)	Civil Action No.: _____
v.)	
)	COMPLAINT
INTERNATIONAL BUSINESS)	FOR DECLARATORY JUDGMENT
MACHINES CORPORATION,)	OF NON-INFRINGEMENT
)	
Defendant.)	JURY TRIAL DEMANDED
)	

Plaintiff Chewy, Inc. (“Chewy”), for its Complaint against Defendant International Business Machines Corporation (“IBM” or “Defendant”) seeking declaratory judgment of non-infringement as to the following patents: U.S. Patent Nos. 7,072,849 (the “’849 patent”), 9,569,414 (the “’414 patent”), 7,076,443 (the “’443 patent”), and 6,704,034 (the “’034 patent”) (collectively, the “Asserted Patents”), alleges as follows:

NATURE OF THE ACTION

1. This is an action arising under the patent laws of the United States, 35 U.S.C. § 1 *et seq.*, and the Declaratory Judgment Act, 28 U.S.C. §§ 2201 and 2202, seeking a declaratory judgment of non-infringement of the Asserted Patents and for such other relief as the Court deems just and proper.

2. True and correct copies of the Asserted Patents are attached as Exhibits 1–4.

THE PARTIES

3. Plaintiff Chewy, Inc. is a corporation organized under the laws of Delaware, with its principal place of business at 1855 Griffin Road, Dania Beach, Florida 33004.

4. On information and belief, Defendant International Business Machines Corporation is a New York corporation having its principal place of business at 1 New Orchard Road, Armonk, New York 10504.

5. On information and belief, Defendant is the assignee of the ’849 patent, the ’414

patent, the '443 patent, and the '034 patent.

JURISDICTION AND VENUE

6. This action arises under the Patent Laws of the United States, 35 U.S.C. §§ 1 *et seq.*, and the Declaratory Judgment Act, 28 U.S.C. §§ 2201–2202. This Court has subject matter jurisdiction over this matter pursuant to 28 U.S.C. 1331, and 1338(a). As discussed further below in paragraphs 13–24, an actual and justiciable controversy exists between Chewy and Defendant as to non-infringement of the Asserted Patents.

7. This Court has personal jurisdiction over Defendant because, on information and belief, Defendant is organized under the laws of New York and maintains its principal place of business in this jurisdiction.

8. Venue is proper in this judicial district pursuant to 28 U.S.C. §§ 1391(b) and 1391(c).

THE ASSERTED PATENTS

9. The '849 patent is titled “Method for Presenting Advertising in an Interactive Service.” The '849 patent issued on July 4, 2006 to named inventors Robert Filepp, Alexander W. Bidwell, Francis C. Young, Allan M. Wolf, Duane Tiemann, Mel Bellar, Robert D. Cohen, James A. Galambos, Kenneth H. Appleman, and Sam Meo. The face of the '849 patent states that the patent was initially assigned to IBM.

10. The '414 patent is titled “Method, Framework, And Program Product For Formatting And Serving Web Content.” The '414 patent issued on February 14, 2017 to named inventors Jennifer Lai, Zhiqiang Liu, Brian J. McDonald, Laurie Miller, Yael Ravin, and Karen A. Ughetta. The face of the '414 patent states that the patent was initially assigned to IBM.

11. The '443 patent is titled “System And Technique For Automatically Associating Related Advertisements To Individual Search Results Items Of A Search Result Set.” The '443 patent issued on July 11, 2006 to named inventors Michael L. Emens and Reiner Kraft. The face of the '443 patent states that the patent was initially assigned to IBM.

12. The '034 patent is titled “Method And Apparatus For Providing Accessibility

Through A Context Sensitive Magnifying Glass.” The ’034 patent issued on March 9, 2004 to named inventors Herman Rodriguez, Newton James Smith, Jr., and Clifford Jay Spinac. The face of the ’034 patent states that the patent was initially assigned to IBM.

THE PARTIES’ DISPUTE CONCERNING THE ASSERTED PATENTS

13. While IBM has obtained thousands of patents over the past 20 years, it is widely accepted that IBM does not itself make or sell any products or services covered by the vast majority of those patents. Instead, IBM has an army of lawyers who try to patent just about anything (*see* “IBM Shamed Into Giving Away Awful Patent On Email Out-Of-Office Messages,” <https://www.techdirt.com/articles/20170301/16185236820/ibm-shamed-into-giving-away-awful-patent-email-out-of-office-messages.shtml>), and then aggressively seeks to license those patents. (*See* “Today’s IBM is Acting Like a Patent Troll and Arming Active Patent Trolls, Just Like Microsoft Does,” <http://techrights.org/2018/10/03/ibm-suing-the-whole-industry/>.)

