B. Special Activities . . . . . 37

## EDUCATIONAL BACKGROUND

Degree	Year	University	Field
Ph.D.	2008	Pennsylvania State University State College, PA <i>Dissertation:</i> Characterizing the Impact of Ridigity on the Security of Cellular Telecommunications Networks <i>Advisors:</i> Thomas F. La Porta and Patrick D. McDaniel	Computer Science & Engineering
M.S.	2004	Pennsylvania State University State College, PA	Computer Science & Engineering
B.S.	2002	University of Richmond Richmond, VA <i>Minors:</i> Biology, Business Admin	Computer Science

## EMPLOYMENT HISTORY

Title	Organization	Years
Associate Professor	University of Florida	August 2014–Present
Associate Professor	Georgia Institute of Technology	March 2014–August 2014
Assistant Professor	Georgia Institute of Technology	2008–March 2014
Research Assistant	Pennsylvania State University	2004–2008
Teaching Assistant	Pennsylvania State University	2004

## CURRENT FIELDS OF INTEREST

My research focuses on the security of cellular/telephony networks and mobile systems. The security of these systems generally relies on their closed nature and trust in the honest behavior of users. However, with the recent disintegration of these assumptions and with over than six billion subscribers around the world, cellular and mobile systems represent the next great expansion in global critical infrastructure and, because of their unique characteristics, require new and different approaches to security.

Recognizing this, my research focuses on three specific themes: (1) developing efficient techniques to allow telephony providers and customers to authenticate the origin of incoming calls; (2) measuring and improving the security of emerging mobile financial systems and (3) efficient and strong privacy-preserving techniques for mobile devices.

This work is guided by the idea that the meeting of smart networks and smart devices, a scenario not seen in the traditional Internet, can lead to significant improvements in the security of users and the availability and integrity of services. I have a strong interest in solutions that can be deployed in both the short and long terms, and am actively engaging both industry and government in this capacity. My

research, if successful, will help to not only improve the general security of networked devices, but also to maintain the historical reliability of telephony networks as they become the dominant digital access technology.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
