9.	PATI	ENT A	: CLAIMS 1-3, 7-11, 15-17, AND 19-23 OF THE 918 RE UNPATENTABLE AS OBVIOUS OVER IN VIEW OF PEIRCE	15
	9.1.		d Have Been Obvious To Adapt Teramura To Include S CIAS	15
	9.2.	Claim 1	is obvious over Teramura in view of Peirce	20
		9.2.1.	Claim 1: [1.P] A method for effecting currency transactions between a first user and a second user over a network, the method comprising the following steps: 20	
		9.2.2.	[1.1] A) a Currency Issuing Authority trusted server (CIAS) receives payment instructions from said first user to transfer a first monetary sum to said second user, 20	
		9.2.3.	[1.2] wherein the CIAS is programmed to receive payment instructions from said first user only over a network connection between said first user and a Currency Issuing Authority (CIA);	22
		9.2.4.	[1.3] B) the CIAS accesses electronic currency in a first active electronic currency area located in a first data storage area, said electronic currency having been provided by said CIA;	23
		9.2.5.	[1.4] C) the CIAS manipulates the electronic currency located in said first active electronic currency area to withdraw a second monetary sum therefrom by (i) deleting electronic currency that equals the second monetary sum and/or (ii) generating a record containing information on the amount withdrawn that equals the second monetary sum and/or (iii) generating a record containing information on the amount of electronic currency remaining in said first active electronic currency area after withdrawing the second monetary sum; and	28

	9.2.6.	[1.5] D) the CIAS creates new electronic currency corresponding to a third monetary sum.	30
9.3.	Claim 2	2 is obvious over Teramura in view of Peirce	33
	9.3.1.	Claim 2: [2] The method according to claim 1, further comprising the step of: E) the CIAS transmits the new electronic currency to a second data storage area associated with the second user.	33
9.4.	Claim 3	is obvious over Teramura in view of Peirce	34
	9.4.1.	Claim 3: [3] The method according to claim 1, wherein the new electronic currency is used to create a record of the third monetary sum to be paid to the second user. 34	
9.5.	Claim 7	' is obvious over Teramura in view of Peirce	35
	9.5.1.	Claim 7: [7] The method according to claim 1, wherein the CIA provides the first data storage area.	35
9.6.	Claim 8	3 is obvious over Teramura in view of Peirce	37
	9.6.1.	Claim 8: [8] The method according to claim 2, wherein the CIAS transmits the new electronic currency to the second data storage area, wherein the second data storage area is provided by the CIA.	37
9.7.	Claim 9	is obvious over Teramura in view of Peirce	39
	9.7.1.	Claim 9: [9.P] A system for effecting currency transactions between users over a network, comprising:	39
	9.7.2.	[9.1] A) a Currency Issuing Authority trusted server (CIAS);	40
	9.7.3.	[9.2] B) a first active electronic currency area associated with a first user provided in a first storage medium, said first active electronic currency area having electronic currency and being accessible to the CIAS:40	

	9.7.4.	[9.3] C) a communication line programmed to receive from the first user, only over a network connection between said first user and the CIA, payment instructions to issue a first monetary sum to a second user; 43
	9.7.5.	[9.4] D) data transfer and manipulation apparatus programmed to: i) access said first user's one or more electronic currency in said first active electronic currency area;
	9.7.6.	[9.5] ii) withdraw a second monetary sum from said first active electronic currency area by (a) deleting said first user's electronic currency in the first active electronic currency area that equals the second monetary sum and/or (b) generating a record containing information on the amount withdrawn that equals the second monetary sum as spent and/or (c) generating a record containing information on the amount of electronic currency remaining in said first active electronic currency area after withdrawing the second monetary sum; and
	9.7.7.	[9.6] iii) create new electronic currency corresponding to a third monetary sum
9.8.	Claim 10	0 is obvious over Teramura in view of Peirce48
	9.8.1.	Claim 10: [10] The system according to claim 9, further comprising a second active electronic currency area associated with the second user provided in a second storage medium
9.9.	Claim 1	1 is obvious over Teramura in view of Peirce49
	9.9.1.	Claim 11: [11] The system according to claim 9, wherein the data transfer and manipulation apparatus is programmed to utilize the new electronic currency to create a record of the third monetary sum to be paid to the second user.
9.10.	Claim 1:	5 is obvious over Teramura in view of Peirce49

DOCKET

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
