This product is impossible to program. What moron came up with those useless instructions? I highly recommend purchasing a different product.

The white plugin is the only one that is programmable, the others have 3 preset times that can't be changed, how ridiculous GE. I don't want my lights on from 5pm to 12am. Horrible product. It's like they thought people are too dumb to program it, fine, but also make it programmable like the white plug in model. The GE TouchDumb Timer.
