B. Brief Overview of Bowden ‘35925

C. Brief Overview of Guggari ‘95127

D. Detailed obviousness arguments for Claim 1-3 under Bowden ‘359 in view of Guggari ‘951.....28

1. Claim 1.0: Both Bowden ‘359 and Guggari ‘951 teach an automatic driller system for regulating the release of a drill string.....28

2. Claim 1.1: Both Bowden ‘359 and Guggari ‘951 teach a drill stem with a drill bit.....29

3. Claim 1.2: Both Bowden ‘359 and Guggari ‘951 disclose a drawworks.29

4. Claim 1.3: Both Bowden ‘359 and Guggari ‘951 teach a prime mover engaged to the drawworks.....30

5. Claim 1.4: A bit weight sensor “directly” interfaced with a bit support means and electrically coupled to a bit weight comparison means is obvious in view of Bowden ‘359 and explicitly taught by Guggari ‘951.....31

6. Claim 1.5: Bowden ‘359 and Guggari ‘951 teach a bit weight comparison means and generates a signal proportionate to any difference between those two weight values.....39

7. Claim 1.6: Bowden ‘359 and Guggari ‘951 teach a programmable control means coupled to an electric motor that is interfaced with a braking means to control the drill string with respect to WOB.....41

8. Claim 2.0: Guggari ‘951 teaches using a programmable logic controller.44

Petition for *Inter Partes* Review of U.S. Patent No. 6,994,172

9.	Claim 3.0: Bowden ‘359 and Guggari ‘951 teach using a control system for governing drawworks braking in a drilling apparatus.....	45
10.	Claim 3.1: Bowden ‘359 and Guggari ‘951 teaches a sensor means for measuring weight-on-bit directly through a bit support means and generating a proportionate electric signal.....	45
11.	Claim 3.2: Guggari ‘951 teaches an electronic weight-on-bit comparison means.	46
a.	Claim 3.2.a: Guggari ‘951 teaches a computer and memory means for storing program logic, data received from the sensor, and user input data.	47
b.	Claim 3.2.b: Both Bowden ‘359 and Guggari ‘951 teach a user input means for inputting desired weight-on-bit data.....	49
c.	Claim 3.2.c: Guggari ‘951 teaches a signal input means for receiving an electronic signal from the sensor means and for storing signal data.	49
d.	Claim 3.2.d: Bowden ‘359 and Guggari ‘951 teach a motor control signal output means for generating a variable motor control signal proportionate to a desired speed of an electric motor.....	50
e.	Claim 3.2.e: Guggari ‘951 teaches a processing means comparing user input data against the electronic signal data and generating a motor control signal proportional to the measured weight-on-bit.....	52
f.	Claim 3.3: Bowden ‘359 and Guggari ‘951 teach an electronic motor controlled by a proportionate signal from a motor control signal output means and connected to a braking means.....	55
