Executing Our Strategy

CORPORATE PROFILE

Whether paving roads, mining essential commodities or extracting the fuels to satisfy global energy demand, Caterpillar products are helping to build a better world. Since 1925, Caterpillar has been making sustainable progress possible and driving positive change on every continent.

Services offered throughout the product life cycle, cutting-edge technology and decades of product expertise set Caterpillar apart, providing exceptional value to help our customers succeed.

A man with short, light-colored hair, wearing a dark suit jacket over a light-colored button-down shirt, is smiling slightly. He is standing in front of a blurred background of yellow construction equipment, possibly a bulldozer or excavator, under warm, golden lighting.

DEAR FELLOW SHAREHOLDERS

“

I would like to thank Caterpillar employees around the world for enabling our customers to continue providing the critical infrastructure essential to fight the global pandemic.

”

As we prepared this year's Annual Report, COVID-19 became a global pandemic, presenting new challenges around the world. Governments responded with guidance to manage the crisis and, in many instances, classified operations such as Caterpillar's as essential activity for support of critical infrastructure.

Customers use our products to provide primary and stand-by power for hospitals, grocery stores and data centers; transport food and critical supplies in trucks, ships and locomotives; maintain clean water and sewer systems; mine commodities

“

Along with our dealers and suppliers, Caterpillar is working to help ensure uninterrupted access to the products and services that our customers rely upon to support society during these difficult times.

”

and extract the fuels essential to satisfy global energy demand. Along with our dealers and suppliers, Caterpillar is working to help ensure uninterrupted access to the products and services that our customers rely upon to support society during these difficult times.

While we are serving this important need, Caterpillar remains dedicated to the safety, health and well-being of our employees. The Caterpillar team achieved our best safety performance on record in 2019, and we are leveraging our strong safety culture to manage through this pandemic.

Employees who can work from home are doing so. In our facilities that remain open, Caterpillar is taking appropriate precautions and implementing safeguards to protect our team members. We have increased the frequency of cleaning and disinfecting facilities with special attention to common areas. We are following social distancing practices and are implementing other measures consistent with specific regulatory requirements and guidance from health authorities.

We have introduced a number of enhanced benefits to our employees to help them deal with the pandemic. These benefits vary by country based on local medical

care systems and various regulatory requirements. The Caterpillar Foundation has also committed \$10 million (USD) to directly support global COVID-19 response activities and help organizations that have been impacted.

In response to the pandemic, we have taken other decisive actions to keep our company strong, including reducing discretionary expenses and suspending 2020 salary increases and short-term incentives for many employees and all senior executives.

Photo credit: NYSE

Celebrating 90 Years of Corporate Strength

Of the approximately 2,200 companies listed on the New York Stock Exchange (NYSE), Caterpillar is among only 3% that have been listed for 90 consecutive years or more. We celebrated the 90th anniversary of Caterpillar's listing on the NYSE in December, when Caterpillar Chairman and CEO Jim Umpleby rang the opening bell.

To mark the occasion, we put a variety of Cat® machines on display in front of the NYSE, including a wheel loader, wheeled excavator, industrial loader and compact loader, all of which have played a part in Caterpillar's historical success.

We continue to execute the strategy for profitable growth we introduced in 2017 by focusing on operational excellence, expanded offerings and services.

Caterpillar has faced and overcome many challenges in our 95-year history. As in the past, our employees continue to rise to the occasion. I would like to thank Caterpillar employees around the world for enabling our customers to continue providing the critical infrastructure essential to fight the global pandemic.

Thank you for your continued support.

Jim Umpleby
Chairman & CEO

2019 PERFORMANCE AT-A-GLANCE

Caterpillar delivered strong operational performance despite a 2% decline in sales and revenues for the year. We remained disciplined and focused on maintaining control of our structural costs, which helped us achieve an operating profit margin of 15.4%. We generated strong operating cash flow and, as a result, were able to return \$6.2 billion to shareholders, including \$4.0 billion in share repurchases. We also raised the dividend by 20% in 2019 and paid dividends of \$2.1 billion, maintaining our status as a Dividend Aristocrat. We achieved our 2019 Investor Day targets for operating margin and returned substantially all Machinery, Energy & Transportation (ME&T) free cash flow to shareholders.

2019 END-MARKET HIGHLIGHTS

Construction Industries

Modest economic expansion and continued growth in construction activity in North America, in particular for road infrastructure, was offset by weaker demand in Asia/Pacific due to continued competitive pressures. Lower sales in 2019 were driven by changes in dealer inventories, partially offset by higher end-user demand.

\$22.6B*

Revenue

\$3.9B

Profit

Resource Industries

Mining customers increased capital expenditures as commodity prices were generally supportive of investments. Positive global economic growth drove increased sales for equipment supporting nonresidential construction activities, as well as quarry and aggregates activities.

\$10.3B*

Revenue

\$1.6B

Profit

Energy & Transportation

Declines in North American oil and gas resulted in weaker new equipment demand for well servicing and slowed timing of turbine project delivery of gas compression projects. Both industrial and power generation applications experienced moderate growth from higher end-user demand, while transportation sales were about flat.

\$22.1B*

Revenue

\$3.9B

Profit

* Includes inter-segment sales

EXECUTING OUR STRATEGY

Caterpillar continues to execute our strategy for profitable growth, which has three pillars: operational excellence, expanded offerings and services. **Operational excellence** includes the core competencies of safety, quality, Lean and a competitive and flexible cost structure. **Expanded offerings** includes our growing equipment portfolio that meets a broad range of customer needs. **Services** refers to the many ways that we help customers succeed after purchasing a product, including growing digital offerings. Successfully executing this strategy allows us to improve operating profit and free cash flow – while providing better solutions to customers and creating more opportunities for our people, partners and shareholders.

OPERATIONAL EXCELLENCE

- ▶ Delivered an operating margin of 15.4% on \$53.8 billion of sales and revenues in line with our 2019 Investor Day range.

- ▶ Continued our Lean manufacturing journey through synchronization of value chains to reduce lead times, optimize working capital and increase availability.
- ▶ Continued focus on improving the competitiveness and flexibility of our cost structure, such as reducing production levels to reflect dealer order patterns and targeting lead times.

- ▶ Removed about \$2 billion in structural costs since 2014 by taking an enterprise view to cost management and streamlining our manufacturing approach.
- ▶ Continued focus on implementing defect-free initiatives across the company has continued to result in high-quality machines and power systems.

Achieved our best safety performance on record.

EXPANDED OFFERINGS

- ▶ Invested approximately \$3.5 billion in research and development (R&D) during the past two years, resulting in a wide variety of new products across all our segments.
- ▶ Launched 11 GC models to date, including six new models in 2019, which target customers who prioritize lifecycle value.
- ▶ Expanded our portfolio to include a broader range of underground mining products. Introduced new products with fuel-efficiency benefits, including the D6 XE, the world's first high-drive electric drive dozer.
- ▶ Responded to customers' needs for reliable engines that are lighter, more efficient and powerful with two new engine platforms, the Cat C3.6 and C13B.
- ▶ Introduced the well service 3512E Tier 4 Final Dynamic Gas Blending™ dual fuel engine – the first and only Tier 4 Final well service dual-fuel engine in the industry.
- ▶ Started production of a new single trailer 5MW Solar turbine mobile generator.
- ▶ Launched the XQP30, XQP60, XQP100, XQ230, XQP1100 and XGC1900 family of switchable electric power rental packages.

SERVICES

- ▶ Increased Machinery, Energy & Transportation (ME&T) services revenue 2% in 2019 to approximately \$18 billion, working toward our goal to double ME&T services revenue between 2016 and 2026.

- ▶ Achieved target to connect 1 million assets, resulting in one of the largest fleets of connected assets in the industries we serve.

- ▶ Continued to expand digital capabilities, providing actionable insights for our customers. For example, the Cat Inspect app is now being used to provide close to 100,000 inspections per month.

- ▶ Helped dealers better forecast customer demand through advanced analytics, enabling them to improve parts availability.

- ▶ Leveraged new capabilities to be more customer-focused than ever before, thanks to a renewed focus on customer value agreements.

- ▶ Expanded the number of mining trucks running Caterpillar's autonomous solutions to 275 trucks, an increase of 48% over 2018. Caterpillar continues to have the single largest autonomous fleet in the world, with customers reporting benefits in the areas of safety, productivity and performance.

CORPORATE GOVERNANCE

Caterpillar's governance structure provides leadership, accountability and transparency to the management of the company and its businesses. Our corporate governance framework serves the interests of shareholders with the highest standards of responsibility, integrity and commitment to enhance shareholder value over the long term. These standards are developed and implemented by our Board of Directors and the Executive Office. Learn more at www.caterpillar.com/governance.

PART I

ITEM 1. Business.

General

Originally organized as Caterpillar Tractor Co. in 1925 in the State of California, our company was reorganized as Caterpillar Inc. in 1986 in the State of Delaware. As used herein, the term “Caterpillar,” “we,” “us,” “our” or “the company” refers to Caterpillar Inc. and its subsidiaries unless designated or identified otherwise.

Overview

With 2019 sales and revenues of \$53.800 billion, Caterpillar is the world's leading manufacturer of construction and mining equipment, diesel and natural gas engines, industrial gas turbines and diesel-electric locomotives. The company principally operates through its three primary segments - Construction Industries, Resource Industries and Energy & Transportation - and also provides financing and related services through its Financial Products segment. Caterpillar is also a leading U.S. exporter. Through a global network of independent dealers and direct sales of certain products, Caterpillar builds long-term relationships with customers around the world.

Currently, we have five operating segments, of which four are reportable segments and are described below.

Categories of Business Organization

1. **Machinery, Energy & Transportation** – Represents the aggregate total of Construction Industries, Resource Industries, Energy & Transportation and All Other operating segment and related corporate items and eliminations.
2. **Financial Products** – Primarily includes the company's Financial Products Segment. This category includes Caterpillar Financial Services Corporation (Cat Financial), Caterpillar Insurance Holdings Inc. (Insurance Services) and their respective subsidiaries.

Other information about our operations in 2019, including certain risks associated with our operations, is included in Part II, Item 7 “Management's Discussion and Analysis of Financial Condition and Results of Operations.”

The Construction Industries product portfolio includes the following machines and related parts and work tools:

• asphalt pavers	• harvesters	• telehandlers
• backhoe loaders	• knuckleboom loaders	• small and medium track-type tractors
• compactors	• motorgraders	• track-type loaders
• cold planers	• pipelayers	• wheel excavators
• compact track and multi-terrain loaders	• road reclaimers	• compact, small and medium wheel loaders
• mini, small, medium and large excavators	• site prep tractors	• utility vehicles
• forestry excavators	• skidders	
• feller bunchers	• skid steer loaders	

Resource Industries

The Resource Industries segment is primarily responsible for supporting customers using machinery in mining, heavy construction, quarry and aggregates, waste and material handling applications. Caterpillar offers a broad product range and services to deliver comprehensive solutions for our mining customers. We manufacture high productivity equipment for both surface

Construction Industries

Our Construction Industries segment is primarily responsible for supporting customers using machinery in infrastructure, forestry and building construction. The majority of machine sales in this segment are made in the heavy and general construction, rental, quarry and aggregates markets and mining.

The nature of customer demand for construction machinery varies around the world. Customers in developing economies often prioritize purchase price in making their investment decisions, while customers in developed economies generally weigh productivity and other performance criteria that contribute to lower owning and operating costs over the lifetime of the machine. To meet customer expectations in developing economies, Caterpillar developed differentiated product offerings that target customers in those markets, including our SEM brand machines. We believe that these customer-driven product innovations enable us to compete more effectively in developing economies. The majority of Construction Industries' research and development spending in 2019 focused on the next generation of construction machines.

The competitive environment for construction machinery is characterized by some global competitors and many regional and specialized local competitors. Examples of global competitors include CASE (part of CNH Industrial N.V.), Deere Construction & Forestry (part of Deere & Company), Doosan Infracore Co., Ltd., Hitachi Construction Machinery Co., Ltd., Hyundai Construction Equipment Co., Ltd., J.C. Bamford Excavators Ltd., Kobelco Construction Machinery (part of Kobe Steel, Ltd), Komatsu Ltd., Kubota Farm & Industrial Machinery (part of Kubota Corporation), and Volvo Construction Equipment (part of the Volvo Group). As an example of regional and local competitors, our competitors in China also include Guangxi LiuGong Machinery Co., Ltd., Longking Holdings Ltd., Sany Heavy Industry Co., Ltd., XCMG Group, Shandong Lingong Construction Machinery Co., Ltd. (SDLG, part of the Volvo Group) and Shantui Construction Machinery Co., Ltd., (part of Shandong Heavy Industry Group Co.). Each of these companies has varying product lines that compete with Caterpillar products, and each has varying degrees of regional focus.

and underground mining operations around the world. Our equipment is used to extract and haul copper, iron ore, coal, oil sands, aggregates, gold and other minerals and ores. In addition to equipment, Resource Industries also develops and sells technology products and services to provide customers fleet management systems, equipment management analytics and autonomous machine capabilities.

Customers in most markets place an emphasis on equipment that is highly productive, reliable and provides the lowest total cost of ownership over the life of the equipment. In some developing markets, customers often prioritize purchase price in making their investment decisions. We believe our ability to control the integration and design of key machine components represents a competitive advantage. Our research and development efforts remain focused on providing customers the lowest total cost of ownership enabled through the highest quality, most productive products and services in the industry.

The Resource Industries product portfolio includes the following machines and related parts:

- electric rope shovels
- draglines
- hydraulic shovels
- rotary drills
- hard rock vehicles
- large track-type tractors
- large mining trucks
- longwall miners
- large wheel loaders
- off-highway trucks
- articulated trucks
- wheel tractor scrapers
- wheel dozers
- landfill compactors
- soil compactors
- machinery components
- autonomous ready vehicles and solutions
- select work tools
- hard rock continuous mining systems

Energy & Transportation

Our Energy & Transportation segment supports customers in oil and gas, power generation, marine, rail and industrial applications, including Cat® machines. The product and services portfolio includes reciprocating engines, generator sets, marine propulsion systems, gas turbines and turbine-related services, the remanufacturing of Caterpillar engines and components and remanufacturing services for other companies, diesel-electric locomotives and other rail-related products and services and product support of on-highway vocational trucks for North America.

Regulatory emissions standards require us to continue to make investments as new products and new regulations are introduced. On-going compliance with these regulations remains a focus. Emissions compliance in developing markets is complex due to rapidly evolving and unique requirements where enforcement processes can often vary. We employ robust product development and manufacturing processes to help us comply with these regulations.

The competitive environment for reciprocating engines in marine, oil and gas, industrial and electric power generation systems along with turbines in oil and gas and electric power generation consists of a few larger global competitors that compete in a variety of markets that Caterpillar serves, and a substantial number of smaller companies that compete in a limited-size product range, geographic region and/or application. Principal global competitors include Cummins Inc., Deutz AG, INNIO, Rolls-Royce Power Systems and Wärtsilä Corp. Other competitors, such as Fiat Industrial SpA (CNHI), GE Power, Kawasaki Heavy Industries Energy System & Plant Engineering, MAN Energy Solutions (VW), Mitsubishi Heavy Industries Ltd., Siemens Power and Gas, Volvo Penta AB, Weichai Power Co., Ltd., and other emerging market competitors compete in certain markets in which Caterpillar competes. An additional set of competitors, including Aggreko plc, Baker Hughes Co., Generac Holdings, Kohler Power Systems, and others, are primarily packagers who source engines and/or other components from domestic and international suppliers and market products regionally and internationally through a variety of distribution channels. In rail-related businesses, our global competitors include Alstom SA, Bombardier Transportation, CRRC Corp., LTD., The Greenbrier Companies, Siemens Mobility, Voestalpine AG, Vossloh AG and Wabtec Freight. We also compete with other companies on a more limited range of products, services and/or geographic regions.

The competitive environment for Resource Industries consists of a few larger global competitors that compete in several of the markets that we serve and a substantial number of smaller companies that compete in a more limited range of products, applications, and regional markets. Our global surface competitors include Deere Construction & Forestry (part of Deere & Company), Epiroc AB, Hitachi Construction Machinery Co., Ltd., Komatsu Ltd., Liebherr-International AG, Sandvik AB, and Volvo Construction Equipment. Our global underground competitors include Epiroc AB, Komatsu Ltd., Sandvik AB and Zhengzhou Coal Mining Machinery Group Co., Ltd.

The Energy & Transportation portfolio includes the following products and related parts:

- reciprocating engine powered generator sets
- reciprocating engines supplied to the industrial industry as well as Caterpillar machinery
- integrated systems used in the electric power generation industry
- turbines, centrifugal gas compressors and related services
- reciprocating engines and integrated systems and solutions for the marine and oil and gas industries
- remanufactured reciprocating engines and components
- diesel-electric locomotives and components and other rail-related products and services

Financial Products Segment

The business of our Financial Products Segment is primarily conducted by Cat Financial, Insurance Services and their respective subsidiaries. Cat Financial is a wholly owned finance subsidiary of Caterpillar Inc. and its primary business is to provide retail and wholesale financing alternatives for Caterpillar products to customers and dealers around the world. Retail financing is primarily comprised of the financing of Caterpillar equipment, machinery and engines. Cat Financial also provides financing for vehicles, power generation facilities and marine vessels that, in most cases, incorporate Caterpillar products. In addition to retail financing, Cat Financial provides wholesale financing to Caterpillar dealers and purchases short-term trade receivables from Caterpillar. The various financing plans offered by Cat Financial are primarily designed to increase the opportunity for sales of Caterpillar products and generate financing income for Cat Financial. A significant portion of Cat Financial's activity is conducted in North America, with additional offices and subsidiaries in Latin America, Asia/Pacific, Europe, Africa and the Middle East.

For over 35 years, Cat Financial has been providing financing in the various markets in which it participates, contributing to its knowledge of asset values, industry trends, product structuring and customer needs.

In certain instances, Cat Financial's operations are subject to supervision and regulation by state, federal and various foreign governmental authorities, and may be subject to various laws and judicial and administrative decisions imposing various requirements and restrictions which, among other things, (i) regulate credit granting activities and the administration of loans, (ii) establish maximum interest rates, finance charges and other charges, (iii) require disclosures to customers and

investors, (iv) govern secured transactions, (v) set collection, foreclosure, repossession and other trade practices and (vi) regulate the use and reporting of information related to a borrower's credit experience. Cat Financial's ability to comply with these and other governmental and legal requirements and restrictions affects its operations.

Cat Financial's retail loans (totaling 49 percent*) include:

- Loans that allow customers and dealers to use their Caterpillar equipment or other assets as collateral to obtain financing (24 percent*).
- Installment sale contracts, which are equipment loans that enable customers to purchase equipment with a down payment or trade-in and structure payments over time (25 percent*).

Cat Financial's retail leases (totaling 35 percent*) include:

- Finance (non-tax) leases, where the lessee for tax purposes is considered to be the owner of the equipment during the term of the lease, that either require or allow the customer to purchase the equipment for a fixed price at the end of the term (22 percent*).
- Tax leases that are classified as either operating or finance leases for financial accounting purposes, depending on the characteristics of the lease. For tax purposes, Cat Financial is considered the owner of the equipment (12 percent*).
- Governmental lease-purchase plans in the U.S. that offer low interest rates and flexible terms to qualified non-federal government agencies (1 percent*).

Cat Financial also purchases short-term receivables from Caterpillar (14 percent*).

Cat Financial's wholesale loans and leases (2 percent*) include inventory/rental programs, which provide assistance to dealers by financing their new Caterpillar inventory and rental fleets.

Cat Financial operates in a highly competitive environment, with financing for users of Caterpillar equipment available through a variety of sources, principally commercial banks and finance and leasing companies. Cat Financial's competitors include, Australia and New Zealand Banking Group Limited, Banc of America Leasing & Capital LLC, BNP Paribas Leasing Solutions Limited, Wells Fargo Equipment Finance Inc. and various other banks and finance companies. In addition, many of our manufacturing competitors own financial subsidiaries, such as John Deere Capital Corporation, Komatsu Financial L.P., Kubota Credit Corporation and Volvo Financial Services, which utilize below-market interest rate programs (funded by the manufacturer) to assist machine sales. Caterpillar and Cat Financial work together to provide a broad array of financial merchandising programs around the world to meet these competitive offers.

Cat Financial's financial results are largely dependent upon the ability of Caterpillar dealers to sell equipment and customers' willingness to enter into financing or leasing agreements. Cat Financial is also affected by, among other things, the availability of funds from its financing sources, its cost of funds relative to its competitors and general economic conditions such as inflation and market interest rates.

Cat Financial has a match-funding policy that addresses interest rate risk by aligning the interest rate profile (fixed or floating rate) of its debt portfolio with the interest rate profile of its receivables portfolio within predetermined ranges on an ongoing basis. In connection with that policy, Cat Financial uses interest rate derivative instruments to modify the debt structure to match assets within the receivables portfolio. This matched funding reduces the volatility of margins between interest-bearing assets and interest-bearing liabilities, regardless of which direction interest rates move.

For more information regarding match funding, please see Note 4 — "Derivative financial instruments and risk management" of Part II, Item 8 "Financial Statements and Supplementary Data." See also the risk factors associated with our financial products business included in Item 1 A. of this Form 10-K.

In managing foreign currency risk for Cat Financial's operations, the objective is to minimize earnings volatility resulting from conversion and the remeasurement of net foreign currency balance sheet positions, and future transactions denominated in foreign currencies. This policy allows the use of foreign currency forward, option and cross currency contracts to offset the risk of currency mismatch between the assets and liabilities, and exchange rate risk associated with future transactions denominated in foreign currencies.

Cat Financial provides financing only when certain criteria are met. Credit decisions are based on a variety of credit quality factors including prior payment experience, customer financial information, credit-rating agency ratings, loan-to-value ratios and other internal metrics. Cat Financial typically maintains a security interest in retail-financed equipment and requires physical damage insurance coverage on financed equipment. Cat Financial finances a significant portion of Caterpillar dealers' sales and inventory of Caterpillar equipment throughout the world. Cat Financial's competitive position is improved by marketing programs offered in conjunction with Caterpillar and/or Caterpillar dealers. Under these programs, Caterpillar, or the dealer, funds an amount at the outset of the transaction, which Cat Financial then recognizes as revenue over the term of the financing. We believe that these marketing programs provide Cat Financial a significant competitive advantage in financing Caterpillar products.

Caterpillar Insurance Company, a wholly owned subsidiary of Caterpillar Insurance Holdings Inc., is a U.S. insurance company domiciled in Missouri and primarily regulated by the Missouri Department of Insurance. Caterpillar Insurance Company is licensed to conduct property and casualty insurance business in 50 states, the District of Columbia and Guam, and as such, is also regulated in those jurisdictions. The State of Missouri acts as the lead regulatory authority and monitors Caterpillar Insurance Company's financial status to ensure that it is in compliance with minimum solvency requirements, as well as other financial ratios prescribed by the National Association of Insurance Commissioners. Caterpillar Insurance Company is also licensed to conduct insurance business through a branch in Zurich, Switzerland and, as such, is regulated by the Swiss Financial Market Supervisory Authority.

Caterpillar Life Insurance Company, a wholly owned subsidiary of Caterpillar, is a U.S. insurance company domiciled in Missouri and primarily regulated by the Missouri Department of Insurance. Caterpillar Life Insurance Company is licensed to conduct life and accident and health insurance business in 26 states and the District of Columbia and, as such, is also regulated in those jurisdictions. The State of Missouri acts as the lead regulatory authority and it monitors the financial status to ensure that it is in compliance with minimum solvency requirements, as well as other financial ratios prescribed by the National Association of Insurance Commissioners. Caterpillar Life Insurance Company provides stop loss insurance protection to a Missouri Voluntary Employees' Beneficiary Association (VEBA) trust used to fund medical claims of salaried retirees of Caterpillar under the VEBA.

Caterpillar Insurance Co. Ltd., a wholly owned subsidiary of Caterpillar Insurance Holdings Inc., is a captive insurance company domiciled in Bermuda and regulated by the Bermuda Monetary Authority. Caterpillar Insurance Co. Ltd. is a Class 2 insurer (as defined by the Bermuda Insurance Amendment Act of 1995), which

* Indicates the percentage of Cat Financial's total portfolio at December 31, 2019. We define total portfolio as total finance receivables (net of unearned income and allowance for credit losses) plus equipment on operating leases, less accumulated depreciation. For more information on the above and Cat Financial's concentration of credit risk, please refer to Note 7 — "Cat Financial Financing Activities" of Part II, Item 8 "Financial Statements and Supplementary Data."

primarily insures its parent and affiliates. The Bermuda Monetary Authority requires an Annual Financial Filing for purposes of monitoring compliance with solvency requirements.

Caterpillar Product Services Corporation (CPSC), a wholly owned subsidiary of Caterpillar, is a warranty company domiciled in Missouri. CPSC previously conducted a machine extended service contract program in Germany and France by providing machine extended warranty reimbursement protection to dealers in Germany and France. The program was discontinued effective January 1, 2013, though CPSC continues to provide extended warranty reimbursement protection under existing contracts.

Caterpillar Insurance Services Corporation, a wholly owned subsidiary of Caterpillar Insurance Holdings Inc., is a Tennessee insurance brokerage company licensed in all 50 states, the District of Columbia and Guam. It provides brokerage services for all property and casualty and life and health lines of business.

Caterpillar's insurance group provides protection for claims under the following programs:

- Contractual Liability Insurance to Caterpillar and its affiliates, Caterpillar dealers and original equipment manufacturers (OEMs) for extended service contracts (parts and labor) offered by Caterpillar, third party dealers and OEMs.
- Cargo insurance for the worldwide cargo risks of Caterpillar products.
- Contractors' Equipment Physical Damage Insurance for equipment manufactured by Caterpillar or OEMs, which is leased, rented or sold by third party dealers to customers.
- General liability, employer's liability, auto liability and property insurance for Caterpillar.
- Retiree Medical Stop Loss Insurance for medical claims under the VEBA.
- Brokerage services for property and casualty and life and health business.

Acquisitions

Information related to acquisitions appears in Note 24 — "Acquisitions" of Part II, Item 8 "Financial Statements and Supplementary Data."

Competitive Environment

Caterpillar products and product support services are sold worldwide into a variety of highly competitive markets. In all markets, we compete on the basis of product performance, customer service, quality and price. From time to time, the intensity of competition results in price discounting in a particular industry or region. Such price discounting puts pressure on margins and can negatively impact operating profit. Outside the United States, certain competitors enjoy competitive advantages inherent to operating in their home countries or regions.

Raw Materials and Component Products

We source our raw materials and manufactured components from suppliers both domestically and internationally. These purchases include unformed materials and rough and finished parts. Unformed materials include a variety of steel products, which are then cut or formed to shape and machined in our facilities. Rough parts include various sized steel and iron castings and forgings, which are machined to final specification levels inside our facilities. Finished parts are ready to assemble components, which are made either to Caterpillar specifications or to supplier developed specifications. We machine and assemble some of the components used in our machines, engines

and power generation units and to support our after-market dealer parts sales. We also purchase various goods and services used in production, logistics, offices and product development processes. We maintain global strategic sourcing models to meet our global facilities' production needs while building long-term supplier relationships and leveraging enterprise spend. We expect our suppliers to maintain, at all times, industry-leading levels of quality and the ability to timely deliver raw materials and component products for our machine and engine products. However, increases in demand have led to parts and components constraints across some products. We use a variety of agreements with suppliers to protect our intellectual property and processes to monitor and mitigate risks of the supply base causing a business disruption. The risks monitored include supplier financial viability, the ability to increase or decrease production levels, business continuity, quality and delivery.

Patents and Trademarks

We own a number of patents and trademarks, which have been obtained over a period of years and relate to the products we manufacture and the services we provide. These patents and trademarks are generally considered beneficial to our business. We do not regard our business as being dependent upon any single patent or group of patents.

Order Backlog

The dollar amount of backlog believed to be firm was approximately \$13.7 billion at December 31, 2019 and \$16.5 billion at December 31, 2018. Compared with year-end 2018, the order backlog decreased across the three primary segments. Of the total backlog at December 31, 2019, approximately \$3.8 billion was not expected to be filled in 2020.

Dealers and Distributors

Our machines are distributed principally through a worldwide organization of dealers (dealer network), 46 located in the United States and 119 located outside the United States, serving 191 countries. Reciprocating engines are sold principally through the dealer network and to other manufacturers for use in products. Some of the reciprocating engines manufactured by our subsidiary Perkins Engines Company Limited are also sold through its worldwide network of 67 distributors covering 178 countries. The FG Wilson branded electric power generation systems primarily manufactured by our subsidiary Caterpillar Northern Ireland Limited are sold through its worldwide network of 150 distributors covering 109 countries. Some of the large, medium speed reciprocating engines are also sold under the MaK brand through a worldwide network of 20 distributors covering 130 countries.

Our dealers do not deal exclusively with our products; however, in most cases sales and servicing of our products are the dealers' principal business. Some products, primarily turbines and locomotives, are sold directly to end customers through sales forces employed by the company. At times, these employees are assisted by independent sales representatives.

While the large majority of our worldwide dealers are independently owned and operated, we own and operate a dealership in Japan that covers approximately 80% of the Japanese market: Nippon Caterpillar Division. We are currently operating this Japanese dealer directly and its results are reported in the All Other operating segment. There are also three independent dealers in the Southern Region of Japan.

For Caterpillar branded products, the company's relationship with each of its independent dealers is memorialized in standard sales and service agreements. Pursuant to these agreements,

the company grants the dealer the right to purchase and sell its products and to service the products in a specified geographic service territory. Prices to dealers are established by the company after receiving input from dealers on transactional pricing in the marketplace. The company also agrees to defend its intellectual property and to provide warranty and technical support to the dealer. The agreement further grants the dealer a non-exclusive license to use the company's trademarks, service marks and brand names. In some instances, a separate trademark agreement exists between the company and a dealer.

In exchange for these rights, the agreement obligates the dealer to develop and promote the sale of the company's products to current and prospective customers in the dealer's service territory. Each dealer agrees to employ adequate sales and support personnel to market, sell and promote the company's products, demonstrate and exhibit the products, perform the company's product improvement programs, inform the company concerning any features that might affect the safe operation of any of the company's products and maintain detailed books and records of the dealer's financial condition, sales and inventories and make these books and records available at the company's reasonable request.

These sales and service agreements are terminable at will by either party primarily upon 90 days written notice.

Employment

As of December 31, 2019, we employed about 102,300 full-time persons of whom approximately 58,700 were located outside the United States. In the United States, we employed approximately 43,600 employees, most of whom are at-will employees and, therefore, not subject to any type of employment contract or agreement. At select business units, certain highly specialized employees have been hired under employment contracts that specify a term of employment, pay and other benefits.

Full-Time Employees at Year-End		
	2019	2018
Inside U.S.	43,600	44,600
Outside U.S.	58,700	59,400
Total	102,300	104,000
By Region:		
North America	43,900	44,900
EAME	18,400	18,000
Latin America	16,400	17,300
Asia/Pacific	23,600	23,800
Total	102,300	104,000

As of December 31, 2019, there were approximately 8,290 U.S. hourly production employees who were covered by collective bargaining agreements with various labor unions, including The United Automobile, Aerospace and Agricultural Implement Workers of America (UAW), The International Association of Machinists and The United Steelworkers. Approximately 6,880 of such employees are covered by collective bargaining agreements with the UAW that expire on December 17, 2020 and March 1, 2023. Outside the United States, the company enters into employment contracts and agreements in those countries in which such relationships are mandatory or customary. The provisions of these agreements generally correspond in each case with the required or customary terms in the subject jurisdiction.

Environmental Matters

The company is regulated by federal, state and international environmental laws governing our use, transport and disposal of substances and control of emissions. In addition to governing our manufacturing and other operations, these laws often impact the development of our products, including, but not limited to, required compliance with air emissions standards applicable to internal combustion engines. We have made, and will continue to make, significant research and development and capital expenditures to comply with these emissions standards.

We are engaged in remedial activities at a number of locations, often with other companies, pursuant to federal and state laws. When it is probable we will pay remedial costs at a site, and those costs can be reasonably estimated, the investigation, remediation, and operating and maintenance costs of the remedial action are accrued against our earnings. Costs are accrued based on consideration of currently available data and information with respect to each individual site, including available technologies, current applicable laws and regulations, and prior remediation experience. Where no amount within a range of estimates is more likely, we accrue the minimum. Where multiple potentially responsible parties are involved, we consider our proportionate share of the probable costs. In formulating the estimate of probable costs, we do not consider amounts expected to be recovered from insurance companies or others. We reassess these accrued amounts on a quarterly basis. The amount recorded for environmental remediation is not material and is included in the line item "Accrued expenses" in Statement 3 — "Consolidated Financial Position at December 31" of Part II, Item 8 "Financial Statements and Supplementary Data." There is no more than a remote chance that a material amount for remedial activities at any individual site, or at all the sites in the aggregate, will be required.

Available Information

The company files electronically with the Securities and Exchange Commission (SEC) required reports on Form 8-K, Form 10-Q, Form 10-K and Form 11-K; proxy materials; ownership reports for insiders as required by Section 16 of the Securities Exchange Act of 1934 (Exchange Act); registration statements on Forms S-3 and S-8, as necessary; and other forms or reports as required. The SEC maintains a website (www.sec.gov) that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. The company maintains a website (www.Caterpillar.com) and copies of our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to these reports filed or furnished with the SEC are available free of charge through our website (www.Caterpillar.com/secfilings) as soon as reasonably practicable after filing with the SEC. Copies of our board committee charters, our board's Guidelines on Corporate Governance Issues, Worldwide Code of Conduct and other corporate governance information are available on our website (www.Caterpillar.com/governance). The information contained on the company's website is not included in, or incorporated by reference into, this annual report on Form 10-K.

ITEM 1A. Risk Factors

The statements in this section describe the most significant risks to our business and should be considered carefully in conjunction with Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and the “Notes to Consolidated Financial Statements” of Part II, Item 8 “Financial Statements and Supplementary Data” to this Form 10-K. In addition, the statements in this section and other sections of this Form 10-K, including in Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” include “forward-looking statements” as that term is defined in the Private Securities Litigation Reform Act of 1995 and involve uncertainties that could significantly impact results. Forward-looking statements give current expectations or forecasts of future events about the company or our outlook. You can identify forward-looking statements by the fact they do not relate to historical or current facts and by the use of words such as “believe,” “expect,” “estimate,” “anticipate,” “will be,” “should,” “plan,” “forecast,” “target,” “guide,” “project,” “intend,” “could” and similar words or expressions.

Forward-looking statements are based on assumptions and on known risks and uncertainties. Although we believe we have been prudent in our assumptions, any or all of our forward-looking statements may prove to be inaccurate, and we can make no guarantees about our future performance. Should known or unknown risks or uncertainties materialize or underlying assumptions prove inaccurate, actual results could materially differ from past results and/or those anticipated, estimated or projected.

We undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events or otherwise. You should, however, consult any subsequent disclosures we make in our filings with the SEC on Form 10-Q or Form 8-K.

The following is a cautionary discussion of risks, uncertainties and assumptions that we believe are significant to our business. In addition to the factors discussed elsewhere in this report, the following are some of the important factors that, individually or in the aggregate, we believe could make our actual results differ materially from those described in any forward-looking statements. It is impossible to predict or identify all such factors and, as a result, you should not consider the following factors to be a complete discussion of risks, uncertainties and assumptions.

MACROECONOMIC RISKS

Our business and the industries we serve are highly sensitive to global and regional economic conditions.

Our results of operations are materially affected by economic conditions globally and regionally and in the particular industries we serve. The demand for our products and services tends to be cyclical and can be significantly reduced in periods of economic weakness characterized by lower levels of government and business investment, lower levels of business confidence, lower corporate earnings, high real interest rates, lower credit activity or tighter credit conditions, perceived or actual industry overcapacity, higher unemployment and lower consumer spending. A prolonged period of economic weakness may also result in increased expenses due to higher allowances for doubtful accounts and potential goodwill and asset impairment charges. Economic conditions vary across regions and countries, and demand for our products and services generally increases in those regions and countries experiencing economic growth and investment. Slower economic growth or a change in the global mix of regions and countries experiencing economic growth and investment could have an adverse effect on our business, results of operations and financial condition.

The energy, transportation and mining industries are major users of our products, including the coal, iron ore, gold, copper, oil and natural gas industries. Customers in these industries frequently base their decisions to purchase our products and services on the expected future performance of these industries, which in turn are dependent in part on commodity prices. Prices of commodities in these industries are frequently volatile and can change abruptly and unpredictably in response to general economic conditions and trends, government actions, regulatory actions, commodity inventories, production and consumption levels, technological innovations, commodity substitutions, market expectations and any disruptions in production or distribution or changes in consumption. Economic conditions affecting the industries we serve may in the future also lead to reduced capital expenditures by our customers. Reduced capital expenditures by our customers are likely to lead to a decrease in the demand for our products and services and may also result in a decrease in demand for aftermarket parts as customers are likely to extend preventative maintenance schedules and delay major overhauls when possible.

The rates of infrastructure spending, commercial construction and housing starts also play a significant role in our results. Our products are an integral component of these activities, and as these activities decrease, demand for our products may be significantly impacted, which could negatively impact our results.

Commodity price changes, material price increases, fluctuations in demand for our products, significant disruptions to our supply chains or significant shortages of material may adversely impact our financial results or our ability to meet commitments to customers.

We are a significant user of steel and many other commodities required for the manufacture of our products. Increases in the prices of such commodities would increase our costs, negatively impacting our business, results of operations and financial condition if we are unable to fully offset the effect of these increased costs through price increases, productivity improvements or cost reduction programs.

We rely on suppliers to produce or secure material required for the manufacture of our products. Production challenges at suppliers, a disruption in deliveries to or from suppliers or decreased availability of raw materials or commodities could have an adverse effect on our ability to meet our commitments to customers or increase our operating costs. On the other hand, in circumstances where demand for our products is less than we expect, we may experience excess inventories and be forced to incur additional costs and our profitability may suffer. Our business, competitive position, results of operations or financial condition could be negatively impacted if supply is insufficient for our operations, if we experience excess inventories or if we are unable to adjust our production schedules or our purchases from suppliers to reflect changes in customer demand and market fluctuations on a timely basis.

Changes in government monetary or fiscal policies may negatively impact our results.

Most countries where our products and services are sold have established central banks to regulate monetary systems and influence economic activities, generally by adjusting interest rates. Interest rate changes affect overall economic growth, which affects demand for residential and nonresidential structures, as well as energy and mined products, which in turn affects sales of our products and services that support these activities. Interest rate changes may also affect our customers’ ability to finance machine purchases, can change the optimal time to keep machines in a fleet and can impact the ability of our suppliers to finance the production of parts and components necessary to manufacture and support

our products. Increases in interest rates could negatively impact sales and create supply chain inefficiencies.

Central banks and other policy arms of many countries may take actions to vary the amount of liquidity and credit available in an economy. The impact from a change in liquidity and credit policies could negatively affect the customers and markets we serve or our suppliers, create supply chain inefficiencies and could adversely impact our business, results of operations and financial condition.

Changes in monetary and fiscal policies, along with other factors, may cause currency exchange rates to fluctuate. Actions that lead the currency exchange rate of a country where we manufacture products to increase relative to other currencies could reduce the competitiveness of products made in that country, which could adversely affect our competitive position, results of operations and financial condition.

Government policies on taxes and spending also affect our business. Throughout the world, government spending finances a significant portion of infrastructure development, such as highways, rail systems, airports, sewer and water systems, waterways and dams. Tax regulations determine asset depreciation lives and impact the after-tax returns on business activity and investment, both of which influence investment decisions. Unfavorable developments, such as decisions to reduce public spending or to increase taxes, could negatively impact our results.

Our global operations are exposed to political and economic risks, commercial instability and events beyond our control in the countries in which we operate.

Our global operations are dependent upon products manufactured, purchased and sold in the U.S. and internationally, including in countries with political and economic instability or uncertainty. This includes, for example, the uncertainty related to the United Kingdom's withdrawal from the European Union (commonly known as "Brexit"). Some countries have greater political and economic volatility and greater vulnerability to infrastructure and labor disruptions than others. Our business could be negatively impacted by adverse fluctuations in freight costs, limitations on shipping and receiving capacity, and other disruptions in the transportation and shipping infrastructure at important geographic points of exit and entry for our products. Operating in different regions and countries exposes us to a number of risks, including:

- multiple and potentially conflicting laws, regulations and policies that are subject to change;
- imposition of currency restrictions, restrictions on repatriation of earnings or other restraints;
- imposition of new or additional tariffs or quotas;
- withdrawal from or modification of trade agreements or the negotiation of new trade agreements;
- imposition of new or additional trade and economic sanctions laws imposed by the U.S. or foreign governments;
- war or acts of terrorism; and
- political and economic instability or civil unrest that may severely disrupt economic activity in affected countries.

The occurrence of one or more of these events may negatively impact our business, results of operations and financial condition.

OPERATIONAL RISKS

The success of our business depends on our ability to develop, produce and market quality products that meet our customers' needs.

Our business relies on continued global demand for our brands and products. To achieve business goals, we must develop and sell

products that appeal to our dealers, OEMs and end-user customers. This is dependent on a number of factors, including our ability to maintain key dealer relationships, our ability to produce products that meet the quality, performance and price expectations of our customers and our ability to develop effective sales, advertising and marketing programs. In addition, our continued success in selling products that appeal to our customers is dependent on leading-edge innovation, with respect to both products and operations, and on the availability and effectiveness of legal protection for our innovations. Failure to continue to deliver high quality, innovative, competitive products to the marketplace, to adequately protect our intellectual property rights, to supply products that meet applicable regulatory requirements, including engine exhaust emission requirements or to predict market demands for, or gain market acceptance of, our products, could have a negative impact on our business, results of operations and financial condition.

We operate in a highly competitive environment, which could adversely affect our sales and pricing.

