Monsanto denies the allegation that all members of the working groups are "experts." Monsanto denies that the working group or anyone at IARC conducted a one-year review of the scientific evidence related to glyphosate or that the working group's findings reflected a comprehensive review of the latest available scientific evidence. Monsanto also denies that the working group considered all information available in the scientific literature and all data from government reports that are publicly available. Monsanto denies the remaining allegations in paragraph 54.

- 55. In response to the allegations in paragraph 55, Monsanto denies that the IARC working group considered all of the data in the numerous studies that have been conducted looking at the safety of glyphosate and glyphosate-containing herbicides in human populations or that it reliably considered the studies that it purports to have reviewed, which frequently reach conclusions directly contrary to those espoused by the IARC working group. To the extent the allegations purport to characterize statements made in the IARC monograph for glyphosate, the statements in that document speak for themselves, but Monsanto lacks information or knowledge sufficient to form a belief as to the accuracy of the source of said information and accordingly denies the allegations.
- 56. The allegations in paragraph 56 are vague and conclusory. To the extent they purport to characterize statements made in the IARC monograph for glyphosate, the statements in that document speak for themselves, but Monsanto lacks information or knowledge sufficient to form a belief as to the accuracy of the source of said information and accordingly denies the allegations.
- 57. In response to the allegations in paragraph 57, to the extent the allegations purport to characterize statements made in the IARC monograph for glyphosate, the statements in that document speak for themselves, but to the extent that this paragraph means that more than *de minimis* amounts of exposure are present, the allegations in paragraph 57 are denied.

58. In response to the allegations in paragraph 58, Monsanto admits that the IARC working group identified a number of case control studies of populations with exposures to glyphosate, but Monsanto denies that any of these studies provide any evidence of a human health concern from such exposures.

- 59. Monsanto denies the allegations in paragraph 59. The IARC working group concluded that there was only limited evidence of carcinogenicity in epidemiologic studies, which, per IARC's guidelines, means that the working group could not rule out chance, bias or confounding so as to reach any conclusion of an increased risk.
- 60. In response to the allegations in paragraph 60, Monsanto admits that the working group cited to a study that it concluded provided evidence of chromosomal damage in community residents reported to be exposed to glyphosate, but Monsanto denies that the study supports such a conclusion or that the authors of the study reached such a conclusion.
- 61. In response to the allegations in paragraph 61, Monsanto admits that the IARC working group purported to make these findings, but denies that the animal carcinogenicity studies of glyphosate in the aggregate provide evidence of a positive trend for or increase in any of the identified tumors. Monsanto further states that regulatory agencies around the world have reviewed the same animal studies and concluded that they do not provide evidence that glyphosate can cause cancer. Monsanto denies the remaining allegations in paragraph 61.
- 62. In response to the allegations in paragraph 62, Monsanto admits that the IARC working group purported to make these findings, but denies that the cited studies provide any reliable basis for a finding that any meaningful levels of glyphosate or AMPA is present or persists in human blood or urine. Monsanto denies the remaining allegations in paragraph 62.
- 63. In response to the allegations in paragraph 63, Monsanto admits that the IARC working group interpreted a selected number of experimental studies as evidence that glyphosate can cause genotoxicity, but Monsanto denies that the working group reliably considered the full body of scientific data on such alleged genotoxic endpoints and denies that the working group reliably interpreted the studies that it selected for consideration. Regulators around the world

 repeatedly have concluded that glyphosate is not genotoxic. Monsanto denies the remaining allegations in paragraph 63.

