Preface *page xiii*
1 Overview 1
Materials and magnetization processes 2
The magnetic recording channel 10
Units 15
2 Review of magnetostatic fields 17
Introduction 17
Basic field expressions 18
Demagnetizing factors 24
Magnetostatic fields from flat surfaces 26
Two-dimensional fields 28
Imaging 31
Vector and scalar potentials 35
Fourier and Hilbert transforms 38
Integral relations for free space fields 44
Problems 47
3 Inductive head fields 48
Introduction 48
Head efficiency and deep-gap field 52
Fields due to a finite gap 56
Far field approximation 56
Medium range approximation (Karlqvist field) 59
Near-field expressions 63
Near-field analytic approximation 73
Finite length heads – thin film heads 75
Keepered heads 81
Concluding remarks 85

8 Record process: Part 1 – Transition models 205
Introduction 205
The magnetic recording process 207
Models of longitudinal recording 213
Voltage–current relations 219
Demagnetization limits 223
Thick media tape recording 224
Models of perpendicular recording 230
Thin medium model 232
Thick medium modeling 235
Problems 240
9 Record process: Part 2 – Non-linearities and overwrite 245
Introduction 245
Non-linear bit shift 245
Non-linear amplitude loss 249
Overwrite 252
Problems 260
10 Medium noise mechanisms: Part 1 – General concepts, modulation noise 261
Introduction 261
Noise formalism 265
Tape density fluctuations 266
Tape surface roughness and asperities 276
Problems 280
11 Medium noise mechanisms: Part 2 – Particulate noise 283
Introduction 283
Single particle replay expressions 284
General particulate noise expression 288
Uncorrelated noise power 290
Correlation terms 292
Signal to particulate noise ratios 293
Case 1: Thick tape 293
Case 2: Thin films 294
Erased noise spectra and correlations 296
Problems 302

Problems 105
5 Playback process: Part 1 – General concepts and single transitions 107
Introduction 107
Direct calculation of playback voltage 108
The reciprocity principle 112
Head definitions 117
Summary comments 119
Generalized playback voltage expressions 119
Isolated transitions 124
Sharp transitions 125
Broad transitions – arctangent example 127
Problems 133
6 Playback process: Part 2 – Multiple transitions 139
Introduction 139
Linear superposition 139
Square wave recording 141
'Roll-off' curve and D_{50} 146
Thin film head 147
Spectral analysis 148
The 'spectrum' 152
Wallace factor or 'thickness loss' 154
Analysis of spectra 155
'Roll-off' curve and spectrum compared – simplified D_{50} analysis 157
Transfer function 159
Linear bit shift 161
Problems 164
7 Magnetoresistive heads 166
Introduction 166
Magnetization configurations 169
Reciprocity for MR heads 177
Application to shielded heads 182
Evaluation of the playback voltage 186

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS
Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS
Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS
Sync your system to PACER to automate legal marketing.