We operate in a highly competitive environment. We compete on the basis of a variety of factors, including product performance, customer service, quality and price. There can be no assurance that our products will be able to compete successfully with other companies' products. Thus, our share of industry sales could be reduced due to aggressive pricing or product strategies pursued by competitors, unanticipated product or manufacturing difficulties, our failure to price our products competitively, our failure to produce our products at a competitive cost or an unexpected buildup in competitors' new machine or dealer-owned rental fleets, which could lead to downward pressure on machine rental rates and/or used equipment prices.

Lack of customer acceptance of price increases we announce from time to time, changes in customer requirements for price discounts, changes in our customers' behavior or a weak pricing environment could have an adverse impact on our business, results of operations and financial condition.

In addition, our results and ability to compete may be impacted negatively by changes in our geographic and product mix of sales.

Increased information technology security threats and more sophisticated computer crime pose a risk to our systems, networks, products and services.

We rely upon information technology systems and networks, some of which are managed by third parties, in connection with a variety of business activities. Additionally, we collect and store sensitive information relating to our business, customers, dealers, suppliers and employees. Operating these information technology systems and networks and processing and maintaining this data in a secure manner, is critical to our business operations and strategy. Information technology security threats -- from user error to cybersecurity attacks designed to gain unauthorized access to our systems, networks and data -- are increasing in frequency and sophistication. Cybersecurity attacks may range from random attempts to coordinated and targeted attacks, including sophisticated computer crime and advanced persistent threats. These threats pose a risk to the security of our systems and networks and the confidentiality, availability and integrity of our data. Cybersecurity attacks could also include attacks targeting customer data or the security, integrity and/or reliability of the hardware and software installed in our products. It is possible that our information technology systems and networks, or those managed by third parties, could have vulnerabilities, which could go unnoticed for a period of time. While various procedures and controls have been and are being utilized to mitigate such risks, there can be no guarantee that the actions and controls we have

implemented and are implementing, or which we cause or have caused third party service providers to implement, will be sufficient to protect our systems, information or other property.

We have experienced cyber security threats and vulnerabilities in our systems and those of our third party providers, and we have experienced viruses and attacks targeting our information technology systems and networks. Such prior events, to date, have not had a material impact on our financial condition, results of operations or liquidity. However, the potential consequences of a future material cybersecurity attack include reputational damage, litigation with third parties, government enforcement actions, penalties, disruption to systems, unauthorized release of confidential or otherwise protected information, corruption of data, diminution in the value of our investment in research, development and engineering, and increased cybersecurity protection and remediation costs, which in turn could adversely affect our competitiveness, results of operations and financial condition. Due to the evolving nature of such security threats, the potential impact of any future incident cannot be predicted. Further, the amount of insurance coverage we maintain may be inadequate to cover claims or liabilities relating to a cybersecurity attack.

In addition, data we collect, store and process is subject to a variety of U.S. and international laws and regulations, such as the European Union's General Data Protection Regulation that became effective in May 2018, which may carry significant potential penalties for noncompliance.

Our business is subject to the inventory management decisions and sourcing practices of our dealers and our OEM customers.

We sell finished products primarily through an independent dealer network and directly to OEMs and are subject to risks relating to their inventory management decisions and operational and sourcing practices. Both carry inventories of finished products as part of ongoing operations and adjust those inventories based on their assessments of future needs and market conditions, including levels of used equipment inventory and machine rental usage rates. Such adjustments may impact our results positively or negatively. If the inventory levels of our dealers and OEM customers are higher than they desire, they may postpone product purchases from us, which could cause our sales to be lower than the end-user demand for our products and negatively impact our results. Similarly, our results could be negatively impacted through the loss of time-sensitive sales if our dealers and OEM customers do not maintain inventory levels sufficient to meet customer demand.

We may not realize all of the anticipated benefits of our acquisitions, joint ventures or divestitures, or these benefits may take longer to realize than expected.

In pursuing our business strategy, we routinely evaluate targets and enter into agreements regarding possible acquisitions, divestitures and joint ventures. We often compete with others for the same opportunities. To be successful, we conduct due diligence to identify valuation issues and potential loss contingencies, negotiate transaction terms, complete complex transactions and manage post-closing matters such as the integration of acquired businesses. Further, while we seek to mitigate risks and liabilities of such transactions through due diligence, among other things, there may be risks and liabilities that our due diligence efforts fail to discover, that are not accurately or completely disclosed to us or that we inadequately assess. We may incur unanticipated costs or expenses following a completed acquisition, including post-closing asset impairment charges, expenses associated with eliminating duplicate facilities, litigation, and other liabilities. Risks associated with our past or future acquisitions also include the following:

- the failure to achieve the acquisition's revenue or profit forecast;
- the business culture of the acquired business may not match well with our culture;

- technological and product synergies, economies of scale and cost reductions may not occur as expected;
- unforeseen expenses, delays or conditions may be imposed upon the acquisition, including due to required regulatory approvals or consents;
- we may acquire or assume unexpected liabilities or be subject to unexpected penalties or other enforcement actions;
- faulty assumptions may be made regarding the macroeconomic environment or the integration process;
- unforeseen difficulties may arise in integrating operations, processes and systems;
- higher than expected investments may be required to implement necessary compliance processes and related systems, including information technology systems, accounting systems and internal controls over financial reporting;
- we may fail to retain, motivate and integrate key management and other employees of the acquired business;
- higher than expected costs may arise due to unforeseen changes in tax, trade, environmental, labor, safety, payroll or pension policies in any jurisdiction in which the acquired business conducts its operations; and
- we may experience problems in retaining customers and integrating customer bases.

Many of these factors will be outside of our control and any one of them could result in increased costs, decreases in the amount of expected revenues and diversion of management's time and attention. They may also delay the realization of the benefits we anticipate when we enter into a transaction.

In order to conserve cash for operations, we may undertake acquisitions financed in part through public offerings or private placements of debt or equity securities, or other arrangements. Such acquisition financing could result in a decrease in our earnings and adversely affect other leverage measures. If we issue equity securities or equity-linked securities, the issued securities may have a dilutive effect on the interests of the holders of our common shares.

Failure to implement our acquisition strategy, including successfully integrating acquired businesses, could have an adverse effect on our business, financial condition and results of operations. Furthermore, we make strategic divestitures from time to time. In the case of divestitures, we may agree to indemnify acquiring parties for certain liabilities arising from our former businesses. These divestitures may also result in continued financial involvement in the divested businesses following the transaction, including through guarantees or other financial arrangements. Lower performance by those divested businesses could affect our future financial results.

Union disputes or other labor matters could adversely affect our operations and financial results.

Some of our employees are represented by labor unions in a number of countries under various collective bargaining agreements with varying durations and expiration dates. There can be no assurance that any current or future issues with our employees will be resolved or that we will not encounter future strikes, work stoppages or other disputes with labor unions or our employees. We may not be able to satisfactorily renegotiate collective bargaining agreements in the United States and other countries when they expire. If we fail to renegotiate our existing collective bargaining agreements, we could encounter strikes or work stoppages or other disputes with labor unions. In addition, existing collective bargaining agreements may not prevent a strike or work stoppage at our facilities in the future. We may also be subject to general country strikes or work stoppages unrelated to our business or collective bargaining agreements. A work stoppage

or other limitations on production at our facilities for any reason could have an adverse effect on our business, results of operations and financial condition. In addition, many of our customers and suppliers have unionized work forces. Strikes or work stoppages experienced by our customers or suppliers could have an adverse effect on our business, results of operations and financial condition.

Unexpected events may increase our cost of doing business or disrupt our operations.

The occurrence of one or more unexpected events, including war, acts of terrorism or violence, civil unrest, fires, tornadoes, tsunamis, hurricanes, earthquakes, floods and other forms of severe weather in the United States or in other countries in which we operate or in which our suppliers are located could adversely affect our operations and financial performance. Natural disasters, pandemic illness, including the current COVID-19 outbreak, equipment failures, power outages or other unexpected events could result in physical damage to and complete or partial closure of one or more of our manufacturing facilities or distribution centers, temporary or long-term disruption in the supply of component products from some local and international suppliers, and disruption and delay in the transport of our products to dealers, end-users and distribution centers. Existing insurance coverage may not provide protection for all of the costs that may arise from such events.

FINANCIAL RISKS

Disruptions or volatility in global financial markets could limit our sources of liquidity, or the liquidity of our customers, dealers and suppliers.

Continuing to meet our cash requirements over the long-term requires substantial liquidity and access to varied sources of funds, including capital and credit markets. Global economic conditions may cause volatility and disruptions in the capital and credit markets. Market volatility, changes in counterparty credit risk, the impact of government intervention in financial markets and general economic conditions may also adversely impact our ability to access capital and credit markets to fund operating needs. Global or regional economic downturns could cause financial markets to decrease the availability of liquidity, credit and credit capacity for certain issuers, including certain customers, dealers and suppliers. An inability to access capital and credit markets may have an adverse effect on our business, results of operations, financial condition and competitive position. Furthermore, changes in global economic conditions, including material cost increases and decreases in economic activity in key markets we serve, and the success of plans to manage cost increases, inventory and other important elements of our business may significantly impact our ability to generate funds from operations.

In addition, demand for our products generally depends on customers' ability to pay for our products, which, in turn, depends on their access to funds. Changes in global economic conditions may result in customers experiencing increased difficulty in generating funds from operations. Capital and credit market volatility and uncertainty may cause financial institutions to revise their lending standards, resulting in customers' decreased access to capital. If capital and credit market volatility occurs, customers' liquidity may decline which, in turn, would reduce their ability to purchase our products.

Failure to maintain our credit ratings would increase our cost of borrowing and could adversely affect our cost of funds, liquidity, competitive position and access to capital markets.

Each of Caterpillar's and Cat Financial's costs of borrowing and their respective ability to access the capital markets are affected not only by market conditions but also by the short- and long-term

credit ratings assigned to their respective debt by the major credit rating agencies. These ratings are based, in significant part, on each of Caterpillar's and Cat Financial's performance as measured by financial metrics such as net worth, interest coverage and leverage ratios, as well as transparency with rating agencies and timeliness of financial reporting. There can be no assurance that Caterpillar and Cat Financial will be able to maintain their credit ratings. We receive debt ratings from the major credit rating agencies. Moody's long- and short-term ratings of Caterpillar and Cat Financial are A3 and Prime-2 ("low-A"), while other major credit rating agencies maintain a "mid-A" debt rating. A downgrade of our credit rating by any of the major credit rating agencies would result in increased borrowing costs and could adversely affect Caterpillar's and Cat Financial's liquidity, competitive position and access to the capital markets, including restricting, in whole or in part, access to the commercial paper market. There can be no assurance that the commercial paper market will continue to be a reliable source of short-term financing for Cat Financial or an available source of short-term financing for Caterpillar. An inability to access the capital markets could have an adverse effect on our cash flow, results of operations and financial condition.

Our Financial Products segment is subject to risks associated with the financial services industry.

Cat Financial is significant to our operations and provides financing support for a significant share of our global sales. The inability of Cat Financial to access funds to support its financing activities to our customers could have an adverse effect on our business, results of operations and financial condition.

Continuing to meet Cat Financial's cash requirements over the long-term could require substantial liquidity and access to sources of funds, including capital and credit markets. Cat Financial has continued to maintain access to key global medium term note and commercial paper markets, but there can be no assurance that such markets will continue to represent a reliable source of financing. If global economic conditions were to deteriorate, Cat Financial could face materially higher financing costs, become unable to access adequate funding to operate and grow its business and/or meet its debt service obligations as they mature, and be required to draw upon contractually committed lending agreements and/or seek other funding sources. However, there can be no assurance that such agreements and other funding sources would be available or sufficient under extreme market conditions. Any of these events could negatively impact Cat Financial's business, as well as our and Cat Financial's results of operations and financial condition.

Market disruption and volatility may also lead to a number of other risks in connection with these events, including but not limited to:

- Market developments that may affect customer confidence levels and cause declines in the demand for financing and adverse changes in payment patterns, causing increases in delinquencies and default rates, which could impact Cat Financial's write-offs and provision for credit losses.
- The process Cat Financial uses to estimate losses inherent in its credit exposure requires a high degree of management's judgment regarding numerous subjective qualitative factors, including forecasts of economic conditions and how economic predictors might impair the ability of its borrowers to repay their loans. Financial market disruption and volatility may impact the accuracy of these judgments.
- Cat Financial's ability to engage in routine funding transactions or borrow from other financial institutions on acceptable terms or at all could be adversely affected by disruptions in the capital markets or other events, including actions by rating agencies and deteriorating investor expectations.

- As Cat Financial's lending agreements are primarily with financial institutions, their ability to perform in accordance with any of its underlying agreements could be adversely affected by market volatility and/or disruptions in financial markets.

Changes in interest rates or market liquidity conditions could adversely affect Cat Financial's and our earnings and/or cash flow.

Changes in interest rates and market liquidity conditions could have an adverse impact on Cat Financial's and our earnings and cash flows. Because a significant number of the loans made by Cat Financial are made at fixed interest rates, its business results are subject to fluctuations in interest rates. Certain loans made by Cat Financial and various financing extended to Cat Financial are made at variable rates that use LIBOR as a benchmark for establishing the interest rate. LIBOR is the subject of recent proposals for reform. On July 27, 2017, the United Kingdom's Financial Conduct Authority announced that it intends to stop persuading or compelling banks to submit LIBOR rates after 2021. These reforms may cause LIBOR to cease to exist, new methods of calculating LIBOR to be established such that LIBOR continues to exist after 2021 or the establishment of an alternative reference rate(s). Several offerings of securities that include such an alternative reference rate have now been completed by other companies. The consequences of these developments cannot be entirely predicted and could have an adverse impact on the market value for or value of LIBOR-linked securities, loans, derivatives, and other financial obligations or extensions of credit held by or due to Cat Financial, as well as the revenue and expenses associated with those securities, loans and financial instruments. Cat Financial has created a cross-functional team that will assess risk across multiple categories as it relates to the use of LIBOR in securities, loans, derivatives, and other financial obligations or extensions of credit held by or due to us. The team is also closely monitoring the progress of LIBOR reform and preparing to incorporate appropriate fallback language for transitioning to an alternative reference rate(s) into new agreements with customers. The team is reviewing how to best manage those customer agreements that extend beyond 2021 and utilize LIBOR. Other changes in market interest rates may influence Cat Financial's borrowing costs and could reduce its and our earnings and cash flows, returns on financial investments and the valuation of derivative contracts. Cat Financial manages interest rate and market liquidity risks through a variety of techniques that include a match funding strategy, the selective use of derivatives and a broadly diversified funding program. There can be no assurance, however, that fluctuations in interest rates and market liquidity conditions will not have an adverse impact on its and our earnings and cash flows. If any of the variety of instruments and strategies Cat Financial uses to hedge its exposure to these types of risk is ineffective, this may have an adverse impact on our earnings and cash flows. With respect to Insurance Services' investment activities, changes in the equity and bond markets could result in a decline in value of its investment portfolio, resulting in an unfavorable impact to earnings.

An increase in delinquencies, repossessions or net losses of Cat Financial customers could adversely affect its results.

Inherent in the operation of Cat Financial is the credit risk associated with its customers. The creditworthiness of each customer and the rate of delinquencies, repossessions and net losses on customer obligations are directly impacted by several factors, including relevant industry and economic conditions, the availability of capital, the experience and expertise of the customer's management team, commodity prices, political events and the sustained value of the underlying collateral. Any increase in delinquencies, repossessions and net losses on customer obligations could have a material adverse effect on Cat Financial's and our earnings and cash flows. In addition, although Cat Financial evaluates and adjusts its allowance for credit losses related to past due and non-performing receivables on a regular basis, adverse economic conditions or

other factors that might cause deterioration of the financial health of its customers could change the timing and level of payments received and necessitate an increase in Cat Financial's estimated losses, which could also have a material adverse effect on Cat Financial's and our earnings and cash flows.

Currency exchange rate fluctuations affect our results of operations.

We conduct operations in many countries involving transactions denominated in a variety of currencies. We are subject to currency exchange rate risk to the extent that our costs are denominated in currencies other than those in which we earn revenues. Fluctuations in currency exchange rates have had, and will continue to have, an impact on our results as expressed in U.S. dollars. There can be no assurance that currency exchange rate fluctuations will not adversely affect our results of operations, financial condition and cash flows. While the use of currency hedging instruments may provide us with protection from adverse fluctuations in currency exchange rates, by utilizing these instruments we potentially forego the benefits that might result from favorable fluctuations in currency exchange rates. In addition, our outlooks do not assume fluctuations in currency exchange rates. Adverse fluctuations in currency exchange rates from the date of our outlooks could cause our actual results to differ materially from those anticipated in our outlooks and adversely impact our business, results of operations and financial condition.

We also face risks arising from the imposition of exchange controls and currency devaluations. Exchange controls may limit our ability to convert foreign currencies into U.S. dollars or to remit dividends and other payments by our foreign subsidiaries or businesses located in or conducted within a country imposing controls. Currency devaluations result in a diminished value of funds denominated in the currency of the country instituting the devaluation.

Restrictive covenants in our debt agreements could limit our financial and operating flexibility.

We maintain a number of credit facilities to support general corporate purposes (facilities) and have issued debt securities to manage liquidity and fund operations (debt securities). The agreements relating to a number of the facilities and the debt securities contain certain restrictive covenants applicable to us and certain subsidiaries, including Cat Financial. These covenants include maintaining a minimum consolidated net worth (defined as the consolidated shareholder's equity including preferred stock but excluding the pension and other post-retirement benefits balance within accumulated other comprehensive income (loss)), limitations on the incurrence of liens and certain restrictions on consolidation and merger. Cat Financial has also agreed under certain of these agreements not to exceed a certain leverage ratio (consolidated debt to consolidated net worth, calculated (1) on a monthly basis as the average of the leverage ratios determined on the last day of each of the six preceding calendar months and (2) at each December 31), to maintain a minimum interest coverage ratio (profit excluding income taxes, interest expense and net gain/(loss) from interest rate derivatives to interest expense, calculated at the end of each calendar quarter for the rolling four quarter period then most recently ended) and not to terminate, amend or modify its support agreement with us.

A breach of one or more of the covenants could result in adverse consequences that could negatively impact our business, results of operations and financial condition. These consequences may include the acceleration of amounts outstanding under certain of the facilities, triggering of an obligation to redeem certain debt securities, termination of existing unused commitments by our lenders, refusal by our lenders to extend further credit under one or more of the facilities or to enter into new facilities or the lowering or modification of our credit ratings or those of one or more of our subsidiaries.

Sustained increases in funding obligations under our pension plans may impair our liquidity or financial condition.

We maintain certain defined benefit pension plans for our employees, which impose on us certain funding obligations. In determining our future payment obligations under the plans, we assume certain rates of return on the plan assets and a certain level of future benefit payments. Significant adverse changes in credit or capital markets could result in actual rates of return being materially lower than projected and result in increased contribution requirements. Our assumptions for future benefit payments may also change over time and could be materially higher than originally projected. We expect to make contributions to our pension plans in the future, and may be required to make contributions that could be material. We may fund contributions through the use of cash on hand, the proceeds of borrowings, shares of our common stock or a combination of the foregoing, as permitted by applicable law. Our assumptions for future benefit payments may change over time and could be materially higher than projected. These factors could significantly increase our payment obligations under the plans, and as a result, adversely affect our business and overall financial condition.

LEGAL & REGULATORY RISKS

Our global operations are subject to a wide-range of trade and anti-corruption laws and regulations.

Due to the international scope of our operations, we are subject to a complex system of import- and export-related laws and regulations, including U.S. regulations issued by Customs and Border Protection, the Bureau of Industry and Security, the Office of Antiboycott Compliance, the Directorate of Defense Trade Controls and the Office of Foreign Assets Control, as well as the counterparts of these agencies in other countries. Any alleged or actual violations may subject us to increased government scrutiny, investigation and civil and criminal penalties, and may limit our ability to import or export our products or to provide services outside the United States. Furthermore, embargoes and sanctions imposed by the U.S. and other governments restricting or prohibiting sales to specific persons or countries or based on product classification may expose us to potential criminal and civil sanctions. We cannot predict the nature, scope or effect of future regulatory requirements to which our operations might be subject or in certain locations the manner in which existing laws might be administered or interpreted.

In addition, the U.S. Foreign Corrupt Practices Act and similar foreign anti-corruption laws generally prohibit companies and their intermediaries from making improper payments or providing anything of value to improperly influence foreign government officials for the purpose of obtaining or retaining business, or obtaining an unfair advantage. Recent years have seen a substantial increase in the global enforcement of anti-corruption laws. Our operations outside the United States, including in developing countries, expose us to the risk of such violations. Violations of anti-corruption laws or regulations by our employees, intermediaries acting on our behalf, or our joint venture partners may result in severe criminal or civil sanctions, could disrupt our business, and result in an adverse effect on our reputation, business and results of operations or financial condition.

International trade policies may impact demand for our products and our competitive position.

Government policies on international trade and investment such as import quotas, capital controls or tariffs, whether adopted by individual governments or addressed by regional trade blocs, can affect the demand for our products and services, impact the

competitive position of our products or prevent us from being able to sell products in certain countries. The implementation of more restrictive trade policies, such as more detailed inspections, higher tariffs or new barriers to entry, in countries where we sell large quantities of products and services could negatively impact our business, results of operations and financial condition. For example, a government's adoption of "buy national" policies or retaliation by another government against such policies could have a negative impact on our results of operations.

We may incur additional tax expense or become subject to additional tax exposure.

We are subject to income taxes in the United States and numerous other jurisdictions. Our future results of operations could be adversely affected by changes in the effective tax rate as a result of a change in the mix of earnings between U.S. and non-U.S. jurisdictions or among jurisdictions with differing statutory tax rates, changes in our overall profitability, changes in tax laws or treaties or in their application or interpretation, changes in tax rates, changes in generally accepted accounting principles, changes in the valuation of deferred tax assets and liabilities, changes in the amount of earnings indefinitely reinvested in certain non-U.S. jurisdictions, the results of audits and examinations of previously filed tax returns and continuing assessments of our tax exposures. We are also subject to the continuous examination of our income tax returns by the U.S. Internal Revenue Service and other tax authorities. We regularly assess the likelihood of an adverse outcome resulting from these examinations. If our effective tax rates were to increase, or if the ultimate determination of our taxes owed is for an amount in excess of amounts previously accrued, our operating results, cash flows and financial condition could be adversely affected. For information regarding additional legal matters related to our taxes, please see Note 6 — "Income taxes" and Note 22 — "Environmental and legal matters" of Part II, Item 8 "Financial Statements and Supplementary Data" to this Annual Report on Form 10-K.

Costs associated with lawsuits or investigations or adverse rulings in enforcement or other legal proceedings may have an adverse effect on our results of operations.

We are subject to a variety of legal proceedings and legal compliance risks in virtually every part of the world. We face risk of exposure to various types of claims, lawsuits and government investigations. We are involved in various claims and lawsuits related to product design, manufacture and performance liability (including claimed asbestos exposure), contracts, employment issues, environmental matters, intellectual property rights, tax, securities and other legal proceedings that arise in and outside of the ordinary course of our business. The industries in which we operate are also periodically reviewed or investigated by regulators, which could lead to enforcement actions, fines and penalties or the assertion of private litigation claims. It is not possible to predict with certainty the outcome of claims, investigations and lawsuits, and we could in the future incur judgments, fines or penalties or enter into settlements of lawsuits and claims that could have an adverse effect on our reputation, business, results of operations or financial condition in any particular period.

The global and diverse nature of our operations means that legal and compliance risks will continue to exist and additional legal proceedings and other contingencies, the outcome of which cannot be predicted with certainty, may arise from time to time. In addition, subsequent developments in legal proceedings may affect our assessment and estimates of loss contingencies recorded as a reserve and require us to make payments in excess of our reserves, which could have an adverse effect on our reputation, business and results of operations or financial condition.

New regulations or changes in financial services regulation could adversely impact Caterpillar and Cat Financial.

Cat Financial's operations are highly regulated by governmental authorities in the locations where it operates, which can impose significant additional costs and/or restrictions on its business. In the United States, for example, certain Cat Financial activities are subject to the U.S. Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank), which includes extensive provisions regulating the financial services industry. As a result, Cat Financial has become and could continue to become subject to additional regulatory costs that could be significant and have an adverse effect on Cat Financial's and our results of operations and financial condition. Changes in regulations or additional regulations in the United States or internationally impacting the financial services industry could also add significant cost or operational constraints that might have an adverse effect on Cat Financial's and our results of operations and financial condition.

We are subject to stringent environmental laws and regulations that impose significant compliance costs.

Our facilities, operations and products are subject to increasingly stringent environmental laws and regulations globally, including laws and regulations governing emissions to noise, air, releases to soil and discharges to water and the generation, handling, storage, transportation, treatment and disposal of non-hazardous and hazardous waste materials. Some environmental laws impose strict, retroactive and joint and several liability for the remediation of the release of hazardous substances, even for conduct that was lawful at the time it occurred, or for the conduct of, or conditions

caused by, prior operators, predecessors or other third parties. Failure to comply with environmental laws could expose us to penalties or clean-up costs, civil or criminal liability and sanctions on certain of our activities, as well as damage to property or natural resources. The potential liabilities, sanctions, damages and remediation efforts related to any non-compliance with such laws and regulations could negatively impact our ability to conduct our operations and our financial condition and results of operations. In addition, there can be no assurances that we will not be adversely affected by costs, liabilities or claims with respect to existing or subsequently acquired operations or under present laws and regulations or those that may be adopted or imposed in the future.

Environmental laws and regulations may change from time to time, as may related interpretations and other guidance. Changes in environmental laws or regulations could result in higher expenses and payments, and uncertainty relating to environmental laws or regulations may also affect how we conduct our operations and structure our investments and could limit our ability to enforce our rights. Changes in environmental and climate change laws or regulations, including laws relating to greenhouse gas emissions, could lead to new or additional investment in product designs and could increase environmental compliance expenditures. Changes in climate change concerns, or in the regulation of such concerns, including greenhouse gas emissions, could subject us to additional costs and restrictions, including increased energy and raw materials costs. If environmental laws or regulations are either changed or adopted and impose significant operational restrictions and compliance requirements upon us or our products, they could negatively impact our reputation, business, capital expenditures, results of operations, financial condition and competitive position.

ITEM 1B. Unresolved Staff Comments.

None.

ITEM 1C. Executive Officers of the Registrant.

Name and age	Present Caterpillar Inc. position and date of initial election	Principal positions held during the past five years if other than Caterpillar Inc. position currently held
D. James Umpleby III (61)	Chairman of the Board (2018) and Chief Executive Officer (2017)	Group President (2013-2016)
Andrew R.J. Bonfield (57)	Chief Financial Officer (2018)	Group Chief Financial Officer for a multinational electricity and gas utility company (2010-2018)
Bob De Lange (50)	Group President (2017)	Vice President (2015-2016), Worldwide Product Manager, Medium Wheel Loaders, (2013-2014)
Denise C. Johnson (53)	Group President (2016)	Vice President (2012-2016)
William P. Ainsworth (63)	Group President (2019)	President/CEO, Progress Rail & Senior Vice President and Strategic Advisor to Caterpillar Inc. (2017-2019), President/CEO, Progress Rail - Vice President (2014-2017)
Ramin Younessi (55)	Group President (2018)	Vice President (2013-2018)
Suzette M. Long (54)	Chief Legal Officer, General Counsel and Corporate Secretary (2017)	Interim Executive Vice President, Law and Public Policy (2017), Deputy General Counsel (2013-2017)
Cheryl C. Johnson (59)	Chief Human Resources Officer (2017)	Executive Vice President of Human Resources for a global multi-industry aerospace, defense and industrial manufacturing company (2012-2017)
G. Michael Marvel (58)	Chief Accounting Officer (2019)	Director of Corporate Financial Reporting (2018-2019), Chief Financial Officer for Solar Turbines Incorporated (2013-2018)

ITEM 2. Properties.

General Information

Caterpillar's operations are highly integrated. Although the majority of our plants are involved primarily in production relating to our Construction Industries, Resource Industries or Energy & Transportation segments, several plants are involved in manufacturing relating to more than one business segment. In addition, several plants reported in our financial statements under the All Other segment are involved in the manufacturing of components that are used in the assembly of products for more than one business segment. Caterpillar's parts distribution centers are involved in the storage and distribution of parts for Construction Industries, Resource Industries and Energy & Transportation. The research and development activities carried on at our Technical Center in Mossville, Illinois involve products for Construction Industries, Resource Industries and Energy & Transportation.

We believe the properties we own to be generally well maintained and adequate for present use. Through planned capital expenditures, we expect these properties to remain adequate for future needs. Properties we lease are covered by leases expiring over terms of generally one to ten years. We do not anticipate any difficulty in retaining occupancy of any leased facilities, either by renewing leases prior to expiration or by replacing them with equivalent leased facilities.

Headquarters and Other Key Offices

Our corporate headquarters are in leased offices located in Deerfield, Illinois. Our Financial Products business is headquartered in offices in Nashville, Tennessee. Additional key offices are located inside and outside the United States.

Technical Center, Training Centers, Demonstration Areas and Proving Grounds

We operate Technical Centers located in Mossville, Illinois; Wuxi, China; and Chennai, India. Our demonstration centers are located in Tinaja Hills, Arizona; Edwards, Illinois; Chichibu, Japan and Malaga, Spain. We have various other technical and training centers, demonstration areas and proving grounds located both inside and outside the United States.

Parts Distribution Centers

Distribution of our parts is conducted from parts distribution centers inside and outside the United States. We operate parts distribution centers in the following locations: Arvin, California; Denver, Colorado; Miami, Florida; Atlanta, Georgia; Morton, Illinois; St. Paul, Minnesota; Clayton, Ohio; York, Pennsylvania; Waco, Texas; Spokane, Washington; Melbourne, Australia; Queensland, Australia; Grimbergen, Belgium; Piracicaba, Brazil; Shanghai, China; Sagami, Japan; San Luis Potosi, Mexico; Singapore, Republic of Singapore; Moscow, Russia; Johannesburg, South Africa; and Dubai, United Arab Emirates. We also own or lease other facilities that support our distribution activities.

Remanufacturing and Components

Remanufacturing of our products is reported in our Energy & Transportation segment and is conducted primarily at the facilities in the following locations: Franklin, Indiana; Bogor, Indonesia; Corinth, Mississippi; Prentiss County, Mississippi; West Fargo, North Dakota; Piracicaba, Brazil; Shanghai, China; Nuevo Laredo, Mexico; and Shrewsbury, United Kingdom.

Component manufacturing is reported in the All Other segment and is conducted primarily at facilities in the following locations: East Peoria, Illinois; Mapleton, Illinois; Peoria, Illinois; Bogor, Indonesia; Menominee, Michigan; Boonville, Missouri; West Plains, Missouri; Goldsboro, North Carolina; Sumter, South Carolina; Tianjin, China; Xuzhou, China; Atessa, Italy; Bazzano, Italy; Frosinone, Italy; San Eusebio, Italy; Ramos Arizpe, Mexico; Pyeongtaek, South Korea; and Skinningrove, United Kingdom.

We also lease or own other facilities that support our remanufacturing and component manufacturing activities.

Manufacturing

Manufacturing of products for our Construction Industries, Resource Industries and Energy & Transportation segments is conducted primarily at the locations listed below. These facilities are believed to be suitable for their intended purposes, with adequate capacities for current and projected needs for existing products.

Our principal manufacturing facilities include those used by the following segments in the following locations:

Segment	U.S. Facilities	Facilities Outside the U.S.
Construction Industries	Arkansas: North Little Rock	Brazil: Campo Largo, Piracicaba
	Georgia: Athens, LaGrange	China: Suzhou, Wujiang, Xuzhou, Qingzhou
	Illinois: Decatur, East Peoria	France: Grenoble, Echirolles
	Kansas: Wamego	Hungary: Godollo
	Minnesota: Brooklyn Park	India: Thiruvallur
	North Carolina: Clayton, Sanford	Indonesia: Jakarta
	Texas: Victoria	Italy: Minerbio
		Japan: Akashi
		Mexico: Torreon
		Netherlands: Den Bosch
Resource Industries		Poland: Janow, Sosnowiec
		Thailand: Rayong
		United Kingdom: Desford, Stockton
	Illinois: Aurora, Decatur, East Peoria, Joliet	China: Wuxi
	South Carolina: Sumter	Germany: Dortmund, Lunen
	Tennessee: Dyersburg	India: Thiruvallur
	Texas: Denison	Indonesia: Batam
	Wisconsin: South Milwaukee	Italy: Jesi
		Mexico: Acuna, Monterrey, Reynosa
		Russia: Tosno
Energy & Transportation		Thailand: Rayong
		United Kingdom: Peterlee, Springvale
	Alabama: Albertville, Montgomery	Australia: Cardiff, Perth, Redbank, Revesby
	California: San Diego	Brazil: Curitiba, Hortolandia, Piracicaba, Sete Lagoas
	Georgia: Griffin	China: Tianjin, Wuxi
	Illinois: Island Lake, LaGrange, Mossville, Mapleton, Pontiac	Czech Republic: Zatec, Zebrak
	Indiana: Lafayette, Muncie	Germany: Kiel, Mannheim, Rostock
	Kentucky: Decoursey, Mayfield	India: Aurangabad, Hosur
	Oklahoma: Broken Arrow	Italy: Pistoria
	North Carolina: Winston-Salem	Mexico: San Luis Potosi, Tijuana
	Texas: Channelview, DeSoto, Mabank, San Antonio, Schertz, Seguin, Sherman	Republic of Singapore: Singapore
		Sweden: Ockero Islands
		United Kingdom: Larne, Peterborough, Sandiacre, South Queensferry, Stafford, Wimborne

ITEM 3. Legal Proceedings

Certain legal proceedings in which we are involved are discussed in Note 22 — “Environmental and legal matters” of Part II, Item 8 “Financial Statements and Supplementary Data” and should be considered an integral part of Part I, Item 3 “Legal Proceedings.”

ITEM 4. Mine Safety Disclosures

Not applicable.

PART II

ITEM 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Common Stock (NYSE: CAT)

Listing Information: Caterpillar common stock is listed on the New York Stock Exchange in the United States, and on stock exchanges in France and Switzerland.

Number of Shareholders: Shareholders of record at the end of 2019 totaled 25,985, compared with 26,938 at the end of 2018.

Performance Graph: Total Cumulative Shareholder Return for Five-Year Period Ending December 31, 2019

The graph below shows the cumulative shareholder return assuming an investment of \$100 on December 31, 2014, and reinvestment of dividends issued thereafter.

	2014	2015	2016	2017	2018	2019
Caterpillar Inc.	\$ 100.00	\$ 77.03	\$ 109.46	\$ 191.59	\$ 157.95	\$ 188.77
S&P 500	\$ 100.00	\$ 101.38	\$ 113.51	\$ 138.29	\$ 132.23	\$ 173.86
S&P 500 Machinery	\$ 100.00	\$ 97.47	\$ 115.85	\$ 140.22	\$ 121.58	\$ 157.29

Non-U.S. Employee Stock Purchase Plans

As of December 31, 2019, we had 24 employee stock purchase plans (the "EIP Plans") administered outside the United States for our non-U.S. employees, which had approximately 12,000 active participants in the aggregate. During the fourth quarter of 2019, approximately 87,000 shares of Caterpillar common stock were purchased by the EIP Plans pursuant to the terms of such plans.

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased ^{2,3}	Average Price Paid per Share ^{2,3}	Total Number of Shares Purchased as Part of Publicly Announced Program	Approximate Dollar Value of Shares that May Yet be Purchased under the Program (in billions) ¹
October 1-31, 2019	4,755,142	\$ 137.65	4,755,142	\$ 6.022
November 1-30, 2019	36,414	\$ 137.31	36,414	\$ 6.017
December 1-31, 2019	2,890	\$ 139.73	2,890	\$ 6.017
Total	4,794,446	\$ 137.64	4,794,446	

¹ In July 2018, the Board approved a share repurchase authorization of up to \$10.0 billion of Caterpillar common stock effective January 1, 2019, with no expiration (the 2018 Authorization). As of December 31, 2019, approximately \$6.0 billion remained available under the 2018 Authorization.

² During the fourth quarter of 2019, we entered into an accelerated share repurchase agreement (ASR) with a third-party financial institution to purchase \$600 million of our common stock. In October 2019, upon payment of \$600 million to the financial institution, we received 3.5 million shares. In January 2020, upon final settlement of the ASR, we received an additional 0.7 million shares. In total, we repurchased 4.2 million shares under this ASR at an average price per share of \$142.48.

³ In October of 2019, we repurchased 1.3 million shares for \$158 million in open market transactions at an average price per share of \$124.43. In November and December of 2019, we repurchased a minimal number of shares in open market transactions as illustrated in the above table.

Share repurchases in the table above are reported based on the trade dates.

ITEM 6. Selected Financial Data.

Five-year Financial Summary

(Dollars in millions except per share data)

	2019	2018	2017	2016	2015
Years ended December 31,					
Sales and revenues	\$ 53,800	\$ 54,722	\$ 45,462	\$ 38,537	\$ 47,011

¹ Profit (loss) attributable to common shareholders.

² Computed on weighted-average number of shares outstanding.

³ Computed on weighted-average number of shares outstanding diluted by assumed exercise of stock-based compensation awards, using the treasury stock method. In 2016, the assumed exercise of stock-based compensation awards was not considered because the impact would be antidilutive.

⁴ Represents profit (loss) divided by average shareholders' equity (beginning of year shareholders' equity plus end of year shareholders' equity divided by two).

Additional information required by Item 6 is included in Part II, Item 7 "Management's Discussion and Analysis of Financial Condition and Results of Operations."

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

This Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with our discussion of cautionary statements and significant risks to the company's business under Item 1A. Risk Factors of the 2019 Form 10-K.

OVERVIEW

Our sales and revenues for 2019 were \$53.800 billion, a 2 percent decrease from 2018 sales and revenues of \$54.722 billion. The decrease was primarily due to lower **sales volume**. The sales volume decline was mostly due to changes in dealer inventories, partially offset by higher end-user demand. Sales were lower in **EAME** and Asia/Pacific, while North America and **Latin America** were about flat. Sales declined in **Energy & Transportation** and **Construction Industries**, while **Resource Industries** was about flat. Profit per share for 2019 was \$10.74, compared to profit per share of \$10.26 in 2018. Profit was \$6.093 billion in 2019, compared with \$6.147 billion in 2018. The decrease was primarily due to higher tax expense as operating profit was about flat. Operating profit was about flat as favorable **price realization**, lower selling, general and administrative (SG&A) and research and development (R&D) expenses and higher Financial Products' profit were offset by higher **manufacturing costs**, lower sales volume and unfavorable **currency** impacts.

Fourth-quarter 2019 sales and revenues were \$13.144 billion, down \$1.198 billion, or 8 percent, from \$14.342 billion in the fourth quarter of 2018. Fourth-quarter 2019 profit was \$1.97 per share, compared with \$1.78 per share in the fourth quarter of 2018. Fourth-quarter 2019 profit was \$1.098 billion, compared with \$1.048 billion in 2018.

Highlights for 2019 include:

- Sales and revenues in 2019 were \$53.800 billion, down 2 percent from 2018. Sales declined in Energy & Transportation and Construction Industries, while Resource Industries was about flat.
- Operating profit as a percent of sales and revenues was 15.4 percent in 2019, compared with 15.2 percent in 2018.
- Profit was \$10.74 per share for 2019, and excluding the items in the table below, **adjusted profit per share** was \$11.06. For 2018 profit was \$10.26 per share, and excluding the items in the table below, adjusted profit per share was \$11.22.
- In order for our results to be more meaningful to our readers, we have separately quantified the impact of several significant items:

	Full Year 2019		Full Year 2018	
	Profit Before Taxes	Profit Per Share	Profit Before Taxes	Profit Per Share
(Dollars in millions except per share data)				
Profit	\$ 7,812	\$ 10.74	\$ 7,822	\$ 10.26
Mark-to-market losses ¹	468	0.64	495	0.64
U.S. tax reform impact	—	(0.31)	—	(0.17)
Restructuring costs ²	—	—	386	0.50
Deferred tax valuation allowance adjustments	—	—	—	(0.01)
Adjusted profit	\$ 8,280	\$ 11.06	\$ 8,703	\$ 11.22

¹ Profit per share at statutory tax rates.

² Profit per share for 2018 restructuring costs were at statutory tax rates. 2019 restructuring costs were not material.

- Enterprise operating cash flow for 2019 was about \$6.9 billion, compared with about \$6.6 billion in 2018. **Machinery, Energy & Transportation (ME&T)** operating cash flow for 2019 was about \$4.9 billion, more than sufficient to cover capital expenditures and dividends. ME&T operating cash flow for 2018 was about \$6.3 billion.

Notes:

- Glossary of terms included on pages 34-35; first occurrence of terms shown in bold italics.

- Information on non-GAAP financial measures is included on pages 43-44.
- Some amounts within this report are rounded to the millions or billions and may not add. In addition, the sum of the components reported across periods may not equal the total amount reported year-to-date due to rounding.

2019 COMPARED WITH 2018

CONSOLIDATED SALES AND REVENUES

The chart above graphically illustrates reasons for the change in consolidated sales and revenues between 2018 (at left) and 2019 (at right). Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees.

Total sales and revenues were \$53.800 billion in 2019, a decrease of \$922 million, or 2 percent, compared with \$54.722 billion in 2018. The decrease was mostly due to lower sales volume driven by changes in dealer inventories, partially offset by higher end-user demand. Unfavorable currency impacts, primarily from a weaker euro, Australian dollar, Chinese yuan and Brazilian real, were mostly offset by favorable price realization. Sales decreased in Energy & Transportation and Construction Industries, while Resource Industries was about flat. Sales decreased in EAME and Asia/Pacific, while North America and Latin America were about flat.

North America sales were about flat compared with prior year as favorable price realization was mostly offset by lower sales volume. Sales volume declined primarily due to changes in dealer inventories as dealers increased inventories more during 2018 than 2019, partially offset by higher end-user demand.

Sales were about flat in Latin America as higher sales volume was offset by an unfavorable currency impact from a weaker Brazilian real. Sales volume increased due to higher end-user demand which was mostly offset by changes in dealer inventories as dealers increased inventories more during 2018 than 2019.