- 64. In response to the allegations in paragraph 64, Monsanto admits that the IARC working group purported to find such effects, but denies that there is any reliable scientific basis for such conclusion. Monsanto denies the remaining allegations in paragraph 64.
- 65. In response to the allegations in paragraph 65, Monsanto admits that the working group reviewed the findings of an Agricultural Health Study ("AHS") published in 2005, but denies that the working group characterized that study as supporting an association between glyphosate and the specified cancers. The AHS cohort study did not find a positive association between glyphosate and any type of cancer. Monsanto denies all other allegations in paragraph 65.
- 66. In response to the allegations in paragraph 66, Monsanto admits that EPA has a technical fact sheet, as part of its Drinking Water and Health, National Primary Drinking Water Regulations, relating to glyphosate that predates the IARC March 20, 2015 evaluation, which should be read in context of EPA's precautionary regulatory mandate and EPA's consistent finding that glyphosate does not pose any cancer risk to humans.
- 67. In response to the allegations in paragraph 67, Monsanto admits that the Northwest Coalition for Alternatives to Pesticides made the identified claims, but denies that the Coalition provides any reliable basis for any conclusions regarding potential health risks from glyphosate. Monsanto notes that a federal district court has characterized this same publication as an "advocacy piece[] published in [a] non-peer-reviewed journal." *See Arias v. DynCorp*, 928 F. Supp. 2d 10, 24 (D.D.C. 2013).
- 68. Monsanto states that the term "toxic" as used in paragraph 68 is vague and ambiguous to the extent it is intended to suggest any evidence of carcinogenicity. Monsanto denies the allegations in paragraph 68.
- 69. In response to the allegations in paragraph 69, Monsanto admits that Julie Marc published the cited study in 2002 and states that the document speaks for itself and does not

require a response. To the extent that a response is deemed required, Monsanto denies the allegations in paragraph 69.

- 70. In response to the allegations in the first sentence of paragraph 70, Monsanto admits that Julie Marc published a study titled "Glyphosate-based pesticides affect cell cycle regulation" in 2004. To the extent that the first sentence of paragraph 70 characterizes the meaning of the cited study, Monsanto denies the allegations in the first sentence of paragraph 70. In response to the remaining allegations in paragraph 70, Monsanto states that the document speaks for itself and does not require a response. To the extent that a response is deemed required, Monsanto denies the remaining allegations in paragraph 70.
- 71. In response to the allegations in paragraph 71, Monsanto states that the cited document speaks for itself and does not require a response. To the extent that paragraph 71 characterizes the meaning of the cited study, Monsanto denies the remaining allegations in paragraph 71.
- 72. In response to the allegations in paragraph 72, Monsanto states that the cited document speaks for itself and does not require a response. To the extent that paragraph 72 characterizes the meaning of the cited study, Monsanto denies the allegation that the cited studies support the allegation that glyphosate or Roundup®-branded products pose any risk to human health and denies the remaining allegations in paragraph 72.
- 73. In response to the allegations in paragraph 73, Monsanto states that the terms "at all times" and these studies are vague and ambiguous, and therefore Monsanto denies the allegations in paragraph 73.
- 74. In response to the allegations in paragraph 74, Monsanto denies that glyphosate or Roundup®-branded products cause cancer. The allegations in paragraph 74 take statements out of context; are vague, misleading, incomplete, and conclusory; and/or comprise attorney characterizations and are accordingly denied.
- 75. In response to the allegations in paragraph 75, Monsanto admits that the IARC working group's classification of glyphosate as a Class 2A carcinogen has resulted in ongoing

remaining allegations in paragraph 76
77. Monsanto admits that,
professionals) of all pesticides (with
as of January 1, 2019, with certain of
paragraph 77.
78. In response to the all
employees of Bermuda's government
glyphosate-based herbicides, but Mon

discussions and/or restrictions in certain countries, including The Netherlands, regarding the sale and/or use of glyphosate-based herbicides, but denies that there is any scientific basis for the concerns raised by the improper IARC classification. The allegations in paragraph 75 constitute conclusions of law for which no response is required or are otherwise vague, misleading, incomplete, and conclusory and/or comprise attorney characterizations — and are accordingly denied.

- 76. In response to the allegations in paragraph 76, Monsanto admits that the IARC working group classification led an individual government attorney in Brazil to write a letter to the Brazilian regulatory authorities requesting a reevaluation of glyphosate. Monsanto denies the remaining allegations in paragraph 76.
- 77. Monsanto admits that, in France, the sale to and use by amateurs (i.e., non-professionals) of all pesticides (with certain exceptions for biocontrol pesticides) are prohibited as of January 1, 2019, with certain exceptions. Monsanto denies the remaining allegations in paragraph 77.
- 78. In response to the allegations in paragraph 78, Monsanto admits that some employees of Bermuda's government announced an intention to suspend the importation of glyphosate-based herbicides, but Monsanto lacks information sufficient to form a belief as to the truth of the allegations about whether this suspension took effect and accordingly denies the same. Monsanto denies the remaining allegations in paragraph 78.
- 79. In response to the allegations in paragraph 79, Monsanto admits that the IARC monograph appears to be the alleged basis for the Sri Lankan government's actions, including the allegation that glyphosate can cause kidney disease. Monsanto further states that the allegations regarding kidney disease found in Sri Lanka are unrelated to plaintiffs' allegations regarding claimed carcinogenicity. Monsanto denies the remaining allegations in paragraph 79.
- 80. In response to the allegations in paragraph 80, Monsanto denies the alleged basis for Colombia's suspension of aerial spraying of glyphosate. Colombia's attorney general has explained that the ban on aerial spraying of illicit coca plantations was a concession to the FARC

