800 LaSalle Avenue
New York, NY 10022
Suite 2800
Minneapolis, MN 55402
RYAN M. SCHULTZ, ESQUIRE
ROBINS KAPLAN, LLP
800 LaSalle Avenue
New York, NY 10022
Suite 2800
Minneapolis, MN 55402

The above-entitled matter came on for hearing on Thursday, December 21, 2017, commencing at 1:00 p.m., at the U.S. Patent and Trademark Office, 600 Dulany Street, Alexandria, Virginia.

Case IPR 2016-01701 (Patent 9,094,802 B2)

Case IPR 2017-00122 (Patent 9,444,868 B2)

P R O C E E D I N G S

1 JUDGE TORNQUIST: You may be seated. Okay. We are here
2 on IPR2016-1701, and IPR2017-122, Netflix v. Affinity Lab in Texas.
3 Who do we have from Petitioner?

4 MR. HOLMES: Good afternoon, Your Honors. Andrew Holmes
5 on behalf of Petitioner, Netflix. With me today is my associate John
6 McCauley also with the same law firm of Quinn Emanuel. And then
7 from Netflix we've got Mr. Ed Bailey here today.

8 JUDGE TORNQUIST: Welcome. patent owner?

9 MR. SCHULTZ: Ryan Schultz from Robins Kaplan on behalf of
10 patent owner, (indiscernible).

11 JUDGE TORNQUIST: Welcome. Okay. Pursuant to our order of
12 November 17th, each side will have 60 minutes to present argument here
13 today. Petitioner, bearing the burden of proof, you'll go first. You can
14 reserve time for rebuttal if you wish. And then we'll hear from patent
15 owner, and anything else you have.

16 MR. HOLMES: Thank you, Your Honor.

17 JUDGE TORNQUIST: And so when you're ready.

18 MR. HOLMES: Thank you. May it please the Board, Andrew
19 Holmes on behalf of the petitioner. At the outset, Your Honor, if you
20 will, I'd like to reserve 20 minutes for rebuttal.

21 JUDGE TORNQUIST: Sure.

22 MR. HOLMES: Okay. And just so the Board is aware, my
23 colleague and associate here with me is going to be presenting on the
24 '868 patent, the second petition that's at issue here today.

25 JUDGE TORNQUIST: Okay.

1 MR. HOLMES: Okay. So what I'd like to start out by doing is, I
2 know there's a long slide presentation that we submitted, and we're not
3 going to have time to run through every single slide, and I don't intend to
4 do that here today. But the goal for us really is to focus on what are the
5 disputes, what matters. And so the opening part of my presentation will
6 be to focus on claim construction in the '802 patent, and then Mr.
7 McCauley will focus on some of the main disputes that we feel are at
8 issue in the '868 patent as well. And then I'm happy to answer any
9 questions as we go and then we'll reserve our time for rebuttal.

10 So just a beginning, a quick overview, the 2016-1701 petition
11 relates to the '802 patent, there were five grounds instituted by the Board.
12 The second IPR that we're here for is the 2017-122 petition, that's the
13 '868 patent that we'll be referring to, there were two grounds instituted for
14 that one. And I know the Board may be familiar with these -- the patent,
15 (indiscernible) as well, but just as a brief background, these two patents
16 share a common specification, a lot of the same terminology is used
17 across the claims, the claims are, in many ways, similar. And so we're
18 trying -- we're going to try to streamline a lot of our presentations today
19 by focusing on some of the common issues that have come up in the
20 patent owner's response in challenging our petition.

21 So another piece of background that I think is relevant because it
22 came up in our -- in the briefing is the history of this family of patents.
23 And, you know, as you can see on the screen, the Board has invalidated a
24 number of claims from five different patents. The one we bolded here at
25 the top is a notable because it relates to, (a), Treyz and Fuller
26 combination that's at issue here today. And then, (b), very similar claim

Case IPR 2016-01701 (Patent 9,094,802 B2)

Case IPR 2017-00122 (Patent 9,444,868 B2)

1 language and also a claim term as construed by the Board previously, and
2 we feel that that's binding and is the right construction here.

3 So we just wanted to note that that's been, (a), already determined
4 in prior IPRs, and also notably upheld by the Federal Circuit. In every
5 instance, actually, where the claims were found invalid, the Federal
6 Circuit's affirmed those. And so I just note that as background because
7 it'll become relevant as we get into some of the disputes.

8 Sort of covered this overview already. The first thing I just want to
9 touch on is the one term that was actually construed by the Board, which
10 is the term available media. And the Board, in its' institution decisions in
11 both of the IPRs at issue today, followed its prior construction of that
12 term and we thinks it's the right one. We think that an available media,
13 as the Board found in the '407 IPR and then in both institution decisions
14 here, includes parts of content accessible from a source of audio, video,
15 and our textual information. And the Board went on to note that the term
16 is not limited to a single file, song, or video, and may encompass, at a
17 minimum, a collection of audio/video files.

18 We feel like that construction that came from a prior proceeding
19 that's been affirmed by the Federal Circuit for patents with the same
20 specification is the right one here. And, frankly, the patent owner has not
21 offered an alternative, they've waived that. And for a lot of the
22 arguments that we're not addressing here today specifically given the
23 time constraints, that's because there's been no argument from the patent
24 owner, and, therefore, those have been waived. And so we're relying on
25 our papers for many of those arguments.

26 So moving on then to the rationale for the Board applying its prior

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
