## 1 Executive Summary

ARCADIS of New York, Inc. (ARCADIS) was retained by PB Americas, Inc. to conduct a Phase I Environmental Site Assessment (ESA) of portions of the north and south banks along an approximate 4-mile stretch of the Grasse River located in the Village of Massena, St. Lawrence County, New York (the Site). Specifically, the Phase I ESA was conducted over bank areas along the north shore between elevation 178 feet mean sea level (msl) and 186 feet msl from the proposed hydroelectric dam upstream to the Main Street Bridge (Mile 8) and along both shores between elevation 178 feet msl and 187 feet msl from the Main Street Bridge (Mile 8) up to the Route 37 Bridge (just below Mile 10). The project proposed at the Site is referred to by PB Americas, Inc. as the Massena Electric Department (MED) Hydroelectric Project.

The Phase I ESA was conducted in general accordance with the American Society for Testing and Materials (ASTM) E 1527-05 *Standard Practice for Site Assessments: Phase I Environmental Site Assessment Process*. The goal of the Phase I ESA was to identify recognized environmental conditions (RECs) and historical recognized environmental conditions (HRECs) associated with the Site in conformance with ASTM E 1527-05.

A REC is defined as the presence or likely presence of hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or an observable or obvious threat of a release of hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property, excluding *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

A HREC is defined as an environmental condition that, in the past would have been considered a REC, but that may or may not be considered a REC currently.

The ASTM practice requires environmental professionals to identify data gaps following reasonable inquiry of Site personnel and search for “reasonably ascertainable” resources. ASTM E 1527-05 defines a data gap as “a lack of or inability to obtain information required by this practice despite good faith efforts by the environmental professional to gather such information.”

The Phase I ESA included a visual inspection of the Site completed on September 21-22 and October 15, 2009, observation of adjacent properties, reviews of historical documents and records that were available from PB Americas, Inc. No specific interviews were conducted of current Site owners or local officials, and no agency file review was conducted.

The Site, an approximate 4-mile stretch along the Grasse River, comprises developed and undeveloped land along the northern and southern banks of the river. The Site location is shown on Figure 1. The Site is located in the Village of Massena, St. Lawrence County, New York.

The Site, under current use, and surrounding properties were not identified as having had any active releases on the federal, state, and local database review provided by Environmental Data Resources (EDR). Several reports completed by consultants to PB Americas, Inc. and MED in efforts to understand Site conditions were reviewed. These reports did define areas of further investigation (i.e., Phase II Investigations). However, review of these reports did not constitute the characterization of a REC, HREC or off-Site REC.

The findings identified by ARCADIS are summarized below and discussed in greater detail in the body of the report.

### 1.1 Recognized Environmental Conditions

One on-Site REC was identified as a result of our site reconnaissance (and confirmed as a potential REC in conversations with PB Americas, Inc.). No off-Site RECs or HRECs were identified in connection with the Site.

A debris pile, located on the northern boundary of the Site, was noted behind Trombino's Restaurant (at 181 Center Street). This pile contained primarily construction-related debris (including concrete, asphalt, brush, PVC pipe, rubber molding, carpeting, iron fencing, plastic bottles, a pick-up truck cap, and various wood pieces).

This area was the subject of a soil assessment, as described in Section 2.2.

### 1.2 Other Findings

No other findings were noted in connection with the Site.

### **1.3 Data Gaps**

As part of the Phase I ESA, the following data gaps were identified:

- As PB Americas, Inc. never owned or operated the Site, there was very limited knowledge of Site history, former operations, and former environmental conditions pertaining to the Site. The information presented was based on the review of historical documents provided to ARCADIS by PB Americas, Inc.
- A review of New York State Department of Environmental Conservation (NYSDEC) files for the identified RECs was not completed as part of the Scope of Work for the Phase I ESA. Additional information regarding potential RECs may be included in these files.

## 2 Introduction

On behalf of PB Americas, Inc., ARCADIS conducted a Phase I ESA of the Site, (an approximate 4-mile stretch along the Grasse River and immediate neighboring properties on the north and south banks of the river) located in Massena, St. Lawrence County, New York. PB Americas, Inc. requested this assessment be performed as part on environmental evaluations associated with the development of a hydroelectric dam located along the Grasse River (MED Hydroelectric Project).

### 2.1 Purpose

PB Americas, Inc. indicated that the purpose for conducting this Phase I ESA is to supplement the existing Phase I ESA (Environmental Resources Management, 2006), provide an evaluation of potential environmental concerns on the banks and neighboring property of the Site, and determine the need for further investigation.

### 2.2 Detailed Scope of Services

The work was conducted in general accordance with the ASTM E 1527-05 *Standard Practice for Site Assessments: Phase I Environmental Site Assessment Process* in order to satisfy the statutory requirements for conducting all appropriate inquires in accordance with Standards and Practices for All Appropriate Inquires rule (40 CFR Part 312). A Phase I ESA, as defined by ASTM, is not intended to be a formal survey for lead-based paint, lead in drinking water, mold, asbestos-containing materials (ACM), urea formaldehyde insulation, ozone-depleting chemicals, or radon.

The purpose of the Phase I ESA was to identify, to the extent practical, RECs and HRECs associated with the site. A REC is defined in the ASTM Phase I Standard as “the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, ground water, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of the appropriate governmental agencies.” A HREC is defined as an environmental condition that in the past would have been considered a REC, but that may or may not be considered a REC currently.

The Phase I ESA was comprised of the following specific elements consistent with ASTM Standard 1527.05:

- An on-site inspection of the subject property to evaluate current conditions and identify areas of potential concern, including underground storage tanks (USTs), aboveground storage tanks (ASTs), polychlorinated biphenyls (PCB)-containing material, or other hazardous materials that may be present at the Site;
- A review of property history through interviews and Sanborn™ Maps, aerial photographs, city directories and historical mapping;
- A review of historical reports and site maps, as available;
- Limited visual inspection of adjacent properties and the local area to evaluate the potential for adverse environmental impact to the subject property;
- Contracting of EDR to identify recognized environmental concerns as required in the regulatory records review section of the ASTM standard for a Phase I ESA; and
- Preparation of a report summarizing the findings of the Phase I ESA.

The Phase I ESA did not include the collection or analysis of soil, air, water, groundwater, or material samples, with the exception of limited collection of soils from an area of observed construction debris dumping at a single property (181 Center Street) (i.e., REC) at the Site, and at the request of PB Americas, Inc. The soil assessment was conducted concurrently with the Phase I ESA effort and not as a result of any particular findings. The results of this limited sampling effort are to be provided under separate cover to this report. A title search was not conducted as part of the Phase I ESA.

Photographs of the site and surrounding areas were taken to document current conditions and are included in Appendix A.

### **2.3 Significant Assumptions**

ARCADIS has assumed that the information sources utilized for this investigation provide complete and accurate information. Evaluations presented in this report are based exclusively on information provided by available public records and observations made during the Site visit. No quantitative or qualitative field activities were conducted and no laboratory analyses were performed (except as noted in Section 2.2).

ARCADIS was provided with historical reports and current site maps by PB Americas, Inc., that showed the general area and boundaries of the Site. ARCADIS has taken this representation as true and accurate and has not sought to independently verify the property boundaries. The limits of the Site subject to this assessment were described by PB Americas, Inc. personnel and ARCADIS accepted as true their representations regarding the location of the property boundaries.

#### **2.4 Limitations and Exceptions**

This Phase I ESA was performed in conformance with all applicable legal requirements and accepted practice prevailing in the environmental assessment industry. The Phase I ESA is limited in nature and should not be construed to be a characterization of environmental regulatory compliance or of conditions above or below grade.

The evaluations presented in this Phase I ESA are based on information provided by PB Americas, Inc. and its representatives, available site records, readily ascertainable historical documents, and observations made during the Site reconnaissance. In preparing this report, ARCADIS has accepted as true the information provided by PB Americas, Inc. personnel on current and historical operations of the site, verified as possible from historical documents. ARCADIS warrants that the services performed were conducted in a competent and professional manner in accordance with sound consulting practices and procedures. ARCADIS cannot warrant the actual site conditions described in this report beyond matters amenable to visual confirmation within the limits of this site assessment program. ARCADIS makes no express or implied representation or warranty that this document or the information contained herein is fit for a particular purpose, nor does ARCADIS make any representation or warranty regarding the accuracy or reliability of information or documents provided by other parties that are contained or relied on herein.

In addition, existing uses that are off-Site were not included as part of the Phase I ESA, except to note their presence and potential related concerns.

#### **2.5 Special Terms and Conditions**

No special terms and conditions were imposed on this Phase I ESA.

## **2.6 Reliance**

This document and the information, findings, opinions and recommendations herein have been prepared for the benefit only of PB Americas, Inc., and no third party is intended as a beneficiary or intended to rely on this document or the information herein unless otherwise expressly stated in writing by ARCADIS. Any use of the contents of this report by any third party is at the sole risk of that party.

## **2.7 Deviations**

There were no deviations from the proposed scope of work other than those specifically described within this report.

### 3 Site Description

#### 3.1 Location and Legal Description

The Site (the Grasse River banks and neighboring properties) is currently owned by various private residential and commercial owners. The Site is an approximately 4-mile stretch along the Grasse River, not including portions of the north and south banks where water retention walls (dikes) are planned. The Site is generally shown on Figures 1 and 2.

The Site is located in the Village of Massena, St. Lawrence County, New York. As shown on Figure 2, the Site includes the area.

- Between elevation 178 feet above msl and 186 feet msl from the proposed dam location upstream to the Main Street Bridge (Mile 8) on the north shore of the Grasse River only.
- Between elevation 178 feet msl and 187 feet msl from the Main Street Bridge (Mile 8) up to the Route 37 Bridge (just below Mile 10) along both the north and south shore of the Grasse River.

The Site boundaries are as follows:

- The Site is generally bounded to the north by residential and commercial properties. Commercial properties are more prevalent towards the eastern extent of the Site, in the section of the Site within the downtown area of the Village of Massena.
- The Site is bounded to the east by a walking bridge and railroad bridge which traverse the Grasse River at the eastern extent of the Site.
- The Site is bounded to the south by residential and commercial properties. Similar to the area to the north of the Grasse River, commercial properties are more prevalent towards the eastern extent of the Site, in the section of the Site within the downtown area of the Village of Massena.
- The Site is bounded to the west by the State Highway 37 Bridge, which traverses the Grasse River.

### 3.2 Physical Setting Sources

In order to obtain information regarding the Site's physical setting, ARCADIS conducted a review of information provided by EDR, topographic maps published by the United States Geological Survey (USGS), and geologic maps published by the New York State Geological Survey. The following sections summarize the physical setting of the Site.

#### 3.2.1 Topography

The Site is located within the Adirondack physiographic province of New York. As shown in Figures 1 and 2, the Site constitutes an approximate 4-mile stretch along the Grasse River and its immediate vicinity within the Village of Massena. The Site area is bounded on the north and south by rising uplands that increase as much as 50 feet above the river elevation. The Site itself indicated this topography in the eastern section of the Site, with relatively less topographic relief in the western half of the Site property. The Grasse River, in essence, serves as the center of a valley with all lands generally sloping towards the river in the immediate vicinity of the Site.

#### 3.2.2 Geology

The surficial geology within the majority of the site and surrounding area is mapped as the Adirondack till, which is a variable till (boulders to silt), and undifferentiated marine and lacustrine sands (Caldwell and Pair, 1991). The area of the Grasse River is additionally mapped as consisting of recent alluvium deposits (oxidized fine sand and gravel). Bedrock within the Site area is mapped as the part of the Beekmantown group (Ogdensburg Dolostone) (Fisher, Isachsen, and Rickard, 1970). Bedrock outcropping was observed during Site reconnaissance activities (as further described in Section 4).

#### 3.2.3 Groundwater

Groundwater was not investigated as part of field activities related to this Phase I ESA.

Groundwater flow direction at the site has not been confirmed by ARCADIS, but it is expected that the groundwater generally flows toward the Grasse River. It is important to note that groundwater flow direction can be influenced locally and regionally by the presence of local wetland features, surface topography, recharge and discharge areas, horizontal and vertical inconsistencies in the types and location of subsurface soils, and proximity to water pumping wells.