("Fuerzas Armadas Revolucionarias de Colombia"), and had nothing to do with alleged safety concerns. As of April 2016, the government of Colombia has resumed manual application of glyphosate on illicit coca crops. A federal district court in the United States excluded plaintiffs' expert testimony purporting to link these same aerial eradication operations with cancer as scientifically unreliable. *See Arias v. DynCorp*, 928 F. Supp. 2d 10 (D.D.C. 2013). Monsanto denies the remaining allegations in paragraph 80.

- 81. In response to the allegations in paragraph 81, Monsanto admits that, on November 12, 2015, the European Food Safety Authority issued its Renewal Assessment Report (RAR) on glyphosate, in which it concluded that "glyphosate is unlikely to pose a carcinogenic hazard to humans." Monsanto further admits that this conclusion affirmed a similar finding by the German Federal Institute for Risk Management (BfR). Monsanto admits that the European scientists who reached these determinations were acting independently of Monsanto and were acting to protect the public.
- 82. In response to the allegations in paragraph 82, Monsanto denies that "industry groups" were afforded any ability to review the RAR beyond that afforded to the public generally. Monsanto otherwise admits the allegations in paragraph 82.
 - 83. Monsanto admits the allegations in paragraph 83.
- 84. In response to the allegations in paragraph 84, Monsanto states that the cited document speaks for itself and does not require a response. Monsanto denies the allegations in paragraph 84 to the extent that they purport to set forth all of the distinctions identified by EFSA between its evaluation and the evaluation of the IARC working group. Monsanto states that in the same document cited by plaintiff, EFSA states that, in contrast to IARC, "the EU peer review concluded that no significant increase in tumour incidence could be observed in any of the treated groups of animals in the nine long term rat studies considered" and explains that "[a]s well as reviewing a larger number of studies [than IARC], EFSA for example considered that

³ See EFSA, Glyphosate: EFSA updates toxicological profile, http://www.efsa.europa.eu/en/press/news/151112.

states that Monsanto lacks information or knowledge sufficient to form a belief as to whether

carcinogenic effects observed at high doses were unreliable as they could be related to general toxicity."⁴ To the extent that paragraph 84 characterizes the meaning of the cited studies, Monsanto denies the remaining allegations in paragraph 84.

- 85. In response to the allegations in paragraph 85, Monsanto states that the cited document speaks for itself and does not require a response.
- 86. In response to the allegations in paragraph 86, Monsanto admits that EFSA set acceptable exposure thresholds for glyphosate that are orders of magnitude higher than those which occur in the ordinary use of glyphosate-based herbicides. Monsanto denies that these exposure thresholds are based upon any alleged risk of carcinogenicity.
- 87. In response to the allegations in paragraph 87, Monsanto admits that certain individuals, including Dr. Christopher Portier, sent the letter identified in paragraph 87 (hereinafter, "the Portier letter"). Monsanto denies that Dr. Portier or the other signatories to his letter are "independent" and "renowned international experts in the field." Monsanto states that Dr. Portier has been disclosed as an expert witness retained by plaintiffs' counsel in the glyphosate cancer litigation against Monsanto and that Monsanto lacks information or knowledge sufficient to form a belief as to whether the other signatories were aware, before they signed the Portier letter, that Dr. Portier was working as a retained expert plaintiffs' counsel. Monsanto otherwise admits that this letter urged the EU Health Commissioner to disregard the scientific findings reached by EFSA and by the BfR.
- 88. In response to the allegations in paragraph 88. Monsanto admits that Dr. Portier sent the letter identified in paragraph 88. Monsanto denies that Dr. Portier or the other signatories to his letter are "renowned international experts in the field." Monsanto admits that certain members of the IARC working group assigned to glyphosate signed on to the Portier letter, but states that Monsanto lacks information or knowledge sufficient to form a belief as to whether

⁴ EFSA, *EFSA Explains Risk Assessment Glyphosate*, http://www.efsa.europa.eu/sites/default/files/comorate_publications/files/efsaexplainsglyphosate151112en.pdf.

those individuals or the other signatories were aware at the time that Dr. Portier was working as a retained expert for plaintiffs' counsel.

