1	THE VIDEOGRAPHER: We are on the	1	Q. Is it more than ten hours?
2	record. This is the videographer speaking,	2	A. Certainly.
3	Shawn Budd, with Transperfect Legal	3	Q. Is it more than a hundred hours?
4	Solutions. Today's date is October 21st,	4	A. Probably.
5	2015, and the time is 9:04 a.m.	5	Q. More than 200 hours?
6	We are here in Boston,	6	A. If I were to guess, I would guess
7	Massachusetts, to take the video	7	it's going to be between somewhere between
8	deposition of William Michalson in the	8	a hundred and 200 hours.
9	matter of adidas AG and adidas America,	9	Q. Okay. Well, at one of your
10	Inc., versus Under Armour and	10	breaks, I think I'd like you to find out for
11	MapMyFitness, Inc.	11	sure.
12	Would counsel please introduce	12	A. I won't be able to do that, I
13	themselves?	13	don't think. I'll try. I'll see what I can
14	MR. DESAI: Anish Desai and	14	do.
15	Sutton, and we're for Under Armour.	15	Q. You don't keep track of your
16	MR. OLINGER: Jonathan Olinger and	16	hours?
17	Mitch Stockwell here for Plaintiff	17	A. I do. I just don't have those
18	adidas.	18	records with me.
19	THE VIDEOGRAPHER: And would the	19	Q. Are you able to access those
20	court reporter please swear in the	20	records?
21	witness?	21	A. I don't think so, but I will see
22	WILLIAM R. MICHALSON, Deponent,	22	what I can do. I don't think I can access
23	having first been satisfactorily identified	23	them all.
24	by the production of his Massachusetts	24	Q. How many times have you testified,
25	driver's license and duly sworn by the Notary	25	as an expert witness, in a patent case?
	Page 7		Page 9
1	Public, was examined and testified as	1	A. Many. Dozens.
2	follows:	2	Q. Roughly speaking, how many times
3	EXAMINATION	3	have you provided an opinion that a patent
4	BY MR. DESAI:	4	that was issued by the U.S. Patent Office was
5	Q. Good morning, Dr. Michalson.	5	invalid?
6	A. Good morning.	6	A. Probably dozens.
7	Q. When were you retained by the	7	Q. There are two sets of patents in
8	Plaintiff adidas to provide opinions in this	8	this case, the Werner patents and the Ellis
9	litigation?	9	patents; is that right?
10	A. I don't recall specifically. I'd	10	A. Correct.
11	have to go back and look at the engagement	11	Q. Okay.
12	letter.	12	And the named inventors of the
13	Q. Was it this year, the year before?	13	Werner patents are John Werner and Scott
14	A. I don't recall.	14	Doyle; correct?
15	Q. How many hours have you worked on	15	A. I believe so, yes.
16	this litigation to date?	16	THE REPORTER: I'm sorry, what
17	A. Well, I'm a little bit back on my	17	were the names?
18	invoices. I don't really know how many hours	18	MR. DESAI: John Werner and Scott
19	I've put in since my last invoice. I haven't	19	Doyle.
20	recorded them yet.	20	BY MR. DESAI:
21	Q. You have no idea how many hours	21	Q. Have you ever spoken to either of
22	approximately you've worked on this case?	22	these gentlemen before?
23	A. I'm really not sure. I don't I	23	A. No.
23	haven't entered that recently so I haven't	24	Q. Have you had any email
25	looked at that.	25	communications with them?
2.0	iookou at mat.	20	Communications with them:
			·

Page 10		Page 12
1 A. No.	1	Do you mean when could some a
2 Q. The named inventors of the Ellis	2	civilian receive a GPS signal.
patents are Michael Ellis and Caron Schwartz;	3	Q. Yeah, that's what I mean.
4 is that correct?	4	A. Probably early '80s you could
5 A. That sounds correct.	5	perceive some of the block one satellite
6 Q. Okay.	6	signals.
7 Have you ever spoken or	7	Q. Okay.
8 communicated with either of them before?	8	Has the availability of the
9 A. No.	9	satellites to the public changed over time?
10 Q. Okay.	10	A. There have been a lot of changes
Dr. Michalson, who was responsible	11	to the GPS system over time. It was first
for creating the global system Global	12	declared operational in the '90s.
Positioning System, GPS?	13	Q. What does that mean, that it was
14 A. That's a very big question.	14	declared operational in the '90s?
15 Q. Can you answer it?	15	A. That meant that the Air Force had
16 A. It was conceived and initially	16	enough confidence in the system that they
implemented by the U.S. Air Force under the	17	could rely on the specifications of that
direction of, at the time, Kernel Brad	18	system.
19 Parkinson.	19	Q. When, in the '90s, did that
Q. And when did that take place,	20	happen?
21 approximately? What decade?	21	A. I believe IOC, which was the
22 A. '70s.	22	initial operational capability was
Q. Since the time so you said it	23	announced I would have to check the date.
was originally conceived and implemented by	24 25	I want to say '95.
25 the U.S. Air Force. Have other parties been	25	Q. Now, just so lay people aren't
Page 11		Page 13
-		
involved in the creation of the system since	1	confused, the system was working before 1995,
2 then?	2	but it was just declared to be fully
A. What do you mean by "the creation of the system"?	3	operational after that time? I'm just
4 of the system"? 5 Q. Well, I'm referring to the	4 5	A. Well, there was a period of time when they didn't have a complete
6 satellites and the GPS satellites that are	6	constellation, and they also did not have
7 orbiting the earth.	7	enough recorded data to be able to rely on
8 A. Well, the satellites are created	8	reliably meet the specifications. There were
by a contractor for the Air Force.	9	periods when satellites might be taken off
10 Q. Okay.	10	arbitrarily. So if you are using GPS for any
11 A. I know there have been I mean,	11	particular application, its performance
there are several contractors that would be	12	wasn't guaranteed before it was declared
involved in that.	13	operational. Once it was declared
Q. Who is ultimately in control of	14	operational, that meant that it had a certain
15 the satellites?	15	minimum operational capability.
16 A. Right now there's a Joint Program	16	Q. Okay.
Office, and the control of the satellites is	17	Did you have any role in the
shared by the Department of Transportation	18	design and development of the GPS system?
and the Department of Defense. I believe the	19	A. The GPS satellites themselves, no.
20 actual flight control center is manned by Air	20	Q. Okay.
Force personnel.	21	Did you it sounds like you had
Q. When was the collection of GPS	22	some other role.
satellites made available for public use?	23	A. I did a fair amount of work with
A. Again, that's a difficult question	24	the F sponsored by the FAA in evaluating
in some ways.	25	what they call receiver autonomous integrity
		4 (Pages 10 to 13)