EAME sales decreased 6 percent primarily due to lower sales volume and the unfavorable impact of a weaker euro, partially offset by higher price realization. The decrease in sales volume was primarily due to changes in dealer inventories. Dealers increased inventories during 2018 and decreased inventories during 2019.

Asia/Pacific sales declined 4 percent primarily due to unfavorable currency impacts of a weaker Australian dollar and Chinese yuan and lower sales volume. Sales volume decreased due to changes in dealer inventories, partially offset by higher end-user demand. Dealer inventories increased more during 2018 than 2019.

Dealer machine and engine inventories increased about \$2.3 billion in 2018, compared with an increase of about \$800 million in 2019. Dealers are independent, and the reasons for changes in their inventory levels vary, including their expectations of future demand and product delivery times. Dealers' demand expectations take into account seasonal changes, macroeconomic conditions, machine rental rates and other factors. Delivery times can vary based on availability of product from Caterpillar factories and product distribution centers. We expect dealer inventories to decline about \$1.0 to \$1.5 billion during 2020.

CONSOLIDATED OPERATING PROFIT

The chart above graphically illustrates reasons for the change in consolidated operating profit between 2018 (at left) and 2019 (at right). Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees. The bar entitled Other includes **consolidating adjustments** and **Machinery, Energy & Transportation other operating (income) expenses**.

Operating profit was \$8.290 billion in 2019, about flat with \$8.293 billion in 2018. Favorable price realization mostly offset higher manufacturing costs. Lower sales volume offset favorable selling, general and administrative (SG&A) and research and development (R&D) expenses and higher profit from Financial Products.

Manufacturing costs increased due to higher warranty expense, increased variable labor and burden, unfavorable cost absorption, and higher material costs. Cost absorption was unfavorable as inventory increased during 2018, compared with a decrease during 2019. The increase was partially offset by lower period manufacturing costs driven by lower short-term incentive compensation expense and the favorable impact of restructuring and cost-reduction actions.

SG&A/R&D expenses decreased due to lower short-term incentive compensation expense, partially offset by investments aligned with the company's strategic growth initiatives.

Short-term incentive compensation expense is directly related to financial and operational performance, measured against targets set annually. Short-term incentive compensation expense in 2018 was about \$1.4 billion, compared with about \$700 million in 2019.

For 2020, we expect short-term incentive compensation expense will be about \$800 million. We also expect lower manufacturing costs.

Operating profit margin was 15.4 percent in 2019, compared with 15.2 percent in 2018.

Profit by Segment

(Millions of dollars)	2019	2018	\$ Change	% Change
Construction Industries	\$ 3,931	\$ 4,174	\$ (243)	(6%)
Resource Industries	1,629	1,603	26	2%
Energy & Transportation	3,910	3,938	(28)	(1%)
All Other Segment	4	23	(19)	(83%)
Corporate Items and Eliminations	(1,504)	(1,583)	79	
Machinery, Energy & Transportation	7,970	8,155	(185)	(2%)
Financial Products Segment	832	505	327	65%
Corporate Items and Eliminations	(81)	17	(98)	
Financial Products	751	522	229	44%
Consolidating Adjustments	(431)	(384)	(47)	
Consolidated Operating Profit	<u>\$ 8,290</u>	<u>\$ 8,293</u>	<u>\$ (3)</u>	—%

Other Profit/Loss and Tax Items

- Interest expense excluding Financial Products in 2019 was \$421 million, compared with \$404 million in 2018. The increase was due to higher average debt outstanding during 2019 than 2018.
- Other income (expense) in 2019 was expense of \$57 million, compared with expense of \$67 million in 2018. The decrease was due to a lower expected return on **pension and other postretirement benefit (OPEB)** plan assets more than offset by lower foreign exchange losses, unrealized and realized gains on marketable securities at Insurance Services and the favorable impact of commodity hedges.
- The provision for income taxes for 2019 reflected an annual effective tax rate of 25.2 percent, compared with 24.1 percent for 2018, excluding the discrete items discussed in the following paragraph. The increase from 2018 was largely driven by the application of U.S. tax reform provisions to the earnings of certain non-U.S. subsidiaries, which do not have a calendar fiscal year-end. These provisions did not apply to these subsidiaries in 2018. The provision for income taxes also included the following:
 - o A tax benefit of \$178 million to adjust previously unrecognized tax benefits as a result of receipt of additional guidance in 2019 related to the calculation of the mandatory deemed repatriation of non-U.S. earnings due to U.S. tax reform. In 2018, the mandatory deemed repatriation estimate increased by \$50 million.
 - o A tax benefit of \$41 million in 2019, compared with \$56 million in 2018, for the settlement of stock-based compensation awards with associated tax deductions in excess of cumulative U.S. GAAP compensation expense.
 - o A net benefit of \$183 million in 2018 to adjust deferred tax balances. (See Note – 6 “Income Taxes” of Part II, Item 8 “Financial Statements and Supplementary Data” for more information.)

Construction Industries

Construction Industries’ total sales were \$22.649 billion for 2019, a decrease of \$588 million, or 3 percent, compared with \$23.237 billion for 2018. The decrease was primarily due to lower sales volume driven by changes in dealer inventories, partially offset by higher end-user demand. Dealer inventories increased significantly more during 2018 than during 2019. Favorable price realization was offset by unfavorable currency impacts from a weaker euro, Chinese yuan and Australian dollar.

Sales increased in North America and Latin America, and decreased in Asia/Pacific and EAME.

- In North America, the sales increase was primarily due to higher demand for construction equipment and favorable price realization.
- Sales were higher in Latin America. While construction activities remained at low levels, the increase was driven by road and non-residential construction activities.

- Sales decreased in EAME primarily due to changes in dealer inventories and the unfavorable impact of a weaker euro, partially offset by favorable price realization. Dealer inventories increased during 2018, compared with a decrease during 2019.
- Sales in Asia/Pacific decreased mostly due to lower demand, including changes in dealer inventories, and unfavorable currency impacts. The unfavorable currency impacts were due to a weaker Chinese yuan and Australian dollar. Dealers increased inventories during 2018 and decreased inventories during 2019. The lower demand was primarily in China due to continued competitive pressures. In addition, demand was lower across the region.

Construction Industries’ profit was \$3.931 billion in 2019, a decrease of \$243 million, or 6 percent, compared with \$4.174 billion in 2018. The decrease was primarily due to lower sales volume, including an unfavorable mix of products, and higher manufacturing costs, which were partially offset by favorable price realization and lower SG&A/R&D expenses. Manufacturing costs increased primarily due to unfavorable variable labor and burden. Lower SG&A/R&D expenses were due to lower short-term incentive compensation expense, partially offset by investments aligned with the company’s strategic growth initiatives.

Construction Industries’ profit as a percent of total sales was 17.4 percent in 2019, compared with 18.0 percent in 2018.

Resource Industries

Resource Industries’ total sales were \$10.276 billion in 2019, about flat with \$10.270 billion in 2018. Higher end-user demand for equipment and favorable price realization were offset by changes in dealer inventories and unfavorable currency impacts, primarily the weaker Australian dollar and euro. Higher end-user demand was driven by increased capital investment by mining customers to support ongoing mine site operations. End-user demand also increased for our non-residential construction and quarry and aggregate customers. Dealers increased inventories more significantly during 2018 than during 2019.

Resource Industries’ profit was \$1.629 billion in 2019, an increase of \$26 million, or 2 percent, compared with \$1.603 billion in 2018. The improvement was mostly due to favorable price realization, partially offset by higher manufacturing costs. Manufacturing costs increased due to higher warranty expense, unfavorable cost absorption, increased variable labor and burden and higher material costs, partially offset by the favorable period manufacturing costs due to the impact of restructuring and cost-reduction actions and lower short-term incentive compensation expense. Cost absorption was unfavorable as inventory increased more during 2018 than 2019.

Resource Industries’ profit as a percent of total sales was 15.9 percent in 2019, compared with 15.6 percent in 2018.

Energy & Transportation

Sales by Application

(Millions of dollars)	2019	2018	\$ Change	% Change
Oil and Gas	\$ 5,205	\$ 5,763	\$ (558)	(10%)
Power Generation	4,474	4,334	140	3%
Industrial	3,749	3,640	109	3%
Transportation	5,057	5,095	(38)	(1%)
External Sales	18,485	18,832	(347)	(2%)
Inter-Segment	3,612	3,953	(341)	(9%)
Total Sales	\$ 22,097	\$ 22,785	\$ (688)	(3%)

Energy & Transportation's total sales were \$22.097 billion in 2019, compared with \$22.785 billion in 2018. Sales declined primarily due to lower inter-segment engine sales and unfavorable currency impacts, primarily from the weaker euro and Australian dollar.

- Oil and Gas – Sales decreased in North America primarily due to lower new equipment demand for well servicing and the timing of turbine project deliveries for gas compression and production. Lower sales in North America were partially offset by increases in all other regions, primarily Asia/Pacific.
- Power Generation – Sales increased mostly due to higher deliveries of diesel reciprocating engines in North America and higher turbine sales across all regions. The increase was partially offset by lower diesel reciprocating engine sales in EAME and Asia/Pacific driven by unfavorable currency impacts and lower volume.
- Industrial – Sales improved primarily in North America and Asia/Pacific driven by higher end-user demand.
- Transportation – Sales were about flat as lower locomotive sales were offset by stronger marine demand.

Energy & Transportation's profit was \$3.910 billion for 2019, a decrease of \$28 million, or 1 percent, compared with \$3.938 billion for 2018. The decrease was mostly due to lower sales volumes, partially offset by lower SG&A/R&D expenses. Lower SG&A/R&D expenses were primarily due to lower short-term incentive compensation expense. Higher manufacturing costs were more than offset by favorable price realization and favorable other operating (income) expenses.

Energy & Transportation's profit as a percent of total sales was 17.7 percent in 2019, compared with 17.3 percent in 2018.

Financial Products Segment

Financial Products' segment revenues were \$3.434 billion, an increase of \$155 million, or 5 percent, from 2018. The increase was primarily due to higher average financing rates in North America

and Asia/Pacific, an increase in earned premiums from Insurance Services across all regions and higher average **earning assets** in North America. These favorable impacts were partially offset by the absence of fees associated with an intercompany credit facility in North America.

Financial Products' segment profit was \$832 million in 2019, compared with \$505 million in 2018. Most of the increase was due to lower provision for credit losses at Cat Financial, driven by a lower allowance rate compared with 2018. The lower allowance rate was due to write-offs of accounts in 2019 that were reserved for in 2018, primarily in the Cat Power Finance portfolio. In addition, there was a favorable impact from an increase in net yield on average earning assets and a favorable impact from equity securities in Insurance Services. These favorable impacts were partially offset by higher SG&A expenses and the absence of the intercompany credit facility.

At the end of 2019, past dues at Cat Financial were 3.14 percent, compared with 3.55 percent at the end of 2018. Write-offs, net of recoveries, were \$237 million for 2019, an increase from \$189 million for 2018, primarily due to Mining, Caterpillar Power Finance and EAME, partially offset by a decrease in Latin America. The increase in Mining was due to a small number of customer balances written off in 2019, while the increases in Caterpillar Power Finance and EAME were concentrated in the marine portfolio and the Middle East, respectively. As of December 31, 2019, Cat Financial's allowance for credit losses totaled \$424 million, or 1.50 percent of finance receivables, compared with \$511 million, or 1.80 percent of finance receivables, at December 31, 2018.

Corporate Items and Eliminations

Expense for corporate items and eliminations was \$1.585 billion in 2019, an increase of \$19 million from 2018. The increase was primarily due to methodology differences, mostly offset by lower restructuring costs and timing differences.

FOURTH QUARTER 2019 COMPARED WITH FOURTH QUARTER 2018

CONSOLIDATED SALES AND REVENUES

The chart above graphically illustrates reasons for the change in consolidated sales and revenues between the fourth quarter of 2018 (at left) and the fourth quarter of 2019 (at right). Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees.

Total sales and revenues of \$13.144 billion in the fourth quarter of 2019 decreased \$1.198 billion, or 8 percent, compared with \$14.342 billion in the fourth quarter of 2018. The decline was due to lower sales volume driven by the impact from changes in dealer inventories and lower end-user demand, primarily in Construction Industries and Resource Industries. Dealers decreased machine and engine inventories about \$700 million during the fourth quarter of 2019, compared with an increase of about \$200 million during the fourth quarter of 2018.

The largest sales decrease was in North America, which declined 14 percent due to lower demand, including changes in dealer inventories. Dealer inventories increased during the fourth quarter of 2018, compared with a decrease during the fourth quarter of 2019.

Sales decreased 16 percent in Latin America due to lower demand across the region.

EAME sales decreased 6 percent primarily due to changes in dealer inventories and unfavorable currency impacts, primarily from the

weaker euro. Dealer inventories decreased more during the fourth quarter of 2019 than the fourth quarter of 2018.

Asia/Pacific sales were about flat as higher sales volume was offset by unfavorable price realization and currency impacts, primarily from the weaker Australian dollar. Sales volume was higher as improved end-user demand was partially offset by changes in dealer inventories. Dealer inventories increased more during the fourth quarter of 2018 than the fourth quarter of 2019.

Dealers decreased machine and engine inventories about \$700 million during the fourth quarter of 2019, compared with an increase of about \$200 million during the fourth quarter of 2018. Dealers are independent, and the reasons for changes in their inventory levels vary, including their expectations of future demand and product delivery times. Dealers' demand expectations take into account seasonal changes, macroeconomic conditions, machine rental rates and other factors. Delivery times can vary based on availability of product from Caterpillar factories and product distribution centers.

CONSOLIDATED OPERATING PROFIT

The chart above graphically illustrates reasons for the change in consolidated operating profit between the fourth quarter of 2018 (at left) and the fourth quarter of 2019 (at right). Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees. The bar entitled Other includes consolidating adjustments and Machinery, Energy & Transportation other operating (income) expenses.

Operating profit for the fourth quarter of 2019 was \$1.850 billion, a decrease of \$33 million, or 2 percent, compared with \$1.883 billion in the fourth quarter of 2018. The decrease was primarily due to lower sales volume, mostly offset by lower SG&A and R&D expenses and higher profit from Financial Products.

Lower SG&A/R&D expenses were mostly due to a reduction in short-term incentive compensation expense and timing of R&D expenses.

Financial Products' operating profit was higher, primarily due to lower provisions for credit losses related to the Cat Power Finance portfolio compared with the fourth quarter of 2018.

In addition, favorable manufacturing costs were mostly offset by unfavorable price realization. Manufacturing costs decreased primarily due to lower period manufacturing and material costs, partially offset by higher warranty expense. Period manufacturing costs declined mainly due to lower short-term incentive compensation and the favorable impact of restructuring and cost-reduction actions.

Short-term incentive compensation expense was about \$120 million in the fourth quarter of 2019, compared with about \$310 million in the fourth quarter of 2018.

Operating profit margin in the fourth quarter of 2019 was 14.1 percent, compared with 13.1 percent in the fourth quarter of 2018.

Profit (Loss) by Segment

(Millions of dollars)	Fourth Quarter 2019	Fourth Quarter 2018	\$ Change	% Change
Construction Industries	\$ 659	\$ 845	\$ (186)	(22%)
Resource Industries	261	400	(139)	(35%)
Energy & Transportation	1,165	1,079	86	8%

Corporate Items and Eliminations	(6)	54	(60)	
Financial Products	204	83	121	146%
Consolidating Adjustments	(103)	(102)	(1)	
Consolidated Operating Profit	\$ 1,850	\$ 1,883	\$ (33)	(2%)

Other Profit/Loss and Tax Items

- Interest expense excluding Financial Products in the fourth quarter of 2019 was \$112 million, compared with \$99 million in the fourth quarter of 2018. The increase was due to higher average debt outstanding during the fourth quarter of 2019, compared with the fourth quarter of 2018.

- Other income (expense) in the fourth quarter of 2019 was expense of \$373 million, compared with expense of \$417 million in the fourth quarter of 2018. The decrease in expense was due to the favorable impact of commodity hedges, higher realized gains and lower unrealized losses on marketable securities at Insurance Services, which were partially offset by unfavorable pension and OPEB costs.

- The provision for income taxes in the fourth quarter reflected an annual effective tax rate of 25.2 percent, compared with 24.1 percent for the full year of 2018, excluding discrete items discussed in the following paragraph. The increase from 2018 was largely driven by the application of U.S. tax reform provisions to the earnings of certain non-U.S. subsidiaries, which do not have a calendar fiscal year-end. These provisions did not apply to these subsidiaries in 2018.

The provision for income taxes also included the following:

- o The change from the third-quarter estimated annual tax rate of 26 percent to the annual effective tax rate of 25.2 percent resulted in a \$54 million tax benefit in the fourth quarter of 2019.
- o A tax benefit of \$13 million in the fourth quarter of 2019, compared to \$4 million in the fourth quarter of 2018, for the settlement of stock-based compensation awards with associated tax deductions in excess of cumulative U.S. GAAP compensation expense.
- o A net tax benefit of \$13 million in the fourth quarter of 2018 for other discrete items.

Construction Industries

Construction Industries' total sales were \$5.020 billion in the fourth quarter of 2019, a decrease of \$685 million, or 12 percent, compared with \$5.705 billion in the fourth quarter of 2018. The decrease was due to lower sales volume, driven mostly by the impact from changes in dealer inventories. Dealers decreased inventories during the fourth quarter of 2019, compared with dealer inventories that were about flat during the fourth quarter of 2018. Unfavorable price realization also contributed to the decline in sales.

- In North America, sales decreased due to lower demand driven by the impact from changes in dealer inventories, while end-user demand was about flat. Dealers decreased inventories during the fourth quarter of 2019, compared with an increase during the fourth quarter of 2018.
- Sales were higher in Latin America. While construction activities remained at low levels, the increase was driven by road and residential construction activities.
- In EAME, the sales decrease was primarily due to the impact from changes in dealer inventories and lower end-user demand across most of the region. Dealers decreased inventories more during the fourth quarter of 2019 than during the fourth quarter of 2018.

Energy & Transportation

Sales by Application

(Millions of dollars)	Fourth Quarter 2019	Fourth Quarter 2018	\$ Change	% Change
Oil and Gas	\$ 1,523	\$ 1,719	\$ (196)	(11%)
Power Generation	1,294	1,271	23	2%
Industrial	908	902	6	1%
Transportation	1,441	1,373	68	5%
External Sales	5,166	5,265	(99)	(2%)
Inter-Segment	783	1,022	(239)	(23%)
Total Sales	\$ 5,949	\$ 6,287	\$ (338)	(5%)

Energy & Transportation's total sales were \$5.949 billion in the fourth quarter of 2019, a decrease of \$338 million, or 5 percent, compared with \$6.287 billion in the fourth quarter of 2018. Sales declined primarily due to lower inter-segment engine sales and unfavorable currency impacts.

- **Oil and Gas** – Sales were lower mainly in North America. The sales decline was largely due to lower demand for reciprocating engines used in gas compression and lower turbine project deliveries.

- Sales in Asia/Pacific were about flat as unfavorable price realization was mostly offset by a few countries' higher sales volume.

Construction Industries' profit was \$659 million in the fourth quarter of 2019, a decrease of \$186 million, or 22 percent, compared with \$845 million in the fourth quarter of 2018. The decrease was primarily due to lower sales volume.

In addition, favorable manufacturing costs were mostly offset by unfavorable price realization. Manufacturing costs decreased due to lower period manufacturing and material costs. Period manufacturing costs declined mainly due to the favorable impact of restructuring and cost-reduction actions as well as lower short-term incentive compensation.

Construction Industries' profit as a percent of total sales was 13.1 percent in the fourth quarter of 2019, compared with 14.8 percent in the fourth quarter of 2018.

Resource Industries

Resource Industries' total sales were \$2.395 billion in the fourth quarter of 2019, a decrease of \$402 million, or 14 percent, compared with \$2.797 billion in the fourth quarter of 2018. The decrease was due to lower sales volume, driven by changes in dealer inventories and lower end-user demand. Dealers increased inventories during the fourth quarter of 2018, compared with a decrease during the fourth quarter of 2019. While commodity prices are generally supportive of reinvestment, the company continues to believe mining customers remained disciplined in their capital expenditures due to economic uncertainty, resulting in lower sales in the quarter. In addition, end-user demand decreased for equipment supporting non-residential construction.

Resource Industries' profit was \$261 million in the fourth quarter of 2019, a decrease of \$139 million, or 35 percent, compared with \$400 million in the fourth quarter of 2018. The decrease was mainly due to lower sales volume, partially offset by lower SG&A/R&D expenses and favorable price realization. The decrease in SG&A/R&D expenses reflected a reduction in short-term incentive compensation expense and timing of R&D expenses.

Resource Industries' profit as a percent of total sales was 10.9 percent in the fourth quarter of 2019, compared with 14.3 percent in the fourth quarter of 2018.

- **Power Generation** – Sales increased slightly primarily due to higher deliveries for turbines in EAME.
- **Industrial** – Sales were about flat as slightly higher sales in North America were partially offset by lower sales in Latin America and EAME.
- **Transportation** – Sales were higher mainly due to stronger marine demand in EAME.

Energy & Transportation's profit was \$1.165 billion in the fourth quarter of 2019, an increase of \$86 million, or 8 percent, compared with \$1.079 billion in the fourth quarter of 2018. The increase was mostly due to lower SG&A/R&D expenses, primarily due to a reduction in short-term incentive compensation expense and lower R&D project expenses. Lower manufacturing costs were mostly offset by lower sales volume.

Energy & Transportation's profit as a percent of total sales was 19.6 percent in the fourth quarter of 2019, compared with 17.2 percent in the fourth quarter of 2018.

Financial Products Segment

Financial Products' segment revenues were \$846 million in the fourth quarter of 2019, an increase of \$34 million, or 4 percent, from the fourth quarter of 2018. The increase was primarily due to a favorable impact from returned or repossessed equipment in Europe and higher average financing rates in North America.

Financial Products' segment profit was \$210 million in the fourth quarter of 2019, compared with \$29 million in the fourth quarter of 2018. Most of the increase was due to lower provision for credit losses at Cat Financial, driven by a lower allowance rate compared with 2018. The lower allowance rate was due to write-offs of accounts in 2019 that were reserved for in 2018, primarily in the Cat Power Finance portfolio. In addition, there was a favorable impact from equity securities in Insurance Services, as well as favorable impacts from an increase in net yield on average earning assets and returned or repossessed equipment. These favorable impacts were partially offset by higher SG&A expenses.

Corporate Items and Eliminations

Expense for corporate items and eliminations was \$331 million in the fourth quarter of 2019, an increase of \$10 million from the fourth quarter of 2018. The increase was primarily due to methodology differences, offset by timing differences and lower restructuring costs.

2018 COMPARED WITH 2017

CONSOLIDATED SALES AND REVENUES

The chart above graphically illustrates reasons for the change in consolidated sales and revenues between 2017 (at left) and 2018 (at right). Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees.

Total sales and revenues were \$54.722 billion in 2018, an increase of \$9.260 billion, or 20 percent, compared with \$45.462 billion in 2017. The increase was primarily due to higher sales volume driven by improved demand for equipment across the three primary segments, including changes in dealer inventories. Favorable price realization across the three primary segments also contributed to the sales improvement. In addition, sales were higher due to currency impacts, primarily from a stronger euro. Financial Products' revenues increased slightly.

Sales increased in all regions, with the largest sales increase in North America, which improved 23 percent as strong economic conditions in key end markets drove higher demand. Also contributing to higher sales was an increase in dealer inventories during 2018, compared with dealer inventories that were about flat in 2017.

Sales increased 13 percent in Latin America primarily due to stabilizing economic conditions in several countries in the region that resulted in improved demand from low levels.

EAME sales increased 16 percent primarily due to higher demand, including changes in dealer inventories. The improvement in demand was primarily in Europe. The impact of a stronger euro and favorable price realization also contributed to higher sales. Dealer inventories increased more significantly in 2018 than in 2017.

Asia/Pacific sales increased 28 percent primarily due to higher demand in several countries across the region, including changes in dealer inventories and favorable price realization. Dealer inventories increased during 2018 as compared with dealer inventories that were about flat in 2017.

Dealer machine and engine inventories increased about \$2.3 billion in 2018, compared with an increase of about \$100 million in 2017. Dealers are independent, and the reasons for changes in their inventory levels vary, including their expectations of future demand and product delivery times. Dealers' demand expectations take into account seasonal changes, macroeconomic conditions, machine rental rates and other factors. Delivery times can vary based on availability of product from Caterpillar factories and product distribution centers.

Sales and Revenues by Segment

(Millions of dollars)	2017	Sales Volume	Price Realization	Currency	Inter- Segment/ Other	2018	\$ Change	% Change

CONSOLIDATED OPERATING PROFIT

The chart above graphically illustrates reasons for the change in consolidated operating profit between 2017 (at left) and 2018 (at right). Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees. The bar entitled Other includes consolidating adjustments and Machinery, Energy & Transportation other operating (income) expenses.

Operating profit was \$8.293 billion in 2018, an increase of \$3.833 billion, or 86 percent, compared with \$4.460 billion in 2017. The increase was primarily due to higher sales volume and lower restructuring costs. Higher manufacturing costs and increased SG&A/R&D expenses were mostly offset by favorable price realization.

Manufacturing costs were higher due to increased material and freight costs, partially offset by lower warranty expense. Material costs were higher primarily due to increases in steel prices. The impact of tariffs on material costs was about \$110 million during 2018. Freight costs were unfavorable primarily due to supply chain inefficiencies as the industry responds to strong global demand.

SG&A/R&D expenses increased primarily due to investments aligned with the company's strategic growth initiatives.

Restructuring costs were \$394 million in 2018, related to restructuring actions across the company. In 2017, we incurred \$1.227 billion of restructuring costs with about half related to the closure of the facility in Gosselies, Belgium, and the remainder related to other restructuring actions across the company.

Short-term incentive compensation expense is directly related to financial and operational performance, measured against targets set annually. Short-term incentive compensation expense in 2018 was about \$1.4 billion, nearly the same as 2017.

Profit (Loss) by Segment

(Millions of dollars)	2018	2017	\$ Change	% Change
Construction Industries	\$ 4,174	\$ 3,255	\$ 919	28%

Consolidated Operating Profit	\$ 8,293	\$ 4,460	\$ 3,833	86%

Other Profit/Loss and Tax Items

- Other income/expense in 2018 was expense of \$67 million, compared with income of \$153 million in 2017. The unfavorable change was primarily a result of an unfavorable impact from equity securities in Insurance Services. Effective January 1, 2018, we adopted a new U.S. GAAP accounting rule that requires our equity securities to be measured at fair value through earnings. Previously, the fair value adjustments for these securities were reported in equity until the securities were sold or an impairment was recognized. We adopted the standard using the modified retrospective approach, with no change to prior year financial statements. During 2018, we recognized a loss of \$33 million related to fair value adjustments. During 2017, we recognized gains on sales of securities of \$104 million. In addition, the absence of a 2017 pretax gain of \$85 million on the sale of Caterpillar's equity investment in IronPlanet contributed to the unfavorable change.
- The provision for income taxes for 2018 reflects an annual effective tax rate of 24.1 percent, compared with 27.7 percent for the full year of 2017, excluding the items discussed below. The decrease was primarily due to the reduction in the U.S. corporate tax rate beginning January 1, 2018, along with other changes in the geographic mix of profits from a tax perspective.

We have completed our accounting for the income tax effects of U.S. tax reform legislation and included measurement period adjustments in 2018 of \$104 million to reduce the provisionally estimated charge of \$2.371 billion recognized in 2017. A \$154 million benefit revised the estimated impact of the write-down of U.S. net deferred tax assets to reflect the reduction in the U.S. corporate tax rate from 35 percent to 21 percent. This benefit primarily related to the decision to make an additional discretionary pension contribution of \$1.0 billion to U.S. pension plans in 2018 which was treated as deductible on the 2017 U.S. tax return. A \$50 million charge revised the provisionally estimated cost of a mandatory deemed repatriation of non-U.S. earnings, including changes in the deferred tax liability related to the amount of earnings considered not indefinitely reinvested as well as the amount of unrecognized tax benefits and state tax liabilities associated with these tax positions.

The provision for income taxes in 2018 and 2017 also included non-cash benefits of \$63 million and \$111 million, respectively, from reductions in the valuation allowance against U.S. state deferred tax assets due to improved profits in the United States. An additional benefit of \$25 million was included in 2018 due to the release of a valuation allowance for a certain non-U.S. subsidiary. The provision for income taxes in 2018 also included a charge of \$59 million to correct for an error which resulted in an understatement of the valuation allowance offsetting deferred tax assets for prior years. This error had the effect of overstating profit by \$17 million and \$33 million for 2017 and 2016, respectively. Management has concluded that the error was not material to any period presented. In addition, a tax benefit of \$56 million was recorded in 2018, compared with \$64 million in 2017, for the settlement of stock-based compensation awards with associated tax deductions in excess of cumulative U.S. GAAP compensation expense.

Construction Industries

Construction Industries' total sales were \$23.237 billion in 2018, compared with \$19.240 billion in 2017. The increase was mostly due to higher sales volume for construction equipment. Sales were also higher due to currency impacts, primarily from a stronger euro.

- Sales volume increased primarily due to higher demand for construction equipment and changes in dealer inventories. Dealer inventories increased significantly more during 2018 than during 2017.

Sales increased in all regions.

- In North America, the sales increase was primarily due to higher demand for construction equipment, primarily to support oil and gas activities, including pipelines, non-residential building construction and infrastructure activities. In addition, sales increased due to changes in dealer inventories, which increased during 2018, compared with a slight decrease during 2017.
- Although construction activities remained weak in Latin America, sales were higher in the region.
- Sales increased in EAME primarily due to higher demand and the favorable impact of currency, mostly from a stronger euro. Higher demand was driven by increased construction activities across several countries in the region. Favorable price realization also contributed to the sales increase.
- Sales in Asia/Pacific were higher in several countries in the region, most significantly in China, stemming from increased building construction and infrastructure investment. Changes in dealer inventories contributed to the sales improvement as dealer inventories increased in 2018 and were about flat in 2017.

Construction Industries' profit was \$4.174 billion in 2018, compared with \$3.255 billion in 2017. The increase in profit was a result of higher sales volume and favorable price realization, partially offset by higher material and freight costs, and increased SG&A/R&D expenses, partially due to spending for strategic growth initiatives.

Construction Industries' profit as a percent of total sales was 18.0 percent in 2018, compared with 16.9 percent in 2017.

Resource Industries

Resource Industries' total sales were \$10.270 billion in 2018, an increase of \$2.409 billion from 2017. The increase was primarily due to higher demand for both mining and heavy construction equipment, including aftermarket parts. Favorable commodity price levels and increased mining production contributed to higher mining equipment sales. In addition, increased sales to heavy construction, quarry and aggregate customers were driven by positive global economic growth. Resource Industries' customers globally continue to focus on improving productivity and efficiency of existing machine assets, thereby extending equipment life cycles and lowering operating costs. Rebuild, overhaul and maintenance activity was robust, resulting in higher aftermarket parts sales. Favorable price realization also contributed to the sales improvement.

Resource Industries' profit was \$1.603 billion in 2018, compared with \$698 million in 2017. The improvement was mostly due to higher sales volume and favorable price realization, partially offset by increased manufacturing costs and unfavorable currency impacts. Manufacturing costs were unfavorable as lower warranty expense was more than offset by higher freight and material costs.

Resource Industries' profit as a percent of total sales was 15.6 percent in 2018, compared with 8.9 percent in 2017.

Energy & Transportation

Sales by Application

(Millions of dollars)	2018	2017	\$ Change	% Change
Oil and Gas	\$ 5,763	\$ 4,424	\$ 1,339	30%
Power Generation	4,334	3,551	783	22%
Industrial	3,640	3,445	195	6%
Transportation	5,095	4,544	551	12%
External Sales	18,832	15,964	2,868	18%
Inter-Segment	3,953	3,418	535	16%
Total Sales	\$ 22,785	\$ 19,382	\$ 3,403	18%

Energy & Transportation's total sales were \$22.785 billion in 2018, compared with \$19.382 billion in 2017. The increase was primarily due to higher sales volume across all applications. Favorable price realization also contributed to the increase in sales.

- **Oil and Gas** – Sales increased due to higher demand in North America for well servicing and gas compression applications. Growth in U.S. onshore oil and gas drove increased sales for reciprocating engines and related aftermarket parts. Sales of turbines and turbine-related services were higher for production applications.
- **Power Generation** – Sales improved across all regions, with the largest increase in North America, primarily for reciprocating engine applications including data centers, and for aftermarket parts. In addition, sales increased in EAME from reciprocating engine projects, turbines and turbine-related services and favorable currency.
- **Industrial** – Sales were higher in Asia/Pacific and North America, primarily due to improving economic conditions supporting higher engine sales into industrial applications. Sales in EAME were about flat as economic uncertainty in a few countries in the Middle East was mostly offset by favorable currency impacts.
- **Transportation** – Sales were higher for rail services driven by acquisitions in Asia/Pacific and EAME and increased rail traffic in North America. Marine sales were higher in Asia/Pacific, led by increased activity in the ferry sector.

Energy & Transportation's profit was \$3.938 billion in 2018, compared with \$2.856 billion in 2017. The improvement was due to higher sales volume and favorable price realization. This was partially offset due to increased spending for strategic growth initiatives and higher freight costs.

Energy & Transportation's profit as a percent of total sales was 17.3 percent in 2018, compared with 14.7 percent in 2017.

Financial Products Segment

Financial Products' segment revenues were \$3.279 billion, an increase of \$186 million, or 6 percent, from 2017. The increase was primarily due to higher average financing rates and higher average earning assets in North America and Asia/Pacific. These favorable impacts were partially offset by lower intercompany lending activity in North America, lower average earning assets in Latin America and lower average financing rates in Europe.

Financial Products' segment profit was \$505 million in 2018, compared with \$792 million in 2017. The decrease was primarily due to an increase in the provision for credit losses at Cat Financial, an unfavorable impact from equity securities in Insurance Services and lower intercompany lending activity. These unfavorable impacts were partially offset by higher average earning assets and an increase in net yield on average earning assets.

At the end of 2018, past dues at Cat Financial were 3.55 percent, compared with 2.78 percent at the end of 2017. Write-offs, net of recoveries, were \$189 million for 2018, compared with \$114 million for 2017. As of December 31, 2018, Cat Financial's allowance for credit losses totaled \$511 million, or 1.80 percent of finance receivables, compared with \$365 million, or 1.33 percent of finance receivables at December 31, 2017. The increase in past dues, write-offs and allowance for credit losses was primarily due to weakening in the Cat Power Finance portfolio.

Corporate Items and Eliminations

Expense for corporate items and eliminations was \$1.566 billion in 2018, a decrease of \$1.209 billion from 2017. The decrease in expense was mostly due to lower restructuring costs and methodology differences. Restructuring costs were \$394 million in 2018. In 2017, restructuring costs impacting operating profit were \$1.227 billion with about half related to the closure of the facility in Gosselies, Belgium and the remainder related to other restructuring actions across the company.

RESTRUCTURING COSTS

Restructuring costs for 2019, 2018, and 2017 were as follows:

(Millions of dollars)	2019	2018	2017
Employee separations ¹	\$ 48	\$ 112	\$ 525
Contract terminations ¹	1	7	183
Long-lived asset impairments ¹	65	93	346
Defined benefit plan curtailments and termination benefits ²	—	(8)	29
Other ³	122	182	173
Total restructuring costs	<u>\$ 236</u>	<u>\$ 386</u>	<u>\$ 1,256</u>

¹ Recognized in Other operating (income) expenses.

² Recognized in Other income (expense).

³ Represents costs related to our restructuring programs, primarily for project management, inventory write-downs, accelerated depreciation and equipment relocation, and also LIFO inventory decrement benefits from inventory liquidations at closed facilities, all of which are primarily included in Cost of goods sold.

The restructuring costs in 2019 were primarily related to restructuring actions across the company. The restructuring costs in 2018 were primarily related to ongoing facility closures across the company. In 2017, about half of the restructuring costs were related to the closure of the facility in Gosselies, Belgium, within

Construction Industries, and the remainder was related to other restructuring actions across the company.

Certain restructuring costs are a reconciling item between Segment profit and Consolidated profit before taxes.

The following table summarizes the 2018 and 2019 employee separation activity:

(Millions of dollars)	
Liability balance at December 31, 2017	\$ 249
Increase in liability (separation charges)	112
Reduction in liability (payments)	(276)
Liability balance at December 31, 2018	\$ 85
Increase in liability (separation charges)	48
Reduction in liability (payments)	(85)
Liability balance at December 31, 2019	<u>\$ 48</u>

Most of the remaining liability balance as of December 31, 2019 is expected to be paid in 2020.

In March 2017, Caterpillar informed Belgian authorities of the decision to proceed to a collective dismissal, which led to the closure of the Gosselies site, impacting about 2,000 employees. Production of Caterpillar products at the Gosselies site ended during the second quarter of 2017. The other operations and functions at the Gosselies site were phased out by the end of the second quarter of 2018. The program concluded in 2018, and we incurred a total of \$647 million of restructuring costs (primarily in 2017) under this program. These costs were primarily related to employee separation costs, long-lived asset impairments and other costs which were partially offset by a LIFO inventory decrement benefit.

In September 2015, we announced a large scale restructuring plan (the Plan) including a voluntary retirement enhancement program for qualifying U.S. employees, several voluntary separation programs

outside of the United States, additional involuntary programs throughout the company and manufacturing facility consolidations and closures. The largest action among those included in the Plan was related to our European manufacturing footprint which led to the Gosselies, Belgium, facility closure as discussed above. We incurred \$43 million, \$121 million and \$817 million of restructuring costs associated with these actions in 2019, 2018 and 2017, respectively. The Plan concluded in 2019, and total restructuring costs incurred since the inception of the Plan were \$1,831 million.

In 2020, we expect to incur about \$300 - \$400 million of restructuring costs, about half for restructuring actions across the company and the remainder for strategic actions to address a small number of products. We expect that prior restructuring actions will result in an incremental benefit to operating costs, primarily Costs of goods sold and SG&A expenses of about \$200 million in 2020 compared with 2019.

GLOSSARY OF TERMS

1. **Adjusted Profit Per Share** – For 2019, profit per share excluding pension and OPEB mark-to-market losses and a discrete tax benefit related to U.S. tax reform. For 2018, profit per share excluding pension and OPEB mark-to-market losses, restructuring costs, certain deferred tax valuation allowance adjustments and the impact of U.S. tax reform.
2. **All Other Segment** – Primarily includes activities such as: business strategy, product management and development, manufacturing and sourcing of filters and fluids, undercarriage, ground engaging tools, fluid transfer products, precision seals, rubber sealing and connecting components primarily for Cat® products; parts distribution; integrated logistics solutions, distribution services responsible for dealer development and administration including a wholly owned dealer in Japan, dealer portfolio management and ensuring the most efficient and effective distribution of machines, engines and parts; and digital investments for new customer and dealer solutions that integrate data analytics with state-of-the-art digital technologies while transforming the buying experience.
3. **Consolidating Adjustments** – Elimination of transactions between Machinery, Energy & Transportation and Financial Products.
4. **Construction Industries** – A segment primarily responsible for supporting customers using machinery in infrastructure, forestry and building construction applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes asphalt pavers; backhoe loaders; compactors; cold planers; compact track and multi-terrain loaders; mini, small, medium and large track excavators; forestry excavators; feller bunchers; harvesters; knuckleboom loaders; motor graders; pipelayers; road reclaimers; skidders; skid steer loaders; telehandlers; small and medium track-type tractors; track-type loaders; utility vehicles; wheel excavators; compact, small and medium wheel loaders; and related parts and work tools.
5. **Corporate Items and Eliminations** – Includes corporate-level expenses; timing differences, as some expenses are reported in segment profit on a cash basis; methodology differences between segment and consolidated external reporting; certain restructuring costs; and inter-segment eliminations.
6. **Currency** – With respect to sales and revenues, currency represents the translation impact on sales resulting from changes in foreign currency exchange rates versus the U.S. dollar. With respect to operating profit, currency represents the net translation impact on sales and operating costs resulting from changes in foreign currency exchange rates versus the U.S. dollar. Currency only includes the impact on sales and operating profit for the Machinery, Energy & Transportation lines of business; currency impacts on Financial Products' revenues and operating profit are included in the Financial Products' portions of the respective analyses. With respect to other income/expense, currency represents the effects of forward and option contracts entered into by the company to reduce the risk of fluctuations in exchange rates (hedging) and the net effect of changes in foreign currency exchange rates on our foreign currency assets and liabilities for consolidated results (translation).
7. **EAME** – A geographic region including Europe, Africa, the Middle East and the Commonwealth of Independent States (CIS).
8. **Earning Assets** – Assets consisting primarily of total finance receivables net of unearned income, plus equipment on operating leases, less accumulated depreciation at Cat Financial.
9. **Energy & Transportation** – A segment primarily responsible for supporting customers using reciprocating engines, turbines, diesel-electric locomotives and related parts across industries serving Oil and Gas, Power Generation, Industrial and Transportation applications, including marine and rail-related businesses. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support of turbine machinery and integrated systems and solutions and turbine-related services; reciprocating engine-powered generator sets; integrated systems used in the electric power generation industry; reciprocating engines and integrated systems and solutions for the marine and oil and gas industries; reciprocating engines supplied to the industrial industry as well as Cat machinery; the remanufacturing of Caterpillar engines and components and remanufacturing services for other companies; the business strategy, product design, product management and development, manufacturing, remanufacturing, leasing and service of diesel-electric locomotives and components and other rail-related products and services and product support of on-highway vocational trucks for North America.
10. **Financial Products Segment** – Provides financing alternatives to customers and dealers around the world for Caterpillar products, as well as financing for vehicles, power generation facilities and marine vessels that, in most cases, incorporate Caterpillar products. Financing plans include operating and finance leases, installment sale contracts, working capital loans and wholesale financing plans. The segment also provides insurance and risk management products and services that help customers and dealers manage their business risk. Insurance and risk management products offered include physical damage insurance, inventory protection plans, extended service coverage for machines and engines, and dealer property and casualty insurance. The various forms of financing, insurance and risk management products offered to customers and dealers help support the purchase and lease of our equipment. The segment also earns revenues from Machinery, Energy & Transportation, but the related costs are not allocated to operating segments. Financial Products' segment profit is determined on a pretax basis and includes other income/expense items.
11. **Latin America** – A geographic region including Central and South American countries and Mexico.
12. **Machinery, Energy & Transportation (ME&T)** – Represents the aggregate total of Construction Industries, Resource Industries, Energy & Transportation, All Other Segment and related corporate items and eliminations.
13. **Machinery, Energy & Transportation (ME&T) Other Operating (Income) Expenses** – Comprised primarily of gains/losses on disposal of long-lived assets, gains/losses on divestitures and legal settlements and accruals.
14. **Manufacturing Costs** – Manufacturing costs exclude the impacts of currency and represent the volume-adjusted change for variable costs and the absolute dollar change for period manufacturing costs. Variable manufacturing costs are defined as having a direct relationship with the volume of production. This includes material costs, direct labor and other costs that vary directly with production volume such as freight, power to operate machines and supplies that are consumed in the manufacturing process. Period manufacturing costs support production but are defined as generally not having a direct relationship to short-term changes in volume. Examples include machinery and equipment repairs, depreciation on manufacturing assets, facility support, procurement, factory scheduling, manufacturing planning and operations management.
15. **Mark-to-market gains/losses** – Represents the net gain or loss of actual results differing from our assumptions and the effects of changing assumptions for our defined benefit pension and OPEB plans. These gains and losses are immediately recognized through earnings upon the annual remeasurement in the fourth quarter, or on an interim basis as triggering events warrant remeasurement.

