PROTECTION AGENCY, and the
UNITED STATES ENVIRONMENTAL
PROTECTION AGENCY,

Defendants.

No. 4:20-cv-4869-KAW

**NOTICE OF MOTION AND MOTION TO
INTERVENE BY THE STATES OF
LOUISIANA, MONTANA, ARKANSAS,
MISSISSIPPI, MISSOURI, TEXAS, WEST
VIRGINIA, AND WYOMING**

Hr'g Date: Oct. 15, 2020
Hr'g Time: 1:30 p.m.
Judge: Hon. Kandis Westmore
Action Filed: July 21, 2020
Dep't: Oakland Courthouse

1 **TO ALL PARTIES AND THEIR ATTORNEYS OF RECORD:**

2 **PLEASE TAKE NOTICE** that Pursuant to Local Rule 7-1(b), the States of Louisiana,
3 Montana, Arkansas, Mississippi, Missouri, Texas, West Virginia, and Wyoming (collectively, “State
4 Intervenors”) respectfully move to intervene as Defendants in the above-captioned litigation without
5 oral argument. Alternatively, the State Intervenors notice that on October 15, 2020, at 1:30 p.m.,
6 before the presiding district judge or the Hon. Kandis Westmore, 1301 Clay Street, Oakland,
7 California, or as soon thereafter as the Court may order, the State Intervenors will and do hereby
8 move for the same relief.

9 This motion is brought pursuant to Federal Rule of Civil Procedure 24. As more fully set
10 forth in the accompanying memorandum, the grounds for the motion are: (a) the motion is timely;
11 (b) the State Intervenors have significant protectable interests, both as sovereigns and as advocates
12 for the challenged rule; (c) the disposition of this action could impede the State Intervenors’ ability to
13 protect those interests; (d) the current parties do not adequately represent the interests of the State
14 Intervenors; and (e) the State Intervenors’ position in support of the revised regulations plainly
15 involves common questions of law and fact with this action, and their direct opposition to Plaintiffs’
16 claims satisfies the “common question” requirement for permissive intervention. This motion is
17 based on this motion and the supporting memorandum below; the accompanying Declaration of
18 Joseph S. St. John; and any further papers filed in support of this motion, the argument of counsel,
19 and all pleadings and records on file in this matter.

20 **PLEASE TAKE FURTHER NOTICE** that counsel for Louisiana contacted counsel for
21 the parties on August 20, 2020. Both Plaintiffs and the United States take no position on this motion.

22 **PLEASE TAKE FURTHER NOTICE** that State Intervenors’ proposed answer is
23 attached.

1 **MEMORANDUM IN SUPPORT**

2 **BACKGROUND**

3 THE CLEAN WATER ACT

4 Since 1970, “[a]ny applicant for a Federal license or permit to conduct any activity . . . which
5 may result in any discharge into the navigable waters . . . shall provide the licensing or permitting
6 agency a certification from the State in which the discharge originates or will originate” Water
7 Quality Improvement Act of 1970, Pub. L. 91-224, 84 Stat. 91, 108 (Apr. 3, 1970). In 1972, Congress
8 enacted a “total restructuring” and “complete rewriting” of the nation’s water pollution control laws,
9 including the provision requiring certification. *City of Milwaukee v. Illinois*, 451 U.S. 304, 317 (1981)
10 (quoting legislative history); *see also* Federal Water Pollution Control Act Amendments of 1972, Pub.
11 L. 92-500, 86 Stat. 816, 877 (Oct. 16, 1972) (codified at 33 U.S.C. § 1341). Of particular relevance
12 here, Congress narrowed the requirement from a certification “that such *activity* will be conducted in a
13 manner which will not violate applicable *water quality standards*,” 84 Stat. at 108 (emphasis added), to a
14 certification only “that any such *discharge* will comply with *the applicable provisions of sections 301, 302,*
15 *306, and 307 of this Act*,” 86 Stat. at 877 (emphasis added).

16 CERTAIN STATES ABUSE THEIR 401 CERTIFICATION AUTHORITY

17 Despite the statutory change, the Environmental Protection Agency (“EPA”) failed to revise
18 the regulations governing the required certification, which is known as a 401 Certification. As a
19 result, EPA’s regulations were incongruent with the new statutory language. *Cf.* NPDES; Revision of
20 Regulations, 44 Fed. Reg. 32,854, 32,856 (June 7, 1979) (indicating need for updated certification
21 rules). Certain states began using the incongruity and ambiguities in EPA’s regulations to abuse their
22 certification authority for the purpose of delaying or denying certifications on non-water quality
23 grounds. In February 2019, Louisiana and other State Intervenors wrote to EPA Administrator
24 Wheeler about that abuse and requested that EPA “clarify[y] . . . the process by which federal and
25 state regulatory authorities are expected to implement [Section 401].” Exh. 1. That weighty request
26 was bolstered when, on April 10, 2019, the President issued an Executive Order noting that
27 “[o]utdated Federal guidance and regulations regarding section 401 of the Clean Water Act . . . are
28 causing confusion and uncertainty and are hindering the development of energy infrastructure.” EO

1 13868, 84 Fed. Reg. 15,494 (Apr. 15, 2019). The President directed Administrator Wheeler to review
2 EPA's Section 401 regulations, "determine whether any provisions thereof should be clarified," and
3 "publish for notice and comment proposed rules revising such regulations, as appropriate and
4 consistent with law." *Id.* Louisiana and other Intervenor States then submitted additional comments
5 in response to EPA's request for Pre-Proposal Stakeholder Engagement. Exhs. 2, 7.

