# CONTENTS

Pretace	<u>л</u>
Acknowledgements	xiii
1 Rationale and Utilization	1
1.1 Logical compression	2
1.2 Physical compression	3
1.3 Compression benefits	4
1.4 Terminology	5
Compression efficiency	6
Compression methods	7
1.5 Communications applications	12
1.6 Data storage applications	16
1.7 Other applications	17
1.8 Data compression and information transfer	18
BISYNC communications	19
<ul> <li>2 Data Codes and Compression-indicating Characters</li> <li>2.1 Data codes         <ul> <li>Boudot code</li> <li>BCD and EBCDIC codes</li> <li>The ASCII code</li> </ul> </li> <li>2.2 Selecting compression-indicating characters         <ul> <li>Logical compression-indicating characters</li> <li>Physical compression-indicating characters</li> </ul> </li> </ul>	34 35 35 35 39 39 41 43
	47
3 Character-oriented Compression Techniques	47
3.1 Null suppression	48
Technique overview	48
Programming examples	50
File naming conventions	50
Compression program	52
Decompression program	53
Technique variations	59

		CONTENTS
3.2	Bit mapping	60
	Encoding process	60
	Hardware considerations	61
	Suppression efficiency	61
	Bitmap variations	65
	Technique constraints	66
3.3	Run length	68
	Operation	68
	Encoding process	69
	Decoding	71
	Utilization	72
	Programming examples	77
	Decompression	83
3.4	Half-byte packing	90
	Encoding format and technique efficiency	92
	Encoding process	96
	Decoding	99
	Programming examples	99
	Encoding	100
	Decompression	107
	Extended half-byte	109
	BASIC compression program	109
	BASIC decompression program	118
	Encoding variations and efficiency considerations	125
3.5	Diatomic encoding	128
	Operation	128
	Air frequency of occurrence	129
	Communications hardware implementation	133
	Programming examples	137
	Decompression	143
	Encoding considerations	148
3.6	Byte pair encoding	150
	Expansion	156
	Efficiency	157
3.7	Pattern substitution	157
	The pattern table	159
	Encoding process	159
	Patterns in programming Languages	161
3.8	Forms-mode operation	163
	Transmission	165
	Modified forms-mode method	167
4	Statistical Encoding	170
	Information theory	170
	Entropy examples	173
4.2	Huffman coding	176
	Prefix property of code	176
	Code construction considerations	181
	Information requirements	184
	HUFF1.C	186

# DOCKET A L A R M

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

# **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

# **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

#### LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

#### FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

### E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