16. **Pension and Other Postemployment Benefit (OPEB)** – The company's defined-benefit pension and postemployment benefit plans.
17. **Price Realization** – The impact of net price changes excluding currency and new product introductions. Price realization includes geographic mix of sales, which is the impact of changes in the relative weighting of sales prices between geographic regions.
18. **Resource Industries** – A segment primarily responsible for supporting customers using machinery in mining, heavy construction, quarry and aggregates, waste and material handling applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes large track-type tractors; large mining trucks; autonomous ready vehicles and solutions; hard rock vehicles; longwall miners; electric rope shovels; draglines; hydraulic shovels; rotary drills; large wheel loaders; off-highway trucks; articulated trucks; wheel tractor scrapers; wheel dozers; landfill compactors; soil compactors; hard rock continuous mining systems; select work tools; machinery components and related parts. In addition to equipment, Resource Industries also develops and sells technology products and services to provide customers fleet management, equipment management analytics and autonomous machine capabilities. Resource Industries also manages areas that provide services to other parts of the company, including integrated manufacturing and research and development.
19. **Restructuring Costs** – May include costs for employee separation, long-lived asset impairments and contract terminations. These costs are included in Other operating (income) expenses except for defined-benefit plan curtailment losses and special termination benefits, which are included in Other income (expense). Restructuring costs also include other exit-related costs which may consist of accelerated depreciation, inventory write-downs, building demolition, equipment relocation and project management costs and LIFO inventory decrement benefits from inventory liquidations at closed facilities, all of which are primarily included in Cost of goods sold.
20. **Sales Volume** – With respect to sales and revenues, sales volume represents the impact of changes in the quantities sold for Machinery, Energy & Transportation as well as the incremental sales impact of new product introductions, including emissions-related product updates. With respect to operating profit, sales volume represents the impact of changes in the quantities sold for Machinery, Energy & Transportation combined with product mix as well as the net operating profit impact of new product introductions, including emissions-related product updates. Product mix represents the net operating profit impact of changes in the relative weighting of Machinery, Energy & Transportation sales with respect to total sales. The impact of sales volume on segment profit includes inter-segment sales.
21. **Services** – Enterprise services include, but are not limited to, aftermarket parts, Financial Products' revenues and other service-related revenues. Machinery, Energy & Transportation segments exclude most Financial Products' revenues.

LIQUIDITY AND CAPITAL RESOURCES

Sources of funds

We generate significant capital resources from operating activities, which are the primary source of funding for our ME&T operations. Funding for these businesses is also available from commercial paper and long-term debt issuances. Financial Products' operations are funded primarily from commercial paper, term debt issuances and collections from its existing portfolio. During 2019, we experienced favorable liquidity conditions globally in both our ME&T and Financial Products' operations. On a consolidated basis, we ended 2019 with \$8.28 billion of cash, an increase of \$427 million from year-end 2018. We intend to maintain a strong cash and liquidity position.

Consolidated operating cash flow for 2019 was \$6.91 billion, up from \$6.56 billion in 2018. The increase was due to favorable changes in working capital in 2019, mostly offset by lower profit adjusted for non-cash items, which included lower accruals for short-term incentive compensation payments, and a larger discretionary pension contribution. Within working capital, changes to inventories, accounts receivable, customer advances and accrued expenses favorably impacted cash flow but were partially offset by changes in accounts payable. See further discussion of operating cash flow under ME&T and Financial Products.

Total debt as of December 31, 2019 was \$37.66 billion, an increase of \$1.10 billion from year-end 2018. Debt related to Financial Products decreased \$43 million. Debt related to ME&T increased \$1.15 billion in 2019, primarily due to the issuance of debt to finance a discretionary pension contribution, which was partially offset by the impact of new accounting guidance on a previously failed sale-leaseback transaction in Japan. On September 19, 2019, we issued \$1.0 billion of 3.250% Senior Notes due 2049 and \$500 million of 2.600% Senior Notes due 2029. During 2019, we repurchased \$4.05 billion of Caterpillar common stock.

We have three global credit facilities with a syndicate of banks totaling \$10.50 billion (Credit Facility) available in the aggregate to both Caterpillar and Cat Financial for general liquidity purposes. Based on management's allocation decision, which can be revised from time to time, the portion of the Credit Facility available to ME&T as of December 31, 2019 was \$2.75 billion. Information on our Credit Facility is as follows:

- The 364-day facility of \$3.15 billion (of which \$0.82 billion is available to ME&T) expires in September 2020.
- The three-year facility, as amended and restated in September 2019, of \$2.73 billion (of which \$0.72 billion is available to ME&T) expires in September 2022.
- The five-year facility, as amended and restated in September 2019, of \$4.62 billion (of which \$1.21 billion is available to ME&T) expires in September 2024.

At December 31, 2019, Caterpillar's consolidated net worth was \$14.63 billion, which was above the \$9.00 billion required under the Credit Facility. The consolidated net worth is defined as the consolidated shareholder's equity including preferred stock but excluding the pension and other postretirement benefits balance within Accumulated other comprehensive income (loss).

At December 31, 2019, Cat Financial's covenant interest coverage ratio was 1.77 to 1. This is above the 1.15 to 1 minimum ratio, calculated as (1) profit excluding income taxes, interest expense and net gain/(loss) from interest rate derivatives to (2) interest expense calculated at the end of each calendar quarter for the rolling four quarter period then most recently ended, required by the Credit Facility.

In addition, at December 31, 2019, Cat Financial's six-month covenant leverage ratio was 7.65 to 1 and year-end covenant leverage ratio was 7.46 to 1. This is below the maximum ratio of debt to net worth of 10 to 1, calculated (1) on a monthly basis as the average of the leverage ratios determined on the last day of each of the six preceding calendar months and (2) at each December 31, required by the Credit Facility.

In the event Caterpillar or Cat Financial does not meet one or more of their respective financial covenants under the Credit Facility in the future (and are unable to obtain a consent or waiver), the syndicate of banks may terminate the commitments allocated to the party that does not meet its covenants. Additionally, in such event, certain of Cat Financial's other lenders under other loan agreements where similar financial covenants or cross default provisions are applicable, may, at their election, choose to pursue remedies under those loan agreements, including accelerating the repayment of outstanding borrowings. At December 31, 2019, there were no borrowings under the Credit Facility.

Our total credit commitments and available credit as of December 31, 2019 were:

(Millions of dollars)	December 31, 2019		
	Consolidated	Machinery, Energy & Transportation	Financial Products
Credit lines available:			
Global credit facilities	\$ 10,500	\$ 2,751	\$ 7,749
Other external	4,999	194	4,805
Total credit lines available	15,499	2,945	12,554
Less: Commercial paper outstanding	(4,168)	—	(4,168)
Less: Utilized credit	(1,247)	—	(1,247)
Available credit	<u>\$ 10,084</u>	<u>\$ 2,945</u>	<u>\$ 7,139</u>

The other consolidated credit lines with banks as of December 31, 2019 totaled \$5.00 billion. These committed and uncommitted credit lines, which may be eligible for renewal at various future dates or have no specified expiration date, are used primarily by our subsidiaries for local funding requirements. Caterpillar or Cat Financial may guarantee subsidiary borrowings under these lines.

We receive debt ratings from the major credit rating agencies. Moody's rates our debt as "low-A," while Fitch and S&P maintain a "mid-A" debt rating. This split rating has not had a material impact on our borrowing costs or our overall financial health. However, a downgrade of our credit ratings by any of the major credit rating agencies would result in increased borrowing costs and could make access to certain credit markets more difficult. In the event economic conditions deteriorate such that access to debt markets becomes unavailable, ME&T's operations would rely on cash flow from operations, use of existing cash balances, borrowings from Cat Financial and access to our Credit Facility. Our Financial Products' operations would rely on cash flow from its existing portfolio, existing cash balances, access to our Credit Facility and other credit line facilities of Cat Financial and potential borrowings from Caterpillar. In addition, we maintain a support agreement with Cat Financial, which requires Caterpillar to remain the sole owner of Cat Financial and may, under certain circumstances, require Caterpillar to make payments to Cat Financial should Cat Financial fail to maintain certain financial ratios.

Machinery, Energy & Transportation

Net cash provided by operating activities was \$4.87 billion in 2019, compared with \$6.35 billion in 2018. The decrease was primarily due to lower profit in 2019 adjusted for non-cash items, which included lower accruals for short-term compensation payments, and a larger discretionary pension contribution partially offset by favorable changes in working capital. Within working capital, changes to inventories, accounts receivable, customer advances and accrued expenses favorably impacted cash flow but were partially offset by changes in accounts payable.

Net cash used for investing activities in 2019 was \$48 million, compared with net cash used of \$1.19 billion in 2018. The change was primarily due to decreased ME&T lending with Financial Products during 2019 and the acquisitions of ECM S.p.A. and Downer Freight Rail in 2018.

Net cash used for financing activities during 2019 was \$4.48 billion, compared with net cash used of \$5.47 billion in 2018. The change was primarily due to the issuance of \$1.5 billion of long-term debt used to fund a discretionary pension contribution. This was partially offset by an increase in repurchases of Caterpillar common stock of \$249 million and an increase in dividends paid of \$181 million.

While our short-term priorities for the use of cash may vary from time to time as business needs and conditions dictate, our long-term cash deployment strategy is focused on the following

priorities. Our top priority is to maintain a strong financial position in support of a Mid-A rating. Next, we intend to fund operational requirements and commitments. Then, we intend to fund priorities that profitably grow the company and return capital to shareholders through dividend growth and share repurchases. Additional information on cash deployment is as follows:

Strong financial position — Our top priority is to maintain a strong financial position in support of a mid-A rating. We track a diverse group of financial metrics that focus on liquidity, leverage, cash flow and margins which align with our cash deployment actions and the various methodologies used by the major credit rating agencies.

Operational excellence and commitments — Capital expenditures were \$1.07 billion during 2019, compared to \$1.22 billion in 2018. We expect ME&T's capital expenditures in 2020 to be about \$1.2 billion. We made \$1.81 billion of contributions to our pension and other postretirement benefit plans during 2019, including a \$1.5 billion discretionary U.S. pension plan contribution. By comparison, we made \$1.35 billion of contributions to our pension and other postretirement plans in 2018, including a \$1.0 billion discretionary contribution made to our U.S. pension plans. We expect to make approximately \$280 million of contributions to our pension and OPEB plans in 2020.

Fund strategic growth initiatives and return capital to shareholders — We intend to utilize our liquidity and debt capacity to fund targeted investments that drive long-term profitable growth focused in the areas of expanded offerings and services, including acquisitions.

As part of our new capital allocation strategy, ME&T free cash flow is a liquidity measure we will use going forward to determine the cash generated and available for financing activities including debt repayments, dividends and share repurchases. We define ME&T free cash flow as cash from ME&T operations excluding discretionary pension and other postretirement benefit plan contributions less capital expenditures. A goal of our new capital allocation strategy is to return substantially all ME&T free cash flow to shareholders in the form of dividends and share repurchases, while maintaining our mid-A rating.

Our share repurchase plans are subject to the company's cash deployment priorities and are evaluated on an ongoing basis considering the financial condition of the company and the economic outlook, corporate cash flow, the company's liquidity needs and the health and stability of global credit markets. The timing and amount of future repurchases may vary depending on market conditions and investing priorities. In July 2018, the Board of Directors approved an authorization to repurchase up to \$10 billion of Caterpillar common stock (the 2018 Authorization) effective January 1, 2019, with no expiration. In 2019, we repurchased \$4.05 billion of Caterpillar common stock, with

\$5.95 billion remaining under the 2018 Authorization as of December 31, 2019. Caterpillar's basic shares outstanding as of December 31, 2019 were approximately 550 million.

Each quarter, our Board of Directors reviews the company's dividend for the applicable quarter. The Board evaluates the financial condition of the company and considers the economic outlook, corporate cash flow, the company's liquidity needs, and the health and stability of global credit markets to determine whether to maintain or change the quarterly dividend. Dividends totaled \$2.13 billion in 2019, representing 86 cents per share paid in each of the first and second quarters and \$1.03 per share paid in each of the third and fourth quarters.

Contractual obligations

The company has committed cash outflow related to long-term debt, operating lease agreements, postretirement benefit obligations, purchase obligations, interest on long-term debt and other long-term contractual obligations. As of December 31, 2019, minimum payments for these obligations were:

(Millions of dollars)	2020	2021-2022	2023-2024	After 2024	Total
Long-term debt:					
Machinery, Energy & Transportation	\$ 16	\$ 1,919	\$ 1,102	\$ 6,716	\$ 9,753
Financial Products	6,198	12,508	4,334	341	23,381
Total long-term debt ¹	6,214	14,427	5,436	7,057	33,134
Operating leases	185	225	110	175	695
Postretirement benefit obligations ²	280	705	745	1,860	3,590
Purchase obligations:					
Accounts payable ³	5,957	—	—	—	5,957
Purchase orders ⁴	5,103	3	—	—	5,106
Other contractual obligations ⁵	160	87	26	—	273
Total purchase obligations	11,220	90	26	—	11,336
Interest on long-term debt ⁶	909	1,291	834	6,362	9,396
Other long-term obligations ⁷	685	546	159	90	1,480
Total contractual obligations	\$ 19,493	\$ 17,284	\$ 7,310	\$ 15,544	\$ 59,631

¹ Amounts exclude unamortized discounts, debt issuance costs, and fair value adjustments.

² Amounts represent expected contributions to our pension and other postretirement benefit plans through 2029, offset by expected Medicare Part D subsidy receipts.

³ Amount represents invoices received and recorded as liabilities in 2019, but scheduled for payment in 2020. These represent short-term obligations made in the ordinary course of business.

⁴ Amount represents contractual obligations for material and services on order at December 31, 2019 but not yet delivered. These represent short-term obligations made in the ordinary course of business.

⁵ Amounts represent long-term commitments entered into with key suppliers for minimum purchases quantities.

⁶ Amounts represent estimated contractual interest payments on long-term debt, including finance lease interest payments.

⁷ Amounts represent contractual obligations primarily for logistics services agreements related to our former third party logistics business, software license and development contracts and IT consulting contracts and outsourcing contracts for benefit plan administration and software system support.

The total amount of gross unrecognized tax benefits for uncertain tax positions, including positions impacting only the timing of tax benefits, was \$1,778 million at December 31, 2019. Payment of these obligations would result from settlements with taxing authorities. Due to the difficulty in determining the timing of settlements, these obligations are not included in the table above. We do not expect to make a tax payment related to these obligations within the next year that would significantly impact liquidity.

Off-balance sheet arrangements

We are a party to certain off-balance sheet arrangements, primarily in the form of guarantees. Information related to guarantees appears in Note 21 – "Guarantees and product warranty" of Part II, Item 8 "Financial Statements and Supplementary Data."

Financial Products

Financial Products operating cash flow was \$1.50 billion in 2019, compared with \$1.52 billion in 2018. Net cash used for investing activities was \$414 million in 2019, compared with \$2.78 billion in 2018. The change was primarily due to the impact of net intercompany purchased receivables and higher collections of finance receivables. Net cash used for financing activities in 2019 was \$991 million, compared with net cash provided by financing activities of \$1.26 billion in 2018. The change was primarily due to lower portfolio funding requirements and lower net intercompany borrowings, partially offset by a lower dividend payment to ME&T.

RECENT ACCOUNTING PRONOUNCEMENTS

For a discussion of recent accounting pronouncements, see Note 1J — "New accounting guidance" of Part II, Item 8 "Financial Statements and Supplementary Data."

CRITICAL ACCOUNTING POLICIES

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect reported amounts. The more significant estimates include: residual values for leased assets, fair values for goodwill impairment tests, warranty liability, reserves for product liability and insurance losses, postretirement benefits, post-sale discounts, credit losses and income taxes. We have incorporated many years of data into the determination of each of

these estimates and we have not historically experienced significant adjustments. These assumptions are reviewed at least annually with the Audit Committee of the Board of Directors. Following are the methods and assumptions used in determining our estimates and an indication of the risks inherent in each.

Residual values for leased assets – The residual value of Cat Financial's leased equipment is determined based on its estimated end-of-term market value. We estimate the residual value of leased equipment at the inception of the lease based on a number of factors, including historical wholesale market sales prices, past remarketing experience and any known significant market/product trends. The following critical factors are also considered in our residual value estimates: lease term, market size and demand, total expected hours of usage, machine configuration, application, location, model changes, quantities, third-party residual guarantees and contractual customer purchase options.

Upon termination of the lease, the equipment is either purchased by the lessee or sold to a third party, in which case we may record a gain or a loss for the difference between the estimated residual value and the sale price.

During the term of our leases, we monitor residual values. For operating leases, adjustments to depreciation expense reflecting changes in residual value estimates are recorded prospectively on a straight-line basis. For finance leases, residual value adjustments are recognized through a reduction of finance revenue over the remaining lease term.

We evaluate the carrying value of equipment on operating leases for potential impairment when we determine a triggering event has occurred. When a triggering event occurs, a test for recoverability is performed by comparing projected undiscounted future cash flows to the carrying value of the equipment on operating leases. If the test for recoverability identifies a possible impairment, the fair value of the equipment on operating leases is measured in accordance with the fair value measurement framework. An impairment charge is recognized for the amount by which the carrying value of the equipment on operating leases exceeds its estimated fair value.

At December 31, 2019, the aggregate residual value of equipment on operating leases was \$2.15 billion. Without consideration of other factors such as third-party residual guarantees or contractual customer purchase options, a 10 percent non-temporary decrease in the market value of our equipment subject to operating leases would reduce residual value estimates and result in the recognition of approximately \$80 million of additional annual depreciation expense.

Fair values for goodwill impairment tests – We test goodwill for impairment annually, at the reporting unit level, and whenever events or circumstances make it more likely than not that an impairment may have occurred, such as a significant adverse change in the business climate or a decision to sell all or a portion of a reporting unit. We perform our annual goodwill impairment test as of October 1 and monitor for interim triggering events on an ongoing basis.

Goodwill is reviewed for impairment utilizing either a qualitative assessment or a quantitative goodwill impairment test. If we choose to perform a qualitative assessment and determine the fair value more likely than not exceeds the carrying value, no further evaluation is necessary. For reporting units where we perform the quantitative goodwill impairment test, we compare the fair value of each reporting unit, which we primarily determine using an income approach based on the present value of discounted cash flows, to the respective carrying value, which includes goodwill. If the fair value of the reporting unit exceeds its carrying value, the goodwill is not considered impaired. If the carrying value is higher than the fair value, the difference would be recognized as an impairment loss.

The impairment test process requires valuation of the respective reporting unit, which we primarily determine using an income approach based on a discounted five year forecasted cash flow with a year-five residual value. The residual value is computed using the constant growth method, which values the forecasted cash flows in perpetuity. The income approach is supported by a reconciliation of our calculated fair value for Caterpillar to the company's market capitalization. The assumptions about future cash flows and growth rates are based on each reporting unit's long-term forecast and are subject to review and approval by senior management. A reporting unit's discount rate is a risk-adjusted weighted average cost of capital, which we believe approximates the rate from a market participant's perspective. The estimated fair value could be impacted by changes in market conditions, interest rates, growth rates, tax rates, costs, pricing and capital expenditures. The fair value determination is categorized as Level 3 in the fair value hierarchy due to its use of internal projections and unobservable measurement inputs.

Our annual impairment tests completed in the fourth quarter of 2019 indicated the fair value of each reporting unit was substantially above its respective carrying value, including goodwill. Caterpillar's market capitalization has remained significantly above the net book value of the Company.

An unfavorable change in our expectations for the financial performance of our reporting units, particularly long-term growth and profitability, would reduce the fair value of our reporting units. The demand for our equipment and related parts is highly cyclical and significantly impacted by commodity prices, although the impact may vary by reporting unit. The energy and mining industries are major users of our products, including the coal, iron ore, gold, copper, oil and natural gas industries. Decisions to purchase our products are dependent upon the performance of those industries, which in turn are dependent in part on commodity prices. Lower commodity prices or industry specific circumstances that have a negative impact to the valuation assumptions may reduce the fair value of our reporting units. Should such events occur and it becomes more likely than not that a reporting unit's fair value has fallen below its carrying value, we will perform an interim goodwill impairment test(s), in addition to the annual impairment test. Future impairment tests may result in a goodwill impairment, depending on the outcome of the quantitative impairment test. A goodwill impairment would be reported as a non-cash charge to earnings.

Warranty liability – At the time a sale is recognized, we record estimated future warranty costs. The warranty liability is determined by applying historical claim rate experience to the current field population and dealer inventory. Generally, historical claim rates are based on actual warranty experience for each product by machine model/engine size by customer or dealer location (inside or outside North America). Specific rates are developed for each product shipment month and are updated monthly based on actual warranty claim experience. Warranty costs may differ from those estimated if actual claim rates are higher or lower than our historical rates.

Product liability and insurance loss reserve – We determine these reserves based upon reported claims in process of settlement and actuarial estimates for losses incurred but not reported. Loss reserves, including incurred but not reported reserves, are based on estimates and ultimate settlements may vary significantly from such estimates due to increased claims frequency or severity over historical levels.

Postretirement benefits – We sponsor defined benefit pension plans and/or other postretirement benefit plans (retirement healthcare and life insurance) to employees in many of our locations throughout the world. There are assumptions used in the accounting for these defined benefit plans that include discount rate, expected return on plan assets, expected rate of compensation increase, the future health care trend rate, mortality and other economic

and demographic assumptions. The actuarial assumptions we use may change or differ significantly from actual results, which may result in a material impact to our consolidated financial statements.

The effects of actual results differing from our assumptions and the effects of changing assumptions are considered actuarial gains or losses. We utilize a mark-to-market approach in recognizing actuarial gains or losses immediately through earnings upon the annual remeasurement in the fourth quarter, or on an interim basis as triggering events warrant remeasurement.

Primary actuarial assumptions were determined as follows:

- The assumed discount rate is used to discount future benefit obligations back to today's dollars. The U.S. discount rate is based on a benefit cash flow-matching approach and represents the rate at which our benefit obligations could effectively be settled as of our measurement date, December 31. The benefit cash flow-matching approach involves analyzing Caterpillar's projected cash flows against a high quality bond yield curve, calculated using a wide population of corporate Aa bonds available on the measurement date. A similar approach is used to determine the assumed discount rate for our most significant non-U.S. plans. In estimating the service and interest cost components of net periodic benefit cost, we utilize a full yield curve approach in determining a discount rate. This approach applies the specific spot rates along the yield curve used in the determination of the benefit obligation to the relevant projected cash flows.

Discount rates are sensitive to changes in interest rates. A decrease in the discount rate would increase our obligation and future expense.

- The expected long-term rate of return on plan assets is based on our estimate of long-term passive returns for equities and fixed income securities weighted by the allocation of our plan assets. Based on historical performance, we increase the passive returns due to our active management of the plan assets. This rate is impacted by changes in general market conditions, but because it represents a long-term rate, it is not significantly impacted by short-term market swings. Changes in our allocation of plan assets would also impact this rate. For example, a shift to more fixed income securities would lower the rate. A decrease in the rate would increase our expense. The expected return on plan assets is calculated using the fair value of plan assets as of our measurement date, December 31.
- The expected rate of compensation increase is used to develop benefit obligations using projected pay at retirement. It represents average long-term salary increases. This rate is influenced by our long-term compensation policies. An increase in the rate would increase our obligation and expense.
- The assumed health care trend rate represents the rate at which health care costs are assumed to increase and is based on historical and expected experience. Changes in our projections of future health care costs due to general economic conditions and those specific to health care (e.g., technology driven cost changes) will impact this trend rate. An increase in the trend rate would increase our obligation and expense.
- The mortality assumption is used to estimate the life expectancy of plan participants. An increase in the life expectancy of plan participants will result in an increase in our obligation and expense.

Postretirement Benefit Plan Actuarial Assumptions Sensitivity

The effects of a one percentage-point change in certain actuarial assumptions on 2019 pension and OPEB costs and obligations are as follows:

(Millions of dollars)	2019 Benefit Cost		Year-end Benefit Obligation	
	One percentage-point increase	One percentage-point decrease	One percentage-point increase	One percentage-point decrease
U.S. Pension benefits:				
Assumed discount rate	\$ 54	\$ (71)	\$ (1,893)	\$ 2,305
Expected rate of compensation increase	2	(2)	—	—
Expected long-term rate of return on plan assets	(122)	122	—	—
Non-U.S. Pension benefits:				
Assumed discount rate	7	(10)	(634)	610
Expected rate of compensation increase	5	(4)	41	(35)
Expected long-term rate of return on plan assets	(39)	39	—	—
Other postretirement benefits:				
Assumed discount rate	8	(10)	(366)	437
Expected rate of compensation increase	—	—	1	(1)
Expected long-term rate of return on plan assets	(3)	3	—	—
Assumed health care cost trend rate	13	(11)	158	(133)

Actuarial Assumptions

	U.S. Pension Benefits			Non-U.S. Pension Benefits			Other Postretirement Benefits		
	2019	2018	2017	2019	2018	2017	2019	2018	2017
Weighted-average assumptions used to determine benefit obligation, end of year:									
Discount rate	3.2%	4.2%	3.5%	1.9%	2.5%	2.4%	3.2%	4.2%	3.6%
Rate of compensation increase ¹	—%	4.0%	4.0%	2.0%	3.0%	4.0%	4.0%	4.0%	4.0%
Weighted-average assumptions used to determine net periodic benefit cost:									
Discount rate used to measure service cost	4.3%	3.7%	4.2%	2.5%	2.3%	2.4%	4.1%	3.5%	3.9%
Discount rate used to measure interest cost	3.9%	3.2%	3.3%	2.3%	2.2%	2.3%	3.9%	3.2%	3.3%
Expected rate of return on plan assets	5.9%	6.3%	6.7%	3.8%	5.2%	5.9%	7.2%	7.5%	7.5%
Rate of compensation increase	4.0%	4.0%	4.0%	3.0%	4.0%	4.0%	4.1%	4.0%	4.0%
Health care cost trend rates at year-end:									
Health care trend rate assumed for next year							6.1%	6.1%	6.1%
Rate that the cost trend rate gradually declines to							5.0%	5.0%	5.0%
Year that the cost trend rate reaches ultimate rate							2025	2025	2022

¹ Effective December 31, 2019, all U.S. pension benefits were frozen, and accordingly this assumption is no longer applicable.

See Note 12 – “Postemployment benefit plans” of Part II, Item 8 “Financial Statement and Supplemental Data” for further information regarding the accounting for postretirement benefits.

Post-sale discount reserve – We provide discounts to dealers through merchandising programs. We have numerous programs that are designed to promote the sale of our products. The most common dealer programs provide a discount when the dealer sells a product to a targeted end user. The amount of accrued post-sale discounts was \$1.7 billion and \$1.5 billion as of December 31, 2019 and 2018, respectively. The reserve represents discounts that we expect to pay on previously sold units and is reviewed at least quarterly. The reserve is adjusted if discounts paid differ from those estimated. Historically, those adjustments have not been material.

Credit loss reserve – The allowance for credit losses is an estimate of the losses inherent in our finance receivable portfolio and includes consideration of accounts that have been individually identified as impaired, as well as pools of finance receivables where it is probable that certain receivables in the pool are impaired but the individual accounts cannot yet be identified. In identifying and measuring impairment, management takes into consideration past loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower’s ability to repay, estimated value of underlying collateral and current economic conditions.

Accounts are identified for individual review based on past-due status and information available about the customer, such as financial statements, news reports and published credit ratings, as well as general information regarding industry trends and the economic environment in which our customers operate. The allowance for credit losses attributable to finance receivables that are individually evaluated and determined to be impaired is based on the present value of expected future cash flows discounted at the receivables’ effective interest rate, the fair value of the collateral for collateral-dependent receivables or the observable market price of the receivable. In determining collateral value, we estimate the current fair market value of the collateral less selling costs. We also consider credit enhancements such as additional collateral and contractual third-party guarantees. The allowance for credit losses attributable to the remaining accounts not yet individually identified as impaired is estimated based on loss forecast models utilizing probabilities of default, our estimate of the loss emergence period and the estimated loss given default. In addition, qualitative factors not able to be fully captured in our loss forecast models including industry trends, macroeconomic factors and model imprecision are considered in the evaluation of the adequacy of the allowance for credit losses. These qualitative factors are subjective and require a degree of management judgment.

While management believes it has exercised prudent judgment and applied reasonable assumptions, there can be no assurance that in the future, changes in economic conditions or other factors would not cause changes in the financial health of our customers. If the financial health of our customers deteriorates, the timing and level of payments received could be impacted and therefore, could result in a change to our estimated losses.

Income taxes – We are subject to the income tax laws of the many jurisdictions in which we operate. These tax laws are complex, and the manner in which they apply to our facts is sometimes open to interpretation. In establishing the provision for income taxes, we must make judgments about the application of these inherently complex tax laws. Our income tax positions and analysis are based on currently enacted tax law. Future changes in tax law or related interpretations could significantly impact the provision for income taxes, the amount of taxes payable, and the deferred tax asset and liability balances. Changes in tax law are reflected in the period of enactment with related interpretations considered in the period received.

Despite our belief that our tax return positions are consistent with applicable tax laws, we believe that taxing authorities could challenge certain positions. Settlement of any challenge can result in no change, a complete disallowance, or some partial adjustment reached through negotiations or litigation. We record tax benefits for uncertain tax positions based upon management’s evaluation of the information available at the reporting date. To be recognized in the financial statements, a tax benefit must be at least more likely than not of being sustained based on technical merits. The benefit for positions meeting the recognition threshold is measured as the largest benefit more likely than not of being realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. Significant judgment is required in making these determinations and adjustments to unrecognized tax benefits may be necessary to reflect actual taxes payable upon settlement. Adjustments related to positions impacting the effective tax rate affect the provision for income taxes. Adjustments related to positions impacting the timing of deductions impact deferred tax assets and liabilities. For tax years 2007 to 2012 including the impact of a loss carryback to 2005, the IRS has proposed to tax in the United States profits earned from certain parts transactions by Caterpillar SARL (CSARL), based on the IRS examination team’s application of “substance-over-form” or “assignment-of-income” judicial doctrines. CSARL is primarily taxable locally in Switzerland. We are vigorously contesting the proposed increases to tax and penalties for these years of approximately \$2.3 billion. We believe that the relevant transactions complied with applicable tax laws and did not violate judicial doctrines. The purchase of parts by CSARL

from unrelated parties and the subsequent sale of those parts to unrelated dealers outside the United States have substantial legal, commercial, and economic consequences for the parties involved. Therefore, we have concluded that the largest amount of benefit that is more likely than not to be sustained related to this position is the entire benefit. As a result, no amount related to these IRS adjustments is reflected in unrecognized tax benefits. We have filed U.S. income tax returns on this same basis for years after 2012. We currently believe the ultimate disposition of this matter will not have a material adverse effect on our consolidated financial position, liquidity or results of operations.

Deferred tax assets generally represent tax benefits for tax deductions or credits available in future tax returns. Certain estimates and assumptions are required to determine whether it is more likely than not that all or some portion of the benefit of a deferred tax asset will not be realized. In making this assessment, management analyzes the trend of U.S. GAAP earnings and estimates the impact of future taxable income, reversing temporary differences and available prudent and feasible tax planning strategies. We give less weight in this analysis to mark-to-market adjustments to remeasure our pension and OPEB plans as we do not consider these adjustments indicative of ongoing earnings trends. Should a change in facts or circumstances lead to a change in judgment about the ultimate realizability of a deferred tax asset, we record or adjust the related valuation allowance in the period that the change in facts and circumstances occurs, along with a corresponding increase or decrease in the provision for income taxes.

Additional information related to income taxes is included in Note 6 - "Income taxes" of Part II, Item 8 "Financial statements and Supplementary Data."

OTHER MATTERS

ENVIRONMENTAL AND LEGAL MATTERS

The Company is regulated by federal, state and international environmental laws governing our use, transport and disposal of substances and control of emissions. In addition to governing our manufacturing and other operations, these laws often impact the development of our products, including, but not limited to, required compliance with air emissions standards applicable to internal combustion engines. We have made, and will continue to make, significant research and development and capital expenditures to comply with these emissions standards.

We are engaged in remedial activities at a number of locations, often with other companies, pursuant to federal and state laws. When it is probable we will pay remedial costs at a site, and those costs can be reasonably estimated, the investigation, remediation, and operating and maintenance costs are accrued against our earnings. Costs are accrued based on consideration of currently available data and information with respect to each individual site, including available technologies, current applicable laws and regulations, and prior remediation experience. Where no amount within a range of estimates is more likely, we accrue the minimum. Where multiple potentially responsible parties are involved, we consider our proportionate share of the probable costs. In formulating the estimate of probable costs, we do not consider amounts expected to be recovered from insurance companies or others. We reassess these accrued amounts on a quarterly basis. The amount recorded for environmental remediation is not material and is included in Accrued expenses. We believe there is no more than a remote chance that a material amount for remedial activities at any individual site, or at all the sites in the aggregate, will be required.

On January 27, 2020, the Brazilian Federal Environmental Agency ("IBAMA") issued Caterpillar Brasil Ltda a notice of violation regarding allegations around the requirements for use of imported oils at the Piracicaba, Brazil facility. We have instituted processes to address the allegations. While we are still discussing resolution of these allegations with IBAMA, the initial notice from IBAMA included a proposed fine of approximately \$370,000. We do not expect this fine or our response to address the allegations to have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

On January 7, 2015, the Company received a grand jury subpoena from the U.S. District Court for the Central District of Illinois. The subpoena requests documents and information from the Company relating to, among other things, financial information concerning U.S. and non-U.S. Caterpillar subsidiaries (including undistributed profits of non-U.S. subsidiaries and the movement of cash among U.S. and non-U.S. subsidiaries). The Company has received additional subpoenas relating to this investigation requesting additional documents and information relating to, among other things, the purchase and resale of replacement parts by Caterpillar Inc. and non-U.S. Caterpillar subsidiaries, dividend distributions of certain non-U.S. Caterpillar subsidiaries, and Caterpillar SARL and related structures. On March 2-3, 2017, agents with the Department of Commerce, the Federal Deposit Insurance Corporation and the Internal Revenue Service executed search and seizure warrants at three facilities of the Company in the Peoria, Illinois area, including its former corporate headquarters. The warrants identify, and agents seized, documents and information related to, among other things, the export of products from the United States, the movement of products between the United States and Switzerland, the relationship between Caterpillar Inc. and Caterpillar SARL, and sales outside the United States. It is the Company's understanding that the warrants, which concern both tax and export activities, are related to the ongoing grand jury investigation. The Company is continuing to cooperate with this investigation. The Company is unable to predict the outcome or reasonably estimate any potential loss; however, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

On March 20, 2014, Brazil's Administrative Council for Economic Defense (CADE) published a Technical Opinion which named 18 companies and over 100 individuals as defendants, including two subsidiaries of Caterpillar Inc., MGE - Equipamentos e Serviços Ferroviários Ltda. (MGE) and Caterpillar Brasil Ltda. The publication of the Technical Opinion opened CADE's official administrative investigation into allegations that the defendants participated in anticompetitive bid activity for the construction and maintenance of metro and train networks in Brazil. While companies cannot be held criminally liable for anticompetitive conduct in Brazil, criminal charges have been brought against one current employee of MGE and two former employees of MGE involving the same conduct alleged by CADE. On July 8, 2019, CADE found MGE, one of its current employees and two of its former employees liable for anticompetitive conduct. CBL was dismissed from the proceeding without any finding of liability. MGE intends to appeal CADE's findings. We currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

In addition, we are involved in other unresolved legal actions that arise in the normal course of business. The most prevalent of these unresolved actions involve disputes related to product design, manufacture and performance liability (including claimed asbestos exposure), contracts, employment issues, environmental matters, intellectual property rights, taxes (other than income taxes)

and securities laws. The aggregate range of reasonably possible losses in excess of accrued liabilities, if any, associated with these unresolved legal actions is not material. In some cases, we cannot reasonably estimate a range of loss because there is insufficient information regarding the matter. However, we believe there is no more than a remote chance that any liability arising from these matters would be material. Although it is not possible to predict with certainty the outcome of these unresolved legal actions, we believe that these actions will not individually or in the aggregate have a material adverse effect on our consolidated results of operations, financial position or liquidity.

RETIREMENT BENEFITS

We recognize mark-to-market gains and losses immediately through earnings upon the remeasurement of our pension and OPEB plans. Mark-to-market gains and losses represent the effects of actual results differing from our assumptions and the effects of changing assumptions. Changes in discount rates and differences between the actual return on plan assets and the expected return on plan assets generally have the largest impact on mark-to-market gains and losses.

The table below summarizes the amounts of net periodic benefit cost recognized for 2019, 2018 and 2017, respectively, and includes expected cost for 2020.

(Millions of dollars)	2020 Expected	2019	2018	2017
U.S. Pension Benefits	\$ (308)	\$ (7)	\$ (149)	\$ (85)
Non-U.S. Pension Benefits	(4)	19	(69)	(22)
Other Postretirement Benefits	150	158	138	148
Mark-to-market loss (gain)	— ¹	468	495	301
Total net periodic benefit cost (benefit)	<u>\$ (162)</u>	<u>\$ 638</u>	<u>\$ 415</u>	<u>\$ 342</u>

¹ Expected net periodic benefit cost (benefit) does not include an estimate for mark-to-market gains or losses.

- **Expected decrease in expense in 2020 compared to 2019** – Excluding the impact of mark-to-market gains and losses, our net periodic benefit cost is expected to decrease \$332 million in 2020. This decrease is primarily due to lower interest cost as a result of lower discount rates at year-end 2019, elimination of service cost for our U.S. pension plans freezing benefit accruals and higher expected return on plan assets due to a higher asset base at year-end 2019.
- **Increase in expense in 2019 compared to 2018** – Primarily due to lower expected return on plan assets (U.S. pension plans had an expected rate of return of 5.9 percent in 2019 compared to 6.3 percent in 2018) and higher interest costs due to higher discount rates at year-end 2018.
- **Increase in expense in 2018 compared to 2017** – Primarily due to higher net mark-to-market losses in 2018 compared to 2017. This was partially offset by a higher expected return on plan assets and curtailment gains compared to curtailment and termination charges in 2017.

The primary factors that resulted in mark-to-market losses for 2019, 2018 and 2017 are described below. The net mark-to-market losses were included in Other income (expense) in the Results of Operations.

- **2019 net mark-to-market loss of \$468 million** – Primarily due to lower discount rates at the end of 2019 compared to the end of 2018. This was partially offset by a higher actual return on plan assets compared to the expected return on plan assets (U.S. pension plans had an actual rate of return of 22.3 percent compared to an expected rate of return of 5.9 percent).
- **2018 net mark-to-market loss of \$495 million** – Primarily due to the difference between the actual return on plan assets compared to the expected return on plan assets (U.S. pension plans had an actual rate of return of negative 5.4 percent compared to an expected rate of return of 6.3 percent). This was partially offset by higher discount rates at the end of 2018 compared to the end of 2017.
- **2017 net mark-to-market loss of \$301 million** – Primarily due to lower discount rates at the end of 2017 compared to the end of 2016 and changes in our mortality assumption (discussed below). This was partially offset by the difference between the actual return

on plan assets compared to the expected return on plan assets (U.S. pension plans had an actual rate of return of 15.5 percent compared to an expected rate of return of 6.7 percent).

In the fourth quarter of 2017, the company reviewed and made changes to the mortality assumptions primarily for our U.S. pension plans which resulted in an overall increase in the life expectancy of plan participants. As of December 31, 2017 these changes resulted in an increase in our Liability for postemployment benefits of approximately \$290 million.

In the first quarter of 2017, we announced the closure of our Gosselies, Belgium facility. This announcement impacted certain employees that participated in a defined benefit pension plan and resulted in a net loss of \$20 million in the first quarter of 2017 for curtailment and termination benefits.

