

Ex. 1049 – Table Comparing Claims 1, 9, and 19 of U.S. Patent No. 9,454,748

Comparison of claim 9 to claims 19 and 1 (both previously found unpatentable)

Claim 9 (challenged herein)	Claim 19 (found unpatentable in IPR2019-00610)	Claim 1 (found unpatentable in IPR2019-00610)
<p>9. A method for managing data comprising the steps of:</p> <p>(a) establishing communications between a handheld computing device and an originating computer wherein said handheld computing device has a GPS integral thereto;</p> <p>(b) using said GPS to automatically obtain location identifying information for said handheld computing device;</p> <p>(c) transmitting said location identifying information from said handheld computing device to said originating computer;</p> <p>(d) receiving within said handheld computing device a transmission of a tokenized questionnaire customized for a particular location from said originating computer, said tokenized questionnaire comprising</p>	<p>19. A method for managing data comprising the steps of:</p> <p>(a) establishing communications between a handheld computing device and an originating computer wherein said handheld computing device has a GPS integral thereto;</p> <p>(b) receiving within said handheld computing device a transmission of a tokenized questionnaire from said originating computer, said tokenized questionnaire including at least one question requesting location identifying information, said tokenized questionnaire comprising a plurality of device independent tokens;</p> <p>(c) ending said communications between said handheld computing device and said originating computer;</p>	<p>1. A method for managing data including the steps of:</p> <p>(a) creating a questionnaire comprising a series of questions customized for a location;</p> <p>(b) said questionnaire including at least one question requesting GPS coordinates;</p> <p>(c) tokenizing said questionnaire, thereby producing a plurality of device indifferent tokens representing said questionnaire;</p> <p>(d) transmitting said plurality of tokens to a remote computing device;</p> <p>(e) when said remote computing device is at said location, executing at least a portion of said plurality of tokens representing said questionnaire at within said remote computing device to collect a response from a user;</p>

Claim 9 (challenged herein)	Claim 19 (found unpatentable in IPR2019-00610)	Claim 1 (found unpatentable in IPR2019-00610)
<p>a plurality of device indifferent tokens;</p> <p>(e) ending said communications between said handheld computing device and said originating computer;</p> <p>(f) after said communications has been ended, when said handheld computing device at said particular location: executing at least a portion of said plurality of tokens comprising said questionnaire on said handheld computing device to collect at least one response from a user, and storing within said computing device said at least one response from the user</p> <p>(g) establishing communications between said handheld computing device and a recipient computer; and,</p> <p>(h) transmitting a value representative of each of said at least one response stored within said handheld computing device to said recipient computer.</p>	<p>(d) after said communications has been ended,</p> <p>(d1) executing at least a portion of said plurality of tokens comprising said questionnaire on said handheld computing device to collect at least one response from a first user, and,</p> <p>(d2) storing within said computing device at least one response from the first user;</p> <p>(d3) using said GPS to automatically obtain said location identifying information in response to said at least one question that requests location identifying information;</p> <p>(e) establishing communications between said handheld computing device and a recipient computer;</p> <p>(f) transmitting a value representative of each of said at least one response stored within said handheld computing device to said recipient computer; and,</p> <p>(g) after receipt of said transmission of step (f),</p>	<p>(f) automatically entering the GPS coordinates into said questionnaire;</p> <p>(g) transmitting at least a portion of said response from the user to a server in real time via a network; and</p> <p>(h) storing said response at said server.</p>

Claim 9 (challenged herein)	Claim 19 (found unpatentable in IPR2019-00610)	Claim 1 (found unpatentable in IPR2019-00610)
	<i>transmitting a notice of said received value representative of each of said at least one response to a second user.</i>
