G06F 9/44 (2006.01)(57) **ABSTRACT**

A method for developing platform independent applications comprises integrating an interface into a software development platform, receiving an input indicative of a desired mobile-device type designated to receive an application responsive to the platform independent code, enabling a user to develop an instruction set via the interface, generating a set of platform independent files responsive to the mobile-device type and the instruction set, forwarding the set of platform independent files to a device translator, and generating a device-specific application responsive to the mobile-device type and the platform independent files. A computing device exposes the functions of a software development platform, generates a representation of a set of instructions designated for execution on a mobile device, and transforms the representation. The mobile device receives a device independent representation of an application program designated for operation on the mobile device along with an application program.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