89. In response to the allegations in paragraph 89, Monsanto states that the cited Portier letter speaks for itself and does not require a response. Monsanto further admits that Dr. Portier — who has been disclosed as an expert witness retained by plaintiffs' counsel in the glyphosate cancer litigation against Monsanto — seeks in his letter to challenge the scientific conclusions reached by EFSA in support of its finding that "glyphosate is unlikely to pose a carcinogenic hazard to humans." To the extent that paragraph 89 characterizes the meaning of the cited document or of EFSA's evaluation of glyphosate, Monsanto denies the remaining allegations in paragraph 89.

90. In response to the allegations in paragraph 90, Monsanto admits that IARC concluded that the human epidemiologic data provides only "limited evidence of carcinogenicity," which IARC defines as meaning that "chance, bias, or confounding could not be ruled out with reasonable confidence." Monsanto further admits that Dr. Portier — who has been disclosed as an expert witness retained by plaintiffs' counsel in the glyphosate cancer litigation against Monsanto — seeks in his letter to challenge the scientific conclusions reached by EFSA in support of its finding that "glyphosate is unlikely to pose a carcinogenic hazard to humans." In response to the remaining allegations in paragraph 90, Monsanto states that the cited Portier letter speaks for itself and does not require a response. To the extent that paragraph 90 characterizes the meaning of the cited document or of EFSA's evaluation of glyphosate, Monsanto denies the remaining allegations in paragraph 90.

91. In response to the allegations in paragraph 91, Monsanto states that the cited Portier letter speaks for itself and does not require a response. Monsanto further admits that Dr. Portier — who has been disclosed as an expert witness retained by plaintiffs' counsel in the glyphosate cancer litigation against Monsanto — seeks in his letter to challenge the scientific conclusions reached by EFSA in support of its finding that "glyphosate is unlikely to pose a carcinogenic hazard to humans." To the extent that paragraph 91 characterizes the meaning of the cited document or of EFSA's and BfR's evaluation of glyphosate, Monsanto denies the remaining allegations in paragraph 91.

- 92. In response to the allegations in paragraph 92, Monsanto states that the cited Portier letter speaks for itself and does not require a response. Monsanto further admits that Dr. Portier who has been disclosed as an expert witness retained by plaintiffs' counsel in the glyphosate cancer litigation against Monsanto seeks in his letter to challenge the scientific conclusions reached by EFSA in support of its finding that "glyphosate is unlikely to pose a carcinogenic hazard to humans." To the extent that paragraph 92 characterizes the meaning of the cited document or of EFSA's and BfR's evaluation of glyphosate, Monsanto denies the remaining allegations in paragraph 92.
 - 93. Monsanto admit the allegations in paragraph 93.
- 94. In response to the allegations in paragraph 94, Monsanto states that the cited document speaks for itself and does not require a response. Monsanto denies that the self-labeled "consensus statement" represents the view of any consensus of scientific opinion. To the extent that paragraph 94 characterizes the scientific evidence regarding the safety of glyphosate-based herbicides, Monsanto denies the remaining allegations in paragraph 94.

⁸ See EFSA, Glyphosate: EFSA updates toxicological profile, http://www.efsa.europa.eu/en/press/news/151112.

95. In response to the allegations in paragraph 95, Monsanto states that the cite				
document speaks for itself and does not require a response. Monsanto denies that the self-labele				
"consensus statement" represents the view of any consensus of scientific opinion. To the extension				
that paragraph 95 characterizes the scientific evidence regarding the safety of glyphosate-based				
herbicides, Monsanto denies the remaining allegations in paragraph 95.				