SENSITIVITY

Foreign Exchange Rate Sensitivity

ME&T operations use foreign currency forward and option contracts to manage unmatched foreign currency cash inflow and outflow. Our objective is to minimize the risk of exchange rate movements that would reduce the U.S. dollar value of our foreign currency cash flow. Our policy allows for managing anticipated foreign currency cash flow for up to approximately five years. Based on the anticipated and firmly committed cash inflow and outflow for our ME&T operations for the next 12 months and the foreign currency derivative instruments in place at year-end, a hypothetical 10 percent weakening of the U.S. dollar relative to all other currencies would adversely affect our expected 2020 cash flow for our ME&T operations by approximately \$225 million. Last year similar assumptions and calculations yielded a potential \$250 million adverse impact on 2019 cash flow. We determine our net exposures by calculating the difference in cash inflow and outflow by currency and adding or subtracting outstanding foreign currency derivative instruments. We multiply these net amounts by 10 percent to determine the sensitivity.

In managing foreign currency risk for our Financial Products operations, our objective is to minimize earnings volatility resulting from conversion and the remeasurement of net foreign currency

balance sheet positions and future transactions denominated in foreign currencies. Since our policy allows the use of foreign currency forward, option and cross currency contracts to offset the risk of currency mismatch between our assets and liabilities and exchange rate risk associated with future transactions denominated in foreign currencies, a 10 percent change in the value of the U.S. dollar relative to all other currencies would not have a material effect on our consolidated financial position, results of operations or cash flow. Neither our policy nor the effect of a 10 percent change in the value of the U.S. dollar has changed from that reported at the end of last year.

The effect of the hypothetical change in exchange rates ignores the effect this movement may have on other variables, including competitive risk. If it were possible to quantify this competitive impact, the results would probably be different from the sensitivity effects shown above. In addition, it is unlikely that all currencies would uniformly strengthen or weaken relative to the U.S. dollar. In reality, some currencies may weaken while others may strengthen. Our primary exposure (excluding competitive risk) is to exchange rate movements in the Swiss franc, Chinese yuan, Japanese yen, Indian rupee, and Australian dollar.

Interest Rate Sensitivity

For our ME&T operations, we have the option to use interest rate contracts to lower the cost of borrowed funds by attaching fixed-to-floating interest rate contracts to fixed-rate debt, and by entering into forward rate agreements on future debt issuances. A hypothetical 100 basis point adverse move in interest rates along the entire interest rate yield curve would have a minimal impact to the 2020 pre-tax earnings of ME&T. Last year, similar assumptions and calculations yielded a minimal impact to 2019 pre-tax earnings.

For our Financial Products operations, we use interest rate derivative instruments primarily to meet our match-funding objectives and strategies. We have a match-funding policy that addresses the interest rate risk by aligning the interest rate profile (fixed or floating rate and duration) of our debt portfolio with the interest rate profile of our finance receivable portfolio within predetermined range on an ongoing basis. In connection with that policy, we use interest rate derivative instruments to modify the debt structure to match assets within the finance receivable portfolio. Match funding reduces the volatility of margins between interest-bearing assets and interest-bearing liabilities, regardless of which direction interest rates move.

In order to properly manage sensitivity to changes in interest rates, Financial Products measures the potential impact of different interest rate assumptions on pre-tax earnings. All on-balance sheet positions, including derivative financial instruments, are included in the analysis. The primary assumptions included in the analysis are that there are no new fixed rate assets or liabilities, the proportion of fixed rate debt to fixed rate assets remains unchanged and the level of floating rate assets and debt remain constant. An analysis of the December 31, 2019 balance sheet, using these assumptions, estimates the impact of a 100 basis point immediate and sustained adverse change in interest rates to have a minimal impact on 2020 pre-tax earnings. Last year, similar assumptions and calculations yielded a minimal impact to 2019 pre-tax earnings.

This analysis does not necessarily represent our current outlook of future market interest rate movement, nor does it consider any actions management could undertake in response to changes in interest rates. Accordingly, no assurance can be given that actual results would be consistent with the results of our estimate.

NON-GAAP FINANCIAL MEASURES

The following definitions are provided for the non-GAAP financial measures used in this report. These non-GAAP financial measures have no standardized meaning prescribed by U.S. GAAP and therefore are unlikely to be comparable to the calculation of similar measures for other companies. Management does not intend these items to be considered in isolation or as a substitute for the related GAAP measures.

We believe it is important to separately quantify the profit impact of several significant items in order for our results to be meaningful to our readers. These items consist of (i) pension and OPEB mark-to-market losses resulting from plan remeasurements, (ii) U.S. tax reform impact, (iii) restructuring costs in 2018, which were incurred to generate longer-term benefits and (iv) certain deferred tax valuation allowance adjustments. We do not consider these items indicative of earnings from ongoing business activities and believe the non-GAAP measures will provide investors with useful perspective on underlying business results and trends and aid with assessing our period-over-period results. In addition, we provide a calculation of ME&T free cash flow as we believe it is an important measure for investors to determine the cash generation available for financing activities including debt repayments, dividends and share repurchases.

Reconciliations of adjusted operating profit margin to the most directly comparable GAAP measure, operating profit as a percent of sales and revenues are as follows:

	Three Months Ended December 31,		Twelve Months Ended December 31,	
	2019	2018	2019	2018
Operating profit as a percent of total sales and revenues	14.1%	13.1%	15.4%	15.2%
Restructuring costs ¹	—%	0.7%	—%	0.7%
Adjusted operating profit margin	14.1%	13.8%	15.4%	15.9%

¹ 2019 Restructuring costs were not material.

Reconciliations of adjusted profit before taxes to the most directly comparable GAAP measure, consolidated profit before taxes, are as follows:

(Millions of dollars)	Three Months Ended December 31,		Twelve Months Ended December 31,	
	2019	2018	2019	2018
Profit before taxes	\$ 1,365	\$ 1,367	\$ 7,812	\$ 7,822
Mark-to-market losses	\$ 468	\$ 495	\$ 468	\$ 495
Restructuring costs	\$ —	\$ 93	\$ —	\$ 386
Adjusted profit before taxes	\$ 1,833	\$ 1,955	\$ 8,280	\$ 8,703

Reconciliations of adjusted profit per share to the most directly comparable GAAP measure, profit per share - diluted, are as follows:

	Three Months Ended December 31,		Twelve Months Ended December 31,	
	2019	2018	2019	2018
Profit per share - diluted	\$ 1.97	\$ 1.78	\$ 10.74	\$ 10.26
Per share mark-to-market losses ¹	\$ 0.65	\$ 0.66	\$ 0.64	\$ 0.64
Per share U.S. tax reform impact	\$ —	\$ 0.09	\$ (0.31)	\$ (0.17)
Per share restructuring costs ²	\$ —	\$ 0.13	\$ —	\$ 0.50
Per share deferred tax valuation allowance adjustments	\$ —	\$ (0.11)	\$ —	\$ (0.01)
Adjusted profit per share	\$ 2.63	\$ 2.55	\$ 11.06	\$ 11.22

¹ At statutory tax rates.

² 2018 restructuring costs were at statutory tax rates. 2019 restructuring costs were not material.

Reconciliations of ME&T free cash flow to the most directly comparable GAAP measure, net cash provided by operating activities are as follows:

(Millions of dollars)	Twelve Months Ended December 31,	
	2019	2018
ME&T net cash provided by operating activities ¹	\$ 4,871	\$ 6,347
ME&T discretionary pension contributions	\$ 1,500	\$ 1,000
ME&T capital expenditures	\$ (1,074)	\$ (1,221)
ME&T free cash flow	\$ 5,297	\$ 6,126

¹ See reconciliation of ME&T net cash provided by operating activities to consolidated net cash provided by operating activities on page 47.

Supplemental Consolidating Data

We are providing supplemental consolidating data for the purpose of additional analysis. The data has been grouped as follows:

Consolidated – Caterpillar Inc. and its subsidiaries.

Machinery, Energy & Transportation – Caterpillar defines Machinery, Energy & Transportation as it is presented in the supplemental data as Caterpillar Inc. and its subsidiaries with Financial Products accounted for on the equity basis. Machinery, Energy & Transportation information relates to the design, manufacturing and marketing of our products. Financial Products' information relates to the financing to customers and dealers for the purchase and lease of Caterpillar and other equipment.

The nature of these businesses is different, especially with regard to the financial position and cash flow items. Caterpillar management utilizes this presentation internally to highlight these differences. We also believe this presentation will assist readers in understanding our business.

Financial Products – Our finance and insurance subsidiaries, primarily Cat Financial and Insurance Services.

Consolidating Adjustments – Eliminations of transactions between Machinery, Energy & Transportation and Financial Products.

Pages 45 to 47 reconcile Machinery, Energy & Transportation with Financial Products on the equity basis to Caterpillar Inc. consolidated financial information.

ITEM 8. Financial Statements and Supplementary Data.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Caterpillar Inc. (company) is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in Rule 13a-15(f) under the Exchange Act. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the company's internal control over financial reporting as of December 31, 2019. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control-Integrated Framework* (2013). Based on our assessment we concluded that, as of December 31, 2019, the company's internal control over financial reporting was effective based on those criteria.

The effectiveness of the company's internal control over financial reporting as of December 31, 2019 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm. Their report appears on pages 50-51.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Caterpillar Inc.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated statement of financial position of Caterpillar Inc. and its subsidiaries (the “Company”) as of December 31, 2019 and 2018, and the related consolidated statements of results of operations, comprehensive income (loss), changes in shareholders’ equity, and cash flow for each of the three years in the period ended December 31, 2019, including the related notes (collectively referred to as the “consolidated financial statements”). We also have audited the Company’s internal control over financial reporting as of December 31, 2019, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2019 and 2018, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2019 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2019, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Company’s management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on the Company’s consolidated financial statements and on the Company’s internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Uncertain Tax Position - Caterpillar SARL IRS Examination

As described in Note 6 to the consolidated financial statements, as a result of the audits of the Company's U.S. 2007 to 2012 income tax returns, including the impact of a loss carryback to 2005, the Internal Revenue Service ("IRS") has proposed to tax in the U.S. profits earned from certain parts transactions by Caterpillar SARL ("CSARL"). This proposal is based on the IRS examination team's application of the "substance-over-form" or "assignment-of-income" judicial doctrines. As described by management, the Company is vigorously contesting the proposed increases to tax and penalties for these years of approximately \$2.3 billion, as management believes that the relevant transactions complied with applicable tax laws and did not violate judicial doctrines. As disclosed by management, the purchase of parts by CSARL from unrelated parties and the subsequent sale of those parts to unrelated dealers outside the U.S. have substantial legal, commercial, and economic consequences for the parties involved. Management has concluded that the largest amount of benefit that is more likely than not to be sustained related to this position is the entire benefit. As a result, no amount related to these IRS adjustments is reflected in the Company's unrecognized tax benefits. The Company has filed U.S. income tax returns on this same basis for years after 2012.

The principal considerations for our determination that performing procedures relating to the uncertain tax position arising from the CSARL IRS Examination is a critical audit matter are there was significant judgment by management in evaluating the amount of the benefit that is more likely than not to be sustained related to the position, which in turn led to a high degree of auditor judgment, subjectivity and effort in performing procedures to evaluate whether the position was more likely than not to be sustained. Also, the audit effort involved the use of professionals with specialized skill and knowledge to assist in evaluating the audit evidence obtained from these procedures.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the uncertain tax position arising from the CSARL IRS Examination. These procedures also included, among others, (i) evaluating management's process for determining the reasonableness of the uncertain tax position, including reading certain intercompany and third-party agreements which are relevant to evaluating the legal form and substance of the CSARL transaction flows; (ii) evaluating management's assessment of whether the position was more likely than not to produce a tax benefit and the determination by management of the largest amount of benefit that is more likely than not to be sustained related to this position; and (iii) evaluating the Revenue Agent Reports ("RARs") from the IRS and management's protests of the RARs. Professionals with specialized skill and knowledge were used to assist in evaluating the applicable tax laws and judicial doctrines related to this matter as well as changes in relevant tax regulations, rulings, and case law.

Cash and short-term investments and restricted cash at end of period	\$ 8,292	\$ 7,890	\$ 8,320

All short-term investments, which consist primarily of highly liquid investments with original maturities of three months or less, are considered to be cash equivalents.

See accompanying notes to Consolidated Financial Statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Operations and summary of significant accounting policies

A. Nature of operations

Information in our financial statements and related commentary are presented in the following categories:

Machinery, Energy & Transportation (ME&T) – Represents the aggregate total of Construction Industries, Resource Industries, Energy & Transportation and All Other operating segment and related corporate items and eliminations.

Financial Products – Primarily includes the company's Financial Products Segment. This category includes Caterpillar Financial Services Corporation (Cat Financial), Caterpillar Insurance Holdings Inc. (Insurance Services) and their respective subsidiaries.

Our products are sold primarily under the brands "Caterpillar," "CAT," design versions of "CAT" and "Caterpillar," "EMD," "FG Wilson," "MaK," "MWM," "Perkins," "Progress Rail," "SEM" and "Solar Turbines."

We conduct operations in our ME&T lines of business under highly competitive conditions, including intense price competition. We place great emphasis on the high quality and performance of our products and our dealers' service support. Although no one competitor is believed to produce all of the same types of equipment that we do, there are numerous companies, large and small, which compete with us in the sale of each of our products.

Our machines are distributed principally through a worldwide organization of dealers (dealer network), 46 located in the United States and 119 located outside the United States, serving 191 countries. Reciprocating engines are sold principally through the dealer network and to other manufacturers for use in products. Some of the reciprocating engines manufactured by our subsidiary Perkins Engines Company Limited, are also sold through its worldwide network of 67 distributors covering 178 countries. The FG Wilson branded electric power generation systems primarily manufactured by our subsidiary Caterpillar Northern Ireland Limited are sold through its worldwide network of 150 distributors covering 109 countries. Some of the large, medium speed reciprocating engines are also sold under the MaK brand through a worldwide network of 20 distributors covering 130 countries. Our dealers do not deal exclusively with our products; however, in most cases sales and servicing of our products are the dealers' principal business. Some products, primarily turbines and locomotives, are sold directly to end customers through sales forces employed by the company. At times, these employees are assisted by independent sales representatives.

The Financial Products line of business also conducts operations under highly competitive conditions. Financing for users of Caterpillar products is available through a variety of competitive sources, principally commercial banks and finance and leasing companies. We offer various financing plans designed to increase the opportunity for sales of our products and generate financing income for our company. A significant portion of Financial Products activity is conducted in North America, with additional offices in Latin America, Asia/Pacific, Europe, Africa and the Middle East.

B. Basis of presentation

The consolidated financial statements include the accounts of Caterpillar Inc. and its subsidiaries where we have a controlling financial interest.

Investments in companies where our ownership exceeds 20 percent and we do not have a controlling interest or where the ownership is less than 20 percent and for which we have a significant influence are accounted for by the equity method.

We consolidate all variable interest entities (VIEs) where Caterpillar Inc. is the primary beneficiary. For VIEs, we assess whether we are the primary beneficiary as prescribed by the accounting guidance on the consolidation of VIEs. The primary beneficiary of a VIE is the party that has both the power to direct the activities that most significantly impact the entity's economic performance and the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE. See Note 21 for further discussion on a consolidated VIE.

We have affiliates, suppliers and dealers that are VIEs of which we are not the primary beneficiary. Although we have provided financial support, we do not have the power to direct the activities that most significantly impact the economic performance of each entity. Our maximum exposure to loss from these VIEs for which we are not the primary beneficiary was \$133 million and \$131 million as of December 31, 2019 and 2018, respectively.

Cat Financial has end-user customers that are VIEs of which we are not the primary beneficiary. Although we have provided financial support to these entities and therefore have a variable interest, we do not have the power to direct the activities that most significantly impact their economic performance. Our maximum exposure to loss from our involvement with these VIEs is limited to the credit risk inherently present in the financial support that we have provided. These risks are evaluated and reflected in our financial statements as part of our overall portfolio of finance receivables and related allowance for credit losses.

Shipping and handling costs are included in Cost of goods sold in Statement 1. Other operating (income) expenses primarily include Cat Financial's depreciation of equipment leased to others, Insurance Services' underwriting expenses, (gains) losses on disposal of long-lived assets, long-lived asset impairment charges, legal settlements and accruals, contract termination costs and employee separation charges.

Prepaid expenses and other current assets in Statement 3 primarily include prepaid insurance, contract assets, right of return assets, prepaid and refundable income taxes, assets held for sale, core to be returned for remanufacturing, restricted cash and other short-term investments.

Certain amounts for prior years have been reclassified to conform with the current-year financial statement presentation.

C. Inventories

Inventories are stated at the lower of cost or net realizable value. Cost is principally determined using the last-in, first-out (LIFO) method. The value of inventories on the LIFO basis represented about 60 percent and 65 percent of total inventories at December 31, 2019 and 2018, respectively.

If the FIFO (first-in, first-out) method had been in use, inventories would have been \$2,086 million and \$2,009 million higher than reported at December 31, 2019 and 2018, respectively.

D. Depreciation and amortization

Depreciation of plant and equipment is computed principally using accelerated methods. Depreciation on equipment leased to others, primarily for Financial Products, is computed using the straight-line method over the term of the lease. The depreciable basis is the original cost of the equipment less the estimated residual value of the equipment at the end of the lease term. In 2019, 2018 and 2017, Cat Financial depreciation on equipment leased to others was \$813 million, \$819 million and \$810 million, respectively, and was included in Other operating (income) expenses in Statement 1. In 2019, 2018 and 2017, consolidated depreciation expense was \$2,253 million, \$2,435 million and \$2,555 million, respectively. Amortization of purchased finite-lived intangibles is computed principally using the straight-line method, generally not to exceed a period of 20 years.

E. Foreign currency translation

The functional currency for most of our ME&T consolidated companies is the U.S. dollar. The functional currency for most of our Financial Products and affiliates accounted for under the equity method is the respective local currency. Gains and losses resulting from the remeasurement of foreign currency amounts to the functional currency are included in Other income (expense) in Statement 1. Gains and losses resulting from translating assets and liabilities from the functional currency to U.S. dollars are included in Accumulated other comprehensive income (loss) in Statement 3.

F. Derivative financial instruments

Our earnings and cash flow are subject to fluctuations due to changes in foreign currency exchange rates, interest rates and commodity prices. Our Risk Management Policy (policy) allows for the use of derivative financial instruments to prudently manage foreign currency exchange rate, interest rate and commodity price exposures. Our policy specifies that derivatives are not to be used for speculative purposes. Derivatives that we use are primarily foreign currency forward, option and cross currency contracts, interest rate contracts and commodity forward and option contracts. All derivatives are recorded at fair value. See Note 4 for more information.

G. Income taxes

The provision for income taxes is determined using the asset and liability approach taking into account guidance related to uncertain tax positions. Tax laws require items to be included in tax filings at different times than the items are reflected in the financial statements. A current liability is recognized for the estimated taxes payable for the current year. Deferred taxes represent the future tax consequences expected to occur when the reported amounts of assets and liabilities are recovered or paid. Deferred taxes are adjusted for enacted changes in tax rates and tax laws. Valuation allowances are recorded to reduce deferred tax assets when it is more likely than not that a tax benefit will not be realized. See Note 6 for further discussion.

H. Goodwill

For acquisitions accounted for as a business combination, goodwill represents the excess of the cost over the fair value of the net assets acquired. We are required to test goodwill for impairment, at the reporting unit level, annually and when events or circumstances make it more likely than not that an impairment may have occurred. A reporting unit is an operating segment or one level below an operating segment (referred to as a component) to which goodwill is assigned when initially recorded. We assign goodwill to reporting units based on our integration plans and the expected synergies resulting from the acquisition. Because Caterpillar is a highly integrated company, the businesses we acquire are sometimes combined with or integrated into existing reporting units. When changes occur in the composition of our operating segments or

reporting units, goodwill is reassigned to the affected reporting units based on their relative fair values.

We perform our annual goodwill impairment test as of October 1 and monitor for interim triggering events on an ongoing basis. Goodwill is reviewed for impairment utilizing either a qualitative assessment or a quantitative goodwill impairment test. If we choose to perform a qualitative assessment and determine the fair value more likely than not exceeds the carrying value, no further evaluation is necessary. For reporting units where we perform the quantitative goodwill impairment test, we compare the fair value of each reporting unit, which we primarily determine using an income approach based on the present value of discounted cash flows, to the respective carrying value, which includes goodwill. If the fair value of the reporting unit exceeds its carrying value, the goodwill is not considered impaired. If the carrying value is higher than the fair value, the difference would be recognized as an impairment loss. See Note 10 for further details.

I. Estimates in financial statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect reported amounts. The more significant estimates include: residual values for leased assets; fair values for goodwill impairment tests; warranty liability and reserves for product liability and insurance losses, postretirement benefits, post-sale discounts, credit losses and income taxes.

J. New accounting guidance

Adoption of new accounting standards

Lease accounting – (Accounting Standards Update (ASU) 2016-02) - In February 2016, the Financial Accounting Standards Board (FASB) issued accounting guidance that revises the accounting for leases. Under the new guidance, lessees are required to recognize a right-of-use asset and a lease liability for substantially all leases. The new guidance continues to classify leases as either financing or operating, with classification affecting the pattern of expense recognition. The accounting applied by a lessor under the new guidance is substantially equivalent to prior lease accounting guidance. The new guidance was effective January 1, 2019 and was applied using a modified retrospective approach through a cumulative effect adjustment to retained earnings as of January 1, 2019. The prior period comparative information has not been recast and continues to be reported under the accounting guidance in effect for those periods.

The new guidance provides a number of optional practical expedients in transition. We elected the “package of practical expedients,” which allows us not to reassess under the new guidance our prior conclusions about lease identification, lease classification and initial direct costs. We did not elect the use-of-hindsight practical expedient. In addition, the new guidance provides practical expedients for an entity’s ongoing lessee accounting. For certain property and information technology equipment leases, we have elected to separate payments for lease components from non-lease components. For all other leases, we have elected not to separate lease and non-lease components. We have elected the short-term lease recognition exemption for all leases that qualify, which means we have not recognized right-of-use assets or lease liabilities for these leases with a term of twelve months or less.

The most significant effects of adoption relate to the recognition of right-of-use assets and lease liabilities on our balance sheet for operating leases and providing new disclosures about our leasing activities. In addition, we derecognized existing assets and debt obligations for a sale-leaseback transaction that qualified for sale accounting under the new guidance. The gain associated with this change in accounting was recognized through opening retained earnings as of January 1, 2019. The adoption did not have a material impact on our financial statements.

In March 2019, the FASB issued Leases - Codification improvements (ASU 2019-01) which amended the new leasing guidance. Under these amendments, lessors that are not manufacturers or dealers will use their cost, less any discounts that may apply, as the fair value of the underlying asset, and lessors within the scope of Financial Services-Depository and Lending guidance will present all principal payments received under leases within investment activities on the statement of cash flows. We adopted the new guidance effective

January 1, 2019, and the adoption did not have a material impact to our financial statements.

See Note 20 for additional information.

The cumulative effect of initially applying the new lease guidance to our consolidated financial statements on January 1, 2019 was as follows:

Consolidated Statement of Financial Position

(Millions of dollars)	Balance as of December 31, 2018	Cumulative Impact from Adopting New Lease Guidance	Balance as of January 1, 2019
Assets			
Prepaid expenses and other current assets	\$ 1,765	\$ (17)	\$ 1,748
Property, plant and equipment - net	\$ 13,574	\$ (26)	\$ 13,548
Noncurrent deferred and refundable income taxes	\$ 1,439	\$ (77)	\$ 1,362
Other assets	\$ 2,332	\$ 713	\$ 3,045
Liabilities			
Accrued expenses	\$ 3,573	\$ (27)	\$ 3,546
Other current liabilities	\$ 1,919	\$ 209	\$ 2,128
Long-term debt due after one year Machinery, Energy & Transportation	\$ 8,005	\$ (362)	\$ 7,643
Other liabilities	\$ 3,756	\$ 538	\$ 4,294
Shareholders' equity			
Profit employed in the business	\$ 30,427	\$ 235	\$ 30,662

We adopted the following ASUs effective January 1, 2019, none of which had a material impact on our financial statements:

ASU	Description
2017 - 08	Premium amortization on purchased callable debt securities
2017 - 12	Derivatives and hedging - Targeted improvements
2018 - 02	Reclassification of certain tax effects from accumulated other comprehensive income

Accounting standards issued but not yet adopted

Credit losses (ASU 2016-13) – In June 2016, the FASB issued accounting guidance to introduce a new model for recognizing credit losses on financial instruments based on an estimate of current expected credit losses. The new guidance will apply to loans, accounts receivable, trade receivables, other financial assets measured at amortized cost, loan commitments and other

off-balance sheet credit exposures. The new guidance will also apply to debt securities and other financial assets measured at fair value through other comprehensive income. The new guidance was effective January 1, 2020. We do not expect the adoption to have a material impact on our financial statements.

We consider the applicability and impact of all ASUs. ASUs not listed above were assessed and either determined to be not applicable or not expected to have a material impact on our financial statements.

2. Sales and revenue recognition

A. Sales of Machinery, Energy & Transportation

Sales of ME&T are recognized when all the following criteria are satisfied: (i) a contract with an independently owned and operated dealer or an end user exists which has commercial substance; (ii) it is probable we will collect the amount charged to the dealer or end user; and (iii) we have completed our performance obligation whereby the dealer or end user has obtained control of the product. A contract with commercial substance exists once we receive and accept a purchase order under a dealer sales agreement, or once we enter into a contract with an end user. If collectibility is not probable, the sale is deferred and not recognized until collection is probable or payment is received. Control of our products typically transfers when title and risk of ownership of the product has transferred to the dealer or end user. Typically, where product is produced and sold in the same country, title and risk of ownership transfer when the product is shipped. Products that are exported from a country for sale typically transfer title and risk of ownership at the border of the destination country.

Our remanufacturing operations are primarily focused on the remanufacture of Cat engines and components and rail related products. In this business, used engines and related components

(core) are inspected, cleaned and remanufactured. In connection with the sale of our remanufactured product to dealers, we collect a deposit that is repaid if the dealer returns an acceptable core within a specified time period. Caterpillar owns and has title to the cores when they are returned from dealers. The rebuilt engine or component (the core plus any new content) is then sold as a remanufactured product to dealers and end users. Revenue is recognized pursuant to the same transfer of control criteria as ME&T sales noted above. At the time of sale, the deposit is recognized in Other current liabilities in Statement 3, and the core to be returned is recognized as an asset in Prepaid expenses and other current assets in Statement 3 at the estimated replacement cost (based on historical experience with usable cores). Upon receipt of an acceptable core, we repay the deposit and relieve the liability. The returned core asset is then transferred into inventory. In the event that the deposit is forfeited (i.e., upon failure by the dealer to return an acceptable core in the specified time period), we recognize the core deposit and the cost of the core in Sales and Cost of goods sold, respectively.

We provide discounts to dealers through merchandising programs. We have numerous programs that are designed to promote the sale of our products. The most common dealer programs provide a discount when the dealer sells a product to a targeted end user. Generally, the cost of these discounts is estimated for each product by model by geographic region based on historical experience and known changes in merchandising programs. The cost of these discounts is reported as a reduction to the transaction price when the product sale is recognized. A corresponding post-sale discount reserve is accrued in Statement 3, which represents discounts we expect to pay on units sold. If discounts paid differ from those estimated, the difference is reported as a change in the transaction price.

Except for replacement parts, no right of return exists on the sale of our products. We estimate replacement part returns based on historical experience and recognize a parts return asset in Prepaid expenses and other current assets in Statement 3, which represents our right to recover replacement parts we expect will be returned. We also recognize a refund liability in Other current liabilities in Statement 3 for the refund we expect to pay for returned parts. If actual replacement part returns differ from those estimated, the difference in the estimated replacement part return asset and refund liability is recognized in Cost of goods sold and Sales, respectively.

Our standard dealer invoice terms are established by marketing region. Our invoice terms for end user sales are established by the responsible business unit. Payments from dealers are due shortly after the time of sale. When a sale is made to a dealer, the dealer is responsible for payment even if the product is not sold to an end user. Dealers and end users must make payment within the established invoice terms to avoid potential interest costs. Interest at or above prevailing market rates may be charged on any past due balance, and generally our practice is to not forgive this interest. In addition, Cat Financial provides wholesale inventory financing for a dealer's purchase of inventory. Wholesale inventory receivables have varying payment terms and are included in Receivables – trade and other and Long-term receivables – trade and other in Statement 3. See Note 7 for further information. Trade receivables from dealers and end users were \$7,648 million, \$7,743 million and \$6,399 million as of December 31, 2019, December 31, 2018 and January 1, 2018, respectively, and are recognized in Receivables – trade and other in Statement 3. Long-term trade receivables from dealers and end users were \$693 million, \$674 million and \$639 million as of December 31, 2019, December 31, 2018 and January 1, 2018, respectively, and are recognized in Long-term receivables – trade and other in Statement 3.

We establish a bad debt allowance for ME&T receivables when it becomes probable that the receivable will not be collected. Our allowance for bad debts is not significant.

We invoice in advance of recognizing the sale of certain products. We recognize advanced customer payments as a contract liability in Customer advances and Other liabilities in Statement 3. Contract liabilities were \$1,654 million, \$1,680 million and \$1,868 million as of December 31, 2019, December 31, 2018 and January 1, 2018, respectively. We reduce the contract liability when revenue is recognized. During 2019, we recognized \$1,171 million of revenue that was recorded as a contract liability at the beginning of 2019. During 2018, we recognized \$1,294 million of revenue that was recorded as a contract liability at the beginning of 2018.

We have elected the practical expedient to not adjust the amount of revenue to be recognized under a contract with a dealer or end user for the effects of time value of money when the timing difference between receipt of payment and recognition of revenue is less than one year.

As of December 31, 2019, we have entered into contracts with dealers and end users for which sales have not been recognized as we have not satisfied our performance obligations and

transferred control of the products. The dollar amount of unsatisfied performance obligations for contracts with an original duration greater than one year is \$6.2 billion, of which \$2.4 billion is expected to be completed and revenue recognized in the twelve months following December 31, 2019. We have elected the practical expedient to not disclose unsatisfied performance obligations with an original contract duration of one year or less. Contracts with an original duration of one year or less are primarily sales to dealers for machinery, engines and replacement parts.

Sales and other related taxes are excluded from the transaction price. Shipping and handling costs associated with outbound freight after control over a product has transferred are accounted for as a fulfillment cost and are included in Cost of goods sold.

We provide a standard manufacturer's warranty of our products at no additional cost. At the time a sale is recognized, we record estimated future warranty costs. See Note 21 for further discussion of our product warranty liabilities.

See Note 23 for further disaggregated sales and revenues information.

B. Revenues of Financial Products

Revenues of Financial Products are generated primarily from finance revenue on finance receivables and rental payments on operating leases. Finance revenue is recorded over the life of the related finance receivable using the interest method, including the accretion of certain direct origination costs that are deferred. Revenue from rental payments received on operating leases is recognized on a straight-line basis over the term of the lease.

Recognition of finance revenue and rental revenue is suspended and the account is placed on non-accrual status when management determines that collection of future income is not probable (generally after 120 days past due). Recognition is resumed, and previously suspended income is recognized, when the account becomes current and collection of remaining amounts is considered probable. See Note 7 for more information.

Revenues are presented net of sales and other related taxes.

3. Stock-based compensation

Our stock-based compensation plans primarily provide for the granting of stock options, stock-settled stock appreciation rights (SARs), restricted stock units (RSUs) and performance-based restricted stock units (PRSUs) to Officers and other key employees, as well as non-employee Directors. Stock options permit a holder to buy Caterpillar stock at the stock's price when the option was granted. SARs permit a holder the right to receive the value in shares of the appreciation in Caterpillar stock that occurred from the date the right was granted up to the date of exercise. RSUs are agreements to issue shares of Caterpillar stock at the time of vesting. PRSUs are similar to RSUs and include performance conditions in the vesting terms of the award.

Our long-standing practices and policies specify that all stock-based compensation awards are approved by the Compensation Committee (the Committee) of the Board of Directors. The award approval process specifies the grant date, value and terms of the award. The same terms and conditions are consistently applied to all employee grants, including Officers. The Committee approves all individual Officer grants. The number of stock-based compensation award units included in an individual's award is determined based on the methodology approved by the Committee. The exercise price methodology approved by the Committee is the closing price of the Company stock on the date of the grant. In June of 2014, shareholders approved the Caterpillar Inc. 2014 Long-Term Incentive Plan (the Plan) under which all new stock-based compensation awards are granted. In June of 2017, the Plan was amended

and restated. The Plan initially provided that up to 38,800,000 Common Shares would be reserved for future issuance under the Plan, subject to adjustment in certain events. Subsequent to the shareholder approval of the amendment and restatement of the Plan, an additional 36,000,000 Common Shares became available for all awards under the Plan.

Common stock issued from Treasury stock under the plans totaled 5,126,379 for 2019, 5,590,641 for 2018 and 11,139,748 for 2017. The total number of shares authorized for equity awards under the amended and restated Caterpillar Inc. 2014 Long-Term Incentive Plan is 74,800,000, of which 40,754,720 shares remained available for issuance as of December 31, 2019.

Stock option and RSU awards generally vest according to a three-year graded vesting schedule. One-third of the award will become vested on the first anniversary of the grant date, one-third of the award will become vested on the second anniversary of the grant date and one-third of the award will become vested on the third anniversary of the grant date. PRSU awards generally have a three-year performance period and cliff vest at the end of the period based upon achievement of performance targets established at the time of grant.

Upon separation from service, if the participant is 55 years of age or older with more than five years of service, the participant meets the criteria for a "Long Service Separation." Award terms for stock option and RSU grants allow for continued vesting as of each vesting date specified in the award document for employees who meet the criteria for a "Long Service Separation" and fulfill a requisite service period of six months. Compensation expense for eligible employees for the grants was recognized over the period from the grant date to the end date of the six-month requisite service period. For employees who become eligible for a "Long Service Separation" subsequent to the end date of the six-month requisite service period and prior to the completion of the vesting period, compensation expense is recognized over the period from the grant date to the date eligibility is achieved.

For PRSU awards granted in 2018 and 2017, only a prorated number of shares may vest at the end of the performance period based upon achievement of the performance target, with the proration based upon the number of months of continuous employment during the three-year performance period. Employees with a "Long

Service Separation" must also fulfill a six-month requisite service period in order to be eligible for the prorated vesting of outstanding PRSU awards granted in 2018 and 2017. Compensation expense for the 2018 and 2017 PRSU grants is being recognized on a straight-line basis over the three-year performance period for all participants. Award terms for the 2019 PRSU grant allowed for continued vesting upon achievement of the performance target specified in the award document for employees who meet the criteria for a "Long Service Separation" and fulfill a requisite service period of six months. Compensation expense for the 2019 PRSU grant with respect to employees who have met the criteria for a "Long Service Separation" is recognized over the period from the grant date to the end of the six-month requisite service period. For employees who become eligible for a "Long Service Separation" subsequent to the end date of the six-month requisite service period and prior to the completion of the vesting period, compensation expense is recognized over the period from the grant date to the date eligibility is achieved.

At grant, option awards and SARs have a term life of ten years. For awards granted prior to 2016, if the "Long Service Separation" criteria are met, the vested options/SARs have a life that is the lesser of ten years from the original grant date or five years from the separation date. For awards granted beginning in 2016, the vested options have a life equal to ten years from the original grant date.

Accounting guidance on share-based payments requires companies to estimate the fair value of options/SARs on the date of grant using an option-pricing model. The fair value of our option/SAR grants was estimated using a lattice-based option-pricing model. The lattice-based option-pricing model considers a range of assumptions related to volatility, risk-free interest rate and historical employee behavior. Expected volatility was based on historical Caterpillar stock price movement and current implied volatilities from traded options on Caterpillar stock. The risk-free interest rate was based on U.S. Treasury security yields at the time of grant. The weighted-average dividend yield was based on historical information. The expected life was determined from the lattice-based model. The lattice-based model incorporated exercise and post vesting forfeiture assumptions based on analysis of historical data. The following table provides the assumptions used in determining the fair value of the Option awards for the years ended December 31, 2019, 2018 and 2017, respectively.

	Grant Year		
	2019	2018	2017
Weighted-average dividend yield	2.6%	2.7%	3.4%
Weighted-average volatility	29.1%	30.2%	29.2%
Range of volatilities	25.1-38.7%	21.5-33.0%	22.1-33.0%
Range of risk-free interest rates	2.48-2.68%	2.02-2.87%	0.81-2.35%
Weighted-average expected lives	7 years	8 years	8 years

Beginning with the 2018 grant, RSU and PRSU awards are credited with dividend equivalent units on each date that a cash dividend is paid to holders of Common Stock. The fair value of the RSU and PRSU awards granted in 2019 and 2018 was determined as the closing stock price on the date of the grant. Prior to 2018, RSU and PRSU awards were not credited with dividend equivalent units and

the fair value was determined by reducing the stock price on the date of the grant by the present value of the estimated dividends to be paid during the vesting period. The estimated dividends were based on Caterpillar's quarterly dividend per share at the time of the grant.

Please refer to Tables I and II below for additional information on our stock-based compensation awards.

TABLE I - Financial Information Related to Stock-based Compensation

	Stock options / SARs		RSUs		PRSUs

¹ No SARs were granted during the year ended December 31, 2019.

² The difference between a stock award's exercise price and the underlying stock's closing market price at December 31, 2019, for awards with market price greater than the exercise price. Amounts are in millions of dollars.

The computations of weighted-average exercise prices and aggregate intrinsic values are not applicable to RSUs or PRSUs since these awards represent an agreement to issue shares of stock at the time of vesting. At December 31, 2019, there were 1,369,203 outstanding RSUs with a weighted average remaining contractual life of 1.5 years and 670,115 outstanding PRSUs with a weighted-average remaining contractual life of 1.5 years.

TABLE II - Additional Stock-based Award Information

(Dollars in millions except per share data)	2019	2018	2017
Stock options/SARs activity:			
Weighted-average fair value per share of stock awards granted	\$ 40.98	\$ 46.09	\$ 25.01
Intrinsic value of stock awards exercised	\$ 264	\$ 348	\$ 504
Fair value of stock awards vested ¹	\$ 100	\$ 86	\$ 191
Cash received from stock awards exercised	\$ 298	\$ 370	\$ 629

Fair value of stock awards vested ²	\$ 59	\$ 70	\$ 20

¹ Based on the grant date fair value.

² Based on the underlying stock's closing market price on the vesting date.

In accordance with guidance on share-based payments, stock-based compensation expense is based on the grant date fair value and is classified within Cost of goods sold, Selling, general and administrative expenses and Research and development expenses corresponding to the same line item as the cash compensation paid to respective employees, officers and non-employee directors. Stock-based compensation expense is recognized on a straight-line basis over the requisite service period for awards with terms that specify cliff or graded vesting and contain only service conditions.

Stock-based compensation expense for PRSUs is based on the probable number of shares expected to vest and is recognized primarily on a straight-line basis.

Before tax, stock-based compensation expense for 2019, 2018 and 2017 was \$205 million, \$197 million and \$206 million, respectively, with a corresponding income tax benefit of \$35 million, \$36 million and \$40 million, respectively.

The amount of stock-based compensation expense capitalized for the years ended December 31, 2019, 2018 and 2017 did not have a significant impact on our financial statements.

At December 31, 2019, there was \$161 million of total unrecognized compensation cost from stock-based compensation arrangements granted under the plans, which is related to non-vested stock-based awards. The compensation expense is expected to be recognized over a weighted-average period of approximately 1.6 years.

We currently use shares in treasury stock to satisfy share award exercises.

The cash tax benefits realized from stock awards exercised for 2019, 2018 and 2017 were \$89 million, \$103 million and \$205 million, respectively. We use the direct only method and tax law ordering approach to calculate the tax effects of stock-based compensation.

4. Derivative financial instruments and risk management

Our earnings and cash flow are subject to fluctuations due to changes in foreign currency exchange rates, interest rates and commodity prices. Our Risk Management Policy (policy) allows for the use of derivative financial instruments to prudently manage foreign currency exchange rate, interest rate and commodity price exposures. Our policy specifies that derivatives are not to be used for speculative purposes. Derivatives that we use are primarily foreign currency forward, option and cross currency contracts, interest rate contracts and commodity forward and option contracts. Our derivative activities are subject to the management, direction and control of our senior financial officers. Risk management practices, including the use of financial derivative instruments, are presented to the Audit Committee of the Board of Directors at least annually.

All derivatives are recognized in Statement 3 at their fair value. On the date the derivative contract is entered into, we designate the derivative as (1) a hedge of the fair value of a recognized asset or liability (fair value hedge), (2) a hedge of a forecasted transaction or the variability of cash flow (cash flow hedge) or (3) an undesignated instrument. Changes in the fair value of a derivative that is qualified, designated and highly effective as a fair value hedge, along with the gain or loss on the hedged recognized asset or liability that is attributable to the hedged risk, are recorded in current earnings. Changes in the fair value of a derivative that is qualified, designated and highly effective as a cash flow hedge are recorded in Accumulated other comprehensive income (loss) (AOCI), to the extent effective, in Statement 3 until they are reclassified to earnings in the same period or periods during which the hedged transaction affects earnings. Changes in the fair value of undesignated derivative instruments are reported in current earnings. Cash flows from designated derivative financial instruments are classified within the same category as the item being hedged on Statement 5. Cash flows from undesignated derivative financial instruments are included in the investing category on Statement 5.

We formally document all relationships between hedging instruments and hedged items, as well as the risk-management objective and strategy for undertaking various hedge transactions. This process includes linking all derivatives that are designated as fair value hedges to specific assets and liabilities in Statement 3 and linking cash flow hedges to specific forecasted transactions or variability of cash flow.

We also formally assess, both at the hedge's inception and on an ongoing basis, whether the designated derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flow of hedged items. When a derivative is determined not to be highly effective as a hedge or the underlying hedged transaction is no longer probable, we discontinue hedge accounting prospectively, in accordance with the derecognition criteria for hedge accounting.

A. Foreign currency exchange rate risk

Foreign currency exchange rate movements create a degree of risk by affecting the U.S. dollar value of sales made and costs incurred in foreign currencies. Movements in foreign currency rates also affect our competitive position as these changes may affect business practices and/or pricing strategies of non-U.S.-based competitors. Additionally, we have balance sheet positions denominated in foreign currencies, thereby creating exposure to movements in exchange rates.

