Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(Applications filed on or after May 29, 2000)

The Office has discontinued providing a Patent Term Adjustment (PTA) calculation with the Notice of Allowance.

Section 1(h)(2) of the AIA Technical Corrections Act amended 35 U.S.C. 154(b)(3)(B)(i) to eliminate the requirement that the Office provide a patent term adjustment determination with the notice of allowance. See Revisions to Patent Term Adjustment, 78 Fed. Reg. 19416, 19417 (Apr. 1, 2013). Therefore, the Office is no longer providing an initial patent term adjustment determination with the notice of allowance. The Office will continue to provide a patent term adjustment determination with the Issue Notification Letter that is mailed to applicant approximately three weeks prior to the issue date of the patent, and will include the patent term adjustment on the patent. Any request for reconsideration of the patent term adjustment determination (or reinstatement of patent term adjustment) should follow the process outlined in 37 CFR 1.705.

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (571)-272-7702. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at 1-(888)-786-0101 or (571)-272-4200.

OMB Clearance and PRA Burden Statement for PTOL-85 Part B

The Paperwork Reduction Act (PRA) of 1995 requires Federal agencies to obtain Office of Management and Budget approval before requesting most types of information from the public. When OMB approves an agency request to collect information from the public, OMB (i) provides a valid OMB Control Number and expiration date for the agency to display on the instrument that will be used to collect the information and (ii) requires the agency to inform the public about the OMB Control Number's legal significance in accordance with 5 CFR 1320.5(b).

The information collected by PTOL-85 Part B is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, Virginia 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450. Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

REMARKS

This Amendment and Response is submitted in reply to the Office Action dated February 26, 2015, in which the Examiner rejected claims 1-20 on the basis of statutory (35 U.S.C. § 101) double patenting in view of claims 1-19 of U.S. Patent No. 8,764,575 (the '575 patent).

Applicant thanks the Examiner for the careful attention to this application, and respectfully addresses the claim rejection below. Claims 1-20 are currently pending. This Amendment cancels claims 19 and 20, and amends claims 1 and 5-18, leaving claims 1-18 pending upon entrance. Claim 1 is the only independent claim.

Regarding the statutory double patenting rejection, Applicant has cancelled independent claim 19 (and its dependent claim 20), making the rejection of those claims moot. Applicant has amended independent claim 1 to differentiate the invention claimed therein from claim 1 of the '575 patent. Correspondingly, all of the dependent claims 2-18 also now differ in scope from claims 2-18 of the '575 patent, at least based on the differences in claim 1. Accordingly, Applicant respectfully requests that the statutory double patenting rejection of claims 1-20 be withdrawn.

In the event the Examiner deems that the amended claims 1-18 would still be subject to a non-statutory double patenting rejection, the Examiner is respectfully

GURLEY
Serial No. 14/151,975

requested to contact the undersigned via telephone to facilitate the submission of a terminal disclaimer to expedite allowance of the claims.

Having addressed the sole grounds of claim rejection, Applicant respectfully requests that this claim rejection be withdrawn and claims 1-18 be passed to issue.

Beyond those fees already submitted herewith, Applicant believes no additional fees are due in connection with this Amendment and Response. If any additional fees are deemed necessary, authorization is granted to charge any such fees to Deposit Account No. 01-0484.

Respectfully submitted,

The present application is being examined under the pre-AIA first to invent provisions.

Double Patenting

A rejection based on double patenting of the “same invention” type finds its support in the language of 35 U.S.C. 101 which states that “whoever invents or discovers any new and useful process... may obtain a patent therefor...” (Emphasis added). Thus, the term “same invention,” in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the claims that are directed to the same invention so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-20 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-19 of prior U.S. Patent No. 8,764,575. This is a statutory double patenting rejection.

P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Prior to the calculation of fees and examination of the present application,
please enter the amendments and remarks set out below.

AMENDMENTS TO THE SPECIFICATION begin on page 2; and
REMARKS begin on page 3.

In re Patent Application of
GURLEY
Serial No. 14/151,975
Filed: JANUARY 10, 2014

AMENDMENTS TO THE SPECIFICATION

Please replace paragraph [0025] of the specification with the following replacement paragraph; marked up to show changes:

[0025] Referring again to Figure 1, the framework assembly 46 12 defines an outwardly sloping outer wall 20, a deck 22 and a plurality of pyramids 24 extending upwardly from the deck 22. An access opening 26 is formed through at least one side of the wall 20 by not placing a trampoline from the corresponding void 14. Advantageously, the framework assembly is adapted to bear the stresses of arena 10 usage while being completely free standing. However, if desired, the framework assembly 46 12 can be anchored at one or more points to structural members of a building in which the area 10 is located.

