

**IN THE UNITED STATES DISTRICT COURT
FOR THE DISTRICT OF MASSACHUSETTS**

ENERGETIQ TECHNOLOGY, INC.,

Plaintiff,

v.

ASML NETHERLANDS B.V.,
EXCELITAS TECHNOLOGIES CORP., and
QIOPTIQ PHOTONICS GMBH & CO. KG,

Defendants.

Civil Action No. 1:15-cv-10240-LTS
FILED UNDER SEAL

**DECLARATION OF DONALD K. SMITH, PH.D. IN SUPPORT OF
ENERGETIQ'S MOTION FOR A PRELIMINARY INJUNCTION**

I. INTRODUCTION

1. I, Donald K. Smith, Ph.D., am President of Energetiq Technology, Inc. ("Energetiq"), which has its principal place of business at 7 Constitution Way, Woburn, MA 01801. I have worked at Energetiq Technology, Inc. in this capacity since 2004.

2. I submit this declaration in support of Energetiq's Motion for a Preliminary Injunction.

3. I have personal knowledge of the facts set forth in this declaration, unless otherwise noted. If called upon as a witness, I could and would competently testify to the statements made herein.

II. QUALIFICATIONS

4. I am a named inventor on each of the patents asserted in this litigation: United States Patent No. 7,435,982, entitled "Laser-Driven Light Source," (the "982" patent), a true

IV. ENERGETIQ'S PATENTED TECHNOLOGY

7. For decades, the brightest broadband (white) light source for semiconductor wafer inspection and metrology was the Xenon or Mercury arc lamp. The brightness of this source was fundamentally limited by the basic principles of physics that it employed and failed to progress over time—even as the semiconductor industry demanded constant improvements in the throughput and resolution of wafer inspection and metrology.

8. For many years the necessary improvements in these tools had to come through steady improvements in the ability to detect and measure light, rather than from the ability to deliver more light into smaller places, because the arc lamp sources of light were not subject to improvement. This situation eventually led to an ever-growing pent-up demand for a fundamentally new light source in the deep ultra-violet (DUV), visible and infrared ranges of wavelengths. Such a demand existed in the market for at least five years before Energetiq's inventions that are the subject of this lawsuit – the Laser Driven Light Source technology.

9. Energetiq's patented Laser Driven Light Source technology provides a light source for these applications that provides brightness that is greater by an order of magnitude. Thus, Energetiq's technology has increased the productivity of the inspection and metrology tools in the industry greatly. In addition, the lifetime of Energetiq's light sources is about ten times longer than the previously used arc lamps.

10. No competitor technology can mimic these results. These results are both unexpectedly good and solve a long-felt need in the industry.

11. Energetiq's Laser Driven Light Source technology, including inventions covered by the '982, '455, '943, and '138 patents, have received much industry praise and many accolades, including the R&D 100 Award and the Prism Award. See "Winners of 2010 Prism Awards Announced," a true and correct copy of which is attached as Exhibit K; see also Letter

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
