Basis for Intervening:

Concerns about repurposing an old pipeline. Reversing flow and changing from fuel oil to natural gas and related hydrocarbons. We have 9 pipelines running through our densely populated township. NGLs are "related hydrocarbons" Once this line is repurposed we are concerned that NGLs could flow and we also think Adelphia could use the new easement agreements to add more pipelines. We have reached the point of pipeline saturation in our community. There is no shortage of natural gas in our region so the need for this pipeline repurposing cannot meet the requirement to demonstrate "need".
