

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

NITTO DENKO CORP.,

Petitioner

Patent No. 8,169,746

Original Issue Date: May 1, 2012

Title: INTEGRATED LEAD SUSPENSION WITH MULTIPLE TRACE
CONFIGURATIONS

**PETITION FOR *INTER PARTES* REVIEW
OF U.S. PATENT NO. 8,169,746
PURSUANT TO 35 U.S.C. § 312 and 37 C.F.R. § 42.104**

Case No. IPR2018-01300

TABLE OF CONTENTS

I.	MANDATORY NOTICES (37 C.F.R. § 42.8).....	3
	Real Party-in-Interest (37 C.F.R. § 42.8(b)(1)).....	3
	Related Matters (37 C.F.R. § 42.8(b)(2)).....	3
	Counsel (37 C.F.R. § 42.8(b)(3)).....	3
II.	REQUIREMENTS FOR IPR	4
	Grounds for Standing	4
	Identification of Challenge and Relief Requested	4
	Claim Construction.....	6
	1. “Interleaved”	6
	2. “ground plane trace”	7
III.	THE ’746 PATENT.....	8
IV.	HOW CHALLENGED CLAIMS ARE UNPATENTABLE.....	10
	Overview of the Prior Art.....	10
	1. Balakrishnan	11
	2. Young	16
	3. Balakrishnan ’152	18
	4. Yuuki	21
	Ground 1: Claims 7 and 11 are anticipated by Balakrishnan.....	23
	1. Claim 7	23
	a. “An integrated lead head suspension flexure having a plurality of regions including a tail and a gimbal, including:”	23
	b. “First trace sections having a first structural configuration on a first region of the flexure”	28
	c. “Second trace sections having a second structural configuration different than the first configuration on a second region of the flexure”	30
	d. “The second trace sections electrically connected to the first trace sections”	32

e.	“Wherein the first trace sections include interleaved traces”	34
f.	“The second trace sections include ground plane traces”	35
2.	Claim 11	36
a.	“An integrated lead head suspension flexure”	37
b.	“A mounting region”	37
c.	A gimbal extending distally from the mounting region and having bond pads	39
d.	A tail extending proximally from the mounting region and having terminal pads	43
e.	First trace sections having a first structural configuration electrically connected to the terminal pads and extending over at least a portion of the tail	45
f.	Wherein the first trace sections extend over substantially all of the tail and mounting region	46
g.	Second trace sections having a second structural configuration different than the first structural configuration electrically connected to the bond pads and extending over at least a portion of the gimbal, wherein the second trace sections extend over substantially all of the gimbal	50
h.	Transition structures electrically connecting the first trace sections to the second trace sections, wherein the transition structures directly electrically connect the first and second trace sections	52
i.	Wherein the first trace sections have a first structural configuration from the set including interleaved traces, stacked traces and ground plane traces	55

j.	The second trace sections have a second structural configuration from the set including interleaved traces, stacked traces and ground plane traces.....	55
	Ground 2: Claims 7 and 11 are obvious over Balakrishnan in view of Young.....	55
1.	Claim 7	55
a.	“An integrated lead head suspension flexure having a plurality of regions including a tail and a gimbal, including:”	55
b.	“First trace sections having a first structural configuration on a first region of the flexure”	56
c.	“Second trace sections having a second structural configuration different than the first configuration on a second region of the flexure”	56
d.	“The second trace sections electrically connected to the first trace sections”	56
e.	“Wherein the first trace sections include interleaved traces”	56
f.	“The second trace sections include ground plane traces”	58
2.	Claim 11	58
a.	“An integrated lead head suspension flexure”	58
b.	“A mounting region”	58
c.	A gimbal extending distally from the mounting region and having bond pads.....	59
d.	A tail extending proximally from the mounting region and having terminal pads.....	60
e.	First trace sections having a first structural configuration electrically connected to the terminal pads and extending over at least a portion of the tail	60
f.	Wherein the first trace sections extend over substantially all of the tail and mounting region	60

g.	Second trace sections having a second structural configuration different than the first structural configuration electrically connected to the bond pads and extending over at least a portion of the gimbal, wherein the second trace sections extend over substantially all of the gimbal.....	60
h.	Transition structures electrically connecting the first trace sections to the second trace sections, wherein the transition structures directly electrically connect the first and second trace sections.....	61
i.	Wherein the first trace sections have a first structural configuration from the set including interleaved traces, stacked traces and ground plane traces.....	62
j.	The second trace sections have a second structural configuration from the set including interleaved traces, stacked traces and ground plane traces.....	62
3.	It Would Have Been Obvious To Combine the Teachings of Balakrishnan and Young.....	62
	Ground 3: Claims 8 and 11 are obvious over Balakrishnan in view of Balakrishnan '152 and Young.....	65
1.	Claim 8	65
a.	“An integrated lead head suspension flexure having a plurality of regions including a tail and a gimbal, including:”	66
b.	“First trace sections having a first structural configuration on a first region of the flexure”	66
c.	“Second trace sections having a second structural configuration different than the first configuration on a second region of the flexure”.....	66
d.	“The second trace sections electrically connected to the first trace sections”	66

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