Our ME&T operations purchase, manufacture and sell products in many locations around the world. As we have a diversified revenue and cost base, we manage our future foreign currency cash flow exposure on a net basis. We use foreign currency forward and option contracts to manage unmatched foreign currency cash inflow and outflow. Our objective is to minimize the risk of exchange rate movements that would reduce the U.S. dollar value of our foreign currency cash flow. Our policy allows for managing anticipated foreign currency cash flow for up to approximately five years. As of December 31, 2019, the maximum term of these outstanding contracts was approximately 60 months.

We generally designate as cash flow hedges at inception of the contract any Australian dollar, Brazilian real, British pound, Canadian dollar, Chinese yuan, Indian rupee, Japanese yen, Mexican peso, Singapore dollar or Thailand baht forward or option contracts that meet the requirements for hedge accounting and the maturity extends beyond the current quarter-end. Designation is performed on a specific exposure basis to support hedge accounting. The remainder of ME&T foreign currency contracts are undesignated.

As of December 31, 2019, \$1 million of deferred net losses, net of tax, included in equity (AOCI in Statement 3), are expected to be reclassified to current earnings (Other income (expense) in Statement 1) over the next twelve months when earnings are affected by the hedged transactions. The actual amount recorded in Other income (expense) will vary based on exchange rates at the time the hedged transactions impact earnings.

In managing foreign currency risk for our Financial Products operations, our objective is to minimize earnings volatility resulting from conversion and the remeasurement of net foreign currency balance sheet positions and future transactions denominated in foreign currencies. Our policy allows the use of foreign currency forward, option and cross currency contracts to offset the risk of currency mismatch between our assets and liabilities and exchange rate risk associated with future transactions denominated in foreign currencies. Our foreign currency forward and option contracts are primarily undesignated. We designate fixed-to-fixed cross currency contracts as cash flow hedges to protect against movements in exchange rates on foreign currency fixed-rate assets and liabilities.

B. Interest rate risk

Interest rate movements create a degree of risk by affecting the amount of our interest payments and the value of our fixed-rate debt. Our practice is to use interest rate contracts to manage our exposure to interest rate changes.

Our ME&T operations generally use fixed-rate debt as a source of funding. Our objective is to minimize the cost of borrowed funds. Our policy allows us to enter into fixed-to-floating interest rate contracts and forward rate agreements to meet that objective. We designate fixed-to-floating interest rate contracts as fair value hedges at inception of the contract, and we designate certain forward rate agreements as cash flow hedges at inception of the contract.

Financial Products operations has a match-funding policy that addresses interest rate risk by aligning the interest rate profile (fixed or floating rate and duration) of Cat Financial's debt portfolio with the interest rate profile of our receivables portfolio within

predetermined ranges on an ongoing basis. In connection with that policy, we use interest rate derivative instruments to modify the debt structure to match assets within the receivables portfolio. This matched funding reduces the volatility of margins between interest-bearing assets and interest-bearing liabilities, regardless of which direction interest rates move.

Our policy allows us to use fixed-to-floating, floating-to-fixed and floating-to-floating interest rate contracts to meet the match-funding objective. We designate fixed-to-floating interest rate contracts as fair value hedges to protect debt against changes in fair value due to changes in the benchmark interest rate. We designate most floating-to-fixed interest rate contracts as cash flow hedges to protect against the variability of cash flows due to changes in the benchmark interest rate.

We have, at certain times, liquidated fixed-to-floating and floating-to-fixed interest rate contracts at both ME&T and Financial Products. The gains or losses associated with these contracts at the time of liquidation are amortized into earnings over the original term of the previously designated hedged item.

The location and fair value of derivative instruments reported in Statement 3 are as follows:

		Consolidated	
		Statement of Financial Position Location	Asset (Liability) Fair Value
		Years ended December 31,	
(Millions of dollars)		2019	2018
Designated derivatives

We enter into International Swaps and Derivatives Association (ISDA) master netting agreements within ME&T and Financial Products that permit the net settlement of amounts owed under their respective derivative contracts. Under these master netting agreements, net settlement generally permits the company or the counterparty to determine the net amount payable for contracts due on the same date and in the same currency for similar types of derivative transactions. The master netting agreements generally

also provide for net settlement of all outstanding contracts with a counterparty in the case of an event of default or a termination event.

Collateral is generally not required of the counterparties or of our company under the master netting agreements. As of December 31, 2019 and 2018, no cash collateral was received or pledged under the master netting agreements.

The effect of the net settlement provisions of the master netting agreements on our derivative balances upon an event of default or termination event is as follows:

December 31, 2019

	Gross Amount of Recognized Assets	Gross Amounts Offset in the Statement of Financial Position	Net Amount of Assets Presented in the Statement of Financial Position	Gross Amounts Not Offset in the Statement of Financial Position		Net Amount of Assets

Total	<u>\$ (57)</u>	<u>\$ (67)</u>	<u>\$ 153</u>

¹ Includes gains (losses) from foreign exchange derivative contracts. See Note 4 for further details.

² Includes pretax gain of \$85 million related to the sale of Caterpillar's equity interest in Iron Planet Holdings Inc.

³ Beginning January 1, 2018, the unrealized gains and losses arising from the revaluation of equity securities are included in Other income (expense) in Statement 1.

6. Income taxes

Reconciliation of the U.S. federal statutory rate to effective rate:

(Millions of dollars)	Years ended December 31,					
	2019		2018		2017	
Taxes at U.S. statutory rate	\$ 1,641	21.0%	\$ 1,643	21.0%	\$ 1,429	35.0%
(Decreases) increases resulting from:						
Non-U.S. subsidiaries taxed at other than the U.S. rate	365	4.7%	282	3.6%	(282)	(6.9)%
State and local taxes, net of federal ¹	59	0.8%	22	0.3%	27	0.7%
Interest and penalties, net of tax	34	0.4%	33	0.4%	28	0.7%
U.S. tax incentives	(149)	(1.9)%	(106)	(1.3)%	(52)	(1.3)%
Net excess tax benefits from stock-based compensation	(41)	(0.5)%	(56)	(0.7)%	(64)	(1.6)%
Mandatory deemed repatriation of non-U.S. earnings	(178)	(2.3)%	50	0.7%	1,775	43.5%
U.S. deferred tax rate change	—	—%	(154)	(2.0)%	596	14.6%
Valuation allowances	—	—%	(29)	(0.4)%	(111)	(2.7)%
Other—net	15	0.2%	13	0.1%	(7)	(0.2)%
Provision (benefit) for income taxes	<u>\$ 1,746</u>	<u>22.4%</u>	<u>\$ 1,698</u>	<u>21.7%</u>	<u>\$ 3,339</u>	<u>81.8%</u>

¹ Excludes amounts included in valuation allowances and mandatory deemed repatriation of non-U.S. earnings.

Included in the line item above labeled "Non-U.S. subsidiaries taxed at other than the U.S. rate" are the effects of local and U.S. taxes related to earnings of non-U.S. subsidiaries, changes in the amount of unrecognized tax benefits associated with these earnings, losses at non-U.S. subsidiaries without local tax benefits due to valuation allowances and other permanent differences between

tax and U.S. GAAP results. Although not individually significant by jurisdiction, pre-tax permanent differences due to nondeductible net foreign exchange gains/losses of non-U.S. subsidiaries were approximately \$36 million of net losses in 2019, \$180 million of net losses in 2018 and \$160 million of net gains in 2017.

Included in the line item above labeled "Valuation allowances" are decreases in the valuation allowance for U.S. state deferred tax assets resulting in a \$63 million non-cash benefit in 2018, net of federal deferred tax adjustment at 21 percent, compared to a \$111 million non-cash benefit in 2017, net of federal deferred tax adjustment at 35 percent. The primary driver of the decreases in the U.S. state valuation allowance was improved U.S. GAAP profits expected to recur in certain state jurisdictions. Also included in 2018 was a decrease in the valuation allowance for a non-U.S. subsidiary of \$25 million offset by a charge of \$59 million to correct for an error which resulted in an understatement of the valuation allowance offsetting deferred tax assets for prior years. This error had the effect of overstating profit by \$17 million for the year ended December 31, 2017. Management has concluded that the error was not material to any period presented.

On December 22, 2017, U.S. tax legislation was enacted containing a broad range of tax reform provisions including a corporate tax rate reduction and changes in the U.S. taxation of non-U.S. earnings. In 2018, measurement period adjustments of \$104 million reduced the provisionally estimated charge of \$2.371 billion recognized during the fourth quarter of 2017. A \$154 million benefit revised the estimated impact of the write-down of U.S. net deferred tax assets to reflect the reduction in the U.S. corporate tax rate from

35 percent to 21 percent. This benefit primarily related to the decision to make an additional discretionary pension contribution of \$1.0 billion to U.S. pension plans in 2018 which was treated as deductible on the 2017 U.S. tax return. A \$50 million charge revised the estimated cost of a mandatory deemed repatriation of non-U.S. earnings, including changes in the deferred tax liability related to the amount of earnings considered not indefinitely reinvested as well as the amount of unrecognized tax benefits and state tax liabilities associated with these tax positions. During 2019, a \$178 million tax benefit was recorded to adjust previously unrecognized tax benefits as a result of receipt of additional guidance related to the calculation of the mandatory deemed repatriation of non-U.S. earnings.

As a result of U.S. tax reform legislation, distributions of profits from non-U.S. subsidiaries are not expected to cause a significant incremental U.S. tax impact in the future. However, these distributions may be subject to non-U.S. withholding taxes if profits are distributed from certain jurisdictions. Undistributed profits of non-U.S. subsidiaries of approximately \$14 billion are considered indefinitely reinvested. Determination of the amount of unrecognized deferred tax liability related to indefinitely reinvested profits is not feasible primarily due to our legal entity structure and the complexity of U.S. and local tax laws.

The components of profit (loss) before taxes were:

(Millions of dollars)	Years ended December 31,		
	2019	2018	2017
U.S.	\$ 2,888	\$ 2,131	\$ 240
Non-U.S.	4,924	5,691	3,842
	<u>\$ 7,812</u>	<u>\$ 7,822</u>	<u>\$ 4,082</u>

Profit before taxes, as shown above, is based on the location of the entity to which such earnings are attributable. Where an entity's earnings are subject to taxation, however, may not correlate solely to where an entity is located. Thus, the income tax provision shown below as U.S. or non-U.S. may not correspond to the earnings shown above.

The components of the provision (benefit) for income taxes were:

(Millions of dollars)	Years ended December 31,		
	2019	2018	2017
Current tax provision (benefit):			
U.S. ¹	\$ 405	\$ 179	\$ 963
Non-U.S.	1,261	1,291	1,124
State (U.S.)	52	8	39
	<u>1,718</u>	<u>1,478</u>	<u>2,126</u>
Deferred tax provision (benefit):			
U.S. ¹	17	298	1,385
Non-U.S.	(7)	4	(17)
State (U.S.)	18	(82)	(155)
	<u>28</u>	<u>220</u>	<u>1,213</u>
Total provision (benefit) for income taxes	<u>\$ 1,746</u>	<u>\$ 1,698</u>	<u>\$ 3,339</u>

¹ Includes U.S. taxes related to non-U.S. earnings. We account for U.S. taxes on global intangible low-taxed income as a period cost.

We paid net income tax and related interest of \$1,847 million, \$1,429 million and \$1,404 million in 2019, 2018 and 2017, respectively.

Accounting for income taxes under U.S. GAAP requires that individual tax-paying entities of the company offset all deferred tax liabilities and assets within each particular tax jurisdiction and present them as a noncurrent deferred tax liability or asset

in the Consolidated Financial Position. Amounts in different tax jurisdictions cannot be offset against each other. The amount of deferred income taxes at December 31, included on the following lines in Statement 3, are as follows:

(Millions of dollars)	December 31,	
	2019	2018
Assets:		
Noncurrent deferred and refundable income taxes	\$ 1,324	\$ 1,363
Liabilities:		
Other liabilities	414	331
Deferred income taxes—net	<u>\$ 910</u>	<u>\$ 1,032</u>

The components of deferred tax assets and liabilities were:

(Millions of dollars)	December 31,	
	2019	2018
Deferred income tax assets:		
Tax carryforwards	\$ 1,218	\$ 1,312
Postemployment benefits other than pensions	876	793
Pension	445	785
Warranty reserves	263	237

Deferred income taxes—net	<u>\$ 910</u>	<u>\$ 1,032</u>

At December 31, 2019, approximately \$1,320 million of U.S. state tax net operating losses (NOLs) and \$125 million of U.S. state tax credit carryforwards were available. The state NOLs primarily expire over the next twenty years. The state tax credit carryforwards primarily expire over the next fifteen years, with some credits having

an unlimited carryforward period. In total, we have established a valuation allowance of \$172 million related to certain of these carryforwards.

At December 31, 2019, approximately \$264 million of U.S. foreign tax credits were available for carryforward. These credits expire in 2028.

At December 31, 2019, amounts and expiration dates of net operating loss and interest carryforwards in various non-U.S. taxing jurisdictions were:

(Millions of dollars)						
2020	2021	2022	2023-2025	2026-2040	Unlimited	Total
\$ 104	\$ 53	\$ 81	\$ 59	\$ 451	\$ 3,627	\$ 4,375

At December 31, 2019, non-U.S. entities that have not yet demonstrated consistent and/or sustainable profitability to support the realization of net deferred tax assets have recorded valuation allowances of \$750 million, including certain entities in Luxembourg.

A reconciliation of the beginning and ending amount of gross unrecognized tax benefits for uncertain tax positions, including positions impacting only the timing of tax benefits, follows.

Reconciliation of unrecognized tax benefits: ¹

(Millions of dollars)	Years ended December 31,		
	2019	2018	2017
Balance at January 1,	\$ 1,796	\$ 1,286	\$ 1,032
Additions for tax positions related to current year	72	61	270
Additions for tax positions related to prior years	112	461	20
Reductions for tax positions related to prior years	(201)	(5)	(27)
Reductions for settlements ²	—	(6)	(9)
Reductions for expiration of statute of limitations	(1)	(1)	—
Balance at December 31,	\$ 1,778	\$ 1,796	\$ 1,286
Amount that, if recognized, would impact the effective tax rate	\$ 1,616	\$ 1,716	\$ 1,209

¹ Foreign currency impacts are included within each line as applicable.

² Includes cash payment or other reduction of assets to settle liability.

We classify interest and penalties on income taxes as a component of the provision for income taxes. We recognized a net provision for interest and penalties of \$43 million, \$42 million and \$38 million during the years ended December 31, 2019, 2018 and 2017, respectively. The total amount of interest and penalties accrued was \$233 million and \$190 million as of December 31, 2019 and 2018, respectively.

On January 31, 2018, we received a Revenue Agent's Report from the IRS indicating the end of the field examination of our U.S. income tax returns for 2010 to 2012. In the audits of 2007 to 2012 including the impact of a loss carryback to 2005, the IRS has proposed to tax in the United States profits earned from certain parts transactions by Caterpillar SARL (CSARL), based on the IRS examination team's application of the "substance-over-form" or "assignment-of-income" judicial doctrines. We are vigorously contesting the proposed increases to tax and penalties for these years of approximately \$2.3 billion. We believe that the relevant transactions complied with applicable tax laws and did not violate judicial doctrines. We have filed U.S. income tax returns on this same basis for years after 2012. Based on the information currently available, we do not anticipate a significant change to our unrecognized tax benefits for this position

within the next 12 months. We currently believe the ultimate disposition of this matter will not have a material adverse effect on our consolidated financial position, liquidity or results of operations.

With the exception of a loss carryback to 2005, tax years prior to 2007 are generally no longer subject to U.S. tax assessment. In our major non-U.S. jurisdictions including Australia, Brazil, China, Germany, India, Japan, Mexico, Switzerland, Singapore and the U.K., tax years are typically subject to examination for three to ten years. Due to the uncertainty related to the timing and potential outcome of audits, we cannot estimate the range of reasonably possible change in unrecognized tax benefits in the next 12 months.

7. Cat Financial Financing Activities

A. Wholesale inventory receivables

Wholesale inventory receivables are receivables of Cat Financial that arise when Cat Financial provides financing for a dealer's purchase of inventory. These receivables are included in Receivables—trade and other and Long-term receivables—trade and other in Statement 3 and were \$1,401 million and \$1,308 million, at December 31, 2019 and 2018, respectively.

Contractual maturities of outstanding wholesale inventory receivables:

(Millions of dollars)	December 31, 2019		
	Wholesale Loans	Wholesale Leases	Total
Amounts Due In			
2020	\$ 630	\$ 65	\$ 695
2021	235	48	283
2022	166	32	198
2023	61	22	83
2024	27	14	41
Thereafter	21	16	37
Total	1,140	197	1,337
Guaranteed residual value ¹	25	50	75
Unguaranteed residual value	—	33	33
Less: Unearned income	(10)	(34)	(44)
Total	\$ 1,155	\$ 246	\$ 1,401

¹ For Wholesale loans, represents residual value on failed sale leasebacks.

Cat Financial's wholesale inventory receivables generally may be repaid or refinanced without penalty prior to contractual maturity. Accordingly, this presentation should not be regarded as a forecast of future cash collections.

Please refer to Note 18 and Table III for fair value information.

B. Finance receivables

Finance receivables are receivables of Cat Financial and are reported in Statement 3 net of an allowance for credit losses.

Contractual maturities of outstanding finance receivables:

(Millions of dollars)	December 31, 2019		
	Retail Loans	Retail Leases	Total
Amounts Due In			
2020	\$ 6,280	\$ 3,134	\$ 9,414
2021	3,582	2,005	5,587
2022	2,610	1,076	3,686
2023	1,634	472	2,106
2024	622	182	804
Thereafter	417	62	479
Total	15,145	6,931	22,076
Guaranteed residual value ¹	53	390	443
Unguaranteed residual value	—	798	798
Less: Unearned income	(265)	(655)	(920)
Total	\$ 14,933	\$ 7,464	\$ 22,397

¹ For Retail loans, represents residual value on failed sale leasebacks.

Cat Financial's finance receivables generally may be repaid or refinanced without penalty prior to contractual maturity. Accordingly, this presentation should not be regarded as a forecast of future cash collections.

Please refer to Note 18 and Table III for fair value information.

C. Allowance for credit losses

The allowance for credit losses is an estimate of the losses inherent in Cat Financial's finance receivable portfolio and includes consideration of accounts that have been individually identified as impaired, as well as pools of finance receivables where it is probable that certain receivables in the pool are impaired but the individual accounts cannot yet be identified. In identifying and measuring impairment, management takes into consideration past loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of underlying collateral and current economic conditions.

Accounts are identified for individual review based on past-due status and information available about the customer, such as financial statements, news reports and published credit ratings, as well as general information regarding industry trends and the economic environment in which Cat Financial's customers operate. The allowance for credit losses attributable to finance receivables that are individually evaluated and determined to be impaired is based on the present value of expected future cash flows discounted at the receivables' effective interest rate, the fair value of the collateral for collateral-dependent receivables or the observable market price of the receivable. In determining collateral value, Cat Financial estimates the current fair market value of the collateral less selling costs. Cat Financial also considers credit enhancements such as additional collateral and contractual third-party guarantees. The allowance for credit losses attributable to the remaining accounts not yet individually identified as impaired is estimated based on loss forecast models utilizing probabilities of default, our estimate of the loss emergence period and the estimated loss given default. In addition, qualitative factors not able to be fully captured in the loss forecast models including

industry trends, macroeconomic factors and model imprecision are considered in the evaluation of the adequacy of the allowance for credit losses. These qualitative factors are subjective and require a degree of management judgment.

Cat Financial's allowance for credit losses is segregated into two portfolio segments:

- Customer – Finance receivables with end-user customers.
- Dealer – Finance receivables with Caterpillar dealers.

A portfolio segment is the level at which the Company develops a systematic methodology for determining its allowance for credit losses.

Cat Financial further evaluates portfolio segments by the class of finance receivables, which is defined as a level of information (below a portfolio segment) in which the finance receivables have the same initial measurement attribute and a similar method for assessing and monitoring credit risk. Typically, Cat Financial's finance receivables within a geographic area have similar credit risk profiles and methods for assessing and monitoring credit risk. Cat Financial's classes, which align with management reporting for credit losses, are as follows:

- North America – Finance receivables originated in the United States and Canada.
- EAME – Finance receivables originated in Europe, Africa, Middle East and the Commonwealth of Independent States.
- Asia Pacific – Finance receivables originated in Australia, New Zealand, China, Japan, Southeast Asia and India.
- Mining – Finance receivables related to large mining customers worldwide.
- Latin America – Finance receivables originated in Mexico and Central and South American countries.
- Caterpillar Power Finance – Finance receivables originated worldwide related to marine vessels with Caterpillar engines and Caterpillar electrical power generation, gas compression and co-generation systems and non-Caterpillar equipment that is powered by these systems.

An analysis of the allowance for credit losses was as follows:

(Millions of dollars)	December 31, 2019		
	Customer	Dealer	Total

Credit quality of finance receivables

At origination, Cat Financial evaluates credit risk based on a variety of credit quality factors including prior payment experience, customer financial information, credit-rating agency ratings, loan-to-value ratios and other internal metrics. On an ongoing basis, Cat Financial monitors credit quality based on past-due status and

collection experience as there is a meaningful correlation between the past-due status of customers and the risk of loss.

In determining past-due status, Cat Financial considers the entire recorded investment in finance receivable past due when any installment is over 30 days past due. The tables below summarize the recorded investment of finance receivables by aging category.

	December 31, 2019

Impaired finance receivables

For all classes, a finance receivable is considered impaired, based on current information and events, if it is probable that Cat Financial will be unable to collect all amounts due according to the contractual terms. Impaired finance receivables include finance receivables that have been restructured and are considered to be troubled debt restructurings.

There were \$78 million of impaired finance receivables with a related allowance of \$39 million and \$14 million as of December 31, 2019 and 2018, respectively, for the Dealer portfolio segment, all of which was in Latin America. There were no impaired finance receivables as of December 31, 2017 for the Dealer portfolio segment. Cat Financial's recorded investment in impaired finance receivables and the related unpaid principal balances and allowances for the Customer portfolio segment were as follows:

(Millions of dollars)	December 31, 2019			December 31, 2018

Recognition of income is suspended and the finance receivable is placed on non-accrual status when management determines that collection of future income is not probable (generally after 120 days past due). Recognition is resumed and previously suspended income is recognized when the finance receivable becomes current and collection of remaining amounts is considered probable.

Payments received while the finance receivable is on non-accrual status are applied to interest and principal in accordance with the contractual terms.

As of December 31, 2019 and 2018, there were \$78 million in finance receivables on non-accrual status for the Dealer portfolio segment, all of which was in Latin America.

The recorded investment in Customer finance receivables on non-accrual status was as follows:

(Millions of dollars)	December 31,	
	2019	2018
North America	\$ 44	\$ 77
EAME	165	154

Total	\$ 727	\$ 807

Troubled Debt Restructurings

A restructuring of a finance receivable constitutes a troubled debt restructuring (TDR) when the lender grants a concession it would not otherwise consider to a borrower experiencing financial

difficulties. Concessions granted may include extended contract maturities, inclusion of interest only periods, below market interest rates, extended skip payment periods and reduction of principal and/or accrued interest.

There were no finance receivables modified as TDRs during the years ended December 31, 2019, 2018 or 2017 for the Dealer portfolio segment. Cat Financial's recorded investment in finance receivables in the Customer portfolio segment modified as TDRs during the years ended December 31, 2019, 2018 and 2017 were as follows:

(Millions of dollars)	Year ended December 31, 2019		
	Number of Contracts	Pre-TDR Recorded Investment	Post-TDR Recorded Investment
North America	15	\$ 11	\$ 11
EAME	19	17	17
Asia Pacific	—	—	—

Latin America	17	26	27
Caterpillar Power Finance ¹	68	422	407
Total	144	\$ 579	\$ 557

¹ In Caterpillar Power Finance, 48 contracts with a pre-TDR recorded investment of \$265 million and a post-TDR recorded investment of \$258 million were related to six customers.

TDRs in the Customer portfolio segment with a payment default (defined as 91+ days past due) during the years ended December 31, 2019, 2018 and 2017 which had been modified within twelve months prior to the default date, were as follows:

(Millions of dollars)	Year ended December 31, 2019		Year ended December 31, 2018		Year ended December 31, 2017	
	Number of Contracts	Post-TDR Recorded Investment	Number of Contracts	Post-TDR Recorded Investment	Number of Contracts	Post-TDR Recorded Investment
North America	11	\$ 5	10	\$ 10	4	\$ 3
EAME	—	—	—	—	1	—
Asia Pacific	—	—	—	—	4	1
Latin America ¹	—	—	3	1	243	17
Caterpillar Power Finance	1	10	3	33	—	—
Total	12	\$ 15	16	\$ 44	252	\$ 21

¹ In Latin America, 238 contracts with a post-TDR recorded investment of \$16 million were related to two customers for the year ended December 31, 2017.

8. Inventories

Inventories (principally using the LIFO method) are comprised of the following:

(Millions of dollars)	December 31,	
	2019	2018
Raw materials	\$ 4,263	\$ 4,477
Work-in-process	1,147	1,259
Finished goods	5,598	5,562
Supplies	258	231
Total inventories	<u>\$ 11,266</u>	<u>\$ 11,529</u>

During the third quarter of 2019, changes were made to the classification of inventories primarily related to purchased parts between Raw materials, Work-in-process and Finished goods. The prior year amounts have been retrospectively adjusted to conform to the current-year classification.

During 2017, closure of our facility in Gosselies, Belgium resulted in a liquidation of LIFO inventory. The liquidated inventory was carried at lower costs prevailing in prior years as compared with

current costs. The effect of this reduction in inventory decreased Cost of goods sold by approximately \$66 million and increased Profit by approximately \$49 million or \$0.08 per share. The impact of LIFO liquidations during 2019 and 2018 was not significant to Statement 1.

We had long-term material purchase obligations of approximately \$270 million at December 31, 2019.

9. Property, plant and equipment

(Millions of dollars)	Useful Lives (Years)	December 31,	
		2019	2018
Land	—	\$ 664	\$ 671
Buildings and land improvements	20-45	6,710	6,977

Total finite-lived intangible assets	14	<u>\$ 4,151</u>	<u>\$ (2,586)</u>	<u>\$ 1,565</u>

	Weighted Amortizable Life (Years)	December 31, 2018		
		Gross Carrying Amount	Accumulated Amortization	Net
Customer relationships	15	\$ 2,463	\$ (1,249)	\$ 1,214
Intellectual property	11	1,557	(965)	592
Other	13	199	(108)	91
Total finite-lived intangible assets	14	<u>\$ 4,219</u>	<u>\$ (2,322)</u>	<u>\$ 1,897</u>

During 2018, we acquired finite-lived intangible assets of \$112 million and \$6 million due to the purchase of ECM S.p.A. and Downer Freight Rail, respectively. See Note 24 for details on these acquisitions.

Finite-lived intangible assets are amortized over their estimated useful lives and tested for impairment if events or changes in circumstances indicate that the asset may be impaired.

Amortization expense related to intangible assets was \$324 million, \$331 million and \$323 million for 2019, 2018 and 2017, respectively.

As of December 31, 2019, amortization expense related to intangible assets is expected to be:

(Millions of dollars)					
2020	2021	2022	2023	2024	Thereafter
\$ 310	\$ 292	\$ 273	\$ 215	\$ 158	\$ 317

B. Goodwill

In 2018, we acquired net assets with related goodwill of \$127 million in the Energy & Transportation segment. We recorded

goodwill of \$109 million related to the acquisition of ECM S.p.A. and \$18 million related to the acquisition of Downer Freight Rail. See Note 24 for details on these acquisitions.

There were no goodwill impairments during 2019, 2018 or 2017.

The changes in carrying amount of goodwill by reportable segment for the years ended December 31, 2019 and 2018 were as follows:

(Millions of dollars)	December 31, 2018	Acquisitions	Other Adjustments ¹	December 31, 2019
Construction Industries				
Goodwill	\$ 304	\$ —	\$ 2	\$ 306

¹ Other adjustments are comprised primarily of foreign currency translation.

² Includes All Other operating segment (See Note 23).

11. Investments in debt and equity securities

We have investments in certain debt and equity securities, primarily at Insurance Services, which are recorded at fair value and are primarily included in Other assets in Statement 3.

Debt securities have been classified as available-for-sale, and the unrealized gains and losses arising from the revaluation of these

debt securities are included, net of applicable deferred income taxes, in equity (Accumulated other comprehensive income (loss) in Statement 3). The unrealized gains and losses arising from the revaluation of the equity securities are included in Other income (expense) in Statement 1. Realized gains and losses on sales of investments are generally determined using the specific identification method for debt and equity securities and are included in Other income (expense) in Statement 1.

The cost basis and fair value of debt securities with unrealized gains and losses included in equity (Accumulated other comprehensive income (loss) in Statement 3) were as follows:

(Millions of dollars)	December 31, 2019			December 31, 2018		
	Cost Basis	Unrealized Pretax Net Gains (Losses)	Fair Value	Cost Basis	Unrealized Pretax Net Gains (Losses)	Fair Value
Government debt						
U.S. treasury bonds	\$ 9	\$ —	\$ 9	\$ 9	\$ —	\$ 9
Other U.S. and non-U.S. government bonds	54	—	54	42	—	42
Corporate bonds						
Corporate bonds	836	20	856	735	(15)	720
Asset-backed securities	62	—	62	63	—	63
Mortgage-backed debt securities						
U.S. governmental agency	327	4	331	301	(4)	297
Residential	6	—	6	7	—	7
Commercial	46	1	47	14	(1)	13
Total debt securities	\$ 1,340	\$ 25	\$ 1,365	\$ 1,171	\$ (20)	\$ 1,151

As of December 31 2019 and 2018, the total unrealized loss for available-for-sale investments in an unrealized loss position that are not other-than-temporarily impaired was \$1 million and \$21 million, respectively.

The cost basis and fair value of the available-for-sale debt securities at December 31, 2019, by contractual maturity, is shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to prepay and creditors may have the right to call obligations.

(Millions of dollars)	December 31, 2019	
	Cost Basis	Fair Value
Due in one year or less	\$ 80	\$ 80
Due after one year through five years	701	715
Due after five years through ten years	148	153
Due after ten years	32	33
U.S. governmental agency mortgage-backed securities	327	331
Residential mortgage-backed securities	6	6
Commercial mortgage-backed securities	46	47
Total debt securities – available-for-sale	<u>\$ 1,340</u>	<u>\$ 1,365</u>

Sales of Securities:

(Millions of dollars)	Years Ended December 31,		
	2019 ¹	2018 ¹	2017
Proceeds from the sale of available-for-sale securities	\$ 260	\$ 247	\$ 930
Gross gains from the sale of available-for-sale securities	\$ 1	\$ —	\$ 109
Gross losses from the sale of available-for-sale securities	\$ 1	\$ —	\$ 5

¹ Beginning January 1, 2018, equity securities are no longer classified as available-for-sale securities.

For the years ended December 31 2019 and 2018, the net unrealized gains (losses) for equity securities held at December 31, 2019 and 2018 were \$29 million and \$(25) million, respectively.

12. Postemployment benefit plans

We provide defined benefit pension plans, defined contribution plans and/or other postretirement benefit plans (retirement health care and life insurance) to employees in many of our locations throughout the world. Our defined benefit pension plans provide a benefit based on years of service and/or the employee's average earnings near retirement. Our defined contribution plans allow employees to contribute a portion of their salary to help save for retirement, and in most cases, we provide a matching contribution. The benefit obligation related to our non-U.S. defined benefit pension plans are for employees located primarily in Europe, Japan and Brazil. For other postretirement benefits (OPEB), substantially all of our benefit obligation is for employees located in the United States.

Our U.S. defined benefit pension plans for support and management employees were frozen for certain employees on December 31, 2010 and were frozen for the remaining employees on December 31, 2019. On the respective transition dates employees move to a retirement benefit that provides a frozen pension benefit and a 401(k) plan that will include a matching contribution and a new annual employer contribution.

In the first quarter of 2017, we announced the closure of our Gosselies, Belgium facility. This announcement impacted certain employees that participated in a defined benefit pension plan and resulted in a net loss of \$20 million in the first quarter of 2017 for curtailment and termination benefits.

All curtailments and termination benefits were recognized in Other income (expense) in Statement 1.

A. Obligations, assets and funded status

	U.S. Pension Benefits		Non-U.S. Pension Benefits		Other Postretirement Benefits	
	2019	2018	2019	2018	2019	2018
Weighted-average assumptions used to determine benefit obligation, end of year:						
Discount rate	3.2%	4.2%	1.9%	2.5%	3.2%	4.2%
Rate of compensation increase ¹	—%	4.0%	2.0%	3.0%	4.0%	4.0%

¹ Effective December 31, 2019, all U.S. pension benefits were frozen, and accordingly this assumption is no longer applicable.

The assumed discount rate is used to discount future benefit obligations back to today's dollars. The U.S. discount rate is based on a benefit cash flow-matching approach and represents the rate at which our benefit obligations could effectively be settled as of our measurement date, December 31. The benefit cash flow-matching approach involves analyzing Caterpillar's projected cash flows

against a high quality bond yield curve, calculated using a wide population of corporate Aa bonds available on the measurement date. A similar process is used to determine the assumed discount rate for our most significant non-U.S. plans. This rate is sensitive to changes in interest rates. A decrease in the discount rate would increase our obligation and future expense.

(Millions of dollars)	U.S. Pension Benefits		Non-U.S. Pension Benefits		Other Postretirement Benefits

Amounts recognized in Accumulated other comprehensive income (pre-tax) consist of:						
Prior service cost (credit)	\$ —	\$ —	\$ 16	\$ 20	\$ (78)	\$ (126)

¹ The Liability for postemployment benefits reported in Statement 3 includes our liability for other postemployment benefits and our liability for non-qualified deferred compensation plans. For 2019, these liabilities were \$60 million and \$432 million, respectively. For 2018, these liabilities were \$119 million and \$351 million, respectively.

(Millions of dollars)	U.S. Pension Benefits		Non-U.S. Pension Benefits	
	2019	2018	2019	2018
Pension plans with projected benefit obligation in excess of plan assets:				
Projected benefit obligation	\$ 14,037	\$ 15,614	\$ 2,010	\$ 1,821
Accumulated benefit obligation	\$ 14,037	\$ 15,541	\$ 1,896	\$ 1,723
Fair value of plan assets	\$ 12,039	\$ 12,349	\$ 1,384	\$ 1,189
Pension plans with accumulated benefit obligation in excess of plan assets:				
Projected benefit obligation	\$ 14,037	\$ 15,614	\$ 1,875	\$ 1,655
Accumulated benefit obligation	\$ 14,037	\$ 15,541	\$ 1,799	\$ 1,603
Fair value of plan assets	\$ 12,039	\$ 12,349	\$ 1,269	\$ 1,047

The accumulated postretirement benefit obligation exceeds plan assets for all of our other postretirement benefit plans for all years presented.

B. Net periodic benefit cost

(Millions of dollars)	U.S. Pension Benefits			Non-U.S. Pension Benefits			Other Postretirement Benefits		
	2019	2018	2017	2019	2018	2017	2019	2018	2017
Components of net periodic benefit cost:									
Service cost	\$ 115	\$ 125	\$ 115	\$ 80	\$ 89	\$ 95	\$ 80	\$ 83	\$ 78
Interest cost	600	534	525	94	96	101	136	125	130
Expected return on plan assets	(721)	(808)	(734)	(148)	(221)	(231)	(18)	(32)	(37)
Curtailments, settlements and termination benefits	(1)	—	9	(7)	(33)	15	—	(2)	—
Amortization of prior service cost (credit) ¹	—	—	—	—	—	(2)	(40)	(36)	(23)
Actuarial loss (gain) ²	72	534	481	90	111	(195)	306	(150)	15
Net Periodic benefit cost (benefit) ³	\$ 65	\$ 385	\$ 396	\$ 109	\$ 42	\$ (217)	\$ 464	\$ (12)	\$ 163
Other changes in plan assets and benefit obligations recognized in other comprehensive income (pre-tax):									
Current year prior service cost (credit)	\$ —	\$ —	\$ —	\$ (4)	\$ 20	\$ 3	\$ 8	\$ (20)	\$ (77)
Amortization of prior service (cost) credit ¹	—	—	—	—	—	2	40	36	23
Total recognized in other comprehensive income	—	—	—	(4)	20	5	48	16	(54)
Total recognized in net periodic cost and other comprehensive income	\$ 65	\$ 385	\$ 396	\$ 105	\$ 62	\$ (212)	\$ 512	\$ 4	\$ 109
Weighted-average assumptions used to determine net periodic benefit cost:									
Discount rate used to measure service cost	4.3%	3.7%	4.2%	2.5%	2.3%	2.4%	4.1%	3.5%	3.9%
Discount rate used to measure interest cost	3.9%	3.2%	3.3%	2.3%	2.2%	2.3%	3.9%	3.2%	3.3%
Expected rate of return on plan assets ⁴	5.9%	6.3%	6.7%	3.8%	5.2%	5.9%	7.2%	7.5%	7.5%
Rate of compensation increase	4.0%	4.0%	4.0%	3.0%	4.0%	4.0%	4.1%	4.0%	4.0%

¹ The estimated amount of prior service cost (credit) that will be amortized from Accumulated other comprehensive income (loss) at December 31, 2019 into net periodic benefit cost (pre-tax) in 2020 is a credit of \$38 million for Other Postretirement Benefits.

² Actuarial loss (gain) represents the effects of actual results differing from our assumptions and the effects of changing assumptions. We recognize actuarial loss (gain) immediately through earnings upon the annual remeasurement in the fourth quarter, or on an interim basis as triggering events warrant remeasurement.

³ The service cost component is included in Operating costs and all other components are included in Other income (expense) in Statement 1.

⁴ The weighted-average rates for 2020 are 5.1 percent and 3.2 percent for U.S. and non-U.S. pension plans, respectively.

The discount rates used in the determination of our service and interest cost components are determined by utilizing a full yield curve approach which applies specific spot rates along the yield curve used in the determination of the benefit obligation to the relevant projected cash flows.

Our U.S. expected long-term rate of return on plan assets is based on our estimate of long-term passive returns for equities and fixed income securities weighted by the allocation of our pension assets. Based on historical performance, we increase the passive returns due to our active management of the plan assets. To arrive at our expected long-term return, the amount added for active management was 0.40 percent for 2019, 0.75 percent for 2018 and 0.80 percent for 2017. A similar process is used to determine this rate for our non-U.S. plans.

The assumed health care trend rate represents the rate at which health care costs are assumed to increase. We assumed a weighted-average increase of 6.1 percent in our calculation of 2019 benefit expense. We expect a weighted-average increase of 6.1 percent during 2020. The 2020 rates are assumed to decrease gradually to the ultimate health care trend rate of 5 percent in 2025. This rate represents 3 percent general inflation plus 2 percent additional health care inflation.

Assumed health care cost trend rates have a significant effect on the amounts reported for the health care plans. A one-percentage-point change in assumed health care cost trend rates would have had the following effects:

(Millions of dollars)	One-percentage-point increase	One-percentage-point decrease
Effect on 2019 service and interest cost components of other postretirement benefit cost	\$ 13	\$ (11)
Effect on accumulated postretirement benefit obligation	\$ 158	\$ (133)

C. Expected contributions and benefit payments

Information about expected contributions and benefit payments for pension and other postretirement benefit plans is as follows:

(Millions of dollars)	2020							
Expected employer contributions:								
U.S. Pension Benefits	\$	40						
Non-U.S. Pension Benefits	\$	105						
Other Postretirement Benefits	\$	135						
Expected benefit payments:	2020	2021	2022	2023	2024	2025-2029	Total	
U.S. Pension Benefits	\$ 1,020	\$ 1,010	\$ 1,010	\$ 1,010	\$ 1,010	\$ 5,005	\$ 10,065	
Non-U.S. Pension Benefits	\$ 280	\$ 175	\$ 180	\$ 185	\$ 190	\$ 1,055	\$ 2,065	
Other Postretirement Benefits	\$ 290	\$ 285	\$ 280	\$ 275	\$ 270	\$ 1,340	\$ 2,740	
Expected Medicare Part D subsidy:	\$ 9	\$ 9	\$ 9	\$ 8	\$ 8	\$ 35	\$ 78	

The above table reflects the total expected employer contributions and expected benefits to be paid from the plan or from company assets and does not include the participants' share of the cost. The expected benefit payments for our other postretirement benefits include payments for prescription drug benefits. The above table also includes Medicare Part D subsidy amounts expected to be received by the company which will offset other postretirement benefit payments.

D. Plan assets

In general, our strategy for both the U.S. and non-U.S. pensions includes ongoing alignment of our investments to our liabilities, while reducing risk in our portfolio. The current U.S. pension target asset allocation is 70 percent fixed income and 30 percent equities. This target allocation will be revisited periodically to ensure it reflects our overall objectives. The non-U.S. pension weighted-average target allocations are 79 percent fixed income, 12 percent equities, 5 percent real estate and 4 percent other. The target allocations for each plan vary based upon local statutory requirements, demographics of plan participants and funded status. The non-U.S. plan assets are primarily invested in non-U.S. securities.

Our target allocation for the other postretirement benefit plans is 70 percent equities and 30 percent fixed income.

The U.S. plans are rebalanced to within the appropriate target asset allocation ranges on a monthly basis. The frequency of rebalancing for the non-U.S. plans varies depending on the plan. As a result of our diversification strategies, there are no significant concentrations of risk within the portfolio of investments.

The use of certain derivative instruments is permitted where appropriate and necessary for achieving overall investment policy objectives. The plans do not use derivative contracts for speculative purposes.

The accounting guidance on fair value measurements specifies a fair value hierarchy based upon the observability of inputs used in valuation techniques (Level 1, 2 and 3). See Note 18 for a discussion of the fair value hierarchy.

Fair values are determined as follows:

- Equity securities are primarily based on valuations for identical instruments in active markets.
- Fixed income securities are primarily based upon models that take into consideration such market-based factors as recent sales, risk-free yield curves and prices of similarly rated bonds.
- Real estate is stated at the fund's net asset value or at appraised value.
- Cash, short-term instruments and other are based on the carrying amount, which approximates fair value, or the fund's net asset value.

