**Michael H. Simon, District Judge.**

In this multidistrict proceeding, Plaintiffs bring a putative nationwide class action against Defendant Intel Corporation (Intel) relating to certain security vulnerabilities in Intel’s microprocessors. Plaintiffs contend that Intel knew for decades about two alleged design defects in its microprocessors that created security vulnerabilities and that Intel failed to disclose or mitigate these vulnerabilities. Plaintiffs also allege that the way these security vulnerabilities could be exploited became publicly known beginning on January 3, 2018, and that new ways continue to be discovered and publicized. These forms of exploit have become generally known as “Spectre,” “Meltdown,” “Foreshadow,” “ZombieLoad,” “SwapGS,” “RIDL,” “LazyFP,” “CacheOut,” and “Vector Register Sampling,” among others. Plaintiffs contend that until Intel fixes the alleged defects at the hardware level, additional ways to exploit these security vulnerabilities likely will still be discovered.

Plaintiffs allege that Intel’s processors have two general design defects. First, the design of the processors heightens the risk of unauthorized access to protected memory secrets. This is called “Unauthorized Access.” Second, the design does not completely delete, or undo, the memory’s recent retrieval of those secrets, also increasing the risk of unauthorized access. This is called “Incomplete Undo.” Plaintiffs contend that these two general design defects create security vulnerabilities that could expose confidential data and that many of the resulting exploits of these vulnerabilities are unique to Intel microprocessors. Plaintiffs also allege that Intel cannot fix these defects “after-the-fact” with software alone and that the software patches that have been created and distributed by Intel after January 3, 2018 to mitigate these defects substantially diminish the speed of Intel’s processors.

Intel already has moved three times to dismiss this lawsuit. The Court granted the first motion and gave Plaintiffs leave to amend. *See In re Intel Corp. CPU Mktg., Sales Pracs. &*

*Prod. Liab. Litig. (Intel I)*, 2020 WL 1495304 (D. Or. Mar. 27, 2020). Plaintiffs then filed an Amended Consolidated Class Action Allegation Complaint. That pleading asserted the following nationwide putative class claims: (1) fraud by concealment or omission; (2) breach of California's Consumers Legal Remedies Act (CLRA), Cal. Civ. Code §§ 1750, *et seq.*; (3) breach of California's Unfair Competition Law (UCL), Cal. Bus. & Prof. Code §§ 17200, *et seq.*; (4) breach of California's False Advertising Law (FAL), Cal. Bus. & Prof. Code §§ 17500, *et seq.*; and (5) unjust enrichment, or quasi-contract. Plaintiffs also asserted separate putative state subclass claims for each state except California, Kentucky, and Massachusetts, plus the District of Columbia, under each jurisdiction's deceptive or unfair trade practices act or consumer protection law. Plaintiffs sought both money damages and injunctive relief.

The Court granted Intel's second motion to dismiss. *See In re Intel Corp. CPU Mktg., Sales Pracs. & Prod. Liab. Litig. (Intel II)*, 2021 WL 1198299 (D. Or. Mar. 29, 2021). The Court gave Plaintiffs leave to amend their nationwide claim under California's UCL alleging unfair conduct, their nationwide claim for unjust enrichment, and their state subclass claims. The Court dismissed all other claims with prejudice.

Plaintiffs then filed a Second Amended Consolidated Class Action Allegation Complaint (Second Amended Complaint). This pleading realleges the two nationwide claims for which the Court granted leave to replead. The first is a claim alleging breach of California's UCL by engaging in unfair conduct. The second is a claim alleging unjust enrichment. The Second Amended Complaint also alleges the same state subclass claims under each jurisdiction's deceptive or unfair trade practices act or consumer protection law. Intel again moved to dismiss.

The Court granted in part Intel's motion to dismiss the Second Amended Complaint. *See In re Intel Corp. CPU Mktg., Sales Pracs. & Prod. Liab. Litig. (Intel III)*, --- F. Supp. 3d ---,

2022 WL 225304 (D. Or. Jan. 26, 2022). The Court dismissed with prejudice all claims except those brought by seven Named Plaintiffs who asserted claims based on Intel's alleged conduct on or after September 1, 2017. The Court also dismissed the claims of even those seven Named Plaintiffs other than: (a) their nationwide claim under California's UCL alleging unfair conduct; (b) their nationwide claim alleging unjust enrichment; (c) their state subclass claims alleging unfair conduct; and (d) their state subclass claims alleging unconscionable conduct. In other words, the Court granted in part and denied in part Intel's motion to dismiss, allowing only certain claims asserted by the seven Named Plaintiffs who purchased devices containing Intel processors *after* September 1, 2017.

Now before the Court is Intel's motion for reconsideration of *Intel III* or, in the alternative, motion for certification for interlocutory appeal under 28 U.S.C. § 1292(b). For the reasons discussed below, the Court grants Intel's motion for reconsideration and now dismisses this lawsuit in its entirety.

## STANDARDS

### A. Motion for Reconsideration

Rule 54(b) of the Federal Rules of Civil Procedure provides that any order “may be revised at any time before the entry of a judgment adjudicating all the claims and all the parties’ rights and liabilities.” Fed. R. Civ. P. 54(b). The rule, however, does not address the standards that a district court should apply when reconsidering interlocutory orders, and the Ninth Circuit has not established a standard of review. “Rule 54(b) is not a mechanism to get a ‘do over’ to try different arguments or present additional evidence when the first attempt failed. Thus, while the limits governing reconsideration of final judgments under Rule 59(e) do not strictly apply, courts frequently invoke them as common-sense guideposts when parties seek reconsideration of an

interlocutory ruling under Rule 54(b).” Stephen S. Gensler & Lumen N. Mulligan, 2 *Fed. R. of Civ. P., Rules and Commentary*, Rule 54 (2022).

When reconsidering an interlocutory order, district courts in the Ninth Circuit have stated:

Motions to reconsider under Rule 54(b), while generally disfavored, may be granted if: (1) there are material differences in fact or law from that presented to the court and, at the time of the court’s decision, the party moving for reconsideration could not have known the factual or legal differences through reasonable diligence; (2) there are new material facts that happened after the Court’s decision; (3) there has been a change in law that was decided or enacted after the court’s decision; or (4) the movant makes a convincing showing that the court failed to consider material facts that were presented to the court before the court’s decision.

Big S. Wholesale of Virginia, LLC*, 899 F.3d 236, 257 (4th Cir. 2018) (noting that courts have more discretion in evaluating reconsideration under Rule 54(b) and concluding that “a court may revise an interlocutory order under the same circumstances in which it may depart from the law of the case: (1) a subsequent trial producing substantially different evidence; (2) a change in applicable law; or (3) clear error causing manifest injustice” (quotation marks omitted)).

However, “[w]hile a motion for reconsideration allows a party to bring a material oversight to the court’s attention, it is not appropriate for a party to request reconsideration merely to force the court to think about an issue again in the hope that it will come out the other way the second