14. As part of its licensing campaign, IBM has accused numerous well-known web-based companies of infringing very early Internet patents and demanded large sums in royalty payments to avoid costly litigation. (*See* “Today’s IBM is Acting Like a Patent Troll and Arming Active Patent Trolls, Just Like Microsoft Does,” <http://techrights.org/2018/10/03/ibm-suing-the-whole-industry/>) (“IBM uses old software patents for blackmail.”). Many of those companies accused of infringement refused to take licenses and were ultimately sued by IBM. For example, since 2013, IBM has sued Twitter (2013), Priceline (2015), Groupon (2016), Expedia (2017), Zillow (2019) and Airbnb (2020). And, in the end, almost all them “basically surrendered and agreed to pay IBM loads of money without an actual trial that tests the patents at hand” (*Id.*). Only the litigation against Zillow is outstanding.

15. In furtherance of this campaign of seeking exorbitant licensing fees for early Internet patents having no value, on July 6, 2020, Ms. Leann M. Pinto of IBM sent a letter to Mr. Sumit Singh, CEO of Chewy, with the subject line “Notice of Infringement for IBM US Patent Nos.: 7,072,849; 9,569,414; 7,076,443; and 6,704,034.” The letter states that Chewy “is infringing at least [the four Asserted Patents] by operation of its website Chewy.com.” The letter also states

that “IBM views your continued use of all of these inventions as a serious matter” and that, while IBM “prefer[s] a negotiated business resolution,” it “has been forced to resolve infringement of its patents through judicial proceedings at times.” The letter further states that IBM has “initiated patent litigations against Amazon, Priceline, Expedia, Zillow, Airbnb, and Groupon, among others, to redress the unauthorized use of IBM’s patented inventions.”

16. On July 31, 2020, Mr. Tom McBride of IBM sent four claim charts to Chewy allegedly showing how the operation of Chewy.com infringes claim 1 of the ’849 patent, claim 1 of the ’414 patent, claims 1 and 5 of the ’443 patent, and claim 1 of the ’034 patent.

17. On October 6, 2020, Mr. Joshua L. Raskin of Greenberg Traurig sent a response to IBM on behalf of Chewy. The letter states, among other things, that “Chewy does not infringe any of the asserted claims of [the Asserted Patents] and, therefore, Chewy declines IBM’s invitation to meet or otherwise discuss a ‘business resolution.’” The letter further states that:

- Chewy’s website cannot infringe claim 1 of the ’849 patent for at least the reason that the website does not pre-fetch advertising objects for future use, while the claim recites the step of “selectively storing advertising objects at a store established at the reception system,” which has been construed to require “pre-fetching advertising objects and storing at a store established at the reception system in anticipation of display concurrently with the applications”;
- Chewy’s website cannot infringe claim 1 of the ’414 patent for at least the reason that the website utilizes JavaScript objects and JavaScript functions that are fetched via separate requests, while the claim recites the step of requesting a set of JavaScript objects and a set of JavaScript functions in a single HTTP request;
- Chewy’s website cannot infringe claim 1 or claim 5 of the ’443 patent for at least the reasons that the website does not associate any advertisements based on the words in the selected search result item, while claims 1 and 5 each requires the step of “identifying said at least one associated advertisement from said repository having at least one word that matches said at least one search result item”; and

- Chewy’s website cannot infringe claim 1 of the ’034 patent for at least the reason that the claim requires the step of “magnifying presentation of the object based on the object type of the object,” and the images on Chewy’s website are magnified based on a data-zoom-id=“Zoomer” attribute and not because they are images.

Accordingly, the October 6, 2020 letter states that “Chewy does not infringe . . . and declines IBM’s invitation to discuss any ‘business resolution.’” The letter concludes by stating that, “[s]hould IBM continue to assert its baseless claims, you are hereby on notice that Chewy reserves all rights, including to seek its fees and costs.”

18. In response to the October 6, 2020 letter, on October 16, 2020, Ms. Pinto, on behalf of IBM, sent a letter purporting to rebut Chewy’s non-infringement positions as to the four Asserted Patents. The letter states that “IBM respectfully reiterates its request for a meeting with Chewy so that you may have a better understanding of IBM’s position with respect to the four IBM patents that Chewy continues to infringe.” In addition, in a cover email, Mr. Tom McBride, also on behalf of IBM, stated that, “[b]ased on the IBM patents being practiced by Chewy, we estimated the damages and future royalties. For Chewy, it exceeds \$83 M. Not counting willfulness, this is the amount we would be seeking if this matter goes to trial.” IBM then offered to settle the dispute based on a payment by Chewy of \$36 million in exchange for a cross-license, pointing out that others have paid IBM for cross-licenses ranging from \$20 million to \$57.5 million. IBM also stated that “[t]his offer expires December 31, 2020.”

19. On December 9, 2020, Mr. Raskin sent another letter to IBM, addressed to Ms. Pinto. Among other things, the letter reiterates that “Chewy does not infringe any valid claim of the four asserted IBM patents” and thus “declines to attend a meeting to discuss [IBM’s meritless infringement allegations].”

20. On December 17, 2020, Ms. Pinto replied to the December 9, 2020 letter, stating that “Chewy’s continued and unfounded assertions that IBM’s infringement proofs are ‘meritless’ and patterns of behavior in its dealings with IBM would support enhanced damages under 35 U.S.C. § 284.” In addition, the letter stated that, “[b]y refusing to engage in business discussions,

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
