

**BEFORE THE UNITED STATES JUDICIAL PANEL
ON MULTIDISTRICT LITIGATION**

**IN RE: SOCIAL MEDIA ADOLESCENT
ADDICTION/PERSONAL INJURY
PRODUCT LIABILITY LITIGATION**

MDL DOCKET NO.: _____

**MOTION FOR TRANSFER AND COORDINATION OR
CONSOLIDATION UNDER 28 U.S.C. § 1407**

Pursuant to 28 U.S.C. § 1407 and Rule 6.2 of the Rules of Procedure of the Judicial Panel on Multidistrict Litigation, Movant-Plaintiff Brianna Murden respectfully asks the Judicial Panel on Multidistrict Litigation (“Panel”) to transfer the “Schedule of Actions,” and subsequent tag-along actions, to the Northern District of Illinois or the Western District of Missouri.

1. Defendants Meta Platforms, Inc., Facebook Holdings, LLC, Facebook Operations, LLC, Facebook Payments, Inc., Facebook Technologies, LLC, Instagram LLC, and Siculus, Inc. (collectively, “Defendants”) operate the world’s largest family of social networks.¹

2. The complaints in the Schedule of Actions allege similar claims of product liability, negligence, misrepresentation, fraud, unjust enrichment, breach of warranty, and infliction of emotional distress against Defendants resulting from the design and operation of their two largest products, Facebook and Instagram. Specifically, Plaintiffs allege that Defendants’ social media products are intentionally designed to be addictive and utilize sophisticated algorithms, and other defectively designed and unreasonably dangerous features, to maximize user time and engagement

¹ Other filed cases also name Defendants Snap, Inc., TikTok, Inc., and ByteDance, Inc. These Defendants operate the social media platforms “Snapchat” and “TikTok” and similarly use defectively designed features resulting in youth addiction and other injuries. The complaints naming these two Defendants allege similar facts and injuries associated with adolescent use of these products.

to maximize profits. This design is employed regardless of a user's age and recognized dangers associated with the use of such features on social media products.

3. From the beginning, Facebook and Instagram have exploited vulnerabilities in human psychology to addict users and maximize user time and engagement. Facebook's first President, Sean Parker, summed up the devastating impact of Facebook and Instagram's designs in a 2017 interview:

“God only knows what it's doing to our children's brains. The thought process that went into building these applications, Facebook being the first of them, ... was all about: 'How do we consume as much of your time and conscious attention as possible?' And that means that we need to sort of give you a little dopamine hit every once in a while, because someone liked or commented on a photo or a post or whatever. And that's going to get you to contribute more content, and that's going to get you ... more likes and comments. It's a social-validation feedback loop ... exactly the kind of thing that a hacker like myself would come up with, because you're exploiting a vulnerability in human psychology. The inventors, creators — it's me, it's Mark [Zuckerberg], it's Kevin Systrom on Instagram, it's all of these people — understood this consciously. And we did it anyway.”²

4. Plaintiffs seek to hold Defendants' accountable for the devastating fallout from exploiting adolescent users during their formative years while in a state of increased fragility. Adolescent females are disproportionately negatively affected by Defendants' products, as shown by the overwhelmingly female Plaintiff population to date.³

5. Defendants have publicly downplayed their products' negative impact on youth. However, leaked internal company documents from former Facebook employee and “whistleblower”, Francesca Haugen, reveal that Defendants are aware of the disproportionate impact its products have on youth, especially adolescent females. One internal study found that

² Mike Allen, *Sean Parker unloads on Facebook: “God only knows what it's doing to our children's brains”*, Axios (November 9, 2017), <https://www.axios.com/2017/12/15/sean-parker-unloads-on-facebook-god-only-knows-what-its-doing-to-our-childrens-brains-1513306792>.

³ Female clients represent 14 of 17 cases filed by the undersigned counsel. Additionally, 7 of the 10 federal cases filed by the Social Media Victims Law Center are female Plaintiffs.