## 4 Site Reconnaissance

### 4.1 Methodologies and Limiting Conditions

The site reconnaissance was completed on September 21-22 and October 15, 2009 by ARCADIS employees Mr. Jeffrey Bonsteel, Mr. Scott Cunningham and Mr. Robert Conden. ARCADIS was not accompanied by a PB Americas, Inc. representative during the site reconnaissance, or by any representative of the property owners. The Site reconnaissance consisted of a walking tour through the developed residential and commercial properties of the Site and along the northern and southern banks of the Grasse River. The Site was defined based on the information provided by PB Americas, Inc. prior to the site reconnaissance. During the site reconnaissance, areas specified as the Site were inspected. However, due to the size of the Site, as well as challenges in accessing several wooded, undeveloped portions of the Site (such as areas primarily to the western end of the Site), the undeveloped portions were traversed to the extent feasible. The weather during the site visit was sunny to partly cloudy with a temperature of approximately 70 degrees Fahrenheit.

### 4.2 General Site Description

The Site is located within the Village of Massena and is located generally between the pedestrian bridge and railroad bridge (located between Richards Street and Bayley Road) and the State Highway 37 Bridge. The Site is accessible from numerous private (yards and undeveloped frontage) and public access points.

Properties immediately adjacent to the Grasse River (and within the Site boundaries) are occupied by residential and commercial uses, with some properties vacant or undeveloped.

The Grasse River generally flows from west to east, and is traversed within the Site boundaries by the State Highway 37 Bridge, Parker Avenue Bridge, Main Street Bridge, and a pedestrian and railroad bridge. Bedrock was noted as comprising the bed of the Grasse River at several locations.

Various utilities, including overhead electrical lines, fire hydrants, storm drains, and water, gas and sewer manholes were observed at the properties and in the town roads that border the Grasse River. Properties located at the western extent of the Site (and

on the perimeter of the village boundaries) were observed at times to have water wells and leach fields (septic systems).

Photographs documenting Site conditions at the time of the Site reconnaissance are included as Appendix A. Figures 3 through 8 indicate the boundaries of the Site.

The Site was separated into distinct portions for discussion within this report. These portions are discussed in the following sections.

#### 4.2.1 Railroad Bridge to Parker Avenue Bridge

The section between the railroad bridge and the Parker Avenue Bridge was observed to be undeveloped along both the northern and southern banks (Figure 3). The Site boundaries were located primarily within the backyards of several residences or buildings, and were observed to be heavily wooded and/or wetland areas.

Immediately north of the Site boundary, a small debris pile was noted behind Trombino's Restaurant (at 181 Center Street). This pile contained primarily construction related debris (including concrete, asphalt, brush, PVC pipe, rubber molding, carpeting, iron fencing, plastic bottles, a pick-up truck cap, and various wood pieces). This area was the subject of the soil assessment described in Section 2.2.

Other than the debris pile, ARCADIS did not observe any RECs on this portion of the Site.

#### 4.2.2 Parker Avenue Bridge to Main Street Bridge

The section between the Parker Avenue Bridge and the Main Street Bridge was observed to be undeveloped along both the northern and southern banks (Figure 4). The Site boundaries were located primarily within the backyards of several residences or buildings, as well as land immediately adjacent to Willow Street, and were observed to be heavily wooded and/or wetland areas.

ARCADIS did not observe any RECs on this portion of the Site.

#### 4.2.3 Main Street Bridge to Riverside Parkway Development

The section between the Main Street Bridge and the Riverside Parkway Development (located on the south bank of the Grasse River) was observed to be undeveloped

along both the northern and southern banks (Figure 5). The Site boundaries included areas within the backyards of several residences or buildings, as well as land as part of a large cemetery and undeveloped parcels, and were observed to be heavily wooded and/or wetland areas. However, some portions of the Site (specifically on the southern bank of the Grasse River at the Veterans Memorial Park, as well as at residences located on the southern bank) were observed to be lawn areas (grasses and related vegetation) extending to the edge of water.

ARCADIS did not observe any RECs on this portion of the Site.

#### 4.2.4 Riverside Parkway Development to State Highway 37 Bridge

The section between the Riverside Parkway Development (located on the south bank of the Grasse River) and the State Highway 37 Bridge was observed to be undeveloped along both the northern and southern banks (Figures 6, 7 and 8). The Site boundaries were located primarily within the backyards of several residences, as well as large undeveloped parcels, and were observed to be heavily wooded and/or wetland areas. However, some portions of the Site (specifically on the northern and southern banks of the Grasse River at the eastern portion of this section) were observed to be lawn areas (grasses and related vegetation) extending to the edge of water.

ARCADIS did not observe any RECs on this portion of the Site.

### 4.3 Employee Interviews

Due to the fact that PB Americas, Inc. has never owned or operated this Site, no employees that worked at the Site could be interviewed. Additionally, there were no formal Phase I interviews conducted with any of the property owners.

## 5 Historical Review

ARCADIS contracted EDR to complete a search of available historical data for the historical review (EDR, 2009). The search (provided in Appendix B) included available and historical USGS topographic maps and Sanborn™ Maps for the Site.

### 5.1 Historical Topographic Maps and Sanborn™ Maps

Historical topographic maps for the Site were provided for the years 1907, 1942, and 1964. Review of these maps indicated no significant changes in topography to the Site area, other than an increase in development of the general region, and has remained relatively unchanged over the past 100+ years. Historical topographic maps are provided in Appendix B.

EDR was also retained to conduct a search of available Sanborn™ Maps (Appendix C) for the Site. Sanborn™ Maps from the year 1965 were obtained and reviewed as part of the Phase I ESA. These maps indicate that the properties adjacent to the Grasse River, in general, are consistent with their uses today (i.e., residential and commercial properties).

### 5.2 Aerial Photograph Review

EDR was retained to conduct a search of available aerial photographs (Appendix D) for the Site. Aerial photographic coverage of the Site was obtained from EDR for the years 1973, 1985, 1997, and 2006. Recent aerial photographs provided to ARCADIS by PB Americas, Inc. (included as the base for Figures 2 through 7) were also reviewed. Copies of the aerial photographs from EDR are provided in Appendix D. In general, the review of the aerial photographs indicated that areas of commercial and residential development adjacent to the site remained relatively unchanged.

The general Site area is visible on each of the aerial photographs; however, Site-specific features or structures are not discernable on all of the photos due to the scale of the photographs. Consequently, no RECs on the Site could be identified based on review of the aerial photographs.

### 5.3 Review of Historical Documents

ARCADIS reviewed the following documents provided by PB Americas, Inc.:

- Letter to NYSDEC by MED entitled *Massena Grasse River Multipurpose Hydroelectric Project (FERC Project P-12607), Findings During Phase I Environmental Site Assessment* (MED, 2007)
- *Phase II Environmental Site Assessment* (ERM, 2007)
- Letter to PB Power from Normandeau Associates entitled *Update on Site Activities* (Normandeau Associates, 2008a)
- *Summary Report of Additional Phase II Environmental Site Assessment Investigation in the Grasse River, Massena, NY* (Normandeau Associates, 2008b)

These documents provided an initial overview of the site, including historical environmental issues or concerns related to past investigations. A brief summary of the significant environmental findings of each of these documents is provided below.

*Massena Grasse River Multipurpose Hydroelectric Project (FERC Project P-12607), Findings During Phase I Environmental Site Assessment*

This letter, from the MED to the NYSDEC (Mr. Gary McCullouch) provides additional information related to sheens observed by MEDs contractor (ERM) during their 2006 field investigations. Two small areas of sheens in shallow, stagnant water were noted immediately adjacent to the shoreline at the Parker Avenue and Main Street bridges. This letter provides the technical basis on why MED has determined that those sheens did not possess the characteristics of an oil or petroleum-related discharge, but rather were indicative of biological-type sheen.

In response to the observance of this sheen in 2006, PB Americas, Inc. requested that ARCADIS, as part of the Phase I ESA, review the areas immediately adjacent to the shoreline at the Parker Avenue and Main Street bridges. ARCADIS did note a biological film/sheen in the stagnant water along the southern banks of the Grasse River at both the Parker Avenue and Main Street bridges. As with the ERM observance, it was noted that these sheens did not possess the characteristics of an oil or petroleum-related discharge, and are therefore of limited significance as a potential tracer for contamination sources. Based on these observations, and the fact that the sheen did not appear “sizeable” and “significant,” no further assessment was performed.

Phase II Environmental Site Assessment

The purpose of the Phase II Environmental Site Assessment completed in December 2007 was to collect and analyze six soil samples to characterize conditions in areas of noted waste disposal areas. A soil sample was collected from each of the areas of concern (dumping areas) noted in ERM's Phase I ESA.

The laboratory results from the six soil samples indicated that volatile organic compounds (VOCs), PCBs and metals were not detected at concentrations above NYSDEC soil cleanup objectives (SCOs). One soil sample exhibited concentrations of semi-volatile organic compounds (SVOCs) above the NYSDEC Part 375 unrestricted use SCOs. A recommendation for further sub-surface sampling to delineate the area of SVOC affected soils was made, as well as potential source removal and off-site disposal of those materials.

Update on Site Activities

The purpose of this letter was to document activities completed at the Site, including additional Phase II ESA activities. These activities included the collection and analysis of four soil samples in the area of the SVOC detections noted in ERM's *Phase II Environmental Site Assessment* (as described above). The results of this sampling were presented in the summary report below.

Summary Report of Additional Phase II Environmental Site Assessment Investigation in the Grasse River, Massena, NY

The additional Phase II ESA Investigation, completed in October 2008, provided the results of the Phase II ESA Activities as described above. This included the collection and analysis of four soil samples for metals and SVOCs, as well as the collection and analysis of soil and sediment samples for PCBs.

The soil analysis results indicated detectable concentrations of several metals (including cadmium, arsenic, barium, chromium, and lead). However, only one concentration of lead and two concentrations of chromium exceeded NYSDEC regulatory guidance values.

PCBs were not detected in five of the six soil/sediment samples. The detection of PCBs in the lone soil sample was above the NYSDEC Part 375 unrestricted SCO, but below the residential-restricted SCO.

**5.4 Historical Review Summary**

Based on review of historical topographic maps, aerial photographs, and historical documents, the following observations were made:

- The Site topography has remained relatively unchanged over the past 100+ years.
- Neighboring properties have been developed as residential, and commercial, with changes in the specific businesses and structure locations over the years.
- Review of the historical reports for the Site indicates the presence of various chemical constituents present in Site soils (i.e., waste piles).

## **6 Well and Septic Review**

Information pertaining to existing wells was obtained from the USGS National Water Information System (NWIS), as well as from the EDR Report. Based on information obtained from the USGS, no wells were identified on the Site. There were multiple wells identified by the USGS within approximately 1 mile of the Site. A significant majority of these wells were located west of the Site, and along State Highway 37 (associated with residences). Thirty-three wells were also identified by the EDR review as existing within 1 mile of the Site, including one public water supply well. A selection of the well information is provided in Appendix E.

Based on research conducted by ARCADIS and the results of the Site visit, there are no known monitoring wells on the Site.

Based on the Site visit, no septic systems were observed on the Site. Some septic systems (i.e., leach fields) were noted on properties adjacent to the Site (primarily residences located upgradient of the Site boundaries).

## 7 Database and Government Records Review

As part of this Phase I ESA, a review of applicable federal and state environmental and regulatory databases was conducted to identify sites of known or suspected contamination within various distances to the Site. The review entailed checking facility listings available through the appropriate agency databases, which were obtained by EDR. The complete regulatory database reports and radius maps are provided in Appendix F. The EDR report includes an “orphan” list of potentially hazardous sites for which insufficient address information exists, allowing for the location to be identified only by zip code, city, or county. The following is a review of the regulatory records and the information provided as it pertains to the Site.

