

EXHIBIT H

Hypermedia Navigation LLC v. Facebook, Inc.
Case No. 4:17-cv-05383-HSG
U.S. Patent No. 9,772,814
Accused Instrumentality – Facebook Video Search

CLAIM 14

14. A method of presenting a linear program of video elements, the linear program including a first video element, a second video element and a third video element, the method comprising:

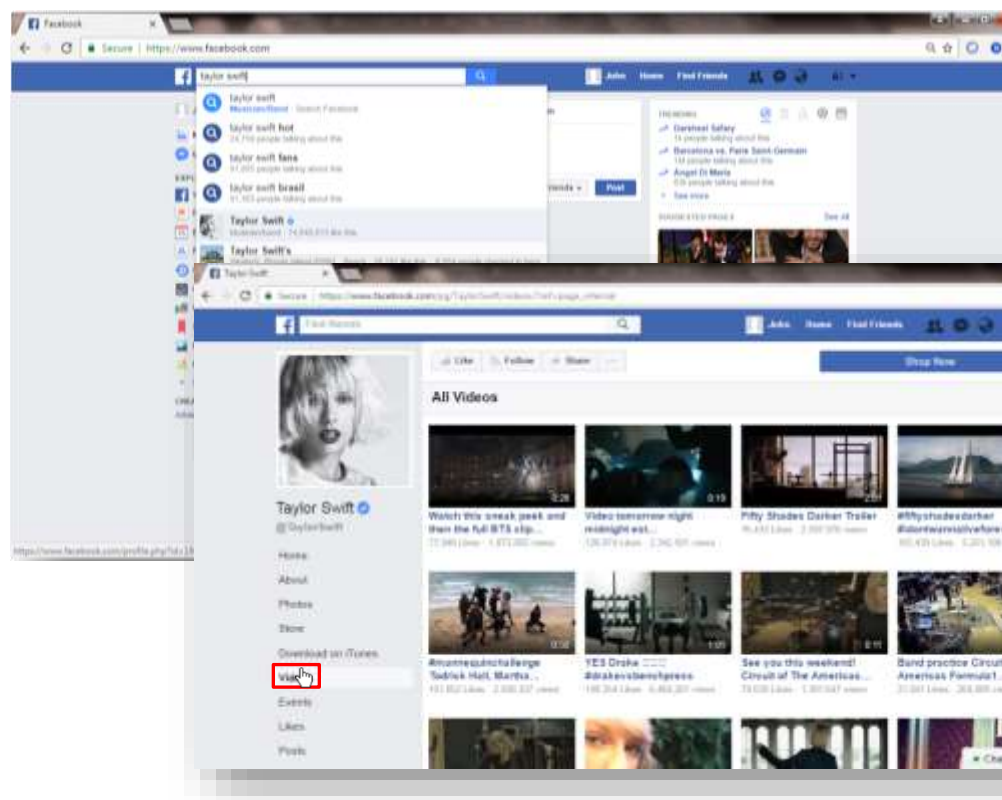

The Accused Instrumentality practices a method of presenting a linear program including a first video element, a second video element and a third video element.

When discussing the Accused Instrumentality in this claim chart Plaintiff refers to video elements that are associated to a Facebook user profile or page to illustrate representative functionality of the operation of the Facebook search platform. It is understood that the content of a Facebook page containing videos will change over time and therefore may not be the same as the exemplary code excerpts shown in this claim chart.

Facebook.com accessible using web browser performs the method of presenting video elements to the client by providing multiple options to search videos, including the capability at www.facebook.com to enter a search query, identify profiles corresponding to the search query and then filtering the search results to view only videos associated with profiles corresponding to the search query. A user will arrive at a video search results page similar to the exemplary page used in this claim chart. In the videos immediately below, an exemplary screenshot of Facebook.com and then filtered to only display video search results which are associated with the search query. The presentation is displayed at the client device.

Hypermedia Navigation LLC v. Facebook, Inc.

Case No. 4:17-cv-05383-HSG

U.S. Patent No. 9,772,814

Accused Instrumentality – Facebook Video Search

The new web page displays the videos (including the selected video) associated with the Facebook web page ('Taylor Swift' – as shown below in exemplary case) below the selected video is being streamed. The streamed video includes next or previous video navigation controls that allow a user to linearly navigate to next or previous video. Thus, the capability to linearly navigate to next or previous video can be inferred to form a linear program of video elements.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
