Preface

Advances in stem cell biology are making possible new approaches to treat devastating human diseases, including cardiovascular disease, neurodegenerative disease, musculoskeletal disease, diabetes, and cancer. Such approaches may involve cell replacement therapy as well as the development of therapeutic drugs for stimulating the body's own regenerative ability to repair cells damaged by disease and injury. However, obstacles such as control of stem cell fate, immunorejection, and limited cell sources must be overcome before their therapeutic potentials can be realized. Recent studies have suggested that tissue-specific cells may overcome their intrinsic lineage-restriction to dedifferentiate or transdifferentiate upon exposure to a specific set of signals in vitro and in vivo. The ability to dedifferentiate or reverse lineage-committed cells to pluripotent/multipotent cells might overcome many of the obstacles (e.g., cell sources, immunocompatibility, and bioethical concerns) associated with using ES and adult stem cells in clinical applications. With an efficient dedifferentiation process, it is conceivable that healthy, abundant, and easily accessible somatic cells could be reprogrammed to become multipotent or pluripotent stem/progenitor cells, which can then be programmed to generate different types of functional cells for the repair of damaged tissues and organs. This series will cover the most recent technologies and their mechanistic understanding in cellular reprogramming and programming.

Contents

<i>Preface</i>	<i>v</i>
<i>Contributors</i>	<i>ix</i>
1 Human Embryonic Stem Cell Derivation, Maintenance, and Differentiation to Trophoblast	1
<i>Ge Lin, Kristen Martins-Taylor, and Ren-He Xu</i>	
2 Isolation and Maintenance of Mouse Epiblast Stem Cells	25
<i>Josh G. Chenoweth and Paul J. Tesar</i>	
3 Functional Assays for Hematopoietic Stem Cell Self-Renewal	45
<i>John M. Perry and Linheng Li</i>	
4 Isolation Procedure and Characterization of Multipotent Adult Progenitor Cells from Rat Bone Marrow.	55
<i>Kartik Subramanian, Martine Geraerts, Karen A. Pauwelyn, Yonsil Park, D. Jason Owens, Manja Muijtjens, Fernando Ulloa-Montoya, Yeuhua Jiang, Catherine M. Verfaillie, and Wei-Shou Hu</i>	
5 Generation of Functional Insulin-Producing Cells from Human Embryonic Stem Cells In Vitro.	79
<i>Yan Shi</i>	
6 Mesoderm Cell Development from ES Cells	87
<i>Takumi Era</i>	
7 Directed Differentiation of Red Blood Cells from Human Embryonic Stem Cells	105
<i>Shi-Jiang Lu, Qiang Feng, Jennifer S. Park, and Robert Lanza</i>	
8 Directed Differentiation of Neural-stem cells and Subtype-Specific Neurons from hESCs	123
<i>Bao-Yang Hu and Su-Chun Zhang</i>	
9 Directing Human Embryonic Stem Cells to a Retinal Fate	139
<i>Thomas A. Reh, Deepak Lamba, and Julianne Gust</i>	
10 Bovine Somatic Cell Nuclear Transfer	155
<i>Pablo J. Ross and Jose B. Cibelli</i>	
11 Cell Fusion-Induced Reprogramming.	179
<i>Jeong Tae Do and Hans R. Schöler</i>	
12 An Improved Method for Generating and Identifying Human Induced Pluripotent Stem Cells	191
<i>Prashant Mali, Zhaohui Ye, Bin-Kuan Chou, Jonathan Yen, and Linzhao Cheng</i>	
13 Using Small Molecules to Improve Generation of Induced Pluripotent Stem Cells from Somatic Cells	207
<i>Caroline Desponts and Sheng Ding</i>	

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