6 Louisiana identified the State of Washington's denial of certification for a proposed coal
7 facility, the Millennium Bulk Terminal, as a paradigmatic example of abuse. Exh. 1. The Governor of
8 Wyoming later explained:

9 Wyoming has been adversely impacted by the misapplication of other states' CWA
10 Section 401 certifications. Our interest in a streamlined 401 certification process is
11 founded by the fact that a large portion of Wyoming's economy depends on our
12 ability to export our energy products to the markets that demand them, particularly
13 markets located overseas in Asia. In the case of the Millennium Bulk Terminal,
14 Washington State blocked the terminal's construction by inappropriately denying the
15 State's Section 401 certification on account of non-water quality related impacts -- an
16 illegal maneuver based on alleged effects that are outside of the scope of Section 401.

17 Exh. 4. The permit applicant for the proposed Millennium Bulk Terminal elaborated:

18 Millennium sought a Clean Water Act, Section 401 water quality certification from the
19 Washington Department of Ecology ("Washington Ecology") for nearly six years. As
20 part of the 401 certification process, Millennium has spent over \$15 million to obtain
21 an environmental impact statement ("EIS"), which originally began as a dual EIS
22 under the National Environmental Policy Act ("NEPA") and the Washington State
23 Environmental Policy Act ("SEPA"), with the US Army Corps of Engineers as the
24 lead agency under NEPA and with the Washington Ecology and Cowlitz County as
25 co-lead agencies under SEPA. In September 2013, the state and federal agencies
26 agreed to separate and prepare both a federal EIS and a state EIS.

27 The state EIS concluded with respect to the Project that **"There would be no
28 unavoidable and significant adverse environmental impacts on water quality."**

29 * * * * *

30 Washington Governor Jay Inslee, and others in his administration, including
31 Washington Ecology Director Bellon, have expressed their belief that no fossil fuel
32 infrastructure projects should ever be built in the State of Washington. Denying
33 Millennium's 401 water quality certification was the way that they could impose their
34 own personal policy preferences to ensure that no permits would be issued for the
35 Project and they could stop sister states from exporting their products into foreign
36 commerce.

37 Exh. 8.

38 Other comments and judicial opinions make clear the Millennium Bulk Terminal denial was
not an isolated abuse. *See, e.g.*, Exh. 9. Indeed, the State of Maryland went so far as to seek a multi-

1 billion dollar “payment-in lieu” of imposing unachievable conditions unrelated to the discharge for
2 which certification was sought – a demand that would ordinarily be considered extortion and which
3 raises constitutional concerns. Ex. 10; *Nollan v. Cal. Coastal Comm’n*, 483 U.S. 825 (1987). The Federal
4 Energy Regulatory Commission bluntly summarized the status quo: “[I]t is now commonplace for
5 states to use Section 401 to hold federal licensing hostage.” *Hoopa Valley Tribe v. FERC*, 913 F.3d
6 1099, 1104 (D.C. Cir. 2019).

7 EPA ADOPTS A RULE TO ELIMINATE AMBIGUITY AND ABUSE

8 Citing the April 2019 Executive Order and Pre-Proposal Stakeholder Engagement, EPA
9 published a proposed rule, Updating Regulations on Water Quality Certification, 84 Fed. Reg. 44,080
10 (Aug. 22, 2019), to, *inter alia*, limit the scope of 401 certification to water quality impacts from the
11 discharge associated with the licensed or permitted project; interpret “receipt” and “certification
12 request” as used in the CWA; reaffirm that certifying authorities are required by the CWA to act on a
13 request for certification within a reasonable period of time, which shall not exceed one year; and
14 specify the contents and effect of a certification or denial. Despite the short text of the proposed rule
15 itself—less than four *Federal Register* pages—EPA provided a lengthy statutory and legal analysis.

16 Louisiana, joined by other states, provided extensive comments in support of the proposed
17 rule. Exhs. 1-3. The Governor of Wyoming even testified before the Senate Committee on the
18 Environment and Public Works in support of EPA’s rule and parallel Congressional action.
19 Thereafter, EPA published the final rule, Clean Water Act Section 401 Certification Rule, 85 Fed.
20 Reg. 42210 (July 13, 2020). Plaintiffs filed their 32-page complaint a mere eight days later. Louisiana,
21 Arkansas, Mississippi, Missouri, Montana, Texas, West Virginia, and Wyoming (collectively, “State
22 Intervenors”) now timely move to intervene in defense of the final rule.

23 LEGAL STANDARDS

24 With respect to intervention as of right, “[o]n timely motion, the court must permit anyone to
25 intervene who: (1) is given an unconditional right to intervene by a federal statute; or (2) claims an
26 interest relating to the property or transaction that is the subject of the action, and is so situated that
27 disposing of the action may as a practical matter impair or impede the movant’s ability to protect its
28 interest, unless existing parties adequately represent that interest.” Fed. R. Civ. P. 24(a). “An applicant

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