### 7.1 Federal Database

The United States Environmental Protection Agency (USEPA) listings that were reviewed include the following:

- National Priorities List (NPL): The NPL includes any property or site that is included on the USEPA database of uncontrolled or abandoned hazardous waste sites identified for priority remedial action under the 1980 Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), also known as Superfund;
- Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS): The CERCLIS includes any property or site identified by the USEPA as abandoned, inactive, or uncontrolled hazardous waste sites which may require cleanup. The CERC-No Further Remedial Action Planned (CERC-NFRAP) database lists sites that have been removed from CERCLIS because of resolved issues;
- Resource Conservation and Recovery Information System (RCRIS): The RCRIS database contains selective information on sites, which generate, store, transport, treat, or dispose of hazardous waste;
- Emergency Response Notification System (ERNS): The ERNS database includes any property or site that is included in a national database of reported releases of oil and hazardous substances;

- Facilities Index System (FINDS): The FINDS database includes any property or site that the USEPA has investigated, reviewed, or been made aware of through its various regulatory programs;
- Corrective Action Report (CORRACTS): The CORRACTS database identifies hazardous waste handlers with Resource Conservation and Recovery Act (RCRA) corrective action activity;
- PCB Activities Database System (PADS): The PADS database identifies generators, transporters, commercial storage, and/or brokers and disposers of PCBs who are required to notify USEPA of such activities;
- RCRA Administrative Action Tracking System (RAATS): The RAATS database contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the USEPA;
- Toxic Chemical Release Inventory System (TRIS): The TRIS database identifies facilities which release toxic chemicals to the air, water, and land in reportable quantities under SARA Title III Section 313;
- Toxic Substances Control Act (TSCA): The TSCA database identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substances Inventory List;
- Material Licensing Tracking System (MLTS): The MLTS lists sites that possess or use radioactive materials;
- Superfund CERCLA Consent Decrees (CONSENT): The CONSENT database lists sites that have major legal settlements establishing responsibility and standards at Superfund sites;
- Mines Master Index File (MINES): The MINES database contains information on mines that is gathered by the Department of Labor, Mine Safety, and Health Administration;
- Records of Decision (ROD): The ROD database lists sites that have had mandates for clean up. ROD documents contain specific technical and health information for site remediation;

- Hazardous Materials Information Reporting System (HMIRS): The HMIRS database contains hazardous material spill incidents reported to the Department of Transportation; and,
- Federal Superfund LIENS (NPL LIENS): The NPL LIENS database is a USEPA-complied list of filed notices of Superfund Liens.

The Site, as defined by the Site boundaries, did not appear in any of the federal databases.

Several other sites within 1 mile of the Site were identified through a review of the federal database. These sites include:

- Aluminum Company of America (ALCOA) is located less than 1-mile northeast from the target property, and was listed under the PADS, FINDS, TRIS, RCRA CORRACTS, RCRA non-CORRACTS Treatment, Storage and Disposal (TSD), RCRA generators, and institutional controls/engineering controls databases.
- St. Lawrence Gas – Massena Operations is located less than 1 mile east-southeast from the target property, and was listed under the RCRA generators database.
- Massena Central School District is located less than 1 mile south from the target property, and was listed under the RCRA generators database.
- Tri Town Cleaners, Inc. is located less than 1/8-mile from the target property, and was listed under the RCRA-Small Quantity Generators (SQG) database.
- Home Depot USA is located less than 1 mile from the target property, and was listed under the RCRA-SQG database.
- WL Smiths Hardware Corporation is located less than 1/8-mile south from the target property, and was listed under the RCRA-Conditionally Exempt Small Quantity Generators (CESQG) database.
- Frenchies Chevrolet Olds, Inc. is located less than 1/2-mile east from the target property, and was listed under the RCRA-CESQG database.

- Wal-Mart Supercenter #1946 is located less than 1-mile southeast from the target property, and was listed under the RCRA-CESQG database.
- Four properties were listed under the ERNS database, including properties at 180 Andrews Street (less than 1/8-mile south of the target property), 150 Park Avenue East (less than 1/2 mile north-northeast of the target property), 202 North Main Street (less than 1 mile north of the target property), and 7 Water Street (less than 1/8 mile south from the target property).

Based on the review of these locations as well as their absence in the databases related to spill or release incidents, none of these sites appear to be of environmental concern (i.e., RECs) to the Site.

Several facilities identified in the federal databases are listed as “orphan” sites for the general Site vicinity. Sites referred to as “orphan” sites are when the address information is not adequate and the site cannot be mapped. These “orphan” sites were reviewed and attempted to be correlated to the subject Site. Based on this review, none of the “orphan” sites appear to be of environmental concern (i.e., RECs) to the Site.

## 7.2 State Database

The State of New York databases that were reviewed include the following:

- State Hazardous Waste Sites (SHWS): The SHWS database is the state’s equivalent to the CERCLIS database. These sites may or may not be listed on the federal CERCLIS list;
- Solid Waste Facilities/Landfills (SWF/LF): The SWF/LF database identifies the permitted solid waste disposal facilities and landfills within the state of New York;
- Leaking Storage Tank Incident Reports (LTANKS): The LTANKS database is an inventory of reported leaking tank incidents;
- Registered Waste Tire Storage and Facility List (SWTIRE): The SWTIRE database contains information on registered waste tire and storage facilities;
- Voluntary Cleanup Agreements (VCP): The VCP database contains information on sites that are involved in the voluntary remedial program;

- Registered Recycling Facility List (SWRCY): The SWRCY database contains a listing of sites that are registered recycling facilities;
- Hazardous Substance Waste Disposal Site Inventory (HSWDS): The HSWDS database contains a listing of known or suspected hazardous substance waste disposal sites as well as sites that are delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-registry sites for which the USEPA prepared Preliminary Assessment and Site Investigation reports;
- AST: The AST database contains a listing of registered above ground storage tanks;
- Major Oil Storage Facilities (MOSF): The MOSF database contains information on facilities that have petroleum storage capacities of 400,000 gallons or greater;
- New York State Spills List (SPILLS): The SPILLS database contains data on spills, including historical spills (NY Hist Spills) that were reported to the NYSDEC;
- Registered USTs: The UST database is a list of registered USTs in the state of New York, and
- Registered Chemical Bulk Storage (CBS UST/AST): The CBS UST/AST is a list of registered chemical USTs and ASTs in the state of New York.

The Site did not appear on any of the State databases. A total of 173 sites within 1-mile of the Site were identified through a search of the state database. The identified sites were listed under the LTANKS, HIST LTANKS, UST, MOSF UST, AST, CBS AST, MOSF AST, CBS, MOSF, SWRCY, HIST UST, HIST AST, HMRIS, SPILLS, and NY Hist Spills databases. Individual sites may be listed under multiple databases.

A review of these databases did not indicate any of these sites to be of environmental concern (i.e., RECs) to the Site.

Several facilities identified in the state databases are listed as “orphan” sites for the Site. Sites referred to as “orphan” sites are when the address information is not adequate and the site cannot be mapped. These “orphan” sites were reviewed and attempted to be correlated to the subject Site. Based on this review, none of the “orphan” sites appear to be of environmental concern (i.e., RECs) to the Site.

## **8 Data Gaps**

As part of the Phase I ESA, the following data gaps were identified:

- As PB Americas, Inc. never owned or operated the Site, there was very limited knowledge of Site history, former operations, and former environmental conditions pertaining to the Site. The information presented was based on the review of historical documents provided to ARCADIS by PB Americas, Inc.
- A review of NYSDEC files for the identified RECs was not completed as part of the Scope of Work for the Phase I ESA. Additional information regarding the RECs may be included in these files.

## 9 Conclusions

A Phase I ESA has been completed in general accordance with the ASTM E 1527-05 *Standard Practice for Site Assessments: Phase I Environmental Site Assessment Process* in order to satisfy the statutory requirements for conducting all appropriate inquiries as in accordance with Standards and Practices for All Appropriate Inquiries rule (40 CFR Part 312) for an approximate 4-mile stretch of the Grasse River and immediate neighboring properties on the north and south banks of the river in Massena, New York. Specifically, the Phase I ESA was conducted over bank areas along the north shore between elevation 178 feet msl and 186 feet msl from the proposed hydroelectric dam upstream to the Main Street Bridge (Mile 8) and along both shores between elevation 178 feet msl and 187 feet msl from the Main Street Bridge (Mile 8) up to the Route 37 Bridge (just below Mile 10). During the Phase I ESA, the following areas of environmental concern were examined: Site history, adjacent land usage, Site structures and operations, aboveground and underground storage tanks, and waste generation storage and disposal.

ARCADIS' assessment identified one on-Site REC. This site is listed below:

REC #1      Debris Pile

At the northern boundary of the Site, a small debris pile was noted behind Trombino's Restaurant (at 181 Center Street). This pile contained primarily construction related debris (including concrete, asphalt, brush, PVC pipe, rubber molding, carpeting, iron fencing, plastic bottles, a pick-up truck cap, and various wood pieces). This area was the subject of the soil assessment, as described in Section 2.2.

ARCADIS' assessment did not identify any off-Site RECs that could potentially affect the Site.

There were no HRECs identified for the Site.

## 10 Limitations of Investigation

The evaluations presented in this Phase I ESA report are based exclusively on information provided by available public records and observations made during the Site visit. No other quantitative or qualitative field activities were conducted and no laboratory analyses were performed other than as noted in Section 2.2. In preparing this report, ARCADIS has accepted as true the information provided by PB Americas, Inc. ARCADIS warrants that the services performed by ARCADIS were conducted in a competent and professional manner in accordance with sound consulting practices and procedures. ARCADIS cannot warrant the actual Site conditions described in this report beyond matters amenable to visual confirmation within the limits of the Site inspection program and limited Site investigation.

Use of this report is limited to PB Americas, Inc. and the results of the assessment of the Site can be relied upon by PB Americas, Inc. to determine the general environmental status at this time for the Site with regard to the objective stated above. There are no third party rights or benefits conferred under this report. Use of this report is strictly limited to PB Americas, Inc., which is the only party to whom ARCADIS intends to confer any rights. Any reliance on the contents of this report by any third party is the sole responsibility of that party.

To the best of ARCADIS's knowledge and belief, the Phase I ESA has been performed in conformance with all applicable legal requirements and accepted practice prevailing in the environmental assessment consulting industry. Specifically, the ESA was conducted to comply with ASTM Standard E 1527-05.

ARCADIS, its officers, and its employees have no present or contemplated interest in the property or the parties involved. Our employment and compensation for preparing this report are not contingent upon any action or event resulting from the analyses, opinions, observations, or conclusions, in or from the use of this report. The statements of fact contained herein, on which our observations, opinions, and conclusions were based, are true and correct. The reported analyses, observations, opinions, and conclusions are unbiased, professional, and limited only by the reported assumptions, qualifications, and conditions stated herein. All information in this report is from sources deemed reliable; however, no representation or warranty is made as to the accuracy thereof.

# The EDR Historical Topographic Map Report

# EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

***Thank you for your business.***

## The EDR Aerial Photo Decade Package

# EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

***Thank you for your business.***  
Please contact EDR at 1-800-352-0050  
with any questions or comments.

## **Disclaimer - Copyright and Trademark Notice**

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT. ENVIRONMENTAL DATA RESOURCES, INC. SPECIFICALLY DISCLAIMS THE MAKING OF ANY SUCH WARRANTIES, INCLUDING WITHOUT LIMITATION, MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OR PURPOSE. ALL RISK IS ASSUMED BY THE USER. IN NO EVENT SHALL ENVIRONMENTAL DATA RESOURCES, INC. BE LIABLE TO ANYONE, WHETHER ARISING OUT OF ERRORS OR OMISSIONS, NEGLIGENCE, ACCIDENT OR ANY OTHER CAUSE, FOR ANY LOSS OF DAMAGE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, CONSEQUENTIAL, OR EXEMPLARY DAMAGES. ANY LIABILITY ON THE PART OF ENVIRONMENTAL DATA RESOURCES, INC. IS STRICTLY LIMITED TO A REFUND OF THE AMOUNT PAID FOR THIS REPORT.** Purchaser accepts this Report AS IS. Any analyses, estimates, ratings, environmental risk levels or risk codes provided in this Report are provided for illustrative purposes only, and are not intended to provide, nor should they be interpreted as providing any facts regarding, or prediction or forecast of, any environmental risk for any property. Only a Phase I Environmental Site Assessment performed by an environmental professional can provide information regarding the environmental risk for any property. Additionally, the information provided in this Report is not to be construed as legal advice.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

2 NORTH ALLEN STREET  
MASSENA, NY 13662

#### COORDINATES

Latitude (North): 44.931830 - 44° 55' 54.6"  
Longitude (West): 74.899470 - 74° 53' 58.1"  
Universal Transverse Mercator: Zone 18  
UTM X (Meters): 507932.9  
UTM Y (Meters): 4975165.5  
Elevation: 208 ft. above sea level

### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property Map: 44074-H8 MASSENA, NY  
Most Recent Revision: 1964

### AERIAL PHOTOGRAPHY IN THIS REPORT

Photo Year: 2006  
Source: USDA

### TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

### DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

## **SURROUNDING SITES: SEARCH RESULTS**

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## EXECUTIVE SUMMARY

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal RCRA CORRACTS facilities list***

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 03/25/2009 has revealed that there is 1 CORRACTS site within approximately 1.75 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>ALUMINUM CO OF AMERICA</b>	<b>PARK AVE E</b>	<b>NE 1/2 - 1 (0.743 mi.)</b>	<b>190</b>	<b>699</b>

#### ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 11/12/2008 has revealed that there is 1 RCRA-TSDF site within approximately 1.25 miles of the target property.