The fair value of the pension and other postretirement benefit plan assets by category is summarized below:

(Millions of dollars)	December 31, 2019				
	Level 1	Level 2	Level 3	Measured at NAV	Total Assets at Fair Value

E. Defined contribution plans

We have both U.S. and non-U.S. employee defined contribution plans to help employees save for retirement. Our primary U.S. 401(k) plan allows eligible employees to contribute a portion of their cash compensation to the plan on a tax-deferred basis. Employees with frozen defined benefit pension accruals are eligible for matching contributions equal to 100 percent of employee contributions to the plan up to 6 percent of cash compensation and an annual employer contribution that ranges from 3 to 5 percent of cash compensation (depending on years of service and age). Employees that were still accruing benefits under a defined benefit pension plan up to December 31, 2019 were eligible for matching contributions equal to 50 percent of employee contributions up to 6 percent of cash compensation. All our U.S. defined benefit pension plans were frozen on December 31, 2019 for remaining employees still accruing a benefit. Starting in 2020, these employees will receive matching contributions equal to 100 percent of employee contributions to the

plan up to 6 percent of cash compensation and an annual employer contribution that ranges from 3 to 5 percent of cash compensation (depending on years of service and age).

These 401(k) plans include various investment funds, including a non-leveraged employee stock ownership plan (ESOP). As of December 31, 2019 and 2018, the ESOP held 14.9 million and 17.2 million shares, respectively. All of the shares held by the ESOP were allocated to participant accounts. Dividends paid to participants are automatically reinvested into company shares unless the participant elects to have all or a portion of the dividend paid to the participant. Various other U.S. and non-U.S. defined contribution plans generally allow eligible employees to contribute a portion of their cash compensation to the plans, and in most cases, we provide a matching contribution to the funds.

Total company costs related to U.S. and non-U.S. defined contribution plans were as follows:

(Millions of dollars)	2019	2018	2017
U.S. plans	\$ 414	\$ 271	\$ 375
Non-U.S. plans	83	89	73
	\$ 497	\$ 360	\$ 448

13. Short-term borrowings

(Millions of dollars)	December 31,	
	2019	2018
Machinery, Energy & Transportation:

Other		421	403	
Total Financial Products		17,140	16,995	
Total long-term debt due after one year		\$ 26,281	\$ 25,000	

¹ Effective yield to maturity includes the impact of discounts, premiums and debt issuance costs.

² Redeemable at our option in whole or in part at any time at a redemption price equal to the greater of (i) 100% of the principal amount or (ii) the discounted present value of the notes or debentures, calculated in accordance with the terms of such notes or debentures.

³ 2018 includes \$360 million related to a financing transaction in Japan entered into in 2017 that was removed in 2019 due to the new lease accounting guidance adopted January 1, 2019. See Note 1J for additional information.

All outstanding notes and debentures are unsecured and rank equally with one another.

On September 19, 2019, we issued \$1.0 billion of 3.250% Senior Notes due 2049 and \$500 million of 2.600% Senior Notes due 2029.

The above table includes \$28.5 million of medium-term notes that can be called at par.

Cat Financial's medium-term notes are offered by prospectus and are issued through agents at fixed and floating rates. Medium-term notes due after one year have a weighted average interest rate of 2.7% with remaining maturities up to 8 years at December 31, 2019.

The aggregate amounts of maturities of long-term debt during each of the years 2020 through 2024, including amounts due within one year and classified as current, are:

(Millions of dollars)	December 31,				
	2020	2021	2022	2023	2024
Machinery, Energy & Transportation	\$ 16	\$ 1,403	\$ 513	\$ 93	\$ 1,007
Financial Products	6,194	7,732	4,744	2,167	2,157
	<u>\$ 6,210</u>	<u>\$ 9,135</u>	<u>\$ 5,257</u>	<u>\$ 2,260</u>	<u>\$ 3,164</u>

Interest paid on short-term and long-term borrowings for 2019, 2018 and 2017 was \$1,057 million, \$1,088 million and \$1,131 million, respectively. Interest paid in 2017 includes a prepayment fee of \$58 million related to the early retirement of our 7.90% senior notes due December 2018.

Medium-term notes of \$1.50 billion matured January 10, 2020 and were excluded from Current maturities of long-term debt as of

December 31, 2019 due to an issuance on January 9, 2020 of two \$750 million medium-term notes, maturing in 2021 and 2022. The table above reflects the maturity dates of the new medium-term notes.

Please refer to Note 18 and Table III for fair value information on long-term debt.

15. Credit commitments

(Millions of dollars)	December 31, 2019		
	Consolidated	Machinery, Energy & Transportation	Financial Products
Credit lines available:			
Global credit facilities	\$ 10,500	\$ 2,751	\$ 7,749
Other external	4,999	194	4,805
Total credit lines available	<u>15,499</u>	<u>2,945</u>	<u>12,554</u>
Less: Commercial paper outstanding	(4,168)	—	(4,168)
Less: Utilized credit	(1,247)	—	(1,247)
Available credit	<u>\$ 10,084</u>	<u>\$ 2,945</u>	<u>\$ 7,139</u>

We have three global credit facilities with a syndicate of banks totaling \$10.50 billion (Credit Facility) available in the aggregate to both Caterpillar and Cat Financial for general liquidity purposes. Based on management's allocation decision, which can be revised from time to time, the portion of the Credit Facility available to ME&T as of December 31, 2019 was \$2.75 billion. Information on our Credit Facility is as follows:

- The 364-day facility of \$3.15 billion (of which \$0.82 billion is available to ME&T) expires in September 2020.
- The three-year facility, as amended and restated in September 2019, of \$2.73 billion (of which \$0.72 billion is available to ME&T) expires in September 2022.
- The five-year facility, as amended and restated in September 2019, of \$4.62 billion (of which \$1.21 billion is available to ME&T) expires in September 2024.

Other consolidated credit lines with banks as of December 31, 2019 totaled \$5.00 billion. These committed and uncommitted credit lines, which may be eligible for renewal at various future dates or have no specified expiration date, are used primarily by our subsidiaries for local funding requirements. Caterpillar or Cat Financial may guarantee subsidiary borrowings under these lines.

At December 31, 2019, Caterpillar's consolidated net worth was \$14.63 billion, which was above the \$9.00 billion required under the Credit Facility. The consolidated net worth is defined as the consolidated shareholders' equity including preferred stock but excluding the pension and other postretirement benefits balance within Accumulated other comprehensive income (loss).

At December 31, 2019, Cat Financial's covenant interest coverage ratio was 1.77 to 1. This is above the 1.15 to 1 minimum ratio, calculated as (1) profit excluding income taxes, interest expense and net gain/(loss) from interest rate derivatives to (2) interest expense calculated at the end of each calendar quarter for the rolling four quarter period then most recently ended, required by the Credit Facility.

In addition, at December 31, 2019, Cat Financial's six-month covenant leverage ratio was 7.65 to 1 and year-end covenant leverage ratio was 7.46 to 1. This is below the maximum ratio of debt to net worth of 10 to 1, calculated (1) on a monthly basis as the average of the leverage ratios determined on the last day of each of the six preceding calendar months and (2) at each December 31, required by the Credit Facility.

In the event Caterpillar or Cat Financial does not meet one or more of their respective financial covenants under the Credit Facility in the future (and are unable to obtain a consent or waiver), the syndicate of banks may terminate the commitments allocated to the party that does not meet its covenants. Additionally, in such event, certain of Cat Financial's other lenders under other loan agreements where similar financial covenants or cross default provisions are applicable may, at their election, choose to pursue remedies under those loan agreements, including accelerating the repayment of outstanding borrowings. At December 31, 2019, there were no borrowings under the Credit Facility.

16. Profit per share

Computations of profit per share:

(Dollars in millions except per share data)	2019	2018	2017
Profit for the period (A) ¹	\$ 6,093	\$ 6,147	\$ 754
Determination of shares (in millions):			
Weighted average number of common shares outstanding (B)	561.6	591.4	591.8
Shares issuable on exercise of stock awards, net of shares assumed to be purchased out of proceeds at average market price	5.9	8.0	7.5
Average common shares outstanding for fully diluted computation (C) ²	567.5	599.4	599.3
Profit per share of common stock:			
Assuming no dilution (A/B)	\$ 10.85	\$ 10.39	\$ 1.27
Assuming full dilution (A/C) ²	\$ 10.74	\$ 10.26	\$ 1.26
Shares outstanding as of December 31 (in millions)	550.1	575.5	597.6
¹ Profit attributable to common shareholders.			
² Diluted by assumed exercise of stock-based compensation awards using the treasury stock method.			

For the year ended December 31, 2019 and 2018, 3.0 million and 1.5 million outstanding stock options, respectively, were excluded from the computation of diluted earnings per share because the effect would have been antidilutive. For 2017, no outstanding SARs and stock options were excluded from the computation of diluted earnings per share because all outstanding SARs and stock options had a dilutive effect.

In July 2018, the Board approved a new share repurchase authorization of up to \$10.0 billion of Caterpillar common stock effective January 1, 2019, with no expiration.

During 2019 and 2018, we repurchased 30.6 million and 27.7 million shares of Caterpillar common stock, respectively, at an aggregate cost of \$4.0 billion and \$3.8 billion, respectively. These purchases were made through a combination of accelerated stock repurchase agreements with third-party financial institutions and open market transactions.

We did not repurchase any Caterpillar common stock during 2017.

17. Accumulated other comprehensive income (loss)

Comprehensive income and its components are presented in Statement 2. Changes in Accumulated other comprehensive income (loss), net of tax, included in Statement 4, consisted of the following:

(Millions of dollars)	Foreign currency translation	Pension and other postretirement benefits	Derivative financial instruments	Available-for- sale securities	Total
Balance at December 31, 2016	\$ (1,970)	\$ 14	\$ (115)	\$ 32	\$ (2,039)

Reclassifications net of tax		\$ —	\$ —	\$ 65
Total reclassifications from Accumulated other comprehensive income (loss)		\$ 81	\$ 127	\$ (9)

18. Fair value disclosures

A. Fair value measurements

The guidance on fair value measurements defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants. This guidance also specifies a fair value hierarchy based upon the observability of inputs used in valuation techniques. Observable inputs (highest level) reflect market data obtained from independent sources, while unobservable inputs (lowest level) reflect internally developed market assumptions. In accordance with this guidance, fair value measurements are classified under the following hierarchy:

- **Level 1** – Quoted prices for identical instruments in active markets.
- **Level 2** – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs or significant value-drivers are observable in active markets.
- **Level 3** – Model-derived valuations in which one or more significant inputs or significant value-drivers are unobservable.

When available, we use quoted market prices to determine fair value, and we classify such measurements within Level 1. In some cases where market prices are not available, we make use of observable market based inputs to calculate fair value, in which case the measurements are classified within Level 2. If quoted or observable market prices are not available, fair value is based upon valuations in which one or more significant inputs are unobservable, including internally developed models that use, where possible, current market-based parameters such as interest rates, yield curves and currency rates. These measurements are classified within Level 3.

Fair value measurements are classified according to the lowest level input or value-driver that is significant to the valuation. A measurement may therefore be classified within Level 3 even though there may be significant inputs that are readily observable.

Fair value measurement includes the consideration of nonperformance risk. Nonperformance risk refers to the risk that an obligation (either by a counterparty or Caterpillar) will not be fulfilled. For financial assets traded in an active market (Level 1 and certain Level 2), the nonperformance risk is included in the market price. For certain other financial assets and liabilities (certain Level 2 and Level 3), our fair value calculations have been adjusted accordingly.

Investments in debt and equity securities

We have investments in certain debt and equity securities, primarily at Insurance Services, that are recorded at fair value. Fair values for our U.S. treasury bonds and large capitalization value and smaller company growth equity securities are based upon valuations for identical instruments in active markets. Fair values for other government bonds, corporate bonds and mortgage-backed debt securities are based upon models that take into consideration such market-based factors as recent sales, risk-free yield curves and prices of similarly rated bonds.

In addition, Insurance Services has an equity investment in a real estate investment trust (REIT) which is recorded at fair value based on the net asset value (NAV) of the investment and is not classified within the fair value hierarchy.

See Note 11 for additional information on our investments in debt and equity securities.

Derivative financial instruments

The fair value of interest rate contracts is primarily based on models that utilize the appropriate market-based forward swap curves and zero-coupon interest rates to determine discounted cash flows.

The fair value of foreign currency and commodity forward, option and cross currency contracts is based on a valuation model that discounts cash flows resulting from the differential between the contract price and the market-based forward rate.

Assets and liabilities measured on a recurring basis at fair value, primarily related to Financial Products, included in Statement 3 as of December 31, 2019 and 2018 are summarized below:

December 31, 2019

In addition to the amounts above, Cat Financial impaired loans are subject to measurement at fair value on a nonrecurring basis and are classified as Level 3 measurements. A loan is considered impaired when management determines that collection of contractual amounts due is not probable. In these cases, an allowance for credit losses may be established based either on the present value of expected future cash flows discounted at the receivables' effective interest rate, the fair value of the collateral for collateral-dependent receivables, or the observable market price of the receivable. In determining collateral value, Cat Financial estimates the current fair market value of the collateral less selling costs. Cat Financial had impaired loans with a fair value of \$343 million and \$469 million for the years ended December 31, 2019 and 2018, respectively.

B. Fair values of financial instruments

In addition to the methods and assumptions we use to record the fair value of financial instruments as discussed in the Fair value measurements section above, we used the following methods and assumptions to estimate the fair value of our financial instruments:

Cash and short-term investments

Carrying amount approximated fair value.

Restricted cash and short-term investments

Carrying amount approximated fair value. Restricted cash and short-term investments are included in Prepaid expenses and other current assets in Statement 3.

Fair values of our financial instruments were as follows:

Finance receivables

Fair value was estimated by discounting the future cash flows using current rates, representative of receivables with similar remaining maturities.

Wholesale inventory receivables

Fair value was estimated by discounting the future cash flows using current rates, representative of receivables with similar remaining maturities.

Short-term borrowings

Carrying amount approximated fair value.

Long-term debt

Fair value for fixed and floating rate debt was estimated based on quoted market prices.

Guarantees

The fair value of guarantees is based upon our estimate of the premium a market participant would require to issue the same guarantee in a stand-alone arms-length transaction with an unrelated party. If quoted or observable market prices are not available, fair value is based upon internally developed models that utilize current market-based assumptions.

TABLE III—Fair Values of Financial Instruments

(Millions of dollars)	2019		2018		Fair Value Levels	Reference
	Carrying Amount	Fair Value	Carrying Amount	Fair Value		
Assets at December 31,						
Cash and short-term investments	\$ 8,284	\$ 8,284	\$ 7,857	\$ 7,857	1	Statement 3
Restricted cash and short-term investments	8	8	33	33	1	Statement 3
Investments in debt and equity securities	1,711	1,711	1,576	1,576	1, 2 & 3	Notes 11 & 19
Finance receivables–net (excluding finance leases ¹)	14,473	14,613	14,714	14,798	3	Notes 7 & 19
Wholesale inventory receivables–net (excluding finance leases ¹)	1,105	1,076	1,050	1,025	3	Notes 7 & 19
Foreign currency contracts–net	62	62	47	47	2	Notes 4 & 19
Commodity contracts–net	3	3	—	—	2	Notes 4 & 19
Liabilities at December 31,						
Short-term borrowings	5,166	5,166	5,723	5,723	1	Note 13
Long-term debt (including amounts due within one year):						
Machinery, Energy & Transportation	9,157	11,216	8,015	9,046	2	Note 14
Financial Products	23,334	23,655	22,815	22,684	2	Note 14
Interest rate swaps–net	20	20	36	36	2	Notes 4 & 19
Commodity contracts–net	—	—	30	30	2	Notes 4 & 19
Guarantees	5	5	8	8	3	Note 21

¹ Represents finance leases and failed sale leasebacks of \$7,800 million at December 31, 2019 and finance leases of \$7,463 million at December 31, 2018, respectively.

19. Concentration of credit risk

Financial instruments with potential credit risk consist primarily of trade and finance receivables and short-term and long-term investments. Additionally, to a lesser extent, we have a potential credit risk associated with counterparties to derivative contracts.

Trade receivables are primarily short-term receivables from independently owned and operated dealers and customers which arise in the normal course of business. We perform regular credit evaluations of our dealers and customers. Collateral generally is not required, and the majority of our trade receivables are unsecured. We do, however, when deemed necessary, make use of various

devices such as security agreements and letters of credit to protect our interests. No single dealer or customer represents a significant concentration of credit risk.

Finance receivables and wholesale inventory receivables primarily represent receivables under installment sales contracts, receivables arising from leasing transactions and notes receivable. We generally maintain a secured interest in the equipment financed. No single customer or dealer represents a significant concentration of credit risk.

Short-term and long-term investments are held with high quality institutions and, by policy, the amount of credit exposure to any one institution is limited. Long-term investments, primarily included in Other assets in Statement 3, are comprised primarily of available-for-sale debt securities and equity securities at Insurance Services.

For derivative contracts, collateral is generally not required of the counterparties or of our company. The company generally enters into International Swaps and Derivatives Association (ISDA) master netting agreements within ME&T and Financial Products that permit the net settlement of amounts owed under their respective derivative contracts. Our exposure to credit loss in the event of nonperformance by the counterparties is limited to only those gains that we have recorded, but for which we have not yet received cash payment. The master netting agreements reduce the amount of loss the company would incur should the counterparties fail to meet their obligations. At December 31, 2019 and 2018, the maximum exposure to credit loss was \$116 million

and \$131 million, respectively, before the application of any master netting agreements.

Please refer to Note 18 and Table III above for fair value information.

20. Leases

A. Lessee arrangements

We lease certain property, information technology equipment, warehouse equipment, vehicles and other equipment through operating leases. We recognize a lease liability and corresponding right-of-use asset based on the present value of lease payments. To determine the present value of lease payments for most of our leases, we use our incremental borrowing rate based on information available on the lease commencement date. For certain property and information technology equipment leases, we have elected to separate payments for lease components from non-lease components. For all other leases, we have elected not to separate payments for lease and non-lease components. Our lease agreements may include options to extend or terminate the lease. When it is reasonably certain that we will exercise that option, we have included the option in the recognition of right-of-use assets and lease liabilities. We have elected not to recognize right-of-use assets or lease liabilities for leases with a term of twelve months or less.

Our finance leases are not significant and therefore are not included in the following disclosures.

The components of lease costs were as follows:

(Millions of dollars)	Year ended December 31	
	2019	
Operating lease cost	\$	232
Short-term lease cost	\$	57

Operating lease right-of-use assets are recognized in Other assets in Statement 3. The operating lease liabilities are recognized in Other current liabilities and Other liabilities.

Supplemental information related to leases was as follows:

(Millions of dollars)	December 31, 2019	January 1, 2019
Operating Leases		
Other assets	\$ 624	\$ 713
Other current liabilities	\$ 173	\$ 209
Other liabilities	\$ 461	\$ 511
Weighted average remaining lease term		
Operating leases	7 years	7 years
Weighted average discount rates		
Operating leases	2%	2%

Maturities of operating lease liabilities at December 31, 2019 and minimum payments for operating leases having initial or remaining non-cancelable terms in excess of one year at December 31, 2018 were as follows:

(Millions of dollars)	December 31, 2019
Amounts Due In	
2020	\$ 185
2021	139
2022	86
2023	64
2024	46
Thereafter	175
Total lease payments	695
Less: Imputed interest	(61)
Total	\$ 634

	December 31, 2018
Amounts Due In	
2019	\$ 205
2020	154
2021	111
2022	67
2023	50
Thereafter	185
Total	\$ 772

Supplemental cash flow information related to leases was as follows:

(Millions of dollars)	Year ended December 31
	2019
Cash paid for amounts included in the measurement of lease liabilities	
Operating cash flows from operating leases	\$ 224
Right-of-use assets obtained in exchange for lease obligations:	
Operating leases	\$ 122

B. Lessor arrangements

We lease Caterpillar machinery, engines and other equipment to customers and dealers around the world, primarily through Cat Financial. Cat Financial leases to customers primarily through sales-type (non-tax) leases, where the lessee for tax purposes is considered to be the owner of the equipment during the term of the lease. Cat Financial also offers tax leases that are classified as either operating or direct finance leases for financial accounting purposes, depending on the characteristics of the lease. For tax purposes, Cat Financial is considered the owner of the equipment. Our lease agreements may include options for the lessee to purchase the underlying asset at the end of the lease term for either a stated fixed price or fair market value.

The residual value of Cat Financial's leased equipment is determined based on its estimated end-of-term market value. We estimate the residual value of leased equipment at the inception of the lease

based on a number of factors, including historical wholesale market sales prices, past remarketing experience and any known significant market/product trends. The following critical factors are also considered in our residual value estimates: lease term, market size and demand, total expected hours of usage, machine configuration, application, location, model changes, quantities, third-party residual guarantees and contractual customer purchase options.

During the term of our leases, we monitor residual values. For operating leases, adjustments to depreciation expense reflecting changes in residual value estimates are recorded prospectively on a straight-line basis. For finance leases, residual value adjustments are recognized through a reduction of finance revenue over the remaining lease term.

See Note 7 for contractual maturities of finance lease receivables (sales-type and direct finance leases).

The carrying amount of equipment leased to others, included in Property, plant and equipment - net in Statement 3, under operating leases was as follows:

(Millions of dollars)	December 31,	
	2019	2018
Equipment leased to others - at original cost	\$ 6,208	\$ 6,015
Less: Accumulated depreciation	(1,960)	(1,744)
Equipment leased to others - net	<u>\$ 4,248</u>	<u>\$ 4,271</u>

Payments due for operating leases at December 31, 2019 and scheduled minimum rental payments for operating leases at December 31, 2018 were as follows:

December 31, 2019 (Millions of dollars)						
2020	2021	2022	2023	2024	Thereafter	Total
\$ 861	\$ 558	\$ 299	\$ 149	\$ 74	\$ 70	\$ 2,011

December 31, 2018						
2019	2020	2021	2022	2023	Thereafter	Total
\$ 896	\$ 574	\$ 314	\$ 158	\$ 71	\$ 69	\$ 2,082

Revenues from finance and operating leases, primarily included in Revenues of Financial Products on Statement 1, were as follows:

(Millions of dollars)	Year ended December 31
	2019
Finance lease revenue	\$ 521
Operating lease revenue	1,248
Total	<u>\$ 1,769</u>

Revenues are presented net of sales and other related taxes.

21. Guarantees and product warranty

Caterpillar dealer performance guarantees

We have provided an indemnity to a third-party insurance company for potential losses related to performance bonds issued on behalf of Caterpillar dealers. The bonds have varying terms and are issued to insure governmental agencies against nonperformance by certain dealers. We also provided guarantees to third-parties related to the performance of contractual obligations by certain Caterpillar dealers. These guarantees have varying terms and cover potential financial losses incurred by the third parties resulting from the dealers' nonperformance.

In 2016, we provided a guarantee to an end user related to the performance of contractual obligations by a Caterpillar dealer. Under the guarantee, which expires in 2025, non-performance by the Caterpillar dealer could require Caterpillar to satisfy the contractual obligations by providing goods, services or financial compensation to the end user up to an annual designated cap.

Supplier consortium performance guarantees

We have provided guarantees to a customer in Brazil and a customer in Europe related to the performance of contractual obligations by supplier consortiums to which our Caterpillar subsidiaries are

members. The guarantees cover potential damages incurred by the customers resulting from the supplier consortiums' non-performance. The damages are capped except for failure of the consortiums to meet certain obligations outlined in the contract in the normal course of business. The guarantee for the customer in Europe will expire when the supplier consortium performs all of its contractual obligations, which are expected to be completed in 2022. The agreement with the customer in Brazil was terminated during second quarter of 2019. No payments were made under the guarantee.

We have dealer performance guarantees and third-party performance guarantees that do not limit potential payment to end users related to indemnities and other commercial contractual obligations. In addition, we have entered into contracts involving industry standard indemnifications that do not limit potential payment. For these unlimited guarantees, we are unable to estimate a maximum potential amount of future payments that could result from claims made.

No significant loss has been experienced or is anticipated under any of these guarantees. At December 31, 2019 and 2018, the related recorded liability was \$5 million and \$8 million, respectively. The maximum potential amount of future payments (undiscounted and without reduction for any amounts that may possibly be recovered under recourse or collateralized provisions) we could be required to make under the guarantees at December 31 are as follows:

(Millions of dollars)	2019	2018
Caterpillar dealer performance guarantees	\$ 1,150	\$ 1,244
Supplier consortium performance guarantees	238	527
Other guarantees	221	207
Total guarantees	<u>\$ 1,609</u>	<u>\$ 1,978</u>

Cat Financial provides guarantees to repurchase certain loans of Caterpillar dealers from a special-purpose corporation (SPC) that qualifies as a variable interest entity. The purpose of the SPC is to provide short-term working capital loans to Caterpillar dealers. This SPC issues commercial paper and uses the proceeds to fund its loan program. Cat Financial has a loan purchase agreement with the SPC that obligates Cat Financial to purchase certain loans that are not paid at maturity. Cat Financial receives a fee for providing this guarantee, which provides a source of liquidity for the SPC. Cat Financial is the primary beneficiary of the SPC as its guarantees result in Cat Financial having both the power to direct the activities that most significantly impact the SPC's economic performance and the obligation to absorb losses, and therefore Cat Financial has consolidated the financial statements of the SPC. As of December 31, 2019 and 2018, the SPC's assets of \$1,453 million and \$1,149 million, respectively, were primarily comprised of loans to dealers, and the SPC's liabilities of \$1,452 million and \$1,148 million, respectively, were primarily comprised of commercial paper. The assets of the SPC are not available to pay Cat Financial's creditors. Cat Financial may be obligated to perform under the guarantee if the SPC experiences losses. No loss has been experienced or is anticipated under this loan purchase agreement.

Cat Financial has commitments to extend credit to customers and Caterpillar dealers through lines of credit and other pre-approved credit arrangements. Cat Financial applies the same credit policies and approval process for these commitments to extend credit as we do for other financing. Collateral is not required for these commitments, but if credit is extended, collateral may be required upon funding. The amount of unused commitments to extend credit to Caterpillar dealers was \$11,154 million at December 31, 2019. The amount of unused commitments to extend credit to customers was \$693 million at December 31, 2019. A significant portion of these commitments is not expected to be fully drawn upon; therefore, the total commitment amounts do not represent a future cash requirement. Cat Financial generally has the right to unconditionally cancel, alter, or amend the terms of these commitments at any time.

Our product warranty liability is determined by applying historical claim rate experience to the current field population and dealer inventory. Generally, historical claim rates are based on actual warranty experience for each product by machine model/engine size by customer or dealer location (inside or outside North America). Specific rates are developed for each product shipment month and are updated monthly based on actual warranty claim experience.

(Millions of dollars)	2019	2018
Warranty liability, January 1	\$ 1,391	\$ 1,419
Reduction in liability (payments)	(903)	(783)
Increase in liability (new warranties)	1,053	755
Warranty liability, December 31	<u>\$ 1,541</u>	<u>\$ 1,391</u>

22. Environmental and legal matters

The Company is regulated by federal, state and international environmental laws governing our use, transport and disposal of substances and control of emissions. In addition to governing our manufacturing and other operations, these laws often impact the development of our products, including, but not limited to, required compliance with air emissions standards applicable to internal combustion engines. We have made, and will continue to make, significant research and development and capital expenditures to comply with these emissions standards.

We are engaged in remedial activities at a number of locations, often with other companies, pursuant to federal and state laws. When it is probable we will pay remedial costs at a site, and those costs can be reasonably estimated, the investigation, remediation, and operating and maintenance costs are accrued against our earnings. Costs are accrued based on consideration of currently available data and information with respect to each individual site, including available technologies, current applicable laws and regulations, and prior remediation experience. Where no amount within a range of estimates is more likely, we accrue

the minimum. Where multiple potentially responsible parties are involved, we consider our proportionate share of the probable costs. In formulating the estimate of probable costs, we do not consider amounts expected to be recovered from insurance companies or others. We reassess these accrued amounts on a quarterly basis. The amount recorded for environmental remediation is not material and is included in Accrued expenses. We believe there is no more than a remote chance that a material amount for remedial activities at any individual site, or at all the sites in the aggregate, will be required.

On January 27, 2020, the Brazilian Federal Environmental Agency ("IBAMA") issued Caterpillar Brasil Ltda a notice of violation regarding allegations around the requirements for use of imported oils at the Piracicaba, Brazil facility. We have instituted processes to address the allegations. While we are still discussing resolution of these allegations with IBAMA, the initial notice from IBAMA included a proposed fine of approximately \$370,000. We do not expect this fine or our response to address the allegations to have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

On January 7, 2015, the Company received a grand jury subpoena from the U.S. District Court for the Central District of Illinois. The subpoena requests documents and information from the Company relating to, among other things, financial information concerning U.S. and non-U.S. Caterpillar subsidiaries (including undistributed profits of non-U.S. subsidiaries and the movement of cash among U.S. and non-U.S. subsidiaries). The Company has received additional subpoenas relating to this investigation requesting additional documents and information relating to, among other things, the purchase and resale of replacement parts by Caterpillar Inc. and non-U.S. Caterpillar subsidiaries, dividend distributions of certain non-U.S. Caterpillar subsidiaries, and Caterpillar SARL (CSARL) and related structures. On March 2-3, 2017, agents with the Department of Commerce, the Federal Deposit Insurance Corporation and the Internal Revenue Service executed search and seizure warrants at three facilities of the Company in the Peoria, Illinois area, including its former corporate headquarters. The warrants identify, and agents seized, documents and information related to, among other things, the export of products from the United States, the movement of products between the United States and Switzerland, the relationship between Caterpillar Inc. and CSARL, and sales outside the United States. It is the Company's understanding that the warrants, which concern both tax and export activities, are related to the ongoing grand jury investigation. The Company is continuing to cooperate with this investigation. The Company is unable to predict the outcome or reasonably estimate any potential loss; however, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

On March 20, 2014, Brazil's Administrative Council for Economic Defense (CADE) published a Technical Opinion which named 18 companies and over 100 individuals as defendants, including two subsidiaries of Caterpillar Inc., MGE - Equipamentos e Serviços Ferroviários Ltda. (MGE) and Caterpillar Brasil Ltda (CBL). The publication of the Technical Opinion opened CADE's official administrative investigation into allegations that the defendants participated in anticompetitive bid activity for the construction and maintenance of metro and train networks in Brazil. While companies cannot be held criminally liable for anticompetitive conduct in Brazil, criminal charges have been brought against one current employee of MGE and two former employees of MGE involving the same conduct alleged by CADE. On July 8, 2019, CADE found MGE, one of its current employees and two of its former employees liable for anticompetitive conduct. CBL was dismissed from the proceeding without any finding of liability. MGE intends to appeal CADE's findings. We currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

In addition, we are involved in other unresolved legal actions that arise in the normal course of business. The most prevalent of these unresolved actions involve disputes related to product design, manufacture and performance liability (including claimed asbestos and welding fumes exposure), contracts, employment issues, environmental matters, intellectual property rights, taxes (other than income taxes) and securities laws. The aggregate range of reasonably possible losses in excess of accrued liabilities, if any, associated with these unresolved legal actions is not material. In some cases, we cannot reasonably estimate a range of loss because there is insufficient information regarding the matter. However, we believe there is no more than a remote chance that any liability arising from these matters would be material. Although it is not possible to predict with certainty the outcome of these unresolved legal actions, we believe that these actions will not individually or in the aggregate have a material adverse effect on our consolidated results of operations, financial position or liquidity.

23. Segment information

A. Basis for segment information

Our Executive Office is comprised of a Chief Executive Officer (CEO), four Group Presidents, a Chief Financial Officer (CFO), a Chief Legal Officer, General Counsel and Corporate Secretary and a Chief Human Resources Officer. The Group Presidents and CFO are accountable for a related set of end-to-end businesses that they manage. The Chief Legal Officer, General Counsel and Corporate Secretary leads the Law, Security and Public Policy Division. The Chief Human Resources Officer leads the Human Resources Organization. The CEO allocates resources and manages performance at the Group President/CFO level. As such, the CEO serves as our Chief Operating Decision Maker, and operating segments are primarily based on the Group President/CFO reporting structure.

Three of our operating segments, Construction Industries, Resource Industries and Energy & Transportation are led by Group Presidents. One operating segment, Financial Products, is led by the CFO who also has responsibility for Corporate Services. Corporate Services is a cost center primarily responsible for the performance of certain support functions globally and to provide centralized services; it does not meet the definition of an operating segment. One Group President leads one smaller operating segment that is included in the All Other operating segment. The Law, Security and Public Policy Division and the Human Resources Organization are cost centers and do not meet the definition of an operating segment.

B. Description of segments

We have five operating segments, of which four are reportable segments. Following is a brief description of our reportable segments and the business activities included in the All Other operating segment:

Construction Industries: A segment primarily responsible for supporting customers using machinery in infrastructure, forestry and building construction applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes asphalt pavers; backhoe loaders; compactors; cold planers; compact track and multi-terrain loaders; mini, small, medium and large track excavators; forestry excavators; feller bunchers; harvesters; knuckleboom loaders; motor graders; pipelayers; road reclaimers; site prep tractors; skidders; skid steer loaders; telehandlers; small and medium track-type tractors; track-type loaders; utility vehicles; wheel excavators; compact, small and medium wheel loaders; and related parts and work tools. Inter-segment sales are a source of revenue for this segment.

Resource Industries: A segment primarily responsible for supporting customers using machinery in mining, heavy construction, quarry and aggregates, waste and material handling applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes large track-type tractors; large mining trucks; autonomous ready vehicles and solutions; hard rock vehicles; longwall miners; electric rope shovels; draglines; hydraulic shovels; rotary drills; large wheel loaders; off-highway trucks; articulated trucks; wheel tractor scrapers; wheel dozers; landfill compactors; soil compactors; hard rock continuous mining systems; select work tools; machinery components and related parts. In addition to equipment, Resource Industries also develops and sells technology products and services to provide customers fleet management, equipment management analytics and autonomous machine capabilities. Resource Industries also manages areas that provide services to other parts of the company, including integrated manufacturing and research and development. Inter-segment sales are a source of revenue for this segment.

Energy & Transportation: A segment primarily responsible for supporting customers using reciprocating engines, turbines, diesel-electric locomotives and related parts across industries serving Oil and Gas, Power Generation, Industrial and Transportation applications, including marine and rail-related businesses. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support of turbine machinery and integrated systems and solutions and turbine-related services; reciprocating engine-powered generator sets; integrated systems used in the electric power generation industry; reciprocating engines and integrated systems and solutions for the marine and oil and gas industries; reciprocating engines supplied to the industrial industry as well as Cat machinery; the remanufacturing of Caterpillar engines and components and remanufacturing services for other companies; the business strategy, product design, product management and development, manufacturing, remanufacturing, leasing and service of diesel-electric locomotives and components and other rail-related products and services; and product support of on-highway vocational trucks for North America. Inter-segment sales are a source of revenue for this segment.

Financial Products Segment: Provides financing alternatives to customers and dealers around the world for Caterpillar products, as well as financing for vehicles, power generation facilities and marine vessels that, in most cases, incorporate Caterpillar products. Financing plans include operating and finance leases, installment sale contracts, working capital loans and wholesale financing plans. The segment also provides insurance and risk management products and services that help customers and dealers manage their business risk. Insurance and risk management products offered include physical damage insurance, inventory protection plans, extended service coverage for machines and engines, and dealer property and casualty insurance. The various forms of financing, insurance and risk management products offered to customers and dealers help support the purchase and lease of our equipment. The segment also earns revenues from ME&T, but the related costs are not allocated to operating segments.

All Other operating segment: Primarily includes activities such as: business strategy, product management and development, manufacturing and sourcing of filters and fluids, undercarriage, ground-engaging tools, fluid transfer products, precision seals, rubber sealing and connecting components primarily for Cat products; parts distribution; integrated logistics solutions, distribution services responsible for dealer development and administration including a wholly owned dealer in Japan, dealer portfolio management and ensuring the most efficient and effective distribution of machines, engines and parts; and digital investments for new customer and dealer solutions that integrate data analytics with state-of-the-art digital technologies while transforming the buying experience. Results for the All Other operating segment are included as a reconciling item between reportable segments and consolidated external reporting.

C. Segment measurement and reconciliations

There are several methodology differences between our segment reporting and our external reporting. The following is a list of the more significant methodology differences:

- ME&T segment net assets generally include inventories, receivables, property, plant and equipment, goodwill, intangibles, accounts payable and customer advances. Beginning in 2019, operating lease right-of-use assets are included in segment assets. In 2018, the present value of future lease payments for certain ME&T operating leases was included in segment assets while the estimated financing component of the lease payments

was excluded. Liabilities other than accounts payable and customer advances are generally managed at the corporate level and are not included in segment operations. Financial Products Segment assets generally include all categories of assets.

- Segment inventories and cost of sales are valued using a current cost methodology.
- Goodwill allocated to segments is amortized using a fixed amount based on a 20 year useful life. This methodology difference only impacts segment assets; no goodwill amortization expense is included in segment profit. In addition, only a portion of goodwill for certain acquisitions made in 2011 or later has been allocated to segments.
- Currency exposures for ME&T are generally managed at the corporate level and the effects of changes in exchange rates on results of operations within the year are not included in segment profit. The net difference created in the translation of revenues and costs between exchange rates used for U.S. GAAP reporting and exchange rates used for segment reporting is reported as a methodology difference.
- Stock-based compensation expense is not included in segment profit.
- Postretirement benefit expenses are split; segments are generally responsible for service costs, with the remaining elements of net periodic benefit cost included as a methodology difference.
- ME&T segment profit is determined on a pretax basis and excludes interest expense and most other income/expense items. Financial Products Segment profit is determined on a pretax basis and includes other income/expense items.

Reconciling items are created based on accounting differences between segment reporting and our consolidated external reporting. Please refer to pages 100 to 104 for financial information regarding significant reconciling items. Most of our reconciling items are self-explanatory given the above explanations. For the reconciliation of profit, we have grouped the reconciling items as follows:

- **Corporate costs:** These costs are related to corporate requirements primarily for compliance and legal functions for the benefit of the entire organization.
- **Restructuring costs:** May include costs for employee separation, long-lived asset impairments and contract terminations. These costs are included in Other operating (income) expenses except for defined-benefit plan curtailment losses and special termination benefits, which are included in Other income (expense). Restructuring costs also include other exit-related costs which may consist of accelerated depreciation, inventory write-downs, building demolition, equipment relocation and project management costs and LIFO inventory decrement benefits from inventory liquidations at closed facilities, all of which are primarily included in Cost of goods sold. Beginning in 2019, only certain restructuring costs are excluded from segment profit. A table, Reconciliation of Restructuring costs on page 102, has been included to illustrate how segment profit would have been impacted by the restructuring costs. See Note 25 for more information.
- **Methodology differences:** See previous discussion of significant accounting differences between segment reporting and consolidated external reporting.
- **Timing:** Timing differences in the recognition of costs between segment reporting and consolidated external reporting. For example, certain costs are reported on the cash basis for segment reporting and the accrual basis for consolidated external reporting.

Segment Information

Reportable Segments:

(Millions of dollars)	External sales and revenues	Inter-segment sales and revenues	Total sales and revenues	Depreciation and amortization	Segment profit	Segment assets at December 31	Capital expenditures

¹ Sales of ME&T are based on dealer or customer location. Revenues from services provided are based on where service is rendered.

24. Acquisitions

ECM S.p.A.

On January 2, 2018, we acquired 100 percent of the equity in privately held ECM S.p.A. (ECM). Headquartered in Pistoia, Italy, ECM designs, manufactures, sells and services advanced signal systems for the rail industry. The ECM acquisition was executed to expand our presence in the international freight and transit industries through a combination of broad product offerings and strong reputation in the signaling market. The purchase price for the acquisition was \$225 million, consisting of \$249 million paid at closing, net of \$25 million of cash acquired and \$1 million of debt assumed.

The transaction was financed with available cash. Tangible assets as of the acquisition date were \$109 million, recorded at their fair values, and primarily included cash of \$25 million, receivables of \$28 million, inventories of \$29 million, and property, plant and equipment of \$17 million. Finite-lived intangible assets acquired of \$112 million included customer relationships, developed technology and trade names. The finite lived intangible assets are being amortized on a straight-line basis over a weighted-average amortization period of approximately 13 years. Liabilities assumed as of the acquisition date were \$79 million, recorded at their fair values, and primarily included accounts payable of \$38 million and net deferred tax liabilities of \$29 million. Goodwill of \$109 million, non-deductible for income tax purposes, represented the excess of the consideration transferred over the net assets recognized and

represented the estimated future economic benefits arising from other assets acquired that could not be individually identified and separately recognized. Factors that contributed to a purchase price resulting in the recognition of goodwill include ECM's strategic fit into our rail product portfolio, the opportunity to provide a complete line-up of signaling and train control systems and the acquired assembled workforce. The results of the acquired business for the period from the acquisition date are included in the accompanying consolidated financial statements and reported in the Energy & Transportation segment in Note 23. Assuming this transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

Downer Freight Rail

On January 2, 2018, we completed the acquisition of certain assets and liabilities of the Downer Freight Rail business (Downer Freight Rail). Headquartered in North Ryde, Australia, Downer Freight Rail provides a full suite of rolling stock, aftermarket parts and services throughout Australia. The acquisition was executed to strengthen our existing Rail footprint in Australia, which currently includes rolling stock maintenance facilities, as well as infrastructure and signaling facilities. The purchase price for the acquisition was \$97 million.

The transaction was financed with available cash. Tangible assets as of the acquisition date were \$86 million, recorded at their fair values, and primarily included receivables of \$23 million, inventories of \$40 million, and property, plant and equipment of \$15 million.

