(57) **ABSTRACT**

A beverage brewing product for brewing a sweetened beverage is disclosed which produces a sweetened beverage solution that can be mixed with a diluting liquid and which comprises at least one water permeable sieve wherein beverage material and granulated sweetener are contained. The beverage material and sweetener are brewed and dissolved during steeping in hot water to produce a sweetened beverage solution. The beverage solution, if concentrated, is then mixed with a proportioned amount of diluting liquid to make a consistently sweet beverage. This beverage brewing product may be used to produce a variety of consistently sweetened beverages, including tea, coffee, lemonade, and other sweetened beverages.
