**Abstract (English):** WebEx Communications, Inc. , the Web communications services leader, today announced that Yahoo! Inc. , a leading global Internet company, will integrate access to WebEx Meeting Center into Yahoo!(R) Messenger Enterprise Edition. By integrating access, customers will be able to seamlessly escalate from instant messaging sessions into highly interactive WebEx meetings, streamlining both internal and external business communications. With more than 7,000 corporate customers and partnerships with the world's largest technology and telecommunications companies, WebEx is the leading provider of Web communications services.

All of WebEx's services are delivered via the WebEx MediaTone Network, the only global network specifically designed for high-speed Web communications.

**Full text:** WebEx Communications, Inc. , the Web communications services leader, today announced that Yahoo! Inc. , a leading global Internet company, will integrate access to WebEx Meeting Center into Yahoo!(R) Messenger Enterprise Edition. By integrating access, customers will be able to seamlessly escalate from instant messaging sessions into highly interactive WebEx meetings, streamlining both internal and external business communications. With more than 7,000 corporate customers and partnerships with the world's largest technology and telecommunications companies, WebEx is the leading provider of Web communications services.

All of WebEx's services are delivered via the WebEx MediaTone Network, the only global network specifically designed for high-speed Web communications. The WebEx MediaTone Network supports live data, voice and video communications and allows users to hold highly interactive meetings through a standard browser. WebEx is working closely with Yahoo! to provide corporate customers with tightly integrated access to the WebEx Meeting Center service and WebEx MediaTone network.

"This relationship gives users a powerful combination of business communications tools," said Steve Boom, senior vice president, Yahoo! Enterprise Solutions. "The ability to escalate easily from text chat into a WebEx meeting can greatly enhance the productivity of enterprise communications."

"Yahoo! is a leading provider of instant messaging technology and we are proud to be working with them," said Subrah Iyar, CEO, WebEx Communications. "We see IM as an important way for even more people to use WebEx meetings in all departments of the enterprise. With integrated access to the WebEx MediaTone Network, business people can move instantly from applications, chat sessions and telephone calls into multimedia Web conferences."

WebEx services are used across the enterprise for sales, support, training, marketing engineering and product design. WebEx supports data, voice and video communications to create an online environment that simulates the full spontaneity and productivity of face-to-face meetings. WebEx's MediaTone technology allows WebEx's communications services to manage complex media types including 3-D objects, CAD files, streaming media and live video. WebEx is the only company to develop and deploy a global network for high-speed Web communications. WebEx uses standards-based APIs to make it easy for developers and resellers to integrate WebEx's communications capabilities into any product or service offering.

About WebEx Communications, Inc.

WebEx Communications, Inc. is the world's leading provider of Web communications services. According to a recent industry report, WebEx is the world's leading provider of Web conferencing services and the company was recently named the Fastest-Growing Technology Company over the last five years by Forbes magazine.

WebEx is used across the enterprise in sales, support, training, marketing, engineering and product design. WebEx meetings simulate the spontaneity and interactivity of face-to-face meetings by allowing users to share presentations, applications, documents and desktop, with full-motion video and integrated telephony. WebEx Communications is based in San Jose, California and has regional headquarters in Europe and Asia. Please call toll free 877-509-3239 or visit <http://www.webex.com/> for more information.
