Table of Contents

I. Introduction..... 1

II. Qualifications..... 1

III. Materials considered and scope of work 3

IV. Applicable standards..... 4

 A. Claim construction 4

 1. My understanding of the legal standard for claim construction..... 4

 2. My understanding about a person having ordinary skill in the art in this case..... 6

 B. My understanding of the legal standard for anticipation 6

 C. My understanding of the legal standard for obviousness..... 7

V. Overview of the technology 8

 A. Background 8

 1. Software agents in the prior art systems 8

 2. Network services..... 10

 3. Remote procedure calls..... 11

 4. The '752 patent 12

 B. Effective filing date 15

 C. Claim construction positions..... 15

 1. Means limitations..... 15

 2. Service resource 17

 3. Agent..... 21

 4. URL defining 21

 5. Consumed..... 22

 6. Exhausted 22

 7. Event handler 22

 8. Service wrapper..... 23

 9. Service permissions 23

VI. Overview of the art 25

A.	Overview of Chow	25
B.	Overview of Bauer	30
C.	Overview of White	31
VII.	Invalidity Grounds Alleged in the Petition.....	32
A.	Ground 1: Chow does not render obvious claims 1–4, 9, 13–14, 22, and 24–26	34
1.	Chow does not render claims of the '752 patent obvious for two reasons	34
2.	Independent claim 1	35
(a)	Preamble (“A system for performing user customized network–based operations comprising”)	35
(b)	means for receiving data for creating a network– based agent.....	35
(c)	means for invoking, in response to receiving a URL defining a type of event and identifying the network-based agent, an execution of the network- based agent.....	37
(d)	means, including the network-based agent, for using a service and a service resource configured to be consumed by the network-based agent for performing the operation, wherein an amount of the service resource is exhausted upon being consumed by the network-based agent; and.....	38
(1)	Agent	39
(2)	“Service Resource”	39
(e)	means for communicating a result of the operation over a network communications link	39
(f)	Conclusion	40
3.	Dependent claim 2	40
4.	Dependent claim 3	40
5.	Dependent claim 4	40
6.	Independent Claim 9	41

(a)	Preamble	41
(b)	Processor.....	41
(c)	Memory storing instruction a memory storing instructions, execution of which by the processor causes the system to perform operations comprising	42
(1)	receiving data for creating a network-based agent	42
(2)	invoking, in response to receiving a URL defining a type of event and identifying the network-based agent, an execution of the network-based agent wherein the execution of the network-based agent comprises using a service and a service resource configured to be consumed by the network-based agent when the network-based agent performs the operation, and wherein an amount of the service resource is exhausted upon being consumed by the network-based agent, and.....	42
(d)	communicating a result of the operation over a network communications link	43
(e)	Conclusion	43
7.	Dependent claim 13	43
8.	Dependent claim 14	43
(a)	identifying, using the service wrapper, service permissions associated with the network-based agent; and.....	44
(b)	determining, using the service wrapper, whether the service permissions include permissions required by the service wrapper to execute the network-based agent	45
(c)	Conclusion	45
9.	Dependent claim 22	45
10.	Independent Claim 24.....	46
(a)	Preamble	46

...

(b)	receiving, using a computing device, data for creating a network-based agent	46
(c)	invoking, using the computing device, and in response to receiving a URL defining a type of event and identifying the network-based agent, execution of the network-based agent, wherein the invoking comprises using a service and a service resource configured to be consumed by the network-based agent for performing the operation, and wherein a discrete unit of the service resource is exhausted upon being consumed by the network-based agent.....	47
(d)	communicating, using the computing device, a result of the operation over a network communication link	47
(e)	Conclusion	47
11.	Dependent claim 25	48
12.	Dependent claim 26	48
B.	Ground 2: Arguments that Chow and Bauer render obvious claims 6, 10, 11, and 23.....	48
1.	Ground 2 fails for the same reason that Ground 1 fails.....	48
2.	Dependent claim 6	48
3.	Dependent claim 10	48
4.	Dependent claim 11	49
5.	Dependent claim 23	49
C.	Ground 3: Chow and White do not render obvious claims 1–4, 9, 13–14, 22, and 24–26	49
1.	Ground 3 fails because Chow and White are not an appropriate combination.	50
(a)	White is not a simple substitution into Chow with a predictable result.....	50
(b)	White renders Chow inoperable for its intended purpose.....	53

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