- 96. In response to the allegations in paragraph 96, Monsanto states that the cited document speaks for itself and does not require a response. Monsanto denies that the self-labeled "consensus statement" represents the view of any consensus of scientific opinion. To the extent that paragraph 96 characterizes the scientific evidence regarding the safety of glyphosate-based herbicides, Monsanto denies the remaining allegations in paragraph 96.
- 97. In response to the allegations in paragraph 97, Monsanto states that the cited document speaks for itself and does not require a response. Monsanto denies that the self-labeled "consensus statement" represents the view of any consensus of scientific opinion. To the extent that paragraph 97 characterizes the scientific evidence regarding the safety of glyphosate-based herbicides, Monsanto denies the remaining allegations in paragraph 97.
- 98. In response to the allegations in paragraph 98, Monsanto states that the cited document speaks for itself and does not require a response. Monsanto denies that the self-labeled "consensus statement" represents the view of any consensus of scientific opinion. To the extent that paragraph 98 characterizes the scientific evidence regarding the safety of glyphosate-based herbicides, Monsanto denies the remaining allegations in paragraph 98.
- 99. In response to the allegations in paragraph 99, Monsanto states that the cited document speaks for itself and does not require a response. Monsanto denies that the self-labeled "consensus statement" represents the view of any consensus of scientific opinion. To the extent that paragraph 99 characterizes the scientific evidence regarding the safety of glyphosate-based herbicides, Monsanto denies the remaining allegations in paragraph 99.
- 100. In response to the allegations in paragraph 100, Monsanto states that the cited document speaks for itself and does not require a response. Monsanto denies that the self-labeled

"consensus statement" represents the view of any consensus of scientific opinion. To the extent that paragraph 100 characterizes the scientific evidence regarding the safety of glyphosate-based herbicides, Monsanto denies the remaining allegations in paragraph 100.

101. In response to the allegations in paragraph 101, Monsanto admits that the United States Food and Drug Administration ("FDA") has authority to enforce pesticide residues and that the FDA announced it would begin testing certain foods for glyphosate residues. In response to the remaining allegations in paragraph 101, Monsanto states that the cited documents speak for themselves and do not require a response.

102. In response to the allegations in paragraph 102, Monsanto admits that the U.S. Government Accountability Office ("GAO") issued the cited report regarding pesticide residue monitoring programs, but Monsanto denies that the GAO report was limited to glyphosate. In response to the remaining allegations in paragraph 102, Monsanto states that the cited documents speak for themselves and do not require a response. To the extent, that paragraph 102 characterizes the meaning of the cited documents; Monsanto denies the remaining allegations in paragraph 102.

103. In response to the allegations in paragraph 103, Monsanto admits that the FDA has authority to enforce pesticide residues and that the FDA announced it would begin testing certain foods for glyphosate residues. In response to the remaining allegations in paragraph 103, Monsanto states that the cited documents speak for themselves and do not require a response. To the extent that paragraph 103 characterizes the meaning of the cited documents, Monsanto denies the remaining allegations in paragraph 103.

104. In response to the allegations in paragraph 104, Monsanto admits that the FDA has authority to enforce pesticide residues and that the FDA announced it would begin testing certain foods for glyphosate residues. In response to the remaining allegations in paragraph 104, Monsanto states that the cited documents speak for themselves and do not require a response. To the extent, that paragraph 104 characterizes the meaning of the cited documents; Monsanto denies the remaining allegations in paragraph 104.

105. Monsanto admits the allegations in paragraph 105. Monsanto also states that the allegations are out of date and that the European Union has approved glyphosate for another five years.

106. In response to the allegations in paragraph 106, Monsanto states that the cited document speaks for itself and does not require a response. Monsanto also states that the allegations are out of date and that the European Union has approved glyphosate for another five years.

107. In response to the allegations in paragraph 107, Monsanto lacks information or knowledge sufficient to form a belief as to whether each of the individuals at the referenced meeting were "experts" and therefore denies that allegation. Monsanto admits the remaining allegations in paragraph 107. Monsanto also states that the allegations are out of date and that the European Union has approved glyphosate for another five years.

108. In response to the allegations in paragraph 108, Monsanto states that the cited document speaks for itself and does not require a response. To the extent, that paragraph 108 characterizes the meaning of the cited document; Monsanto denies the remaining allegations in paragraph 108.

109. In response to the allegations in paragraph 109, Monsanto states that the cited document speaks for itself and does not require a response. To the extent that paragraph 109 characterizes the meaning of the cited document, Monsanto denies the remaining allegations in paragraph 109. Monsanto also states that the allegations are out of date and that the European Union has approved glyphosate for another five years.