Statement under 37 CFR 1.55 or 1.78 for AIA (First Inventor to File) Transition Applications: No**PROTECTING YOUR INVENTION OUTSIDE THE UNITED STATES**

Since the rights granted by a U.S. patent extend only throughout the territory of the United States and have no effect in a foreign country, an inventor who wishes patent protection in another country must apply for a patent in a specific country or in regional patent offices. Applicants may wish to consider the filing of an international application under the Patent Cooperation Treaty (PCT). An international (PCT) application generally has the same effect as a regular national patent application in each PCT-member country. The PCT process **simplifies** the filing of patent applications on the same invention in member countries, but **does not result** in a grant of "an international patent" and does not eliminate the need of applicants to file additional documents and fees in countries where patent protection is desired.

Almost every country has its own patent law, and a person desiring a patent in a particular country must make an application for patent in that country in accordance with its particular laws. Since the laws of many countries differ in various respects from the patent law of the United States, applicants are advised to seek guidance from specific foreign countries to ensure that patent rights are not lost prematurely.

Applicants also are advised that in the case of inventions made in the United States, the Director of the USPTO must issue a license before applicants can apply for a patent in a foreign country. The filing of a U.S. patent application serves as a request for a foreign filing license. The application's filing receipt contains further information and guidance as to the status of applicant's license for foreign filing.

Applicants may wish to consult the USPTO booklet, "General Information Concerning Patents" (specifically, the section entitled "Treaties and Foreign Patents") for more information on timeframes and deadlines for filing foreign patent applications. The guide is available either by contacting the USPTO Contact Center at 800-786-9199, or it can be viewed on the USPTO website at <http://www.uspto.gov/web/offices/pac/doc/general/index.html>.

For information on preventing theft of your intellectual property (patents, trademarks and copyrights), you may wish to consult the U.S. Government website, <http://www.stopfakes.gov>. Part of a Department of Commerce initiative, this website includes self-help "toolkits" giving innovators guidance on how to protect intellectual property in specific countries such as China, Korea and Mexico. For questions regarding patent enforcement issues, applicants may call the U.S. Government hotline at 1-866-999-HALT (1-866-999-4258).

LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Bureau of Industry and Security, Department of Commerce (15 CFR parts 730-774); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).

TRAMPOLINE ARENA

Cross-Reference to Related Applications

[0001] This application is a continuation of U.S. Non-Provisional Patent Application Serial No. 13/164, 356, filed June 20, 2011, which claims the benefit of U.S. Provisional Application Serial No. 61/356,108, filed on June 18, 2010, the contents of which applications are herein incorporated by reference in their entirety.

Field of the Invention

[0002] The present invention relates to trampolines, and more particularly, to arenas formed from a plurality of trampolines.

Background of the Invention

[0003] Trampolines have long been recognized as a source of fun and exercise for young and old, alike. However, trampolines, and particularly large trampolines, have also been viewed as a considerable safety risk. As a result, trampolines have been underutilized in group and commercial recreation applications.

Summary of the Invention

[0004] In view of the foregoing, it is an object of the present invention to provide an improved trampoline arena. According to an embodiment of the present invention, a trampoline arena includes a framework assembly having a plurality of frame elements

defining an outwardly sloping outer wall, and a deck, a plurality of voids being defined between the framework elements. The arena also includes a plurality of trampolines connected to the frame elements along peripheries thereof and extending across the plurality of voids to further define the outwardly sloping outer wall and deck, and a padding assembly including a plurality of pads overlying the frame elements and the peripheries of the trampolines.

[0005] According to an aspect of the present invention, the plurality of frame elements further define a plurality of pyramids extending upwardly from the deck and plurality of pyramids, and the plurality of trampolines connected to the frame elements along the peripheries thereof and extending across the plurality of voids also further define the plurality of pyramids.

[0006] These and other objects, aspects and advantages of the present invention will be better appreciated in view of the drawings and following detailed description of preferred embodiments.

Detailed Description of Preferred Embodiments

[0024] According to an embodiment of the present invention, referring to Figure 1, a trampoline arena 10 includes a framework assembly 12 supporting a plurality of trampolines 18 (only a portion of the trampolines 18 are shown to more clearly depict the framework assembly 12) across voids 14 thereof, and a padding assembly 16 overlying the framework assembly 10 and peripheries of the trampolines 18. Referring to Figure 1A, the trampolines 18 preferably connect to the framework assembly 12 via hooks at the end of trampoline springs 18A inserted into respective eyes 18B on members the framework. Connection points are advantageously close enough to eliminate the risk of appendages slipping between adjacent springs. The padding assembly 16 attaches to the framework assembly 12 via a plurality of hook and loop fasteners, or other fasteners.

[0025] Referring again to Figure 1, the framework assembly 16 defines an outwardly sloping outer wall 20, a deck 22 and a plurality of pyramids 24 extending upwardly from the deck 22. An access opening 26 is formed through at least one side of the wall 20 by not placing a trampoline from the corresponding void 14. Advantageously, the framework assembly is adapted to bear the stresses of arena 10 usage while being completely free standing. However, if desired, the framework

assembly 16 can be anchored at one or more points to structural members of a building in which the area 10 is located.