<b>ALUMINUM CO OF AMERICA</b>	<b>PARK AVE E</b>	<b>NE 1/2 - 1 (0.743 mi.)</b>	<b>190</b>	<b>699</b>

#### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 3 RCRA-LQG sites within approximately 1 mile of the target property.

## EXECUTIVE SUMMARY

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 2 RCRA-SQG sites within approximately 1 mile of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 11/12/2008 has revealed that there are 3 RCRA-CESQG sites within approximately 1 mile of the target property.

### ***Federal institutional controls / engineering controls registries***

US ENG CONTROLS: A listing of sites with engineering controls in place.

A review of the US ENG CONTROLS list, as provided by EDR, and dated 03/31/2009 has revealed that there is 1 US ENG CONTROLS site within approximately 1.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>ALUMINUM CO OF AMERICA</i>	<i>PARK AVE E</i>	<i>NE 1/2 - 1 (0.743 mi.)</i>	<i>190</i>	<i>699</i>

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 03/31/2009 has revealed that there is 1 US INST CONTROL site within approximately 1.25 miles of the target property.

## EXECUTIVE SUMMARY

### **Federal ERNS list**

ERNS: The Emergency Response Notification System records and stores information on reported releases of oil and hazardous substances. The source of this database is the U.S. EPA.

A review of the ERNS list, as provided by EDR, and dated 12/31/2008 has revealed that there are 4 ERNS sites within approximately 0.75 miles of the target property.

### **State and tribal leaking storage tank lists**

LTANKS: Leaking Storage Tank Incident Reports. These records contain an inventory of reported leaking storage tank incidents reported from 4/1/86 through the most recent update. They can be either leaking underground storage tanks or leaking aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills

A review of the LTANKS list, as provided by EDR, and dated 06/09/2009 has revealed that there are 51 LTANKS sites within approximately 1.25 miles of the target property.

HIST LTANKS: A listing of leaking underground and aboveground storage tanks. The causes of the incidents are tank test failures, tank failures or tank overfills. In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY LTANKS database.

A review of the HIST LTANKS list, as provided by EDR, and dated 01/01/2002 has revealed that there are 46 HIST LTANKS sites within approximately 1.25 miles of the target property.

## EXECUTIVE SUMMARY

### State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Environmental Conservation's Petroleum Bulk Storage (PBS) Database

A review of the UST list, as provided by EDR, and dated 07/21/2009 has revealed that there are 47 UST sites within approximately 1 mile of the target property.

MOSF UST: Major Oil Storage Facilities Database. Facilities are licensed pursuant to Article 12 of the Navigation Law, 6 NYCRR Part 610 and 17 NYCRR Part 30. These facilities may be onshore facilities or vessels, with petroleum storage capacities of 400,000 gallons or greater. Includes MOSF's licensed or closed since April 1, 1986, (responsibility was transferred from DOT on October 13, 1985) plus available data obtained from DOT facilities licensed since Article 12 became law on April 1, 1978.

A review of the MOSF UST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 MOSF UST site within approximately 1.25 miles of the target property.

CBS AST: Chemical Bulk Storage Database. Registration data collected as required by 6 NYCRR Part 596. It includes facilities storing hazardous substances listed in 6 NYCRR Part 597, in aboveground tanks with capacities of 185 gallons or greater, and/or in underground tanks of any size. Includes facilities registered (and closed) since effective date of CBS regulations (July 15, 1988) through the date request is processed.

A review of the CBS AST list, as provided by EDR, and dated 01/01/2002 has revealed that there is 1 CBS AST site within approximately 1 mile of the target property.

### **Records of Emergency Release Reports**

HMIRS: The Hazardous Materials Incident Report System contains hazardous material spill incidents reported to the Department of Transportation. The source of this database is the U.S. EPA.

A review of the HMIRS list, as provided by EDR, and dated 03/31/2009 has revealed that there are 2 HMIRS sites within approximately 0.75 miles of the target property.

Not reported	100 WILLOW ST	NE 1/4 - 1/2 (0.423 mi.)	AB111	370

NY Spills: Data collected on spills reported to NYSDEC. is required by one or more of the following: Article 12 of the Navigation Law, 6 NYCRR Section 613.8 (from PBS regs), or 6 NYCRR Section 595.2 (from CBS regs). It includes spills active as of April 1, 1986, as well as spills occurring since this date.

A review of the NY Spills list, as provided by EDR, and dated 06/09/2009 has revealed that there are 59 NY Spills sites within approximately 0.875 miles of the target property.

NY Hist Spills: This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database.

A review of the NY Hist Spills list, as provided by EDR, and dated 01/01/2002 has revealed that there are 50 NY Hist Spills sites within approximately 0.875 miles of the target property.

### Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 11/12/2008 has revealed that there are 20 RCRA-NonGen sites within approximately 1 mile of the target property.

MINES: Mines Master Index File. The source of this database is the Dept. of Labor, Mine Safety and Health Administration.

A review of the MINES list, as provided by EDR, and dated 02/19/2009 has revealed that there is 1 MINES site within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
ALCOA INC	MASSENA SMELTER	NNE 1/2 - 1 (0.717 mi.)	185	690

TRIS: The Toxic Chemical Release Inventory System identifies facilities that release toxic chemicals to the air, water, and land in reportable quantities under SARA Title III, Section 313. The source of this database is the U.S. EPA.

A review of the TRIS list, as provided by EDR, and dated 12/31/2007 has revealed that there is 1 TRIS site within approximately 0.75 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
ALUMINUM CO OF AMERICA	PARK AVE E	NE 1/2 - 1 (0.743 mi.)	190	699

TSCA: The Toxic Substances Control Act identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site. The United States Environmental Protection Agency has no current plan to update and/or re-issue this database.

A review of the TSCA list, as provided by EDR, and dated 12/31/2002 has revealed that there are 3

## EXECUTIVE SUMMARY

TSCA sites within approximately 0.75 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
ST. LAWRENCE GAS - MASSENA	33 STEARNS STREET	ESE 1/2 - 1 (0.590 mi.)	AL148	488

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

FTTS: FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act) over the previous five years. To maintain currency, EDR contacts the Agency on a quarterly basis.

A review of the FTTS list, as provided by EDR, and dated 04/09/2009 has revealed that there is 1 FTTS site within approximately 0.75 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>ST. LAWRENCE GAS COMPANY</i>	<i>56-58 MAIN STREET</i>	<i>0 - 1/8 (0.000 mi.)</i>	<i>B12</i>	<i>47</i>

HIST FTTS: A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

A review of the HIST FTTS list, as provided by EDR, and dated 10/19/2006 has revealed that there is 1 HIST FTTS site within approximately 0.75 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>ST. LAWRENCE GAS COMPANY</i>	<i>56-58 MAIN STREET</i>	<i>0 - 1/8 (0.000 mi.)</i>	<i>B12</i>	<i>47</i>

ICIS: The Integrated Compliance Information System (ICIS) supports the information needs of the national enforcement and compliance program as well as the unique needs of the National Pollutant Discharge Elimination System (NPDES) program.

A review of the ICIS list, as provided by EDR, and dated 03/20/2009 has revealed that there are 3 ICIS sites within approximately 0.75 miles of the target property.

## EXECUTIVE SUMMARY

PADS: The PCB Activity Database identifies generators, transporters, commercial storers and/or brokers and disposers of PCBs who are required to notify the United States Environmental Protection Agency of such activities. The source of this database is the U.S. EPA.

A review of the PADS list, as provided by EDR, and dated 02/26/2009 has revealed that there is 1 PADS site within approximately 0.75 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<b>ALUMINUM CO OF AMERICA</b>	<b>PARK AVE E</b>	<b>NE 1/2 - 1 (0.743 mi.)</b>	<b>190</b>	<b>699</b>

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/28/2009 has revealed that there are 36 FINDS sites within approximately 0.75 miles of the target property.

NPDES: New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

A review of the NPDES list, as provided by EDR, and dated 08/05/2009 has revealed that there is 1 NPDES site within approximately 0.75 miles of the target property.

S105135238

DEC Memo:

Prior to Sept, 2004 data translation this spill Lead DEC Field was "OUDERKIRK" 9/24/01: KEVIN SAMOLIS OF ALTLANIC TESTING LABS STATES THAT THEY PUT IN 5 MW WAITING FOR GW ANALYSIS. PROPOSING SVE SYSTEM FOR SOIL. SOIL IS CLAY; WON'T WORK. KEVIN SAMOLIS WILL COPY ME ON PROPOSAL FOR ADDITIAL WORK. (JLR) 10/4/01: RECEIVED LETTER FROM ALT STATING THAT A GWI IS UNDERWAY AND DISPOSAL OF SOIL IS PENDING. LISTS A WORK PLAN FOR GW SAMPLING AND INSTALLATION OF MONITORING WELLS. A REMEDIAL PLAN WILL BEFORWARDED TO THIS OFFICE WHEN SAMPLING ANALYSIS IS COMPLETE. (JLR) 10/4/01: received TCRs. (jlr) 12/7/01: SENT MS PACCIONE, SEACOMM FED CREDIT UNION, OPTIONS LETTER. (JLR) 1/24/02: CHARACTERIZED AS DER SITE. (JLR) 6/19/02: SPOKE TO KEVIN SAMOLIS, ATL. KEVIN CALLED AGAIN TO DISCUSS REPORTS AND SITE PROGRESS. I TOLD HIM AGAIN THAT IF HE WANTED THE DEPARTMENTS GUIDENCE HE SHOULD HAVE THEM SIGN AN ORDER LIKE I SUGGESTED IN MY 12/7/01 LETTER TO MS. PACCIONE. DISCUSSED THE NEW PROCEDURE OF REFERRINGSITES TO SWERDOWSKI'S GROUP. 7/22/02: MARYJEAN, ATL, CALLED DARREL SWERDOWSKI THIS AM. I SPOKE WITH D.S. AND TOLD HIM I HAVE NOT DONE THE REFERRAL YET. ATL IS SAYING THEY HAVE A SMALL WINDOW OF TIME TO WORK IN NOW AND WANT US TO MOVE ON IT. I TOLD D.S. THAT THEY WERE GIVEN THE OPTION TO SIGN A ORDER IN DECEMBER OF 2001 AND CHOSE NOT TO. (JLR) 09/09/2002 - DMS sends Seacomm signed STIP 09/17/2002 - ATL reports on ORC Injection Plans 01/10/2003 - Recieved Quarterly Report from ATL 03/12/2003 - Recieved Quarterly Report from ATL 04/19/2004 - Called Kevin Samolis at ATL 699-5281 August 2004: Provided comments to ATL on proposed design in July. No response as of August 16, 2004. ATL proposes a trench collection system. ORC did not work at thesite. PSO Ocotober 26, 2004: ATL is waiting for RP to approve the direction of the project. As of this date, no approval has not been received. Contacted ATL in October and November asking that a written proposal be provided concerning the next phase of the project. In November ATL's project manager Kevin Somalis left ATL. Jennfier Reymond is now handling the site. On December 3, 2004, I emailed Jennifer Reymond and asked that a written proposal be provided by December 31, 2004. November of 2005 Seacomm conducted dig out of contaminated soil to a depth of 20 feet. Verification samples has shown that soil cleanup objectives have been achieved at all locations except 3. All three samples are on the northeast corner of the property at the edge of Andrews Street and the adjacent parking lot. Two samples slightly exceeded TAGM 4046. One sample showed a total of 30 ppm total VOCs. Soil borings and monitorig wells just beyond this location show non-detect. Since the soil is beneath the road, the source is removed and samples just beyond this location are clean, it is expected that the residual contamination will attenuate quickly. The site is closed not meeting standards on December 7, 2005. Peter S.Ouderkirk,Project Manager.

