## Download

### Current Users

Directly download the latest products below. Your valid license key will support the install of your software.

### New Users

Please [buy](#) a valid license key from our store or try a 30-day evaluation (if available) and directly download the latest products below. You will receive a valid license key to support the install of your software.

Please read the install notes for VMware Workstation (for [Windows NT/2000](#)), VMware Workstation (for [Linux](#)), VMware GSX Server Beta (for [Windows NT and Windows 2000](#)) or VMware GSX Server (for [Linux](#)) for installation support. After you have installed the VMware Workstation software and a guest operating system, install the VMware Tools (Settings > VMware Tools Install...) in the guest operating system for greatly improved performance.

If you have any questions during the evaluation process, please refer to our [Evaluation FAQs](#) page.

**Please note** that VMware provides telephone support only for customers who have purchased a premium support package from us at either the Gold or Platinum level. Commercial or academic purchasers of our products may receive assistance by visiting [the Support section](#) of our Web site. There, you will find comprehensive information about all of our support options and services and will be guided through the process of filing an incident report.

If you are an evaluation user of any of our products, VMware offers [self-help on our Web site](#). We do not currently offer any additional assistance.

### Desktop Products

VMware Workstation 2.0.4	(for Windows NT/2000)	<a href="#">Buy</a>   <a href="#">Try</a>   <a href="#">Download</a>