[0026] Referring also to Figure 2, sides of the wall 20 are supported by a plurality of substantially parallel, spaced apart, side frames 30. Each side frame 30 includes first and second spaced apart side frame vertical members 30A, 30B and a side frame angled member 30C extending between the tops of the vertical members 30A, 30B. Upper frame members 32 connect to brackets 34 at the top of each side frame 30, tying the side frames 30 together and forming a top margin of the wall 20. Brackets 36 tie a knee of each side frame 30 into longitudinal and transverse frame elements 40, 42 of the deck 22. Bracing 44 extends between midpoints of the side frames and the frame elements 40, 42 to add further rigidity and strength.

[0027] Referring to Figures 1, 3 and 4, at corners 46 of the wall 20, adjacent side frames 30 are arranged substantially perpendicular and upper and lower corner brackets 48, 50 are angled to tie into diagonal upper and lower corner members 52, 54. The design of corners 46 more evenly distributes stresses throughout the corner than a unitary member underlying the corner would, and increases available void space for trampolines at the corners 46.

[0028] Referring again to Figure 1, the deck 22 is formed by the longitudinal and transverse frame elements 40, 42. Midpoints of the longitudinal frame elements 40 are supported by tripods 60 and midpoints of the transverse frame elements 42 are supported by angled legs 62. Deck brackets 64 and corresponding additional support legs 66 are located where longitudinal and transverse frame elements 40, 42 meet away from the outer wall 20 or pyramids 24.

[0029] Referring also to Figure 5, the pyramids 24 are interspersed throughout the deck 22, and offer additional visual interest and more gaming options to the arena 10. The pyramids 24 can also be arranged and used to help route existing building structures, such as pillars, through the arena 10, while protecting users therefrom. Alternately, the pyramids 24 could be omitted.

[0030] Each pyramid 24 includes four central vertical members 70 connected by a common top member 72, and four perimeter horizontal members 74 connected by a plurality of brackets 76 that also tie into the longitudinal and transverse frame elements 40, 42 of the deck 22. The perimeter horizontal members 74 are supported by perimeter legs 80 extending from the brackets 76. Additionally, a diagonal member 82 extends from each corner of the top member 72 to a corresponding one of the brackets 76. Dual bracing 84 connected to each vertical member 70 extends to respective corners and midpoints of the horizontal members 74.

[0031] Referring again to Figure 1, the padding assembly 16 covers the framework assembly 12 cushioning any contact therewith, and inhibiting entanglement in trampoline springs. The padding assembly 16 is preferably formed from a plurality of foam pads sheathed in vinyl. The particular padding material can be chosen based on needs and preferences for a given application. However, a higher density foam, permitting a lower profile pad, is generally advantageous. Also, where pads abut a trampoline 14, the edges of the pad are preferably tapered or chamfered toward the trampoline 14. This arrangement reduces the likelihood of tripping over the edge of a pad while using the arena 10.

[0032] Referring to Figure 6, the side frames 40 forming sides of the wall 20 and most of the longitudinal and transverse members 40, 42 of the deck 22 are covered by generally flat pads 90. Referring to Figure 7, longitudinal and transverse members 40, 42 forming an outside edge of the deck 22 are covered by side base pads 92 having a wedge-shaped profile with angularly offset flat edges to allow a smooth transition between the flat pads 90 on the deck 22 and the wall 20. Referring to Figure 8, the upper frame members 32 are covered by side top pads 94.

[0033] Referring to Figures 9-13, at the corners 46, a triangular base pad 96 is arranged between opposite ends of adjacent base pads 92, covering the lower corner member 54. The side frames 40 in the corners 46 are covered by two-piece corner pads 100 extending upwardly from the junction of the base pads 92, 96. The upper corner member 52 is covered by a corner top pad 102, similar to the side top pads 94, but mitered at respective ends thereof to closely fit between the ends of adjacent side top pads 94.

[0034] Referring to Figures 14-17, the pyramids 24 have pyramid base pads 104 similar to the side base pads 92, but mitered to closely fit at respective ends thereof. Likewise, the pyramids have pyramid top pads 106 similar to the side top pads 94, but again mitered to fit closely at ends thereof. Two-piece pyramid side pads 110 extend between the base pads 104 and top pads 106 covering the diagonal members 82.

[0035] Referring to Figure 18, adjacent the opening 26, additional vertical padding 112 is included to offer extra protection for users entering and exiting the arena 10.

[0036] It will be appreciated from the foregoing, that aspects of the present invention provide an improved trampoline arena that can be freestanding, in which stresses from the use of the trampolines are very evenly distributed throughout the framework assembly, even in corners thereof. Moreover, the padding assembly closely conforms to the framework assembly, offering excellent protection while minimizing the likelihood of tripping.

[0037] The foregoing embodiment is provided for illustrative and exemplary purposes, the present invention is not necessarily limited thereto. Those skilled in the art will appreciate that various modifications, as well adaptations for particular circumstances, will fall within the scope of the invention as herein shown and described and of the claims appended hereto.