Remarks:

SPILL SITE WAS FORMERLY A GASOLINE STATION-CREW ON SITE FOR CLEANUP AND REPAIR.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

**TONY'S PIZZA SHOP (Continued)**

**S109206309**

Remarks: down) is a small tank and a 55-gallon drum containing used cooking grease. The 55-gallon drum tipped over, and an unknown quantity (less than a third of the drum?) spilled to the groundsurface and the pavement. I contacted Mr. Slavin and advised him to contact city codes. I also contacted city codes and advised them of the situation. (DRR)  
 There was a fire in Janary where 3 commercial businesses burned down the spill began then. Caller never reported the spill... it is now out of control in his parking lot. Material is coming from behind the old Tony's Pizza Shop. Would like DEC to respond.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: 08/24/07: Received a call from the office regarding a tank pull with strong gas vapors. Contacted LE and requested an officer to investigate. ECO responded, confirmed that a tank pull had taken place and that there is a spill. ECO took photos, witness statements, depositions, etc. John Gardner is the owner. He hired Orvell Kimbell to remove the tank. Mr. Kimbell removed the tank with a backhoe. He stated that the tank was full of water with a small amount of product, and that the bottom of the tank was corroded with holes. It is believed that Mr. Kimbell drained the tank to the excavation and then removed the tank to property he owns in Braiser. ECO directed both Mr. Gardner and Mr. Kimbell to leave the tank and excavation alone, and the tank was corroded with holes. It is believed that Mr. Kimbell drained the tank to the excavation and then removed the tank to property he owns in Braiser. ECO directed both Mr. Gardner and Mr. Kimbell

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "DER,W,S,G" 07/02/1999 BJ ON SITE. TANKS WERE FOUND DURING A PHASE 2 SITE INVESTIGATION FOR A PROPERTY TRANSACTION. TANKS WERE REMOVED AND CONTAMINATION WAS FOUND. WILL ATTEMPT TO DIG CLEAN. OWNER STATES A 20 ACRE APRCEL IN TOWN OF LOISVILLE BEHIND OWNER RESIDENCE THAT HE COULD BUILD A SOIL TREATMENT CELL ON. nO NEIGHBORS AND HE WILL BUILD CELL IN THE MIDDLE OF HIS 20 ACRES. 07/08/1999 VERBAL APPROVAL TO BUILD CELLS AND EMERGENCY WASTE HAULER PERMITS GRANTED TO MOVE THE SOIL TO THE TREATMENT CELLS PENDING A FORMAL SUBMITTAL FOR THE TREATMENT CELLS AND BASED ON VERBAL ASSURANCES THAT THE SITE IS ACCEPTABLE FOR TREATMENT CELL. 07/08/1999 COULD NOT DIG CLEAN NEAR ISLAND OR TOWARD WILLOW STREET. RECOMMENDED A GEO-PROBE INVESTIGATION TO FURTHER DEFINE AREA OF CONTAMINATION. PID READINGS OF EXCAVATION WALLS WERE IN THE 1000'S LAB SAMPLES COLLECTED. 07/20/1999 RECEIVED COMPLAINT FROM NEIGHBOTR TO PHIL BROWN DEBBIE FOOTE 764-1272 REGARDING SOIL PILE WITHIN 100 FEET OF HER WELL. WILL CHECK INTO IT. 07/31/1999 APPARENTLY SOIL BIO-PILE WAS NOT PLACED ACCORDING TO THE AGREEMENT. WILL ALLOW TREATMENT IF AN APPROVABLE PLAN IS SUBMITTED. 09/10/1999 SOIL TREATMENT PLAN SUBMITTED ALONG WITH TANK CLOSURE REPORT. EXCAVATION WALLS IN THE 1-4K RANGE. 09/14/1999 STIP ISSUED, REQUIRES TILLING TWICE PER WEEK, AND REQUIREMENT THAT ALL SOIL BE USED AS CLEAN FILL ON SITE OR

REMOVED FOR DISPOSAL PENDING ANALYTICAL RESULTS TAKEN ON OCTOBER 1, 1999. SITE TO BE RESTORED TO PRE-EXISTING CONDITIONS BY OCTOBER 31, 1999. 11/01/1999 CALLED OPTEC AND MS. FOOTE FOR STATUS OF SOIL PILE, NO ANSWER, IN EITHER CASE. 11/01/1999. RECEIVED GEO-PROBE INVESTIGATION PID SHEET. APPEARS SITE CLEANS-UP 6-7 FEET FROM THE EDGE OF THE EXCAVATION. LAB SAMPLES ALSO COLLECTED, WILL WAIT FOR ANALYTICAL BEFORE A DECISION IS MADE. 11/05/99: PHIL BROWN CALLED TODAY REGARDING THE SITE/ADIRONDACK WAS PRESENT AT THE TIME YESTERDAY FOR SAMPLING FOR DISPOSAL/PHIL SAID HE HAS HAD OPTECH SAMPLE THE CELL AND HNU READINGS WERE ND/LAB RESULTS ARE NOT YET AVAILABLE/ACCORDING TO THE STIP OFFERED, HE HAD UNTIL OCTOBER 31, 1999 TO GET THE SOIL PROPERLY DISPOSED, WHETHER CLEAN ON SITE OR DIRTY AT LANDFILL/FAILURE TO DO THIS PROMPTED THE DEPT TAKING OVER THE SITE/PHIL DID NOT SIGN THE OFFICIAL STIP AGREEMENT SO THE CELL HAS BEEN IN OPERATION WITHOUT A PERMIT/HE WILL TRY TO GET THE LAB RESULTS TO ME TO VERIFY IT IS CLEAN AND GET THE STUFF DISPOSED ON SITE BEFORE. ENV. CAN GET THE STUFF CLEARED FOR THE LANDFILL/ALSO, A GEO-PROBE INVESTIGATION AT THE GAS STATION SHOWED THAT IT WOULD BE POSSIBLE TO DIG OUT OF THE CONTAMINATION/OFFERED TO USE THE CLEAN STUFF AT PHIL'S RESIDENCE AS BACKFILL AT THE GAS STATION/IF THEY DIG OUT, IT COULD BE CLEAN-CLOSER/HE WILL WORK ON IT (WJ)\ 11/15/1999 ADIRONDACK TOOK PID READINGS OF 130 PPM. 11/16/1999 ADIRONDACK TOOK SEVERAL PID READINGS OF SOIL COLLECTED AT 1' DEPTHS 100-200 PPM. MIKE COX ON SITE TO REVIEW AND OBSERVED PID READINGS FROM 80-120 PPM. THESE SAMPLES FROM WEST SIDE AND ONE FROM THE NORTH SIDE OF THE PILE. NORTH IS AWAY FROM THE ROAD. 12/01/1999 BROWN DID NOT DIG OUT THE GAS STATION SO THE MATERIAL STARTED BEING HAULED TO HTE LANDFILL. MR. BROWN PLEADED FOR AN EXTENSION TO USE THE CLEAN MATERIAL AS BACKFILL. EXTENSION GRANTED. 04/01/2000 BROWN STILL NOT TAKEN INITIATIVE TO REMOVE THE SOIL. DEC HIRED PES TO SAMPLE THE CELLS PER STARS. IT FAILED. DEC PAID TO HAVE THE PILE REMOVED TO RODMAN. 05/08/2001 GAS STATION REMAINS WITH MINOR CONTAMINATION ASSOCIATED WITH THE LINES. BOTH SOIL AND GROUNDWATER CONTAMINATION REMAINS ON THE SITE. CLOSE PIN, LEAVE SITE ACTIVE.

Remarks: CALLER PULLING TANK. CONTAMINATION FOUND.

DEC Remarks: 07/02/1999 BJ ON SITE. TANKS WERE FOUND DURING A PHASE 2 SITE INVESTIGATION FOR A PROPERTY TRANSACTION. TANKS WERE REMOVED AND CONTAMINATION WAS FOUND. WILL ATTEMPT TO DIG CLEAN. OWNER STATES A 20 ACRE APRCEL IN TOWN OF LOISVILLE BEHIND OWNER RESIDENCE THAT HE COULD BUILD A SOIL TREATMENT CELL ON. nO NEIGHBORS AND HE WILL BUILD CELL IN THE MIDDLE OF HIS 20 ACRES. 07/08/1999 VERBAL APPROVAL TO BUILD CELLS AND EMERGENCY WASTE HAULER PERMITS GRANTED TO MOVE THE SOIL TO THE TREATMENT CELLS PENDING A FORMAL SUBMITTAL FOR THE TREATMENT CELLS AND BASED ON VERBAL ASSURANCES THAT THE SITE IS ACCEPTABLE FOR TREATMENT CELL. 07/08/1999 COULD NOT DIG CLEAN NEAR ISLAND OR TOWARD WILLOW STREET. RECOMMENDED A GEO-PROBE INVESTIGATION TO FURTHER DEFINE AREA OF CONTAMINATION. PID READINGS OF EXCAVATION WALLS WERE IN THE 1000 S LAB SAMPLES COLLECTED. 07/20/1999 RECEIVED COMPLAINT FROM NEIGHBOTR TO PHIL BROWN DEBBIE FOOTE 764-1272 REGARDING SOIL PILE WITHIN 100 FEET OF HER WELL. WILL CHECK INTOIT. 07/31/1999 APPARENTLY SOIL BIO-PILE WAS NOT PLACED ACCORDING TO THE AGREEMENT. WILL ALLOW TREATMENT IF AN APPROVABLE PLAN IS SUBMITTED. 09/10/1999 SOIL TREATMENT PLAN SUBMITTED ALONG WITH TANK CLOSURE REPORT. EXCAVATION WALLS IN THE 1-4K RANGE.09/14/1999 STIP ISSUED, REQUIRES TILLING TWICE PER WEEK, AND REQUIREMENT THAT ALL SOIL BE USED AS CLEAN FILL ON SITE OR REMOVED FOR DISPOSAL PENDING ANALYTICAL RESULTS TAKEN ON OCTOBER 1, 1999. SITE TO BE RESTORED TO PRE-EXISTING CONDITIONS BY OCTOBER 31, 1999. 11/01/1999 CALLED OPTEC AND MS. FOOTE FOR STATUS OF SOIL PILE, NO ANSWER, IN EITHER CASE. 11/01/1999. REVEIWD GEO-PROBE INVESTIGATION PID SHEET. APEEARS SITE CLEANS-UP 6-7 FEET FROM THE EDGE OF THE EXCAVATION. LAB SAMPLES ALSO COLLECTED, WILL WAIT FOR ANALYTICAL BEFORE A DECISION IS MADE. 11/05/99: PHIL BROWN CALLED TODAY REGARDING THE SITE/ADIRONDACK WAS PRESENT AT THE TIME YESTEDAY FOR SAMPLING FOR DISPOSAL/PHIL SAID HE HAS HAD OPTECH SAMPLE THE CELL AND HNU READINGS WERE ND/LAB RESULTS ARE NOT YET AVAIL/ACCORDING TO THE STIP OFFERED, HE HAD UNTIL OCTOBER 31, 1999 TO GET THE SOIL PROPERLY DISPOSED, WHETHER CLEAN ON SITE OR DIRTY AT LANDFILL/FAILURE TO DO THIS PROMPTED THE DEPT TAKING OVER THE SITE/PHIL DID NOT SIGN THEOFFICIAL STIP AGREEMENT SO THE CELL HAS BEEN IN OPERATION WITHOUT A PERMIT/HE WILL TRY TO GET THE LAB RESULTS TO ME TO VERIFY IT IS CLEAN AND GET THE STUFF DISPOSED ON SITE BEFORE AD. ENV. CAN GET THE STUFF CLEARED FOR THE

LANDFILL/ALSO, A GE0-PROBEINVESTIGATION AT THE GAS STATION SHOWED THAT IT WOULD BE POSSIBLE TO DIG OUT OF THE CONTAMINATION/OFFERED TO USE THE CLEAN STUFF AT PHIL S RESIDENCE AS BACKFILL AT THE GAS STATION/IF THEY DIG OUT, IT COULD BE CLEAN-CLOSER/HE WILL WORK ON IT WJ 11/15/1999 ADIRONDACK TOOK PID READINGS OF 130 PPM. 11/16/1999 ADIRONDACK TOOK SEVERAL PID READINGS OF SOIL COLLECTED AT 1 DEPTHS 100-200 PPM. MIKE COX ON SITE TO REVIEW AND OBSERVED PID READINGS FROM 80-120 PPM. THESE SAMPLES FROM WEST SIDE AND ONEFROM THE NORTH SIDE OF THE PILE. NORHT IS AWAY FROM THE ROAD. 12/01/1999 BROWN DID NOT DIG OUT THE GAS STATION SO THE MATERIAL STARTED BEING HAULED TO HTE LANDFILL. MR. BROWN PLEADED FOR AN EXTENSION TO US ETHE CLEAN MATERIAL AS BACKFILL. EXTENSION GRANTED. 04/01/2000 BROWN STILL NOT TAKEN INITIATIVE TO REMOVE THE SOIL. DEC HIRED PES TO SAMPLE THE CELLS PER STARS. IT FAILED. DEC PAID TO HAVE THE PILE REMOVED TO RODMAN. 05/08/2001 GAS SATION REMAINS WITH MINOR CONTAMINATION ASSOCIATED WITHTHE LINES. BOTH SOIL AND GROUNDWATER CONTAMINATION REMAINS ON THE SITE. CLOSE PIN, LEAVE SITE ACTIVE.

