

IN THE UNITED STATES DISTRICT COURT
FOR THE DISTRICT OF DELAWARE

SK INNOVATION CO., LTD.,

Plaintiff,

v.

LG CHEM, LTD., LG CHEM MICHIGAN
INC., AND LG ELECTRONICS., INC.,

Defendants.

C.A. No. 19-1637-CFC

LG CHEM, LTD., LG CHEM MICHIGAN,
INC.,

Counterclaim Plaintiffs,

v.

SK INNOVATION CO., LTD.,

Counterclaim Defendant.

~~PROPOSED~~ SCHEDULING ORDER

This 13th day of January, 2020, the Court having conducted an initial Rule 16(b) scheduling conference pursuant to Local Rule 16.1(b), and the parties having determined after discussion that the matter cannot be resolved at this juncture by settlement, voluntary mediation, or binding arbitration:

IT IS ORDERED THAT:

1. Relevant Deadlines and Dates. All relevant deadlines and dates established by this Order are set forth in the chart attached as Exhibit A.

2. Rule 26(a)(1) Initial Disclosures. The parties shall make their initial disclosures required by Federal Rule of Civil Procedure 26(a)(1) on January 24, 2020.

3. Disclosure of Asserted Claims and Infringement Contentions. A party claiming patent infringement shall serve on all parties a “Disclosure of Asserted Claims and Infringement Contentions” on February 21, 2020. Separately for each opposing party, the “Disclosure of Asserted Claims and Infringement Contentions” shall contain the following information:

(a) Each claim of each asserted patent that is allegedly infringed by each opposing party, including for each claim the applicable statutory subsections of 35 U.S.C. § 271 asserted;

(b) Separately for each asserted claim, each accused apparatus, product, device, process, method, act, or other instrumentality (“Accused Instrumentality”) of each opposing party of which the party is aware. This identification shall be as specific as possible. Each product, device, and apparatus shall be identified by name or model number, if known. Each method or process shall be identified by name, if known, or by any product, device, or apparatus which, when used, allegedly results in the practice of the claimed method or process;

(c) A chart identifying specifically where and how each limitation of each asserted claim is found within each Accused Instrumentality, including for each limitation that such party contends is governed by 35 U.S.C. § 112(f), the identity of the structure(s), act(s), or material(s) in the Accused Instrumentality that performs the claimed function;

(d) For each claim alleged to have been indirectly infringed, an identification of any direct infringement and a description of the acts of the alleged

indirect infringer that contribute to or are inducing that direct infringement. Insofar as alleged direct infringement is based on joint acts of multiple parties, the role of each such party in the direct infringement must be described;

(e) Whether each limitation of each asserted claim is alleged to be present literally or under the doctrine of equivalents in the Accused Instrumentality;

(f) For any patent that claims priority to an earlier application, the priority date to which each asserted claim is alleged to be entitled;

(g) If a party claiming patent infringement wishes to preserve the right to rely, for any purpose, on the assertion that its own or its licensee's apparatus, product, device, process, method, act, or other instrumentality practices the claimed invention, the party shall identify, separately for each asserted claim, each such apparatus, product, device, process, method, act, or other instrumentality that incorporates or reflects that particular claim;

(h) The timing of the point of first infringement, the start of claimed damages, and the end of claimed damages; and

(i) If a party claiming patent infringement alleges willful infringement, the basis for such allegation.

4. Document Production Accompanying Disclosure of Asserted Claims and Infringement Contentions. With the "Disclosure of Asserted Claims and Infringement Contentions," the party claiming patent infringement shall produce to each opposing party or make available for inspection and copying:

(a) Documents (e.g., contracts, purchase orders, invoices, advertisements, marketing materials, offer letters, beta site testing agreements, and

third party or joint development agreements) sufficient to evidence each discussion with, disclosure to, or other manner of providing to a third party, or sale of or offer to sell, or any public use of, the claimed invention prior to the date of application for the asserted patent(s);

(b) All documents evidencing the conception, reduction to practice, design, and development of each claimed invention, which were created on or before the date of application for the asserted patent(s) or the priority date identified pursuant to paragraph 3(f) of this Order, whichever is earlier;

(c) A copy of the file history for each asserted patent;

(d) All documents evidencing ownership of the patent rights by the party asserting patent infringement;

(e) If a party identifies instrumentalities pursuant to paragraph 3(g) of this Order, documents sufficient to show the operation of any aspects or elements of such instrumentalities the patent claimant relies upon as embodying any asserted claims;

(f) All agreements, including licenses, transferring an interest in any asserted patent;

(g) All agreements that the party asserting infringement contends are comparable to a license that would result from a hypothetical reasonable royalty negotiation;

(h) All agreements that otherwise may be used to support the party asserting infringement's damages case;

(i) If a party identifies instrumentalities pursuant to paragraph 3(g) of this Order, documents sufficient to show marking of such embodying accused instrumentalities; and if the party wants to preserve the right to recover lost profits based on such products, the sales, revenues, costs, and profits of such embodying accused instrumentalities; and

(j) All documents comprising or reflecting a F/RAND commitment or agreement with respect to the asserted patent(s).

The producing party shall separately identify by production number the documents that correspond to each category set forth in this paragraph. A party's production of a document as required by this paragraph shall not constitute an admission that such document evidences or is prior art under 35 U.S.C. § 102.

5. Invalidity Contentions. On April 10, 2020, each party opposing a claim of patent infringement shall serve on all parties its "Invalidity Contentions," which shall contain the following information:

(a) The identity of each item of prior art that the party alleges anticipates each asserted claim or renders the claim obvious. Each prior art patent shall be identified by its number, country of origin, and date of issue. Each prior art publication shall be identified by its title, date of publication, and, where feasible, author and publisher. Each alleged sale or public use shall be identified by specifying the item offered for sale or publicly used or known, the date the offer or use took place or the information became known, and the identity of the person or entity which made the use or which made and received the offer, or the person or entity which made the information known or to whom it was made known.