110. Monsanto admits the allegations in paragraph 110. Monsanto also states that the allegations are out of date and that the European Union has approved glyphosate for another five years.

111. Monsanto admits the allegations in paragraph 111. Monsanto also states that the allegations are out of date and that the European Union has approved glyphosate for another five years.

- 112. Monsanto admits the allegations in paragraph 112.
- 113. In response to the allegations in paragraph 113, Monsanto admits that the EU voted to extend the glyphosate license for five more years. In response to the remaining allegations in paragraph 113, Monsanto states that the cited document speaks for itself and does not require a response.
- 114. In response to the allegations in paragraph 114, Monsanto admits that plaintiff purports to bring the described action for damages allegedly related to exposure to Roundup®-branded products but denies any liability to plaintiff.
- 115. In response to the allegations in paragraph 115, Monsanto admits that plaintiff purports to seek damages as described but denies any liability to plaintiff.
- 116. Monsanto incorporates by reference its responses to paragraphs 1 through 115 in response to paragraph 116 of plaintiff's Complaint.
- 117. In response to the allegations in paragraph 117, Monsanto admits that plaintiff purports to bring claims for strict liability but denies any liability to plaintiff.
 - 118. Monsanto denies the allegations in paragraph 118.
- 119. Monsanto lacks information or knowledge sufficient to form a belief as to the truth of the allegations in paragraph 119 and therefore denies those allegations.
 - 120. Monsanto denies the allegations in paragraph 120.
- 121. Monsanto lacks information or knowledge sufficient to form a belief as to the truth of the allegations in paragraph 121 and therefore denies those allegations.
 - 122. Monsanto denies the allegations in paragraph 122.
 - 123. Monsanto denies the allegations in paragraph 123.
 - 124. Monsanto denies the allegations in paragraph 124.
 - 125. Monsanto denies the allegations in paragraph 125, including each of its subparts.
- 126. Monsanto lacks information or knowledge sufficient to form a belief as to the truth of the allegations in paragraph 126 regarding decedent's claimed use of and/or exposure to Roundup®-branded products and therefore denies those allegations. Monsanto denies the

- 25 -

- 196. The allegations in paragraph 196 are vague and conclusory and comprise attorney characterizations and are accordingly denied.
 - 197. Monsanto denies the allegations in paragraph 197.
 - 198. Monsanto denies the allegations in paragraph 198.
- 199. The allegations in paragraph 199 set forth conclusions of law for which no response is required.
- 200. The allegations in paragraph 200 set forth conclusions of law for which no response is required.
 - 201. Monsanto denies the allegations in paragraph 201, including each of its subparts.
 - 202. Monsanto denies the allegations in paragraph 202.
- 203. In response to the allegations in paragraph 203, Monsanto admits that plaintiff purports to bring the described action for damages allegedly related to exposure to Roundup®-branded products but denies any liability to plaintiff.
- 204. In response to the allegations in paragraph 204, Monsanto admits that plaintiff purports to seek damages as described but denies any liability to plaintiff.
- 205. In response to the allegations in paragraph 205, Monsanto admits that plaintiff purports to seek the relief described but denies any that plaintiff is entitled to any relief.

Every allegation in the Complaint that is not specifically and expressly admitted in this Answer is hereby specifically and expressly denied.

SEPARATE AND AFFIRMATIVE DEFENSES

- 1. The Complaint, in whole or part, fails to state a claim or cause of action upon which relief can be granted.
- 2. Plaintiff's claims are barred because plaintiff cannot proffer any scientifically reliable evidence that the products at issue were defective or unreasonably dangerous.

