Re: 2012 Dam Safety/Operation Inspection Reports

Dear Mr. Livingston:

Enclosed is a CD containing copies of the Commission's 2012 dam safety/operation inspection reports for the projects listed in Table 1 of the enclosure, which were requested by PG&E's email correspondence dated January 22, 2013. Also inspected in 2012 were the projects listed in Table 2 of the enclosure. However, the reports for those projects have not yet been finalized by the Commission, and will be forwarded at a later date.

These inspection reports are classified as Critical Energy Infrastructure Information (CEII) in accordance with Commission Order No. 630, 102 FERC ¶ 61,190 (2003). The public may seek access to these reports through the CEII procedures found in Title 18, Section 388.113 of the Code of Federal Regulations (18 CFR 388.113).

PG&E is a unique member of the public with special interest in this information, as it is the owner/operator of the referenced projects. As a project owner/operator whose facilities are intended to be protected from terrorist attacks by Order No. 630, one can fairly assume that PG&E will treat any sensitive information contained in the reports in the same way that the Commission would. Therefore, PG&E may receive these reports

outside of the CEII process. Please call Mr. John Wiegel at (415) 369-3336 for instructions for opening the reports.

We appreciate your cooperation in this aspect of the Commission's dam safety program.

Sincerely,

(For) Robert B. Finucane, P.E., F. ASCE
Regional Engineer