INVESTIGATION; Hnu READINGS OF 5-6 PPM. MR. BEYER REQUESTED SOME SORT OF A REPORT BE PROVIDED TO HIM AFTER CLEAN UP IS DONE. SPOKE WITH MR. DEL LeGROW. MR LeGROW STATED THAT THE SPILL WAS STARTED WHEN A BATTERY CABLE ARCHED WHEN IT TOUCHED THE FRAME CAUSING A FIRE. THE FIRE BURNT THE CROSS OVER LINE BETWEEN THE SADDLE TANKS. WATER BEING SPRAYED ON THE FIRE CAUSED THE LINE TO BEGIN LEAKING. MR. LeGROW STATES THAT HE TRYED TO POINT THIS SITUATION OUT TO THE FIREMEN. 7/2/01: SPOKE WITH HASSAN FAYAD. HESAYS VILLAGE WILL NOT HIRE A CONTRACTOR. I WILL HIRE OPTECH. CLEAN UP WILL BE DONE 7/10/01. (JLR) 7/12/01: DUG CLEAN SPILL REPORT PENDING. (JLR) 7/19/01: OPTECH CALLED OFF JOB TOP SOIL AND SEEDING TO BE FINISHED BY 7/20/01. (JLR). 7/20/01: RP LETTER AND INSURANCE INFO/COMPANY TRUCK INFO REQUEST SENT CERTIFIED MAIL TO MR LEGROW. (JLR) 7/30/01: MR. LEGROW DRIVES FOR LAVALLE TRANSPORTATION, POTSDAM NY. LAVALLE OWNS THE TRUCK IN QUESTION. 8/6/01: RECEIVED CLOSURE LAB RESULTS. (JLR) 8/10/01: RP LETTER AND INSURANCE INFO REQUEST RETURNED UNCLAIMED. WILL SEE IF AN ECO CAN SERVE THE LETTER. (JLR) 9/17/01: RECEIVED SPILL REPORT. (JLR) 10/20/01: mike sherry delivered RP letter. (JLR)

Remarks: fuel line broke on vehicle causing spill - no clean up

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo:

1-13-05: I went to the site to observe the tank pull by Perras. Village of Massena & Perras crews on site. Excavating to pull & demo 21'x8'x8'= 8,000 gal. tank, Village had Norco previously pump/dispose of product/liquid from the tank, no odors, little sheen on gw, fuel lines on N-end of tank, broke line leaking product, stopped to contain/clean up leaking line, segregated contaminated soils, all excavated soils being placed on poly, single wall steel tank, visible product/sheen on gw from piping during removal, PID monitoring of soils being excavated, cutting off hatch w/demo saw, appears to be significant sludge in the tank, pumping sludge out of tank w/vactruck - very heavy thick sludge in tank - 2,000 gals.+/-, holes found in bttom of tank, little release due to the heavy thick sludge blocking the holes, spill being reported to the DEC Hotline by Village of Massena, excavating, pumping water, taking confirmation samples from the bottom & side wall. Photos taken. Perras to prepare a clean up spill closure report for the Village & DEC.(Cox) June 6, 2005

Mr. Everett Basford Village Administrator Village of Massena  
Town Hall Building Massena, New York 13662-1975 RE: SPILL  
0411118, OLD WASHINGTON STREET SCHOOL/VILLAGE OF MASSENA BEACH  
STREET, MASSENA (V), ST. LAWRENCE COUNTY Dear Mr. Basford: We  
have reviewed the February 25, 2005 tank closure report prepared  
by Perras Environmental Control, Inc. and find it acceptable.  
Based on the information provided by Perras, we have closed this  
spill as meeting State standards and no further action is  
required at this time. Please be advised the Village may still  
be held liable in the future for any unknown contamination or  
unforeseen circumstances at this site. We appreciate your  
cooperation in this matter. If you have any questions, please  
feel free to give me a call. Sincerely, Peter R. Taylor, P.E.  
Regional Spill Engineer cc: Mike Cox Bill Jesmore Scott  
McRoberts, Perras

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

FIS (New York - Facility Information System) is New York's Department of Environmental Conservation (DEC) information system for tracking environmental facility information found across the State.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region

that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Environmental Interest/Information System  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: 02/13/07: Spoke with Tom Griffif, property owner. Walgreens is in the process of purchasing the property to develop into a Walgreens store. Phase II investigation is currently underway, and some petroleum odors were discovered yesterday. The developer is: Joe Kane West Lake Development 753 James St Syracuse, NY 13203 (315) 471-5462 I will send Mr. Griffif an RP letter and cc: Mr. Kane. (DRR) 02/13/07: Spoke with Mr. Kane. Investigation underway; he has requested rush turnaround on all samples and should have a report ASAP. He will send in a copy of the report. (DRR) 05/24/07: Previously approved workplan for remedial excavation. Visited site yesterday, approx. 1100 tons of contaminated soil removed. Should be done with excavation today. Expect closure report mid-June. (DRR) 07/02/07: Reviewed cleanup report. Approx. 1,325 tons of soil disposed of at the Clinton Co. Landfill. Closing meeting standards. No further action required. (DRR)

**Environmental Interest/Information System**

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "DER,W,G,P" 02/09/2002 BJ REVEIWD FILE. TCR DATED 11/97 INDICATED 2-8k, 1 3K BARE STEEL GASOLINE UST INSTALLED 8/1978 REMOVED 9/1997 ISLAND AREAS ALSO REMOVED. NEW FACILITY INSTALLED. 1000 YARDS SOIL REMOVED TO TREATMENT IN NEW BREMEN, LEWIS COUNTY. 5,000 GALLONS OF GROUNDWATER REMOVED AND TREATED TO FACILITATE NEW INSTALLATION. POST CLOSURE SAMPLING OF SOILS SHOWED MINOR DETECTIONS IN ALL SAMPLES EXCEPT EAST WALL OF THE PUMPSLAND TOTALS 500 PPB BY 8021, 140 PPM ON PID. GW TREATMENT INF. SHOWED TOTAL 503.1 AT 500 PPB INCLUDING MTBE. GWI REQUESTED 12/97. GWI DATED 11/98 REPORTED 4 WELLS INSTALLED. GW FLOW TOWARD NORTH, INTERSECTION OF KATHLEEN STREET AND N. MAIN STREET.WELL SP-3 DIRECTLY DOWNGRADIENT OF PLUME SHOWED 200 PPB TOTAL ON 503.1, OTHER WELLS ND. LAST GW REPORT REC'D JANUARY 2001, GROUNDWATER CONTAMIANTION CONSISTENT OR DROPPING, FLOW DIRECTION DUE EAST TOWARD N. MAIN STREET. REQUEST CLOSURE. 02/12/2002 BJ REVIEWED FILE. SOIL WHICH WAS REMOVED TO THEIR NEW BREMEN FACILITY MAY NOT HAVE BEEN DISPOSED OF OR TREATED PROPERLY. NEED VERIFICATION FROM RP. 06/03/2005: BILL JESMORE WROTE THE RP ON 2/12/2002 INDICATING NO FURTHER ACTION WAS REQUIRED AT THIS SITE EXCEPT THE CONFIRMATION OF PROPER SOIL DISPOSAL. AS NOTED ABOVE, SOIL FROM THIS SITE WAS TRANSFERRED TO STEWART'S TREATMENT SITE IN THE TOWN OF NEW BREMAN, LEWIS COUNTY. A SEPARATE SPILL [0107323] WAS SUBSEQUENTLY REPORTED DUE TO CONTAMINATION AT THAT SITE. DOCUMENTATION FOR THAT SPILL INDICATES THAT ALL CONTAMINATED SOIL TRANSFERRED TO THE SITE WAS EITHER TREATED TO MEET STARS OR WAS DISPOSED OF PROPERLY. THIS IS CONFIRMED IN A LETTER TO STEWARTS DATED 1/15/03, WHICH CLOSED THE SPILL. THEREFORE, THIS SPILL IS BEING CLOSED, BUT AS NOT MEETING STANDARDS DUE TO THE ANTICIPATED, RESIDUAL, GROUNDWATER CONTAMINATION NOTED ABOVE. [PT] 07/12/07: Village found some minor contaminated soil while doing utility work. Stewarts hired Precision Environmental to handle soil. Spoke with Paul Sokolowski, Precision, 518-378-0377. I told him that we would handle the soil under this spill number. He will submit copies of the soil analytical and disposal receipts. (DRR) 07/25/07: Received documentation from Mr. Sokolowski. 21.66 tons disposed at Rodman. Filed documentation. (DRR)

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D006  
Waste name: CADMIUM

Waste code: D009

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: 1-28-05:SEM (Tammy Caswell) was performing an investigation (soil borings)near the Coca-Cola building for the Town Of Massena (client)of a UST (1,000 gal.) PID readings of 300 ppm +/- were found in a 2' - 2.5' wood layer next to the tank, they are attempting to further define contamination around the UST. NO soil sampling/analysis is to be performed at this time. This information was given to me by Tammy by phone at the site.(Cox) 2-10-05: I spoke to SEM Tammy Caswell, they found a small localized area of contamination near the UST, seven additional boring were performed near the boring that showed contamination, they advised the client (Town of Massena) that need to put together a work plan to address the contamination if/when they takeownership, cleanup will need to be coordinated through DEC. O-Tech performed a UST removal and excavated/removed the impacted underlying soils, confirmation samples taken, closure report to be submitted to DEC.(Cox) 7-26-06: Rec'd/reviewed Op-Tech'sUST Removal/Closure Services report dated June 30, 2006, report details site/project background, UST removal, excavation of impacted soils, confirmation samples/results - ND, no further action, spill closed.(Cox)

Remarks: SOME SUB SURFACE INVESTIGATION WORK, FOUND CONTAMINATED SOIL;

Environmental Interest/Information System  
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

The NEI (National Emissions Inventory) database contains information on stationary and mobile sources that emit criteria air pollutants and their precursors, as well as hazardous air pollutants (HAPs).

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated

Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

PCS (Permit Compliance System) is a computerized management information system that contains data on National Pollutant Discharge Elimination System (NPDES) permit holding facilities. PCS tracks the permit, compliance, and enforcement status of NPDES facilities.

Last Biennial Reporting Year: 2007

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs):	12148
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs):	5406
Waste code:	D003
Waste name:	A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs):	400
Waste code:	D005
Waste name:	BARIUM
Amount (Lbs):	159006
Waste code:	D006
Waste name:	CADMIUM
Amount (Lbs):	400

Event:	Igration of Contaminated Groundwater under Control, Yes, Migration of Contaminated Groundwater Under Control has been verified. Based on a review of information contained in the EI determination, it has been determined that migration of contaminated groundwater is under control at the facility. Specifically, this determination indicates that the migration of contaminated groundwater is under control, and that monitoring will be conducted to confirm that contaminated groundwater remains within the existing area of contaminated groundwater. This determination will be re-evaluated when the Agency becomes aware of significant changes at the facility.
Event date:	09/19/2002
Event:	Current Human Exposures under Control, Yes, Current Human Exposures

Under Control has been verified. Based on a review of information contained in the EI determination, current human exposures are expected to be under control at the facility under current and reasonably expected conditions. This determination will be re-evaluated when the Agency/State becomes aware of significant changes at the facility.

