An electrotherapy stimulation device is provided. In an embodiment the electrotherapy stimulation device may include a cranial electrical stimulation module with a pulse generator system, a processor, and a memory. The processor can be configured to control the pulse generation system and the memory can be configured to store instructions that cause the processor to cause the pulse generator to generate cranial stimulation waveforms. The electrotherapy stimulation device may also include a body stimulation module that is coupled to the cranial stimulation system and configured to operate in conjunction with it. One example body stimulation module is an electrical muscle stimulation module. Additionally, the electrotherapy stimulation device may be used to stimulate a patient's mind and body by following a protocol that can including predetermined e-yoga, power vector, classical sequence, dynamic rotation, micro-massage, and body care.
