

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

VOLTSERVER INC.
Petitioner

v.

CISCO TECHNOLOGY, INC.
Patent Owner

Patent No. 10,735,105

DECLARATION OF DAVID A. DURFEE, PH.D.

I.	INTRODUCTION	1
II.	BACKGROUND AND QUALIFICATIONS	2
III.	SUMMARY OF OPINIONS	6
IV.	PERSON OF ORDINARY SKILL IN THE ART	10
V.	TECHNICAL BACKGROUND	11
A.	Electrical Fundamentals	11
1.	Flow of Electricity	11
2.	Electrical Components	14
3.	Electrical Circuits	16
B.	Communication Fundamentals	20
C.	Power Distribution Fundamentals	21
1.	Power Conversion	21
2.	Distribution	21
3.	Pulsed Power	22
D.	Human and Animal Safety	22
VI.	OVERVIEW OF THE '105 PATENT	24
VII.	OVERVIEW OF THE PRIOR ART	35
A.	Overview of <i>Eaves-543</i> (Ex. 1006)	35
B.	Overview of <i>Chawgo</i> (Ex. 1009)	46
C.	Overview of <i>Torello</i> (Ex. 1010)	49
D.	Overview of <i>Mlyniec</i> (Ex. 1013)	55
E.	Overview of <i>EavesIEEE</i> (Ex. 1014)	58
F.	Overview of <i>Mather</i> (Ex. 1015)	60
G.	Overview of <i>Baldwin</i> (Ex. 1011)	65
VIII.	CLAIM CONSTRUCTION	68
A.	“Low Voltage” (Claim 1, 4, 13, 17, 29, 35) and “High Voltage” (Claims 1, 3, 7-10, 14, 15, 21, 23-26, 28, 35)	68

IX.	A POSITA WOULD NOT HAVE UNDERSTOOD THE SCOPE OF CLAIMS 1-5, 7-31, and 33-35 OF THE '105 PATENT WITH REASONABLE CERTAINTY	68
A.	Claims 1-5, 7-31, and 33-35.....	68
B.	Claim 15	76
	[15.a] “A method comprising:”	76
	[15.b] “testing at power sourcing equipment comprising a power and data source, a power circuit between the power sourcing equipment and a powered device upon startup of the powered device and determining that the power circuit is operable to receive high voltage direct current (HVDC) pulse power;”	76
	[15.c] “delivering the HVDC pulse power from the power sourcing equipment to the powered device over a cable delivering the HVDC pulse power and optical data;”	76
	[15.d] “testing at the power sourcing equipment, the power circuit between the power sourcing equipment and the powered device between high voltage pulses; and”	76
	[15.e] “communicating at the power sourcing equipment, with the powered device over the cable to identify an operating mode at the powered device based on said testing;”	76
	[15.f] “wherein the HVDC pulse power and the optical data are received at an optical transceiver module at the power[ed] device.”	76
C.	Claim 21	78
	“The method of claim 15 wherein a time between said testing between the high voltage pulses is approximately 1 millisecond.”	78
D.	Claim 34	80

“The apparatus of claim 26 wherein the power module is operable to calculate droop voltage for use in fault sensing.”	80
X. THE PRIOR ART DISCLOSES OR SUGGESTS ALL OF THE FEATURES OF CLAIMS 1, 2, 4-26, 28-30, and 32-35 OF THE '105 PATENT	81
A. <i>Eaves-543</i> in View of <i>Chawgo</i> Discloses or Suggests the Features of Claims 1, 2, 4, 5, 7-12, 14-18, 23-26, 28-29, and 34-35	81
1. Claim 1	81
a) [1.a] “A method comprising:”	81
b) [1.b] “receiving electrical power at an optical transceiver module at a remote network device on a cable delivering power on an electrical wire and data on an optical fiber from a central network device;”	82
c) [1.c] “operating the remote network device in a low voltage mode during fault sensing at the remote network device;”	103
d) [1.d] “transmitting on the cable, a data signal to the central network device, said data signal indicating an operating status based on said fault sensing; and”	121
e) [1.e] “receiving high voltage power from the central network device on the cable at the remote network device upon transmitting an indication of a safe operating status, wherein the remote network device is powered by the high voltage power;”	127
f) [1.f] “wherein the high voltage power comprises high voltage pulse power and wherein said fault sensing is performed between pulses.”	134

2.	Claim 2	137
	a) [2.a] “The method of claim 1 further comprising auto-negotiating with the central network device to identify a type of power to apply at the remote network device and”	137
	b) [2.b] “applying a digital interlock setting a power mode of operation at the remote network device.”	142
3.	Claim 4	146
	a) “The method of claim 1 wherein operating the remote network device in a low voltage mode comprises operating the remote network device in a low voltage mode during startup.”	146
4.	Claim 5	147
	a) “The method of claim 1 wherein said fault sensing performed between the pulses comprises fault sensing a power circuit at the remote network device between the pulses.”	147
5.	Claim 7	151
	a) “The method of claim 1 wherein the high voltage power comprises unipolar pulse power.”	151
6.	Claim 8	152
	a) “The method of claim 1 wherein the high voltage power comprises bipolar pulse power.”	152
7.	Claim 9	153
	a) “The method of claim 1 wherein the high voltage power is at least 100 watts and the remote network device is located at a distance greater than 100 meters.”	153
8.	Claim 10	160

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
