DOCKET

IPR2016-00174, Paper No. 25 February 27, 2017

### UNITED STATES PATENT AND TRADEMARK OFFICE

### BEFORE THE PATENT TRIAL AND APPEAL BOARD

UNIFIED PATENTS INC, Petitioner,

v.

NONEND INVENTIONS N.V., Patent Owner.

> Case IPR2016-00174 Patent 8,090,862 B2

Held: February 8, 2017

BEFORE: MICHAEL W. KIM, JENNIFER S. BISK, and DANIEL N. FISHMAN, Administrative Patent Judges.

The above-entitled matter came on for hearing on Wednesday, February 8, 2017, commencing at 1:00 p.m., at the U.S. Patent and Trademark Office, 600 Dulany Street, Alexandria, Virginia.

### **APPEARANCES:**

### ON BEHALF OF THE PETITIONER:

DAVID L. CAVANAUGH, ESQUIRE MICHAEL VAN HANDEL, ESQUIRE Wilmer Cutler Pickering Hale and Dorr LLP 1875 Pennsylvania Avenue, N.W. Washington, D.C.

--and—

DOCKET

JONATHAN STROUD Chief Patent Counsel Unified Patents 1875 Connecticut Avenue, N.W. Floor 10 Washington, D.C. 20009

### ON BEHALF OF PATENT OWNER:

MATTHEW ANTONELLI, ESQUIRE Antonelli, Harrington & Thompson LLP 4306 Yoakum Boulevard Suite 450 Houston, Texas 77006

1	PROCEEDINGS
2	
3	JUDGE BISK: Good afternoon. This is a hearing for
4	IPR 2016-00174 involving Patent 8,090,862, Unified Patents as
5	the Petitioner and I'm not sure if I'm saying this right, but Nonend
6	Inventions is the Patent Owner.
7	As you know, we gave 60 minutes to each side for this
8	case. And since there is no motion to amend, Petitioner, you will
9	be the last to speak. So just let me know when you stand up how
10	much time you want to save.
11	And if you're going to I think we only received one
12	set of slides. Is that correct?
13	MR. ANTONELLI: That is correct. Matt Antonelli for
14	Nonend. We did not present any slides.
15	JUDGE BISK: Okay. I just want to make sure we're
16	[not] missing something. So when you're talking, if you could
17	specify the slide you're on because Judge Fishman can't see the
18	screen. Okay?
19	MR. CAVANAUGH: Yes, Your Honor.
20	JUDGE BISK: Oh, can we get a roll call for the
21	record?
22	MR. CAVANAUGH: Dave Cavanaugh for the
23	Petitioner. With me is Jonathan Stroud from Unified Patents and
24	also Mike Van Handel from Wilmer Hale, also with Unified
25	Patents.

3

1 JUDGE BISK: Okay. And the Patent Owner? 2 MR. ANTONELLI: Matt Antonelli. I represent 3 Nonend. 4 JUDGE BISK: Okay. Thank you. All right. 5 Whenever you're ready. 6 MR. CAVANAUGH: Thank you, Your Honor. 7 May it please the Board, I'm Dave Cavanaugh. As I 8 mentioned a moment ago, the Petitioner is Unified Patents and 9 this inter partes review is centered around an issue of streaming video data and we'll be talking about a variety of attributes of 10 11 that. The Board in the Decision on Institution granted three 12 different grounds. We'll talk about each of those grounds and 13 address the particular issues raised by the Patent Owner. 14 Before that so that everyone is on the same page, we'll 15 provide a brief description of the '862 patent and then provide an 16 overview of the prior art. I'd like to reserve just for the record 10 minutes of rebuttal time and my colleague and I will split the 17 18 argument for the first part and up until the description of the first 19 ground I will be presenting and then Jonathan Stroud will be 20 presenting for the second and third grounds and we'll make that 21 transition as smooth as possible. 22 JUDGE BISK: Okay. Thank you. 23 MR. CAVANAUGH: So the '862 patent, as I 24 mentioned, relates to a way of streaming data. I think what we've

25 presented on slide 3 here is kind of a representative illustration,

1 Figure 13 of the '862 patent and, you know, essentially the center 2 circle is a consumer node that is going to -- getting ready or in this case receiving media stream and information from another 3 4 node, a first node, getting the information stored in the buffer and 5 then out in the green lines, which I've added just for clarity, the 6 green line going down to the consumer manager, which is in the 7 center of the consumer node circle out to the stream target, which 8 is on the lower right-hand side of the illustration.

9 And so the consumer node just as a circle is both
10 receiving and buffers the information from the first node and then
11 passes that information to the stream target.

12 You know, so following Figure 13, Figure 14 describes 13 a circumstance, and this is illustrated on slide 4, where a second 14 node is included that is -- and that's shown on the left-hand side 15 of Figure 14, on the top left-hand side, and that is kind of an 16 indication that the consumer node is seeking or requesting for the 17 media potentially to come from node B. Perhaps it's a slow 18 connection. Perhaps the data connection is not as robust from 19 node A and the consumer node is seeking another node to gain 20 the data. And that's what's represented here.

And then once there is a switch-off, let's say node B is -- and this is on slide 5. Node B is demonstrated to be a better quality node to provide the content. The node will switch and information will proceed from node -- from node B to the

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

### **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

# **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

### API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

### LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

### FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

### E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
