A system and method for converting a page-based application to a component based application configured for execu-

tion on a device, the device configured for communication over a network with a schema-defined service of a data source, the page-based application expressed as a series of presentation pages having embedded data and messaging elements for interaction with a user interface. The system and method comprise an analyzer module for assembling a set of page metadata representing at least a portion of a selected page from the series of pages of the page-based application, the page metadata expressed in a first structured definition language. Also included is a data conversion module for converting the embedded data elements into a data component, the data component containing data descriptors expressed in a selected structured definition language of the component based application. Also included is a message conversion module for converting the embedded messaging elements into a message component, the message component containing message descriptors expressed in the selected structured definition language of the component based application, the message component operatively coupled to the data component. Also included is a dependency module for generating a dependency link associated with an event corresponding to the embedded elements, the dependency link for describing a workflow of the components in respect to operation of the component based application when executed on a user interface of the device.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
