(57) **ABSTRACT**

A method of automatically generating software from one or more predefined functions in accordance with an input statement entered in natural language, the method comprising the steps of:

- (i) analysing the input statement for its semantic content, so as to extract first semantically meaningful elements from the input statement;
- (ii) analysing the one or more predefined functions for their semantic content, so as to extract one or more sets of second semantically meaningful elements from the one or more predefined functions;
- (iii) identifying at least one of a condition, an action and/or a statement in the input statement;
- (iv) comparing the first semantically meaningful elements with the second semantically meaningful elements so as to identify one or more predefined functions that correspond to one or more action and/or statement of the input statement;
- (v) combining at least some of the first semantic elements in accordance with any conditions identified at step (iii) so as to generate corresponding condition variables;
- (vi) combining functions and condition variables identified at steps (iv) and (v) according to a set of predetermined rules in order to generate the software.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