DON JOHNSON (PBS) SENT LETTER TO REGISTER NEW OWNER/OPERATOR AS ADIRONDACK ENERGY, INC., 17 JUNCTION ROAD, MALONE, NY 12953. 03/14/2003 BJ REVIEWED FILE. THREE WELLS WERE INITIALLY INSTALLED (1992) WHICH SHOWED UP TO 50 PPM TOT VOC IN ONE WELL (B-1). GRADIENT DESCRIBED BY THREE BORINGS MAY BE QUESTIONABLE DUE TO THE PROXIMITY OF THE WELLS TO EACH OTHER. FURTHER DEFINITION OF THE PLUME WAS WARRANTED. ADDITIONAL POINTS INSTALLED, GRADIENT CHANGED, FOLLOW-UP SAMPLING OF THE WELLS IN SHOWED DECREASE TO 20 15 PPM TOTAL. PET ID SHOWED GASOLINE AS MAJOR CONTAMINANT WITH LITTLE OR NO MTBE IN VOC ANALYSIS. 03/18/03 BJ WROTE LETTER TO NEW OWNER ASKING FOR UPDATE ON SITE STATUS. BRUCE MONETTE, 518-483-3835. 03/31/2003 - BJ sends STIP to Owner 04/01/2003 - Site referred to DMS and PSO 04/02/2003 - Comments sent to consultant on CAP 04/03/2003 - Revised CAP Submitted with additional data 04/04/2003 - 2nd revisions made to CAP. 04/07/2003 - STIP and CAP approved. 04/08/2003 - On site - Ouderkirk / Cox - Eric Lewis of Precision Environmental on site to dewater and dig out contamination. Area is much larger than earlier reported. Tanks have been removed. Piping and contaminated soils remain. Dig out to be done week of April 14th. 05/21/03 - Majority of site soils removed. Eric Lewis with Precision set to install monitoring wells and to delineate two hot spots identified after soil excavation. Mike Cox to be on site for activities. 07/21/03: Majority of contaminated soils have been removed. Two locations exceeded TAGM. Wells installed on site and show that contaminated groundwater is present at the most down gradient on site well. The owner has been asked to complete the investigation and evaluate exposure routes. As of this date no further action has been taken. Mike Cox indicated that the new mini mart is under construction. 09/11/03: Owner has installed additional wells down gradient of site near Barber Shop. Wells are clean, however existing on site well has shown increase in contamination. Adjacent home owners basements were inspected by consultant and no evidence of contamination, odors, staining etc. Consultant will be submitting a report detailing out their findings and proposed monitoring plans. PSO April 19, 2004: As of today's date the RP has failed to re sample wells and inspect basement adjacent to site. August 2004: Spoke with Bruce Monet of Adirondack Energy in July. Bruce informed me that new wells were to be installed, groundwater was to be sampled and the adjacent homes basements inspected as part of the requested data to close out spill. As of August 16, 2004, no response has been received. PSO October 25, 2004: No response from Bruce Monet of Adirondack Energy. December 3, 2004: Called Bruce Monet of Adirondack Energy to request that project be completed. May 24, 2005: Groundwater has demonstrated that attenuation of GW contamination is occurring. Since 2003, contaminant levels have been cut by 1/2. Spill closed not meeting standards. PSO

Remarks: STEVE KUNO (386-1000), A PROSPECTIVE BUYER HIRED PLUMLEY TO PERFORM SITE ASSESSMENT. CONTAMINATION OBSERVED. DONALD MOORE HAS LEASED THE STATION FROM MR. HARTE FOR OVER 20 YEARS.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "DER,W,V" 03/13/2003 THROUGH PHONE CALLS, SOME LIMITED AREAS OF CONTAMINATION WERE REMOVED ON SITE. CONTENTION IS THAT A PLUME IS MIGRATING FROM THE FORMER COCA-COLA PROPERTY. NO REPORTS HAVE BEEN RECEIVED. OWNER HAS SOLD THE PROPERTY AND IS KEEPING ANY INFORMATION FROM DEC. 5/17/2005: A COMPREHENSIVE REPORT PREPARED FOR SPILL 0012752 [FLOOR DRAIN DISCHARGE, WHICH HAS BEEN CLOSED] INDICATES CONTAMINATION ON THIS PART OF THE PROPERTY COULD BE COMING FROM OFF-SITE, NAMELY COCA COLA, SPILL 9011376. THEREFORE, THIS SPILL WILL REMAIN OPEN UNTIL IT IS CLEANED UP OR THE RP STATUS IS RESOLVED. NOTE, SPILL 0100219 [TANKS PULL] WAS CLOSED MEETING STANDARDS. SPILL 0107876, ALSO ALLEGING CONTAMINATION FROM OFF-SITE HAS BEEN REFERRED TO THIS SPILL. [PT]

Remarks: SPILL APPEARS TO BE COMING FROM AN ADJACENT SITE TO THE SOUTH WEST THERE ARE A COUPLE POTENTIAL PLACES THAT SOIL CONTAMINATION COULD BE COMING FROM. SOIL AND GROUND WATER IMPACT ALONG A PROPERTY LINE DISCOVERED DURING SOIL BORING ACTIVITIES. GROUNDWATER CONTOURING INDICATES IMPACTED GROUND WATER COMING FROM ADJACENT PROPERTIES. WAS DISCUSSED THIS AFTERNOON WITH BILL JESMORE FROM DEC REG6W.

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "ROGERS" 8/6/01: SPOKE WITH SEAN SMITH, STRATEGIC, EXCAVATING 8/7 AND 8/8 AROUND OUT FALL OF FLOOR DRAIN PIPE. STRATEGIC TO DIFFERENTIATE B/T ON SITE AND OFF SITE CONTAMINATION. (JLR) 03/31/2003 ALL ON SITE SOURCES APPEAR TO HAVE BEEN REMOVED TO THE EXTENT POSSIBLE THE PROPERTY IS BEING LEASED/RENT-TO-OWN TO ANOTHER PARTY. SEVERAL OFF SITE SOURCES FOR SOME OF THE ON SITE CONTAMINATION WERE IDENTIFIED BY SEM. NAMES AND ADDRESSES ARE IN THE FILE. BJ 06/08/04: received

comprehensive report for the entire site including the suspected off site impacts (9011376, 0013108, 0107876). This spill is closed meeting standards. (jlr) ALL RECORDS ARE IN 0013108 FILE  
Remarks: caller states that cont. was found in soil borings. callers client will be called to determine about clean up...property is on municipal water...believes that ground water may be affected.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

**LTANKS:**

Site ID: 226532  
Spill No: 9610044  
Spill Date: 11/12/1996  
Spill Cause: Tank Failure  
Spill Source: Commercial/Industrial  
Spill Class: Known release with minimal potential for fire or hazard. DEC Response. Willing Responsible Party. Corrective action taken.  
Spill Closed Dt: 5/28/2004  
Facility Addr2: Not reported  
Cleanup Ceased: Not reported  
Cleanup Meets Standard: False

DEC Memo: Prior to Sept, 2004 data translation this spill Lead DEC Field was "VOSS" 11/14/96: CALL FROM SID BELILE, OP-TECH/THE AREA UNDER THE ISLAND WAS BAD BUT ALSO SEEMED TO BE OLD/THEY ARE EXCAVATING. LOADING AND DISPOSING/HE EXPECTS TO BE ABLE TO DIG CLEAN/A FULL TANK CLOSURE WITH CONFIRMATORY SAMPLING AROUND THE ISLAND WILL BE DEVELOPED/A CALL LATER SAID THEY MAY HAVE GW IMPACTED AND MAY NEED MORE WORK (TV) 11/21/96: ONSITE WITH OP-TECH CREW/THEY HAD ALREADY EXCAVATED 700 TONS AND HAD A BIT MORE TO DO/CONTAMINATION AT LAYER 10' B.G. DOWN TO A CLAY LAYER AT APPROX 15'/COVERS AN AREA AROUND FORMER ISLAND AND TANK LOCATION/DOESN'T APPEAR TO EXTEND BEYOND FENSE LINE/COMPOSITES OF THE WALLS AND ONE FROM THE BOTTOM WILL BE COLLECTED AS WELL AS A SAMPLE OF THE HOT SOIL THEY ARE GOING TO LEAVE UNDER THE NEW TANK AND PUMP ISLAND AND A G.W. SAMPLE. (TV)

Remarks: caller excavating underground storage tanks & found contamination when they excavated under the pump island and in & around the piping

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 02/02/2009	Source: EPA
Date Data Arrived at EDR: 02/12/2009	Telephone: N/A
Date Made Active in Reports: 03/30/2009	Last EDR Contact: 07/31/2009
Number of Days to Update: 46	Next Scheduled EDR Contact: 10/26/2009
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 04/23/2009	Source: EPA
Date Data Arrived at EDR: 04/28/2009	Telephone: N/A
Date Made Active in Reports: 05/19/2009	Last EDR Contact: 07/31/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 10/26/2009
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 02/02/2009	Source: EPA
Date Data Arrived at EDR: 02/12/2009	Telephone: N/A
Date Made Active in Reports: 03/30/2009	Last EDR Contact: 07/31/2009
Number of Days to Update: 46	Next Scheduled EDR Contact: 10/26/2009
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 01/09/2009	Source: EPA
Date Data Arrived at EDR: 01/30/2009	Telephone: 703-412-9810
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 07/14/2009
Number of Days to Update: 101	Next Scheduled EDR Contact: 10/12/2009
	Data Release Frequency: Quarterly

## ***Federal CERCLIS NFRAP site List***

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 12/03/2007	Source: EPA
Date Data Arrived at EDR: 12/06/2007	Telephone: 703-412-9810
Date Made Active in Reports: 02/20/2008	Last EDR Contact: 06/15/2009
Number of Days to Update: 76	Next Scheduled EDR Contact: 09/14/2009
	Data Release Frequency: Quarterly

## ***Federal RCRA CORRACTS facilities list***

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/25/2009	Source: EPA
Date Data Arrived at EDR: 04/02/2009	Telephone: 800-424-9346
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 08/31/2009
Number of Days to Update: 39	Next Scheduled EDR Contact: 11/30/2009
	Data Release Frequency: Quarterly

## ***Federal RCRA non-CORRACTS TSD facilities list***

RCRA-TSDF: RCRA - Transporters, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

## ***Federal RCRA generators list***

### **RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

### **RCRA-SQG: RCRA - Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 11/12/2008

### **RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Number of Days to Update: 20	Next Scheduled EDR Contact: 12/07/2009
	Data Release Frequency: Annually

### VAPOR REOPENED: Vapor Intrusion Legacy Site List

"Vapor intrusion" refers to the process by which volatile chemicals move from a subsurface source into the indoor air of overlying or adjacent buildings. The subsurface source can either be contaminated groundwater or contaminated soil which releases vapors into the pore spaces in the soil. Improvements in analytical techniques and knowledge gained from site investigations in New York and other states has led to an increased awareness of soil vapor as a medium of concern and of the potential for exposures from the soil vapor intrusion pathway. Based on this additional information, New York is currently re-evaluating previous assumptions and decisions regarding the potential for soil vapor intrusion exposures at sites. As a result, all past, current, and future contaminated sites will be evaluated to determine whether these sites have the potential for exposures related to soil vapor intrusion.

Date of Government Version: 05/14/2009	Source: Department of Environmental Conservation
Date Data Arrived at EDR: 06/10/2009	Telephone: 518-402-9814

## **State and tribal voluntary cleanup sites**

### VCP: Voluntary Cleanup Agreements

New York established its Voluntary Cleanup Program (VCP) to address the environmental, legal and financial barriers that often hinder the redevelopment and reuse of contaminated properties. The Voluntary Cleanup Program was developed to enhance private sector cleanup of brownfields by enabling parties to remediate sites using private rather than public funds and to reduce the development pressures on "greenfield" sites.

