ORDER  
Decision on Petitioner's Motions to Seal  
*37 C.F.R. §§ 42.14 and 42.54*

## I. INTRODUCTION

Comcast Cable Communications, LLC (“Petitioner”) filed four motions to seal various exhibits and materials in the current proceeding pursuant to 37 C.F.R. §§ 42.14 and 42.54. *See* Papers 23, 31, 41, and 48.

### A. First Motion to Seal

Through the first Motion to Seal, Petitioner seeks to seal portions of Exhibits 2022, 2023, and 2031 and represents that Patent Owner, Promptu Systems Corp., does not oppose the motion. Paper 23, 2. Corresponding redacted exhibits have been filed as exhibits 1020, 1021, and 1022. Exhibit 2020 is a “License and Development Agreement” between Comcast IP Holdings I, LLC and Comcast Corporation, and AgileTV Corporation. Paper 23, 2; *see* Ex. 2022. Exhibit 2023 is a “Marketing Trial Agreement for Voice Activated Television Control Service” between Comcast Cable Communications Management, LLC and AgileTV Corporation. Paper 23, 2; *see* Ex. 2023. Exhibit 2031 is a Comcast presentation titled “AgileTV Update,” and “describes the financial, marketing, and technical evaluations and projections for the trial of the AgileTV product as well as usability studies and metrics for voice control more generally.” Paper 23, 3; *see* Ex. 2031. Petitioner certifies that these exhibits contain confidential information that has not been published or otherwise made publicly available. Paper 23, 3. The alleged confidential information were not relied on or referred to in the Final Written Decision. Thus, protecting the alleged confidential material from public disclosure does not harm the public’s interest in maintaining a complete and understandable file history. Furthermore, the redactions appear to be limited in extent, and the motion is unopposed. We

determine that good cause exists to grant this motion to seal (Paper 23).  
37 C.F.R. § 42.54.

### B. Second Motion to Seal

Through the second Motion to Seal, Petitioner seeks to seal portions of Exhibit 1024, which “contains excerpts from the transcript of the deposition of Paul Cook.” Paper 31, 1. A corresponding redacted copy of Exhibit 1024 has been filed. *See* Exhibit 1032. Petitioner proposes to seal portions of Exhibit 1024 because those portions “disclose[] the amount of a proposed patent license agreement between the parties” or “the specific amount of consideration under the License and Development Agreement entered by the parties and additional confidential terms of that agreement.” Paper 31, 4–6. According to Petitioner, “[n]one of the specific dollar amounts disclosed in the exhibit are cited in Comcast’s reply brief or elsewhere in the parties’ briefing on the merits[, t]hus the public will have no interest in this specific confidential information with regard to the patentability of the challenged claims.” Paper 31, 4. In addition, Petitioner contends that the “information is confidential and its disclosure would harm Petitioner in similar negotiations involving patent or other licenses with other third parties.” Paper 31, 4–6.

Patent Owner states that “[a]lthough Promptu indicated it does not oppose Comcast’s motion to seal, Promptu was ordered . . . that it ‘still should inform the Board whether the information sought to be sealed by Petitioner constitutes confidential information or if the information is in the public domain.’ *See* IPR2018-00340, Paper 40 at 2.” Paper 44, 1. According to Patent Owner, “the information [Petitioner sought to seal] does not constitute confidential information and [that] the information is in the

public domain.” *Id.* at 1, 9–11.<sup>1</sup> For example, Promptu’s amended complaint in its district court action and “several details regarding Comcast’s valuation of Promptu’s technology are already in the public domain.” *Id.* at 10. Promptu’s amended complaint states that “To further encourage Promptu to continue to disclose its proprietary voice recognition technology, Comcast represented it would invest \$2 million of capital into Promptu.” *Id.* at 2–3 (citing to *Promptu Sys. Corp. v. Comcast Corp.*, Case No. 2:16-CV- 6516-JS (E.D. Pa.), ECF No. 30, ¶ 32). Patent Owner also points to Exhibits 2002 and 2003 in support of its contention. Exhibit 2002 is an AgileTV Corporation Executive Summary and Exhibit 2003 appears to be an AgileTV presentation titled “AgileTV Voice Navigation.” In addition, Patent Owner also argues that “the material is already publicly known, by virtue of the information having originated from the mouth of a non-party subject to no obligation of confidentiality.” Paper 44, 10–11. According to Patent Owner, Mr. Cook, “Promptu’s former CEO and a non-party, [] is no longer under any obligation of confidentiality” and did not designate his testimony as being confidential during his deposition. *Id.* at 7.

In response, Petitioner contends that “Patent Owner does not identify any public source for the loan amount and instead cites its own allegations in the district court complaint that do not reveal the amount of the loan.” Paper 50, 1. Petitioner also contends that Mr. Cook’s testimony “was provided in

---

<sup>1</sup> Patent Owner also argues that the information is not confidential because Petitioner did not properly designate Ex. 1026 under the protective order. Paper 44, 5–9. We do not find this argument persuasive because Patent Owner does not explain why a protective order, or compliance with a protective order, is a prerequisite to filing a motion to seal.

a conference room before attorneys bound by protective orders[, and is therefore] not a public statement.” *Id.*

“The rules aim to strike a balance between the public’s interest in maintaining a complete and understandable file history and the parties’ interest in protecting truly sensitive information.” Office Patent Trial Practice Guide, 77 Fed. Reg. 48760 (August 14, 2012). Here, the alleged confidential information is not relied on or referred to in the Final Written Decision. Thus, a complete and understandable file history does not depend on disclosure of any of the alleged confidential information at issue. Also, the scope of protection sought by Petitioner is limited, *i.e.*, redacting “the amount of a proposed patent license agreement between the parties” and “the specific amount of consideration under the License and Development Agreement entered by the parties and additional confidential terms of that agreement.” Paper 31, 4–6. We determine that good cause exists to grant Petitioner’s Second Motion to Seal. 37 C.F.R. § 42.54.

### C. Third Motion to Seal

Through the Third Motion to Seal, Petitioner seeks to seal portions of Patent Owner’s Sur-Reply (Paper 38), which “disclose[] the specific amount Comcast loaned to Patent Owner to conduct trials intended for Patent Owner to demonstrate its AgileTV product to Comcast.” Paper 41, 1. A corresponding redacted copy of Patent Owner’s Sur-Reply has been filed. *See* Paper 42. Patent Owner states that “[a]lthough Promptu indicated it does not oppose Comcast’s motion to seal, Promptu was ordered . . . that it ‘still should inform the Board whether the information sought to be sealed by Petitioner constitutes confidential information or if the information is in the public domain.’ *See* IPR2018-00340, Paper 40 at 2.” Paper 44, 1.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
