## ICASSP '98 Conference Committee

The 1998 International Conference on Acoustics, Speech and Signal Processing (ICASSP), sponsored by the IEEE Signal Processing Society, is the twenty-third in a series of international conferences devoted to experimental and theoretical aspects of signal processing, speech and acoustics. Conferences of this scope are possible only because of the continuous interest and support of the Society membership, expressed both by their submission of papers of high quality and by their attendance at the conference. The ICASSP 98 Conference Committee is grateful to all authors, the session chairs, and the volunteers for contributing to the success of this Conference.

## IEEE Signal Processing Society

The IEEE Signal Processing Society is the fourth largest among the IEEE's 37 Technical Societies and councils. The Society's purposes are scientific and educational, directed toward the advancement of the theory and practice of its field of interest, as defined in Article II [of the Constitution]. Its purpose is also professional, directed toward the advancement of the standing of its members. Furthermore, it shall work with other IEEE entities to fulfill the broader purposes of IEEE. The Society's field of interest is the theory and applications of filtering, coding, transmitting, estimating, detecting, analyzing, recognizing, synthesizing, recording, and reproducing signals by digital or analog devices or techniques. The term "signal" includes audio, video, speech, image, communication, geophysical, sonar, radar, medical, musical, and other signals. In 1998 the Society celebrates its 50<sup>th</sup> year anniversary.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
