Basis for Intervening:

Neptune Regional Transmission System, LLC ("Neptune") respectfully moves to intervene in this proceeding. The Neptune Line is a High Voltage Direct Current ("HVDC") merchant transmission facility that is owned by Neptune and is under the operational control of PJM Interconnection, L.L.C. ("PJM"). The Neptune Line is interconnected to both PJM and the New York Independent System Operator, Inc. transmission systems. Neptune is a PJM Transmission Owner under the PJM Tariff. As a PJM Transmission Owner, Neptune pays the costs of PJM transmission facilities through Schedule 12 of the PJM Tariff, and the PJM Border Rate. Therefore, Neptune has a direct and substantial interest in the outcome of this proceeding, and stands to be directly affected by the outcome of this proceeding. Accordingly Neptune cannot be adequately represented by any other party in this proceeding and Neptune requests leave to intervene in this proceeding.
