RE: U.S. 9,320,122: PRIME EZ-SET Timers

Mr. Stewart:

We are intellectual property counsel for Prime Wire & Cable, Inc. ("PRIME"). We are in receipt of your letter dated December 8, 2017 concerning US Pat. No. 9,320,122 (the '122 patent).

Initially, we were unaware of any patents that covered Jasco's products. It does not appear to us that any have been marked on packaging pursuant to 35 USC §287. Also, the '122 patent says on its face that it belongs to a company called Cantigny Lighting Control, LLC. We have been unable to locate any assignment documents to show Jasco owns this patent.

We are happy to discuss amicable resolution of any claims, but we are somewhat confused about the allegations against PRIME's products. It appears to us that the claims of the '122 patent are very narrowly drawn to "light timers" whereas PRIME's products are outlet timers that employ technology that has been in the public domain for decades predating the '122 patent.

Also, in your letter you mentioned design patents, but we have not found any that speak to your products. So, I would ask that you share those design patents with me so we may have an informed discussion.

I would encourage you share the requested information and give me a call so we may discuss.

Sincerely,

BUCHE & ASSOCIATES, P.C.
