Disclaimer

While every precaution has been taken in the preparation of this document, ATI Technologies Inc. assumes no liability with respect to the operation or use of ATI hardware, software or other products and documentation described herein, for any act or omission of ATI concerning such products or this documentation, for any interruption of service, loss or interruption of business, loss of anticipatory profits, or for punitive, incidental or consequential damages in connection with the furnishing, performance, or use of the ATI hardware, software, or other products and documentation provided herein. ATI Technologies Inc. reserves the right to make changes without further notice to a product or system described herein to improve reliability, function or design. With respect to ATI products which this document relates, ATI disclaims all express or implied warranties regarding such products, including but not limited to, the implied warranties of merchantability, fitness for a particular purpose, and non-infringement.

1 Introduction

The RADEON 8500 MAC EDITION represents the next generation in 3D and video acceleration for your Power Macintosh computer. It includes 64MB of DDR memory for fast 32-bit true color 3D graphics. Flexible dual-display support for multiple combinations of CRT monitors, TVs and video devices is included. Your new graphics accelerator provides:

- Flexible dual-display support enabling many combinations utilizing the VGA, DVI-I, and TV connectors
- OpenGL[®] and QuickDraw 3D accelerator providing superior 3D rendering performance and advanced imaging and filtering techniques
- QuickTime playback accelerator for full screen, full motion, TV quality video
- DVI-I support for digital flat panels
- TV-Out support via S-Video connector

The ATI Config Menu (available only for Mac OS 9.2.1), is located on the Apple menu bar. This provides instant access to Help, the ATI Displays control panel, and all of RADEON 8500 MAC EDITION features.

What You'll Need

The RADEON 8500 MAC EDITION runs with the following minimum system requirements:

- Any Power Macintosh computer with an AGP expansion slot
- Mac OS 9.2.1 or Mac OS X version 10.1 or higher
- OpenGL 1.2.2 (required for 3D graphics)
- Apple multi-frequency monitor, VGA-style monitor (*see note below*), DVI-I style digital flat panel, or TV
- QuickTime 5.0 (earlier versions are **NOT** supported) or higher
- Minimum 64MB of system memory required for Mac OS 9.2.1
- Minimum 128MB of system memory required for Mac OS X version 10.1

OpenGL 1.2.2 or higher is required to obtain full 3D graphics functionality in Mac OS 9.2.1 applications. OpenGL 1.2.2 is only available from Apple as part of Mac OS 9.2.1, or 9.2.2.

Apple branded digital flat panels with an ADC connector must use a third party adapter.

Apple analog monitors without a VGA connector must use a the supplied adapter to connect to the RADEON 8500 MAC EDITION graphics accelerator.

Future references to Mac OS 9 and Mac OS X in this manual are intended to be generic and inclusive of their respective versions of the Macintosh operating systems

Related Documentation

The README file summarizes the latest product revisions. Click the README icon on the installation disk to open this file.

The RADEON 8500 MAC EDITION comes with ATI Guide for Mac OS 9, which provides on-line help for making the best use of your card's features. There are two methods of accessing the ATI Guide. From the Mac OS menu bar under the ATI icon choose ATI Guide. From the ATI Displays control panel, you can access the ATI Guide by clicking on the Apple Guide  icon. RADEON Help can be found in the Apple Help menu.

Help is available in Mac OS X by simply clicking on the  button in the ATI Displays control panel or through the Apple Help Center. You can browse through the Help or search for a specific topic.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
