Instruction

Claims to 1997 ACS - § 102

ments v. My response

able Subject Matter - § 101

Asserted Patent – Claim 39

Method for processing returned mail items sent by a sender to an intended recipient, the method comprising:

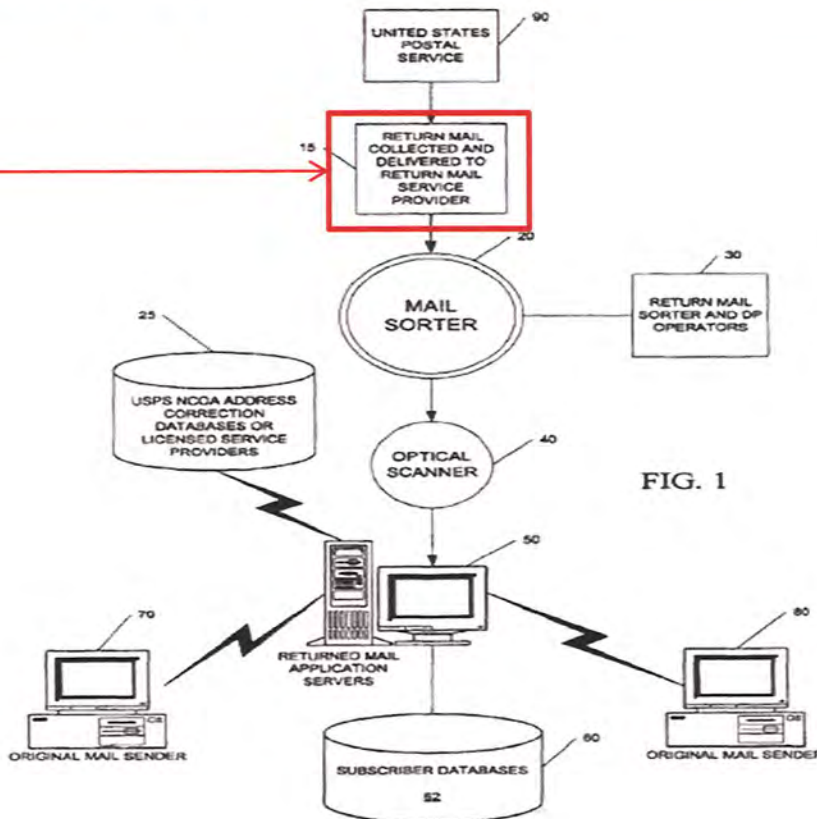

- receiving, subsequent to mailing of the returned mail items, an indication indicating whether the sender wants a corrected address to be provided for the intended recipient, on at least one of the returned mail items;
- determining an updated address of the intended recipient based on the indication;
- transmitting to the sender, subsequent to determining that the sender wants a corrected address to be provided for the intended recipient; and
- electronically transmitting an updated address of the intended recipient to a transferee, wherein the transferee is a return mail provider.

An Example

processing
 sent by a sender to
 the method

sequent to mailing
 ms, information
 sender wants a
 e provided for
 on at least one
 ms;
 lated address of
 subsequent to
 ender wants a
 e provided for
 and
 nsmittin an
 e intended
 e, wherein the
 mail service

Referring to Fig. 1 at the return mail service provider's location, the returned mail (block 15) is received from the United States Postal Service (block 90). (3:39-43)

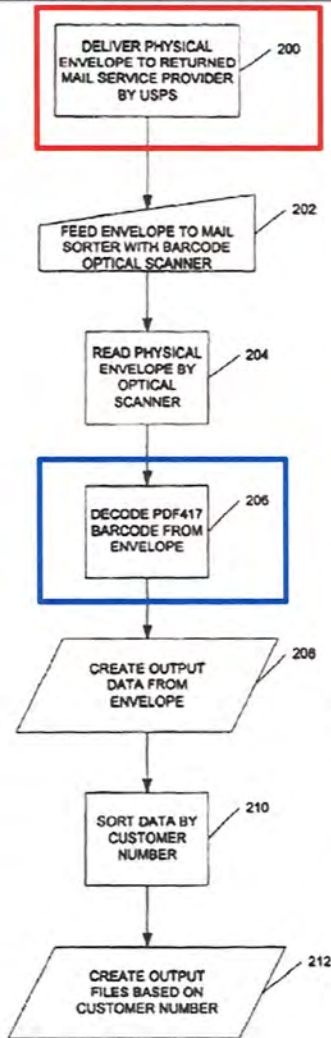

An Example

processing
 sent by a sender to
 the method

request to mailing
 ms, information
 sender wants a
 e provided for
 on at least one
 ms;

ated address of
 subsequent to
 sender wants a
 e provided for
 and
 nsmitting an
 e intended
 e, wherein the
 mail service

The undeliverable mail is then fed through the mail sorter 20 with barcode optical scanner 40, as indicated in input block 202. The optical scanner 40 then reads the machine-readable information on each envelope as indicated in logic block 204. The two-dimensional barcode is then decoded from each envelope as indicated in logic block 206. (4:41-44)

'548 Patent at FIG. 2, 4:41-44

FIG. 2

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