“Thirty-two percent of teen girls said that when they felt bad about their bodies, Instagram made them feel worse.”⁴ The same study found that “[c]omparisons on Instagram can change how young women view and describe themselves.”⁵ Defendants have also found that “social comparison is worse on Instagram”, compared to other social media apps.⁶ As early as 2019, Defendants recognized that they “make body image issues worse for one in three teen girls.”⁷

6. Additionally, internal studies revealed that “teens blame Instagram for increases in the rate of anxiety and depression.”⁸ Among teens who reported suicidal thoughts, 13% of British users and 6% of American users traced the desire to kill themselves to Instagram, one presentation showed.⁹ One in five teens say that Instagram makes them feel worse about themselves, and teens who struggle with mental health say Instagram makes it worse.¹⁰

7. Internal research indicates that the design of Defendants’ products is what is most harmful to teens. “A pressure to look perfect and an addictive product can send teens spiraling toward eating disorders, an unhealthy sense of their own bodies and depression, March 2020 internal research states. It warns that the Explore page, which serves users photos and videos curated by an algorithm, can send users deep into content that can be harmful.”¹¹ According to Defendants’ research, “aspects of Instagram exacerbate each other to create a perfect storm.”¹²

8. Plaintiffs’ common allegations against Defendants include:

⁵ *Id.*

⁶ *Id.*

⁷ *Id.*

⁸ *Id.*

⁹ *Id.*

¹⁰ *Id.*

¹¹ *Id.*

¹² *Id.*

- a. Facebook and Instagram were designed by Defendants, to be unreasonably dangerous and addictive to users, particularly adolescents;
- b. Defendants failed to warn adolescent users and their parents about risks posed by the addictive platforms or that there was even a risk of addiction;
- c. Defendants failed to warn adolescent users and their parents about the risks of causing body dysmorphic disorder and disordered eating posed by the platforms;
- d. Defendants failed to make accurate and truthful representations to Plaintiff and the general public regarding the nature of the Facebook and Instagram products;
- e. Defendants were unjustly enriched from consumers use of the products, at the expense of users' physical and mental well-being;
- f. Defendants engaged in unfair and deceptive acts and trade practices in the design, development, manufacture, marketing and dissemination of the Facebook and Instagram products; and
- g. Defendants failed to recall or retrofit the Facebook and Instagram products, despite knowing of the serious risks the platforms pose to adolescent consumers and the public.

9. The common injuries contained within the complaints in the Schedule of Actions include but are not limited to: (a) multiple periods of suicidal ideation, (b) self-harm, (c) disordered eating, (d) body dysmorphic disorder, (e) severe anxiety, (f) depression, (g) a reduced inclination or ability to sleep, among other harmful effects, which may cause or contribute to additional disease, (h) medical expenses, and (i) other economic and non-economic damages.

10. There are millions of adolescents who use Instagram and Facebook and spend hours on these platforms every day.¹³

11. To date, twenty-seven (27) additional actions seeking similar relief in federal court have been filed. (*See* Schedule of Actions at Exhibit “A” of Brief in Support). In total, there are twenty-eight (28) actions pending in seventeen (17) different districts throughout the country. Currently, counsel represents over 400 clients prepared to bring similar claims against Defendants.

12. Because of the millions of adolescents impacted by Defendants’ conduct and the growing awareness of Defendants’ conduct and resulting harms revealed by Facebook “whistleblower” Francesca Haugen, the undersigned anticipates a substantial number of similar cases in the coming months and years. Further, the undersigned is in communication with attorneys throughout the country who are investigating similar claims, thus increasing the likelihood of additional case filings.

13. The complaints within the Schedule of Actions, and any additional tag-along actions, pending against Defendants will involve similar if not identical questions of fact and will involve common discovery and pretrial motion practice. Accordingly, inconsistent pretrial rulings could occur if the cases are not transferred for coordinated or consolidated proceedings pursuant to 28 U.S.C. § 1407.

14. Movant-Plaintiff seeks to create an MDL with respect to Defendants’ defective design and operation of the Facebook and Instagram products as they relate to adolescent users. As detailed in the accompanying Brief, centralization will help eliminate inconsistent rulings, curtail duplicative discovery, and conserve judicial resources.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
