**Re: Approval to Construct LNG Rundown Line Connection Point Design
Modification**

Dear Ms. Francis:

I grant your October 10, 2017 request for Elba Liquefaction Company, L.L.C. and Southern LNG Company, L.L.C. (collectively referred to as “Companies”) to proceed with construction of the LNG rundown line connection point design modification. The information filed is consistent with Environmental Conditions 1, 41, 42, 57, and 61 of the Commission’s June 1, 2016 *Order Granting Section 3 and Section 7 Authorizations* (Order) in the above-referenced docket. This approval is based on review of the information filed on October 10, 19, and 30, and November 28, 2017 and March 21, 2018.

I remind you that the Companies must comply with all applicable remaining terms and conditions of the above referenced Order, as well as procedures stipulated in your previous filings. We also note that the Companies must also comply with any applicable Department of Transportation requirements under 49 CFR 193 and U.S. Coast Guard requirements under 33 CFR 127 and 33 CFR 105.

Please note that this approval does not grant the Companies the authority to commence construction of other project facilities at the LNG terminal. Additional authorizations will be released once the Companies have demonstrated full compliance

with the conditions of the Order. If you have any questions regarding this approval, please contact Karla Bathrick at (202) 502-6328.

Sincerely,

Hugh Thomas
Chief, LNG Branch 2