- 3. Any alleged negligent or culpable conduct of Monsanto, none being admitted, was so insubstantial as to be insufficient to be a proximate or substantial contributing cause of plaintiff's and/or decedent's alleged injuries.
- 4. Plaintiff's claims are barred, in whole or in part, because the products at issue were designed, manufactured, marketed and labeled with proper warnings, information, cautions and instructions, in accordance with the state of the art and the state of scientific and technological knowledge.
- 5. Plaintiff's claims are barred, in whole or in part, because the products at issue were not defective or unreasonably dangerous in that they complied with, at all relevant times, all applicable government safety standards.
- 6. Any claims based on allegations that Monsanto misled, defrauded, made misrepresentations to, or withheld information from U.S. EPA are preempted by federal law. *See, e.g., Buckman Co. v. Plaintiffs' Legal Comm.*, 531 U.S. 341 (2001); *Nathan Kimmel, Inc. v. Dowelanco*, 275 F.3d 1199 (9th Cir. 2002).
- 7. Plaintiff's claims are preempted, in whole or in part, by applicable federal law relating to the design, testing, producing, manufacturing, labeling, distributing, modeling, processing, and supply of Roundup®-branded products and/or glyphosate-containing products.
- 8. Plaintiff's claims are preempted, in whole or in part, because of U.S. EPA findings that glyphosate does not cause cancer in humans and/or because of U.S. EPA-approved product labeling.
- 9. Plaintiff's claims are barred, in whole or in part, by the doctrine of primary jurisdiction, including by the authority delegated by Congress to the U.S. EPA.
- 10. Plaintiff's claims are barred, in whole or in part, because plaintiff's and/or decedent's injuries, if any, were the result of conduct of plaintiff, independent third parties, and/or events that were extraordinary under the circumstances, not foreseeable in the normal course of events, and/or independent, intervening and superseding causes of the alleged injuries, including but not limited to plaintiff's and/or decedent's pre-existing medical conditions.

- 11. The doctrines contained in Restatement (Second) of Torts § 402A, comments j and k, bar plaintiff's claims against Monsanto in whole or in part.
- 12. Applicable statutes of limitations and/or repose bar plaintiff's claims in whole or in part.
- 13. Plaintiff's and/or decedent's misuse or abnormal use of the product or failure to follow instructions bar plaintiff's claims in whole or in part.
- 14. If plaintiff and/or decedent suffered injuries or damages as alleged, which is denied, such injuries or damage resulted from: (a) acts or omissions of persons or entities for which Monsanto is neither liable nor responsible or, in the alternative, Monsanto is entitled to an assessment of the relative degree of fault of all such persons and entities; or (b) resulted from diseases and/or causes that are not related or connected with any product sold, distributed, or manufactured by Monsanto. Such acts or omissions on the part of others or diseases or causes constitute an independent, intervening and sole proximate cause of plaintiff's and/or decedent's alleged injuries or damages.
- 15. Monsanto had no legal relationship or privity with plaintiff and owed no duty to plaintiff and/or decedent by which liability could be attributed to it.
- 16. Monsanto made no warranties of any kind or any representations of any nature whatsoever to plaintiff. If any such warranties were made, which Monsanto specifically denies, then plaintiff and/or decedent failed to give notice of any breach thereof.
- 17. Plaintiff's claims are preempted or otherwise barred in whole or in part by the Freedom of Speech Clause of the First Amendment of the U.S. Constitution.
- 18. Plaintiff's claims are barred in whole or in part by plaintiff's and/or decedent's own contributory/comparative negligence.
- 19. Plaintiff's claims are barred in whole or in part by plaintiff's and/or decedent's own failure to mitigate damages.
 - 20. Plaintiff's claims are barred in whole or in part by the sophisticated user doctrine.

- 21. Plaintiff's recovery, if any, shall be reduced by those payments that plaintiff receives from collateral sources.
- 22. If plaintiff has been injured or damaged, no injuries or damages being admitted, such injuries were not caused by a Monsanto product.
- 23. Plaintiff's claims are barred to the extent that plaintiff seeks relief under the laws of states that do not govern plaintiff's claims.
- 24. Plaintiff's claims are barred or limited to the extent that plaintiff asserts claims that are governed by the laws of a state that does not recognize, or limits, such claims.
- 25. To the extent that plaintiff recovered payments for their alleged injuries from any collateral source(s) or other source(s), plaintiff's recovery in this lawsuit, if any, shall be reduced to the extent allowed by applicable law.
- If plaintiff and/or decedent have been injured or damaged, no injury or damages being admitted, plaintiff's claims for damages are limited by M.D. Cts. & Jud. Proc. § 11-108.
- 27. Monsanto hereby gives notice that it intends to rely upon such other defenses as may become available or apparent during the course of discovery and thus reserves its right to amend this Answer to assert such defenses.

WHEREFORE, Defendant Monsanto demands judgment in its favor and against plaintiff, dismissing plaintiff's Complaint with prejudice, together with the costs of suit and such other relief as the Court deems equitable and just.

JURY TRIAL DEMAND

Monsanto demands a jury trial on all issues so triable.

27