	Page 14		Page 16
1	monitoring algorithms. There was a period of	1	against us, and therefore they implemented
2	time where the FAA wanted to be able to	2	selective availability to reduce the accuracy
3	approve GPS for use in civilian aircraft	3	of a civilian receiver.
4	navigation; and in order to do that, they had	4	Q. Okay.
5	to be able to verify the integrity and	5	So selective availability was a
6	reliability and verify that that met the	6	way for the U.S. Government to intentionally
7	standards of the FAA. So some of the work	7	limit the accuracy of GPS receivers available
8	that I was involved with early on was	8	to the public?
9	involving the valuation and test of	9	A. At that time, yes.
10	algorithms for performing that receiver	10	Q. And when did that when did
11	autonomous integrity monitoring.	11	selective availability, you know, get
12	So I worked with the RTCM	12	switched off or turned off?
13	excuse me the RTCA working groups that	13	A. I believe it was May 1st, 2000.
14	were putting together the specifications that	14	Yeah, I think it was 2000.
15	ultimately would be used by the FAA to draft	15	Q. So before selective availability
16	their regulations.	16	was switched off, so before May 2000, what
17	Q. So you mentioned GPS receivers,	17	was the accuracy of a civilian GPS receiver?
18	and is it fair to say that the, you know, two	18	A. That depends upon whether
19	basic components of the GPS system are the	19	selective availability was on or off or
20	receivers that are located on the ground or	20	whether or not you were using differential
21	on the surface of the earth and the	21	corrections. Very often selective
22	satellites orbiting the earth?	22	availability was off, in which case your
23	A. No, not really. There's a third	23	receiver would be three to five meter
24	part that would be the control system.	24	accuracy, typically.
25	Q. Okay.	25	With selective availability on, it
	Page 15		Page 17
1	So then is it fair to say that the	1	would be it would be around a hundred
2	GPS system is composed of the satellites, the	2	meter extremes, but the average accuracy
3	receivers on the ground and a control	3	would be very high. So if you averaged over
4	system?	4	several minutes, you'd be able to get a very
5	A. Yeah, the ground control, yes.	5	accurate position even in the presence of
6	Q. Okay.	6	selective availability; or if you had a
7	And you had some involvement in	7	differential correction, you'd be able to
8	designing and evaluating GPS receivers;	8	get, you know, one to three meter
9	correct?	9	positioning.
10	A. Yes.	10	Q. So I guess are you saying that
11	Q. Okay.	11	selective availability didn't really work the
12	But you had no involvement in	12	way it was supposed to?
13	designing or developing the control center or	13	A. No, that's not what I'm saying.
14	the GPS satellites; correct?	14	Q. Okay.
15	A. Correct.	15	So was the U.S. Government
16	Q. Okay.	16	actually able to prevent civilians from
17	Have you heard of the term	17	having GPS receivers that could provide three
18	"selective availability"?	18	to five meter accuracy before switching off
19	A. Yes.	19	selective availability?
20	Q. What does that mean to you?	20	A. Well, the way you phrased that, I
21	A. What selective availability was,	21	think the answer is no.
22	was a mechanism for reducing the achievable	22	Q. Okay.
23	accuracy of the GPS receiver. There was a	23	Why did the government switch off
24	period of time that the military was	24	selective availability; do you know?
25	concerned that the GPS system could be used	25	A. There are a lot of reasons. I

# DOCKET

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

# **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

### API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

#### **LAW FIRMS**

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

#### **FINANCIAL INSTITUTIONS**

Litigation and bankruptcy checks for companies and debtors.

### **E-DISCOVERY AND LEGAL VENDORS**

Sync your system to PACER to automate legal marketing.
