BACKGROUND

The '612 Patent

FIG. 1

Independent Claim 1 Of The '612 Patent

Four (4) Structural Elements

a housing

hollow tubes

containers

elastic fasteners

1. An apparatus comprising:
a housing comprising a plurality of holes extending through the housing;
a plurality of hollow tubes, each hollow tube attached to the housing at a respective one of the holes;
a plurality of containers, each container removably attached to a respective one of the hollow tubes;
a plurality of elastic fasteners, each elastic fastener attached to a respective one of the plurality of containers and to a respective one of the plurality of hollow tubes, each elastic fastener configured to restrict detachment of its respective container from its respective tube, and to automatically seal its respective container upon detachment of the container from its respective tube, the restriction of each elastic fastener being sufficiently limited to permit its respective container to detach from its respective tube by a user partially filling the container with water;
wherein the apparatus is configured to fill the containers substantially simultaneously with water.
