One-Machine Linux Cluster

Posted by chrisd on Wednesday November 07, 2001 @01:00AM from the chroot-is-so-old-skool dept.

An AC wrote: Forget Beowulf[?] clusters, Jacques Gelinas has made available a kernel patch to enable many virtual servers running on the same machine, even the same kernel. Read his original message posted to the Linux kernel list." Imagine what this will mean for hosting companies...