### **State and tribal Brownfields sites**

#### ERP: Environmental Restoration Program Listing

In an effort to spur the cleanup and redevelopment of brownfields, New Yorkers approved a \$200 million Environmental Restoration or Brownfields Fund as part of the \$1.75 billion Clean Water/Clean Air Bond Act of 1996 (1996 Bond Act). Enhancements to the program were enacted on October 7, 2003. Under the Environmental Restoration Program, the State provides grants to municipalities to reimburse up to 90 percent of on-site eligible costs and 100% of off-site eligible costs for site investigation and remediation activities. Once remediated, the property may then be reused for commercial, industrial, residential or public use.

### **ADDITIONAL ENVIRONMENTAL RECORDS**

#### **Local Brownfield lists**

US BROWNFIELDS: A Listing of Brownfields Sites

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 10/01/2008	Source: Environmental Protection Agency

## **Local Lists of Hazardous waste / Contaminated Sites**

### US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 07/01/2008

Data Release Frequency: Varies

### HIST SPILLS: SPILLS Database

This database contains records of chemical and petroleum spill incidents. Under State law, petroleum and hazardous chemical spills that can impact the waters of the state must be reported by the spiller (and, in some cases, by anyone who has knowledge of the spills). In 2002, the Department of Environmental Conservation stopped providing updates to its original Spills Information Database. This database includes fields that are no longer available from the NYDEC as of January 1, 2002. Current information may be found in the NY SPILLS database. Department of Environmental Conservation.

## **Other Ascertainable Records**

### **RCRA-NonGen: RCRA - Non Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 04/23/2009	Source: EPA
Date Data Arrived at EDR: 04/28/2009	Telephone: 703-416-0223
Date Made Active in Reports: 05/19/2009	Last EDR Contact: 07/31/2009
Number of Days to Update: 21	Next Scheduled EDR Contact: 09/28/2009
	Data Release Frequency: Annually

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 01/05/2009	Source: Department of Energy
Date Data Arrived at EDR: 05/07/2009	Telephone: 505-845-0011

Number of Days to Update: 1	Next Scheduled EDR Contact: 09/14/2009
	Data Release Frequency: Varies

## MINES: Mines Master Index File

Contains all mine identification numbers issued for mines active or opened since 1971. The data also includes violation information.

Date of Government Version: 02/19/2009	Source: Department of Labor, Mine Safety and Health Administration
Date Data Arrived at EDR: 03/24/2009	Telephone: 303-231-5959
Date Made Active in Reports: 05/05/2009	Last EDR Contact: 06/23/2009
Number of Days to Update: 42	Next Scheduled EDR Contact: 09/21/2009
	Data Release Frequency: Semi-Annually

## TRIS: Toxic Chemical Release Inventory System

Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.

Date of Government Version: 12/31/2007	Source: EPA
Date Data Arrived at EDR: 04/09/2009	Telephone: 202-566-0250
Date Made Active in Reports: 06/17/2009	Last EDR Contact: 06/16/2009
Number of Days to Update: 69	Next Scheduled EDR Contact: 09/14/2009
	Data Release Frequency: Annually

## TSCA: Toxic Substances Control Act

Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

Date of Government Version: 12/31/2002	Source: EPA
Date Data Arrived at EDR: 04/14/2006	Telephone: 202-260-5521
Date Made Active in Reports: 05/30/2006	Last EDR Contact: 07/14/2009
Number of Days to Update: 46	Next Scheduled EDR Contact: 10/12/2009
	Data Release Frequency: Every 4 Years

FTTS: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act) FTTS tracks administrative cases and pesticide enforcement actions and compliance activities related to FIFRA, TSCA and EPCRA (Emergency Planning and Community Right-to-Know Act). To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/09/2009	Source: EPA/Office of Prevention, Pesticides and Toxic Substances
Date Data Arrived at EDR: 04/16/2009	Telephone: 202-566-1667
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 06/15/2009

**HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing**

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501
Date Made Active in Reports: 04/10/2007	Last EDR Contact: 12/17/2007
Number of Days to Update: 40	Next Scheduled EDR Contact: 03/17/2008

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## PADS: PCB Activity Database System

PCB Activity Database. PADS Identifies generators, transporters, commercial storers and/or brokers and disposers of PCB's who are required to notify the EPA of such activities.

Date of Government Version: 02/26/2009	Source: EPA
Date Data Arrived at EDR: 05/20/2009	Telephone: 202-566-0500
Date Made Active in Reports: 05/29/2009	Last EDR Contact: 08/05/2009
Number of Days to Update: 9	Next Scheduled EDR Contact: 11/02/2009
	Data Release Frequency: Annually

## MLTS: Material Licensing Tracking System

MLTS is maintained by the Nuclear Regulatory Commission and contains a list of approximately 8,100 sites which possess or use radioactive materials and which are subject to NRC licensing requirements. To maintain currency, EDR contacts the Agency on a quarterly basis.

Date of Government Version: 04/02/2009	Source: Nuclear Regulatory Commission
Date Data Arrived at EDR: 04/24/2009	Telephone: 301-415-7169
Date Made Active in Reports: 05/19/2009	Last EDR Contact: 06/29/2009
Number of Days to Update: 25	Next Scheduled EDR Contact: 09/28/2009
	Data Release Frequency: Quarterly

## RADINFO: Radiation Information Database

The Radiation Information Database (RADINFO) contains information about facilities that are regulated by U.S. Environmental Protection Agency (EPA) regulations for radiation and radioactivity.

Date of Government Version: 04/28/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 04/29/2009	Telephone: 202-343-9775
Date Made Active in Reports: 05/11/2009	Last EDR Contact: 07/28/2009
Number of Days to Update: 12	Next Scheduled EDR Contact: 10/26/2009
	Data Release Frequency: Quarterly

## FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/28/2009	Source: EPA
Date Data Arrived at EDR: 05/01/2009	Telephone: (212) 637-3000
Date Made Active in Reports: 05/19/2009	Last EDR Contact: 06/29/2009
Number of Days to Update: 18	Next Scheduled EDR Contact: 09/28/2009
	Data Release Frequency: Quarterly

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104
Date Made Active in Reports: 08/07/1995	Last EDR Contact: 06/02/2008
Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

## BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Data Release Frequency: Biennially

## HSWDS: Hazardous Substance Waste Disposal Site Inventory

The list includes any known or suspected hazardous substance waste disposal sites. Also included are sites delisted from the Registry of Inactive Hazardous Waste Disposal Sites and non-Registry sites that U.S. EPA Preliminary Assessment (PA) reports or Site Investigation (SI) reports were prepared. Hazardous Substance Waste Disposal Sites are eligible to be Superfund sites now that the New York State Superfund has been refinanced and changed. This means that the study inventory has served its purpose and will no longer be maintained as a separate entity. The last version of the study inventory is frozen in time. The sites on the study will not automatically be made Superfund sites, rather each site will be further evaluated for listing on the Registry. So overtime they will be added to the registry or not.

Date of Government Version: 01/01/2003

## SPDES: State Pollutant Discharge Elimination System

New York State has a state program which has been approved by the United States Environmental Protection Agency for the control of wastewater and stormwater discharges in accordance with the Clean Water Act. Under New York State law the program is known as the State Pollutant Discharge Elimination System (SPDES) and is broader in scope than that required by the Clean Water Act in that it controls point source discharges to groundwaters as well as surface waters.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## E DESIGNATION: E DESIGNATION SITE LISTING

The (E (Environmental)) designation would ensure that sampling and remediation take place on the subject properties, and would avoid any significant impacts related to hazardous materials at these locations. The (E) designations would require that the fee owner of the sites conduct a testing and sampling protocol, and remediation where appropriate, to the satisfaction of the NYCDEP before the issuance of a building permit by the Department of Buildings pursuant to the provisions of Section 11-15 of the Zoning Resolution (Environmental Requirements). The (E) designations also include a mandatory construction-related health and safety plan which must be approved by NYCDEP.

## EDR PROPRIETARY RECORDS

### *EDR Proprietary Records*

#### Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

### CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2006

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

## Electric Power Transmission Line Data

Source: PennWell Corporation  
Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

## AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

## Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

## Nursing Homes

Source: National Institutes of Health  
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

## Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

## Daycare Centers: Day Care Providers

## **GEOCHECK<sup>®</sup> - PHYSICAL SETTING SOURCE ADDENDUM**

### **TARGET PROPERTY ADDRESS**

MED HYDROELECTRIC PLANT  
2 NORTH ALLEN STREET  
MASSENA, NY 13662

### **TARGET PROPERTY COORDINATES**

Latitude (North):	44.93183 - 44° 55' 54.6"
Longitude (West):	74.89947 - 74° 53' 58.1"
Universal Tranverse Mercator:	Zone 18
UTM X (Meters):	507932.9
UTM Y (Meters):	4975165.5
Elevation:	208 ft. above sea level

### **USGS TOPOGRAPHIC MAP**

Target Property Map:	44074-H8 MASSENA, NY
Most Recent Revision:	1964

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## FEMA FLOOD ZONE

<u>Target Property County</u>	<u>FEMA Flood Electronic Data</u>
ST LAWRENCE, NY	Not Available

Flood Plain Panel at Target Property: Not Reported

Additional Panels in search area: Not Reported

## NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
MASSENA	YES - refer to the Overview Map and Detail Map

## HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

### *Site-Specific Hydrogeological Data\*:*

Search Radius:	1.25 miles
Status:	Not found

## AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

\* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: Croghan

Soil Surface Texture: loamy fine sand

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 54 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	loamy fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 705 Min: 141	Max: 6 Min: 4.5
2	9 inches	44 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 705 Min: 141	Max: 6 Min: 4.5
3	44 inches	72 inches	fine sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 705 Min: 141	Max: 6 Min: 4.5

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### Soil Map ID: 2

Soil Component Name: Udorthents

Soil Surface Texture: loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 122 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	3 inches	loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel	Max: 4 Min: 0.42	Max: 9 Min: 6.6
2	3 inches	72 inches	channery loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Gravels, Gravels with fines, Clayey Gravel	Max: 4 Min: 0.42	Max: 9 Min: 6.6

### Soil Map ID: 3

Soil Component Name: Hogansburg

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Moderately well drained

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 54 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
2	9 inches	25 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4
3	25 inches	72 inches	gravelly fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 4 Min: 1.4	Max: 8.4 Min: 7.4

### Soil Map ID: 4

Soil Component Name: Heuvelton

Soil Surface Texture: silty clay loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 54 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.01	Max: 8.4 Min: 6.6
2	7 inches	11 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.01	Max: 8.4 Min: 6.6
3	11 inches	22 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.01	Max: 8.4 Min: 6.6
4	22 inches	72 inches	stratified silty clay loam to very fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.01	Max: 8.4 Min: 6.6

### Soil Map ID: 5

Soil Component Name: Muskellunge

Soil Surface Texture: silty clay loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 31 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	11 inches	silty clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6
2	11 inches	37 inches	clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6
3	37 inches	72 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.42	Max: 8.4 Min: 6.6

**Soil Map ID: 6**

Soil Component Name: Elmwood

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Moderately well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 46 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.01	Max: 7.8 Min: 5.6
2	5 inches	25 inches	fine sandy loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.01	Max: 7.8 Min: 5.6
3	25 inches	72 inches	silty clay	Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 1.4 Min: 0.01	Max: 7.8 Min: 5.6

**Soil Map ID: 7**

Soil Component Name: Malone

Soil Surface Texture: loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Somewhat poorly drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 30 inches

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

### State Wetlands Data: Freshwater Wetlands

Source: Department of Environmental Conservation

Telephone: 518-402-8961

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### New York Public Water Wells

Source: New York Department of Health

Telephone: 518-458-6731

## OTHER STATE DATABASE INFORMATION

#### Oil and Gas Well Database

Department of Environmental Conservation

Telephone: 518-402-8056

These files contain records, in the database, of wells that have been drilled.

### RADON

#### State Database: NY Radon

Source: Department of Health

Telephone: 518-402-7556

Radon Test Results

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

### OTHER

#### Airport Landing Facilities: Private and public use landing facilities

Source: Federal Aviation Administration, 800-457-6656

#### Epicenters: World earthquake epicenters, Richter 5 or greater

Source: Department of Commerce, National Oceanic and Atmospheric Administration