Restructuring costs for 2019, 2018 and 2017 were as follows:

(Millions of dollars)	2019	2018	2017
Employee separations ¹	\$ 48	\$ 112	\$ 525
Contract terminations ¹	1	7	183
Long-lived asset impairments ¹	65	93	346
Defined benefit plan curtailments and termination benefits ²	—	(8)	29
Other ³	122	182	173
Total restructuring costs	\$ 236	\$ 386	\$ 1,256

¹ Recognized in Other operating (income) expenses.

² Recognized in Other income (expense).

³ Represents costs related to our restructuring programs, primarily for project management, inventory write-downs, accelerated depreciation and equipment relocation, and also LIFO inventory decrement benefits from inventory liquidations at closed facilities, all of which are primarily included in Cost of goods sold.

The restructuring costs in 2019 were primarily related to restructuring actions across the company. The restructuring costs in 2018 were primarily related to ongoing facility closures across the company. In 2017, about half of the restructuring costs were related to the closure of the facility in Gosselies, Belgium, within

Finite-lived customer relationship intangible assets acquired were \$6 million. The finite lived intangible assets are being amortized on a straight-line basis over an amortization period of 15 years. Liabilities assumed as of the acquisition date were \$14 million, which represented their fair values. Goodwill of \$18 million, not expected to be deducted for income tax purposes, represented the excess of the consideration transferred over the net assets recognized and represented the estimated future economic benefits arising from other assets acquired that could not be individually identified and separately recognized. Factors that contributed to a purchase price resulting in the recognition of goodwill include Downer Freight Rail's strategic fit into our rail product portfolio, the opportunity to expand our aftermarket parts and maintenance service portfolio in Australia and the acquired assembled workforce. The results of the acquired business for the period from the acquisition date are included in the accompanying consolidated financial statements and reported in the Energy & Transportation segment in Note 23. Assuming this transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

25. Restructuring costs

Our accounting for employee separations is dependent upon how the particular program is designed. For voluntary programs, eligible separation costs are recognized at the time of employee acceptance unless the acceptance requires explicit approval by the company. For involuntary programs, eligible costs are recognized when management has approved the program, the affected employees have been properly notified and the costs are estimable.

Construction Industries, and the remainder was related to other restructuring actions across the company.

Certain restructuring costs are a reconciling item between Segment profit and Consolidated profit before taxes. See Note 23 for more information.

The following table summarizes the 2018 and 2019 employee separation activity:

(Millions of dollars)	
Liability balance at December 31, 2017	\$ 249
Increase in liability (separation charges)	112
Reduction in liability (payments)	(276)
Liability balance at December 31, 2018	\$ 85
Increase in liability (separation charges)	48
Reduction in liability (payments)	(85)
Liability balance at December 31, 2019	\$ 48

Most of the remaining liability balance as of December 31, 2019 is expected to be paid in 2020.

In March 2017, Caterpillar informed Belgian authorities of the decision to proceed to a collective dismissal, which led to the closure of the Gosselies site, impacting about 2,000 employees. Production of Caterpillar products at the Gosselies site ended during the second quarter of 2017. The other operations and functions at the Gosselies site were phased out by the end of the second quarter of 2018. The program concluded in 2018, and we incurred a total of \$647 million of restructuring costs (primarily in 2017) under the program. Those costs were primarily related to employee separation costs, long-lived asset impairments, and other costs which were partially offset by a LIFO inventory decrement benefit.

In September 2015, we announced a large scale restructuring plan (the Plan) including a voluntary retirement enhancement program for qualifying U.S. employees, several voluntary separation programs outside of the United States, additional involuntary programs throughout the company and manufacturing facility consolidations and closures. The largest action among those included in the Plan was related to our European manufacturing footprint which led to the Gosselies, Belgium, facility, closure as discussed above. We incurred \$43 million, \$121 million and \$817 million of restructuring costs associated with these actions in 2019, 2018 and 2017, respectively. The Plan concluded in 2019, and total restructuring costs incurred since inception of the Plan were \$1,831 million.

³ The first quarter of 2019 includes a benefit of \$178 million to adjust unrecognized tax benefits due to the receipt of final regulations providing additional guidance related to the calculation of the mandatory deemed repatriation of non-U.S. earnings due to U.S. tax reform. The fourth quarter of 2018 includes a charge of \$50 million due to an estimated increase in the mandatory deemed repatriation of non-U.S. earnings.

⁴ The third quarter of 2018 includes a benefit of \$154 million due to the revised estimated impact of the write-down of U.S. net deferred tax assets to reflect the reduction in the U.S. corporate tax rate from 35 percent to 21 percent. The third quarter of 2018 also includes a charge of \$59 million to increase the valuation allowance against deferred tax assets for prior years. See Note 6 for additional details.

⁵ The fourth quarter of 2019 and fourth quarter of 2018 include pre-tax pension and other postretirement benefit plan actuarial losses of \$468 million and \$495 million, respectively. See Note 12 for additional information on these costs.

⁶ The fourth quarter of 2018 includes a benefit of \$63 million from reductions in the valuation allowance against U.S. state deferred tax assets. See Note 6 for additional information.

ITEM 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

Not Applicable.

ITEM 9A. Controls and Procedures.

Disclosure Controls and Procedures

An evaluation was performed under the supervision and with the participation of the company's management, including the Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of the design and operation of the company's disclosure controls and procedures, as that term is defined in Rule 13a-15(e) under the Exchange Act, as of the end of the period covered by this annual report. Based on that evaluation, the CEO and CFO concluded that the company's disclosure controls and procedures were effective as of the end of the period covered by this annual report.

Management's Report on Internal Control Over Financial Reporting

Management's report on the company's internal control over financial reporting as of December 31, 2019 is included on page 49 of Part II, Item 8 "Financial Statements and Supplementary Data." The effectiveness of the company's internal control over financial reporting as of December 31, 2019 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm. Their report appears on pages 50-51 of Part II, Item 8 "Financial Statements and Supplementary Data."

Changes in Internal Control over Financial Reporting

During the last fiscal quarter, there has been no significant change in the company's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

ITEM 9B. Other Information.

Not Applicable.

PART III

ITEM 10. Directors, Executive Officers and Corporate Governance.

Identification of Directors and Business Experience

Information required by this Item is incorporated by reference from the 2020 Proxy Statement.

Identification of Executive Officers and Business Experience

Information required by this Item appears in Item 1C of this Form 10-K.

Family Relationships

There are no family relationships between the officers and directors of the company.

Legal Proceedings Involving Officers and Directors

Information required by this Item is incorporated by reference from the 2020 Proxy Statement.

Audit Committee Financial Expert

Information required by this Item is incorporated by reference from the 2020 Proxy Statement.

Identification of Audit Committee

Information required by this Item is incorporated by reference from the 2020 Proxy Statement.

Shareholder Recommendation of Board Nominees

Information required by this Item is incorporated by reference from the 2020 Proxy Statement.

Compliance with Section 16(a) of the Exchange Act

If applicable, information required by this Item relating to compliance with Section 16(a) of the Exchange Act is incorporated by reference from the 2020 Proxy Statement.

Code of Ethics

Our Worldwide Code of Conduct (Code), first published in 1974 and most recently updated in 2015, sets a high standard for honesty and ethical behavior by every director and employee, including the principal executive officer, principal financial officer and principal accounting officer. The Code is posted on our website at www.Caterpillar.com/code. To obtain a copy of the Code at no charge, submit a written request to the Corporate Secretary at 510 Lake Cook Road, Suite 100, Deerfield, IL 60015-4971. We post on our website at www.Caterpillar.com/code any required amendments to or waivers granted under our Code pursuant to SEC or New York Stock Exchange disclosure rules.

ITEM 11. Executive Compensation.

Information required by this Item is incorporated by reference from the 2020 Proxy Statement.

ITEM 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Information required by this Item relating to security ownership of certain beneficial owners and management is incorporated by reference from the 2020 Proxy Statement.

Information required by this Item relating to securities authorized for issuance under equity compensation plans is included in the following table:

Equity Compensation Plan Information (as of December 31, 2019)			
Plan category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted-average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders	17,467,057	\$ 99.29	40,754,720
Equity compensation plans not approved by security holders	N/A	N/A	N/A
Total	17,467,057	\$ 99.29	40,754,720

ITEM 13. Certain Relationships and Related Transactions, and Director Independence.

Information required by this Item is incorporated by reference from the 2020 Proxy Statement.

ITEM 14. Principal Accountant Fees and Services.

Information required by this Item is incorporated by reference from the 2020 Proxy Statement.

CHAIRMAN & CEO MESSAGE

DEAR FELLOW SHAREHOLDERS

We will emerge from the pandemic as an even stronger company, well-positioned for long-term profitable growth.

In a year of unexpected and unparalleled challenges, I am proud of our global team's performance as they provided essential products and services that enabled our customers to support a world in need.

By prioritizing employees' safety, health and well-being, we remained both safe and productive as we managed through the pandemic. Despite the difficult environment, we achieved the best safety performance on record for the second consecutive year – a testament to our employees' safety-first mindset.

We finished the year with an operating profit margin of 10.9% and were pleased our adjusted operating profit margin of 11.8% was within the targeted range we announced during our 2019 investor day. We expected it would be difficult to achieve our targeted range due to the impact of COVID-19 and our intent to continue investing in new products and services to drive long-term profitable growth.

Also notable, 2020 marked the 27th consecutive year we paid higher annual dividends to shareholders. We are proud of our status as a Dividend Aristocrat.

EXECUTING OUR STRATEGY FOR PROFITABLE GROWTH

Successfully navigating the many obstacles we faced in 2020 has only strengthened our resolve that we have the right strategy – based on operational excellence, expanded offerings and services – and that we are well-positioned for long-term profitable growth.

The operational excellence element of our strategy has served us well, resulting in disciplined management of structural costs. By carefully managing costs and improving efficiencies, we went into the pandemic with a strong financial position. We continued to invest in expanded offerings and services to help make our customers more successful.

An example of continued investment in expanded offerings is our new GX line of excavators launched last fall in China. The GX series provides a more competitive offering by delivering the durability, safety and services customers expect, plus up to 15% lower fuel consumption than prior models and up to 25% lower maintenance cost.

We have intensified our focus on growing services by working more closely with our dealers to help our customers be even more successful. Through integrated services offerings like Customer Value Agreements (CVAs), dealers can better support customers throughout the lifecycle of their equipment, with an easy-to-buy, easy-to-own experience. Last year we increased the number of products sold with CVAs and the average length of the agreements.

Through our digital strategy, we improved our customers' ability to conveniently manage their equipment and conduct business with Caterpillar and our dealers. Our digital investments allow us to leverage our more than one million connected machines and engines to expand our offerings and services.

GIVING BACK THROUGH THE CATERPILLAR FOUNDATION

The record level of support for worldwide COVID-19 relief efforts through the Caterpillar Foundation speaks to our Caterpillar team's generosity. The Foundation donated \$10 million (USD) to directly support COVID-19 response and help impacted organizations.

CATERPILLAR INNOVATION, THEN AND NOW

In 2020, Caterpillar celebrated 95 years since the Holt Manufacturing Company and C.L. Best Tractor Co. merged to form the Caterpillar Tractor Co. From then until now, our business has grown tremendously, expanded globally and played a role in projects that have shaped the world's history. While many things have changed since our earliest days, our commitment to safety, quality and customer success has remained foundational.

Benjamin Holt

C.L. Best

BUILDING A BETTER, MORE SUSTAINABLE WORLD

Caterpillar has a long-standing commitment to sustainability. It is one of our five Values in Action, which are the foundation of who we are and what we do every day. We are reducing emissions in our operations and are investing to help our customers meet their climate-related objectives. Our 2020 Sustainability Report features our new sustainability goals, several of which we established to enhance our future performance and impact.

We continue executing our strategy for profitable growth, improving operational excellence and investing in expanded offerings and services to help our customers succeed.

We are grateful for our team's accomplishments in 2020 as they put safety first, remained productive and continued to deliver for our customers and stakeholders. It was not the year we were expecting as we celebrated 95 years of operation. Yet, for nearly a century, we have overcome many challenges, and once again, our employees rose to the occasion, laying the foundation for many more years of success. We will emerge from the pandemic as an even stronger company, well-positioned for long-term profitable growth.

Jim Umpleby
Chairman & CEO

In 1904, founder Benjamin Holt invented the track-type tractor when he realized that heavy machines needed an even distribution of weight to move over soft soils. Today, our tradition of innovation continues with products and services from a family of brands that span industries and support customers around the globe – enabling progress and helping build a better world. Our innovation is no longer limited to just a few ingenious minds. Caterpillar today is a diverse and global team of makers, problem solvers and world builders who pursue excellence in all they do.

2020 PERFORMANCE AT A GLANCE

Caterpillar delivered solid operational performance despite a 22% decline in sales and revenues for the year. We remained disciplined and focused on maintaining control of our structural costs, which helped us achieve an operating profit margin of 10.9%. Adjusted operating profit margin of 11.8% was within our 2019 Investor Day target range. We generated operating cash flow of \$6.3 billion and, as a result, we were able to return \$3.4 billion to shareholders through dividends and share repurchases, while returning 110% of Machinery, Energy & Transportation (ME&T) free cash flow* to shareholders. We maintained our dividend in 2020 and paid dividends of \$2.2 billion, continuing our status as a Dividend Aristocrat.

2020 END-MARKET HIGHLIGHTS

CONSTRUCTION INDUSTRIES

Lower end-user demand and changes in dealer inventories resulted in lower sales in 2020. End-user demand was driven by weaker construction activity, primarily in North America.

RESOURCE INDUSTRIES

Lower end-user demand for equipment supporting heavy construction and quarry and aggregates drove lower sales in 2020. Mining equipment demand was also down, though to a lesser extent, and was impacted by mining company delays in capital expenditures and overall economic uncertainty.

ENERGY & TRANSPORTATION

Declines in North American oil and gas were mainly driven by lower demand for reciprocating engines used in gas compression and lower sales of engine aftermarket parts and turbines and turbine-related services. Transportation, industrial and power generation were also down due to lower demand.

* Includes inter-segment sales

STRATEGY EXECUTION

Caterpillar is committed to improving operating profit and free cash flow while providing better solutions to customers and creating more value for our people, partners and shareholders. We do this through our strategy for profitable growth, which has three pillars: operational excellence, expanded offerings and services. Here's how we executed each of these pillars in 2020:

OPERATIONAL EXCELLENCE

Continuously improving our core competencies, including safety, quality, Lean and a competitive and flexible cost structure.

- Delivered our best safety performance on record, as measured by recordable injury frequency, while providing essential products and services.
- Leveraged our Lean culture to adapt and problem solve during the pandemic to continuously deliver customer value. Continued to focus on Lean thinking and cost management to support services and aftermarket growth.
- Implemented an enhanced sales and operation planning (S&OP) process, which resulted in better alignment with dealers. This enables Caterpillar to be more responsive to changes in customer demand and allows dealers to better manage their inventories to support customer demand.
- Focused on manufacturing flexibility, working across the value chain, reducing lead times, and becoming leaner to meet fluctuations in demand cost-effectively.

EXPANDED OFFERINGS

A growing equipment portfolio that meets a broad range of customer needs.

- Launched the GX line of excavators in China to provide customers even more choices to meet their needs while delivering up to 15% lower fuel consumption and up to 25% lower maintenance cost.
- Introduced the new D9 GC that is versatile enough to be used in various applications, such as ripping overburden, production dozing, stockpiling, winching, site maintenance, fleet support and reclamation.
- Collaborated with a South American customer to supply a zero-emissions battery-powered locomotive for yard and switching applications through our Progress Rail subsidiary.
- Expanded our combined heat and power solutions, including the G3520H, the first EPA-certified gas fuel generator for standby power.
- Introduced Cat® Command for Compaction, an operator-assisted, semi-autonomous technology that automates the compaction process based on operator inputs while increasing consistency, coverage and safety.
- Introduced 23 new lower-cost Cat GC standby generator sets ranging from 33-1100 kVA to reach new retail electric power customers.

SERVICES

The many ways, including digital offerings, that we help customers succeed after purchasing a product.

- Supported customers affected by the pandemic through Cat Financial's Customer Care Program, which offered payment relief arrangements to meet a range of customer situations.
- Maintained high aftermarket parts availability throughout the pandemic, ensuring our customers were able to continue to perform essential work.
- Built on our 30 years of success in autonomy, with our customers moving more than 2.76 billion tonnes autonomously with zero lost-time injuries.
- Improved the quality of our data-driven aftermarket opportunity management tools to help dealers provide customers with relevant information to help simplify their service and repair decisions.
- Optimized our parts distribution network efficiency through deployments of autonomous technology, which will increase warehouse density and velocity while enhancing safety to further support a zero-injury culture.
- Announced the acquisition of Weir's Oil & Gas business, now SPM Oil & Gas, expanding our global presence to serve our Oil & Gas customers with an enhanced range of well service products and over 50 service centers.
- Increased percentage of Cat parts sold online, with a record number of customers purchasing online.

- Enhanced The Cat Rental Store customer portal features, including telematics, enabling customers to now see equipment location, fuel levels, and time utilization, leading to rapid adoption.

CORPORATE GOVERNANCE

Caterpillar's governance structure provides leadership, accountability and transparency to the management of the company and its businesses. Our corporate governance framework serves the interests of shareholders with the highest standards of responsibility, integrity and commitment to enhance shareholder value over the long term. These standards are developed and implemented by our Board of Directors and the Executive Office. Learn more at www.caterpillar.com/governance.

PART I

Item 1. Business.

General

Originally organized as Caterpillar Tractor Co. in 1925 in the State of California, our company was reorganized as Caterpillar Inc. in 1986 in the State of Delaware. As used herein, the term “Caterpillar,” “we,” “us,” “our” or “the company” refers to Caterpillar Inc. and its subsidiaries unless designated or identified otherwise.

Overview

With 2020 sales and revenues of \$41.748 billion, Caterpillar is the world’s leading manufacturer of construction and mining equipment, diesel and natural gas engines, industrial gas turbines and diesel-electric locomotives. The company principally operates through its three primary segments - Construction Industries, Resource Industries and Energy & Transportation - and also provides financing and related services through its Financial Products segment. Caterpillar is also a leading U.S. exporter. Through a global network of independent dealers and direct sales of certain products, Caterpillar builds long-term relationships with customers around the world.

Currently, we have five operating segments, of which four are reportable segments and are described below.

Categories of Business Organization

1. **Machinery, Energy & Transportation** — Caterpillar Inc. and its subsidiaries, excluding Financial Products. Machinery, Energy & Transportation information relates to the design, manufacturing and marketing of our products.

2. **Financial Products** — Our finance and insurance subsidiaries, primarily Caterpillar Financial Services Corporation (Cat Financial) and Caterpillar Insurance Holdings Inc. (Insurance Services). Financial Products information relates to the financing to customers and dealers for the purchase and lease of Caterpillar and other equipment.

Other information about our operations in 2020, including certain risks associated with our operations, is included in Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

Construction Industries

Our Construction Industries segment is primarily responsible for supporting customers using machinery in infrastructure, forestry and building construction. The majority of machine sales in this segment are made in the heavy and general construction, rental, quarry and aggregates markets and mining.

The nature of customer demand for construction machinery varies around the world. Customers in developing economies often prioritize purchase price in making their investment decisions, while customers in developed economies generally weigh productivity and other performance criteria that contribute to lower owning and operating costs over the lifetime of the machine. To meet customer expectations in developing economies, Caterpillar developed differentiated product offerings that target customers in those markets, including our SEM brand machines. We believe that these customer-driven product innovations enable us to compete more effectively in developing economies. The majority of Construction Industries' research and development spending in 2020 focused on the next generation of construction machines.

The competitive environment for construction machinery is characterized by some global competitors and many regional and specialized local competitors. Examples of global competitors include CASE (part of CNH Industrial N.V.), Deere Construction & Forestry (part of Deere & Company), Doosan Infracore Co., Ltd., Hitachi Construction Machinery Co., Ltd., Hyundai Construction Equipment Co., Ltd., J.C. Bamford Excavators Ltd., Kobelco Construction Machinery (part of Kobe Steel, Ltd), Komatsu Ltd., Kubota Farm & Industrial Machinery (part of Kubota Corporation), and Volvo Construction Equipment (part of the Volvo Group). As an example of regional and local competitors, our competitors in China also include Guangxi LiuGong Machinery Co., Ltd., Longking Holdings Ltd., Sany Heavy Industry Co., Ltd., XCMG Construction Machinery Co., Ltd., Shandong Lingong Construction Machinery Co., Ltd. (SDLG, part of the Volvo Group) and Shantui Construction Machinery Co., Ltd., (part of Shandong Heavy Industry Group Co.). Each of these companies has varying product lines that compete with Caterpillar products, and each has varying degrees of regional focus.

The Construction Industries product portfolio includes the following machines and related parts and work tools:

· asphalt pavers	· forestry excavators	· small and medium
· backhoe loaders	· motorgraders	track-type tractors
· compactors	· pipelayers	· track-type loaders
· cold planers	· road reclaimers	· wheel excavators
· compact track and	· site prep tractors	· compact, small and
multi-terrain loaders	· skid steer loaders	medium wheel loaders
· mini, small, medium	· telehandlers	· utility vehicles
and large excavators		

Resource Industries

The Resource Industries segment is primarily responsible for supporting customers using machinery in mining, heavy construction, and quarry and aggregates. Caterpillar offers a broad product range and services to deliver comprehensive solutions for our customers. We develop and manufacture high productivity equipment for both surface and underground mining operations around the world, as well as provide drivetrains, hydraulic systems, electronics and software for Cat machines and engines. Our equipment is used to extract and haul copper, iron ore, coal, oil sands, aggregates, gold and other minerals and ores. In addition to equipment, Resource Industries also develops and sells technology products and services to provide customers fleet management systems, equipment management analytics and autonomous machine capabilities.

Customers in most markets place an emphasis on equipment that is highly productive, reliable and provides the lowest total cost of ownership over the life of the equipment. In some developing markets, customers often prioritize purchase price in making their investment decisions. We believe our ability to control the integration and design of key machine components represents a competitive advantage. Our research and development efforts remain focused on providing customers the lowest total cost of ownership enabled through the highest quality, most productive products and services in the industry.

The competitive environment for Resource Industries consists of a few larger global competitors that compete in several of the markets that we serve and a substantial number of smaller companies that compete in a more limited range of products, applications, and regional markets. Our global surface competitors include Deere Construction & Forestry (part of Deere & Company), Epiroc AB, Hitachi Construction Machinery Co., Ltd., Komatsu Ltd., Liebherr-International AG, Sandvik AB, and Volvo Construction Equipment. Our global underground competitors include Epiroc AB, Komatsu Ltd., and Sandvik AB.

The Resource Industries product portfolio includes the following machines and related parts:

· electric rope shovels	· large mining trucks	· wheel dozers
· draglines	· longwall miners	· landfill compactors
· hydraulic shovels	· large wheel loaders	· soil compactors
· rotary drills	· off-highway trucks	· machinery components
· hard rock vehicles	· articulated trucks	· autonomous ready vehicles and solutions
· large track-type tractors	· wheel tractor scrapers	· select work tools

Energy & Transportation

Our Energy & Transportation segment supports customers in oil and gas, power generation, marine, rail and industrial applications, including Cat® machines. The product and services portfolio includes reciprocating engines, generator sets, gas turbines and turbine-related services, the remanufacturing of Caterpillar engines and components and remanufacturing services for other companies, diesel-electric locomotives and other rail-related products and services and product support of on-highway vocational trucks for North America.

Regulatory emissions standards require us to continue to make investments as new products and new regulations are introduced. Ongoing compliance with these regulations remains a focus. Emissions compliance in developing markets is complex due to rapidly evolving and unique requirements where enforcement processes can often vary. We employ robust product development and manufacturing processes to help us comply with these regulations.

The competitive environment for reciprocating engines in marine, oil and gas, industrial and electric power generation systems along with turbines in oil and gas and electric power generation consists of a few larger global competitors that compete in a variety of markets that Caterpillar serves, and a substantial number of smaller companies that compete in a limited-size product range, geographic region and/or application. Principal global competitors include Cummins Inc., Deutz AG, INNIO, Rolls-Royce Power Systems and Wärtsilä Corp. Other competitors, such as Fiat Industrial SpA (CNHI), GE Power, Kawasaki Heavy Industries Energy System & Plant Engineering, MAN Energy Solutions (VW), Mitsubishi Heavy Industries Ltd., Siemens Power and Gas, Volvo Penta AB, Weichai Power Co., Ltd., and other emerging market competitors compete in certain markets in which Caterpillar competes. An additional set of competitors, including Aggreko plc, Baker Hughes Co., Generac Holdings, Kohler Power Systems, and others, are primarily packagers who source engines and/or other components from domestic and international suppliers and market products regionally and internationally through a variety of distribution channels. In rail-related businesses, our global competitors include Alstom SA, CRRC Corp., LTD., The Greenbrier Companies, Siemens Mobility, Voestalpine AG, Vossloh AG and Wabtec Freight. We also compete with other companies on a more limited range of products, services and/or geographic regions.

The Energy & Transportation portfolio includes the following products and related parts:

- Reciprocating engine powered generator sets
- Reciprocating engines supplied to the industrial industry as well as Caterpillar machinery
- Integrated systems used in the electric power generation industry
- Turbines, centrifugal gas compressors and related services
- Reciprocating engines and integrated systems and solutions for the marine and oil and gas industries
- Remanufactured reciprocating engines and components
- Diesel-electric locomotives and components and other rail-related products and services

Financial Products Segment

The business of our Financial Products Segment is primarily conducted by Cat Financial, Insurance Services and their respective subsidiaries and affiliates. Cat Financial is a wholly owned finance subsidiary of Caterpillar Inc. and it provides retail and wholesale financing to customers and dealers around the world for Caterpillar products, as well as financing for vehicles, power generation facilities and marine vessels that, in most cases, incorporate Caterpillar products. Retail financing is primarily comprised of installment sale contracts and other equipment-related loans, working capital loans, finance leases and operating leases. Wholesale financing to Caterpillar dealers consists primarily of inventory and rental fleet financing. In addition, we purchase short-term wholesale trade receivables from Caterpillar. The various financing plans offered by Cat Financial are designed to support sales of Caterpillar products and generate financing income for Cat Financial. A significant portion of Cat Financial's activity is conducted in North America, with additional offices and subsidiaries in Latin America, Asia/Pacific, Europe, Africa and the Middle East.

For almost 40 years, Cat Financial has been providing financing in the various markets in which it participates, contributing to its knowledge of asset values, industry trends, product structuring and customer needs.

In certain instances, Cat Financial's operations are subject to supervision and regulation by state, federal and various foreign governmental authorities, and may be subject to various laws and judicial and administrative decisions imposing various requirements and restrictions which, among other things, (i) regulate credit granting activities and the administration of loans, (ii) establish maximum interest rates, finance charges and other charges, (iii) require disclosures to customers and investors, (iv) govern secured transactions, (v) set collection, foreclosure, repossession and other trade practices and (vi) regulate the use and reporting of information related to a borrower's credit experience. Cat Financial's ability to comply with these and other governmental and legal requirements and restrictions affects its operations.

Cat Financial's retail loans (totaling 49 percent*) include:

- Loans that allow customers and dealers to use their Caterpillar equipment or other assets as collateral to obtain financing.

- Installment sale contracts, which are equipment loans that enable customers to purchase equipment with a down payment or trade-in and structure payments over time.

Cat Financial's retail leases (totaling 37 percent*) include:

- Finance (non-tax) leases, where the lessee for tax purposes is considered to be the owner of the equipment during the term of the lease, that either require or allow the customer to purchase the equipment for a fixed price at the end of the term.
- Tax leases that are classified as either operating or finance leases for financial accounting purposes, depending on the characteristics of the lease. For tax purposes, Cat Financial is considered the owner of the equipment.
- Governmental lease-purchase plans in the U.S. that offer low interest rates and flexible terms to qualified non-federal government agencies.

Cat Financial also purchases short-term receivables from Caterpillar (12 percent*).

Cat Financial's wholesale loans and leases (2 percent*) include inventory/rental programs, which provide assistance to dealers by financing their new Caterpillar inventory and rental fleets.

*Indicates the percentage of Cat Financial's total portfolio at December 31, 2020. We define total portfolio as total finance receivables (net of unearned income and allowance for credit losses) plus equipment on operating leases, less accumulated depreciation. For more information on the above and Cat Financial's concentration of credit risk, please refer to Note 7 — "Cat Financial Financing Activities" of Part II, Item 8 "Financial Statements and Supplementary Data."

Cat Financial operates in a highly competitive environment, with financing for users of Caterpillar equipment available through a variety of sources, principally commercial banks and finance and leasing companies. Cat Financial's competitors include, Australia and New Zealand Banking Group Limited, Banc of America Leasing & Capital LLC, BNP Paribas Leasing Solutions Limited, Wells Fargo Equipment Finance Inc., Societe General and various other banks and finance companies. In addition, many of our manufacturing competitors own financial subsidiaries, such as John Deere Capital Corporation, Komatsu Financial L.P., Kubota Credit Corporation and Volvo Financial Services, which utilize many below-market interest rate programs (funded by the manufacturer) to assist machine sales. Caterpillar and Cat Financial work together to provide a broad array of financial merchandising programs around the world to meet these competitive offers.

Cat Financial's financial results are largely dependent upon the ability of Caterpillar dealers to sell equipment and customers' willingness to enter into financing or leasing agreements. Cat Financial is also affected by, among other things, the availability of funds from its financing sources, its cost of funds relative to its competitors and general economic conditions such as inflation and market interest rates.

Cat Financial has a match-funding policy that addresses interest rate risk by aligning the interest rate profile (fixed or floating rate) of its debt portfolio with the interest rate profile of its receivables portfolio within predetermined ranges on an ongoing basis. In connection with that policy, Cat Financial uses interest rate derivative instruments to modify the debt structure to match assets within the receivables portfolio. This matched funding reduces the volatility of margins between interest-bearing assets and interest-bearing liabilities, regardless of which direction interest rates move. For more information regarding match funding, please see Note 4 — "Derivative financial instruments and risk management" of Part II, Item 8 "Financial Statements and Supplementary Data." See also the risk factors associated with our financial products business included in Item 1 A. of this Form 10-K.

In managing foreign currency risk for Cat Financial's operations, the objective is to minimize earnings volatility resulting from conversion and the remeasurement of net foreign currency balance sheet positions, and future transactions denominated in foreign currencies. This policy allows the use of foreign currency forward, option and cross currency contracts to offset the risk of currency mismatch between the assets and liabilities, and exchange rate risk associated with future transactions denominated in foreign currencies.

Cat Financial provides financing only when certain criteria are met. Credit decisions are based on a variety of credit quality factors including prior payment experience, customer financial information, credit ratings, loan-to-value ratios and other internal metrics. Cat Financial typically maintains a security interest in retail-financed equipment and requires physical damage insurance coverage on financed equipment. Cat Financial finances a significant portion of Caterpillar dealers' sales and inventory of Caterpillar equipment throughout the world. Cat Financial's competitive position is improved by marketing programs offered in conjunction with Caterpillar and/or Caterpillar dealers. Under these programs, Caterpillar, or the dealer, funds an amount at the outset of the transaction, which Cat Financial then recognizes as revenue over the term of the financing. We believe that these marketing programs provide Cat Financial a significant competitive advantage in financing Caterpillar products.

Caterpillar Insurance Company, a wholly owned subsidiary of Caterpillar Insurance Holdings Inc., is a U.S. insurance company domiciled in Missouri and primarily regulated by the Missouri Department of Insurance. Caterpillar Insurance Company is licensed to conduct property and casualty insurance business in 50 states, the District of Columbia and Guam, and as such, is also regulated in those jurisdictions. The State of Missouri acts as the lead regulatory authority and monitors Caterpillar Insurance Company's financial status to ensure that it is in compliance with minimum solvency requirements, as well as other financial ratios prescribed by the National Association of Insurance Commissioners. Caterpillar Insurance Company is also licensed to conduct insurance business through a branch in Zurich, Switzerland and, as such, is regulated by the Swiss Financial Market Supervisory Authority.

Caterpillar Life Insurance Company, a wholly owned subsidiary of Caterpillar, is a U.S. insurance company domiciled in Missouri and primarily regulated by the Missouri Department of Insurance. Caterpillar Life Insurance Company is licensed to conduct life and accident and health insurance business in 26 states and the District of Columbia and, as such, is also regulated in those jurisdictions. The State of Missouri acts as the lead regulatory authority and it monitors the financial status to ensure that it is in compliance with minimum solvency requirements, as well as other financial ratios prescribed by the National Association of Insurance Commissioners. Caterpillar Life Insurance Company provides reinsurance coverage to Caterpillar Insurance Company. Specifically, Caterpillar Life Insurance Company has entered into a reinsurance agreement with Caterpillar Insurance Company, assuming 100% of the risk of an Accident and Health Stop Loss Insurance Policy to cover a Caterpillar Voluntary Employees' Benefits Association (VEBA) Trust for medical losses sustained by a select group of Caterpillar retirees and dependents.

Caterpillar Insurance Co. Ltd., a wholly owned subsidiary of Caterpillar Insurance Holdings Inc., is a captive insurance company domiciled in Bermuda and regulated by the Bermuda Monetary Authority. Caterpillar Insurance Co. Ltd. holds a Class 2 license (as defined by the Bermuda Insurance Amendment Act of 1995), which primarily insures its parent and affiliates. Caterpillar Insurance Co. Ltd. also provides reinsurance to Caterpillar Insurance Company under quota share reinsurance agreements for contractual liability and contractors' equipment programs in the United States. Finally, Caterpillar Insurance Co. Ltd. holds a Class B license to provide life and disability reinsurance covering Caterpillar Inc.'s International employee benefits program. The Bermuda Monetary Authority is responsible for monitoring Caterpillar Insurance Co. Ltd.'s compliance with solvency requirements, and requires an Annual Financial Filing for this purpose.

Caterpillar Product Services Corporation (CPSC), a wholly owned subsidiary of Caterpillar, is a warranty company domiciled in Missouri. CPSC previously conducted a machine extended service contract program in Germany and France by providing machine extended warranty reimbursement protection to dealers in Germany and France. The program was discontinued effective January 1, 2013, though CPSC continues to provide extended warranty reimbursement protection under existing contracts.

Caterpillar Insurance Services Corporation, a wholly owned subsidiary of Caterpillar Insurance Holdings Inc., is a Tennessee insurance agency licensed in all 50 states, the District of Columbia and Guam. It provides insurance services for all property and casualty and life and health lines of business.

Caterpillar's insurance group provides protection and service for claims under the following programs:

- Contractual Liability Insurance to insure certain service contract obligations of Caterpillar and its affiliates, Caterpillar dealers and original equipment manufacturers (OEMs).
- Cargo reinsurance for the worldwide cargo risks of Caterpillar products.
- Contractors' Equipment Physical Damage Insurance for equipment manufactured by Caterpillar or OEMs, which is leased, rented or sold by third party dealers to customers.

- General liability, employer's liability, auto liability and property insurance for Caterpillar.
- Life, health and disability reinsurance for Caterpillar's international employee benefits program (non-U.S.).
- Reinsurance to cover VEBA Trust for medical claims of certain Caterpillar retirees and dependents.
- Brokerage and insurance services for property and casualty and life and health business.

Competitive Environment

Caterpillar products and product support services are sold worldwide into a variety of highly competitive markets. In all markets, we compete on the basis of product performance, customer service, quality and price. From time to time, the intensity of competition results in price discounting in a particular industry or region. Such price discounting puts pressure on margins and can negatively impact operating profit. Outside the United States, certain competitors enjoy competitive advantages inherent to operating in their home countries or regions.

Raw Materials and Component Products

We source our raw materials and manufactured components from suppliers both domestically and internationally. These purchases include unformed materials and rough and finished parts. Unformed materials include a variety of steel products, which are then cut or formed to shape and machined in our facilities. Rough parts include various sized steel and iron castings and forgings, which are machined to final specification levels inside our facilities. Finished parts are ready to assemble components, which are made either to Caterpillar specifications or to supplier developed specifications. We machine and assemble some of the components used in our machines, engines and power generation units and to support our after-market dealer parts sales. We also purchase various goods and services used in production, logistics, offices and product development processes. We maintain global strategic sourcing models to meet our global facilities' production needs while building long-term supplier relationships and leveraging enterprise spend. We expect our suppliers to maintain, at all times, industry-leading levels of quality and the ability to timely deliver raw materials and component products for our machine and engine products. However, in some cases, increases in demand or supply chain disruptions have led to parts and components constraints across some products. We use a variety of agreements with suppliers to protect our intellectual property and processes to monitor and mitigate risks of the supply base causing a business disruption. The risks monitored include supplier financial viability, the ability to increase or decrease production levels, business continuity, quality and delivery.

Patents and Trademarks

We own a number of patents and trademarks, which have been obtained over a period of years and relate to the products we manufacture and the services we provide. These patents and trademarks are generally considered beneficial to our business. We do not regard our business as being dependent upon any single patent or group of patents.

Order Backlog

The dollar amount of backlog believed to be firm was approximately \$14.2 billion at December 31, 2020 and \$13.7 billion at December 31, 2019. Compared with year-end 2019, the order backlog increased in Construction Industries, partially offset by decreases in Energy & Transportation and Resource Industries. Of the total backlog at December 31, 2020, approximately \$3.6 billion was not expected to be filled in 2021.

Dealers and Distributors

We distribute our machines principally through a worldwide organization of dealers (dealer network), 45 located in the United States and 116 located outside the United States, serving 192 countries. We sell reciprocating engines principally through the dealer network and to other manufacturers for use in products. We also sell some of the reciprocating engines manufactured by our subsidiary Perkins Engines Company Limited through its worldwide network of 92 distributors covering 183 countries. We sell the FG Wilson branded electric power generation systems primarily manufactured by our subsidiary Caterpillar Northern Ireland Limited through its worldwide network of 150 distributors covering 109 countries. We also sell some of the large, medium speed reciprocating engines under the MaK brand through a worldwide network of 20 distributors covering 130 countries.

Our dealers do not deal exclusively with our products; however, in most cases sales and servicing of our products are the dealers' principal business. We sell some products, primarily turbines and locomotives, directly to end customers through sales forces employed by the company. At times, these employees are assisted by independent sales representatives.

While the large majority of our worldwide dealers are independently owned and operated, we own and operate a dealership in Japan that covers approximately 80% of the Japanese market: Nippon Caterpillar Division. We are currently operating this Japanese dealer directly and we report its results in the All Other operating segment. There are also three independent dealers in the Southern Region of Japan.

For Caterpillar branded products, the company's relationship with each of its independent dealers is memorialized in standard sales and service agreements. Pursuant to these agreements, the company grants the dealer the right to purchase and sell its products and to service the products in a specified geographic service territory. The company establishes prices to dealers after receiving input from dealers on transactional pricing in the marketplace. The company also agrees to defend its intellectual property and to provide warranty and technical support to the dealer. The agreement further grants the dealer a non-exclusive license to use the company's trademarks, service marks and brand names. In some instances, a separate trademark agreement exists between the company and a dealer.

In exchange for these rights, the agreement obligates the dealer to develop and promote the sale of the company's products to current and prospective customers in the dealer's service territory. Each dealer agrees to employ adequate sales and support personnel to market, sell and promote the company's products, demonstrate and exhibit the products, perform the company's product improvement programs, inform the company concerning any features that might affect the safe operation of any of the company's products and maintain detailed books and records of the dealer's financial condition, sales and inventories and make these books and records available at the company's reasonable request.

These sales and service agreements are terminable at will by either party primarily upon 90 days written notice.

Human Capital

Core Values

Caterpillar's global workforce is united by Our Values In Action, Caterpillar's Code of Conduct. Integrity, Excellence, Teamwork, Commitment and Sustainability provide the foundation for our values-based culture. Our diversity and inclusion principles are embedded in our values. Our values unite us, and reflect our diverse cultures, languages, geographies, and businesses, as one Caterpillar team.

Health and Safety

The health and safety of our employees is an important focus at Caterpillar, and we strive to continually reduce our recordable injuries. As part of this focus on health and safety, Caterpillar has established a peer to peer safety mentorship and education program for manufacturing new hires to accelerate acclimation to our safety culture in many global locations. In 2020, the Company achieved a recordable injury frequency rate of 0.42, compared to the 2019 recordable injury frequency rate of 0.43.

The COVID-19 pandemic has further reinforced the importance of a safe and healthy workforce. In response to the pandemic, the Company implemented safeguards to protect our essential employees, including increased frequency of cleaning and disinfecting, social distancing practices, face coverings, temperature screening and other measures consistent with specific regulatory requirements and guidance from health authorities. We also instituted travel restrictions and remote work, for employees who were able to work from home.

Talent Development and Training

In addition to our focus on values and safety, we strive to continually attract, develop, engage, and retain a high-performing diverse global team that executes our enterprise strategy of long-term profitable growth.

We are committed to employee development and helping them reach their full potential, by making on-going investments in our team. Our global internships, engineering co-ops, and career programs for engineering, marketing, and manufacturing provide development opportunities for early career employees. We also have a continual focus on strengthening technical, professional and leadership capabilities at every level. Strategic talent reviews and succession planning occur at a minimum, annually, across our businesses.

Our leadership development programs and focus on encouraging a variety of experiences help employees broaden understanding and increase perspective. For example, in Africa and the Middle East, we have established a program designed to upskill our existing talent pipeline and prepare them for future leadership in the region. A diverse team of professionals representing 26 different nationalities participated in the inaugural program.

Additionally, skill-based programs to upskill our manufacturing employees are developed locally and tailored to the specific needs of the business. In China, we continue to invest in programs that encourage women to pursue engineering management and leadership roles. In India, we tailored recruiting campaigns and on-site benefits to attract female employees. In 2020, Caterpillar, along with other companies across industries formed the OneTen coalition. The coalition is committed to upskill, hire and advance Black Americans over the next 10 years into family-sustaining careers.

Diversity and Inclusion

We are committed to fostering a diverse workforce and an inclusive environment. Our 14 Employee Resource Groups (ERGs), sponsored and supported by leadership, are integral to ensuring different voices and perspectives contribute to our strategy for long term profitable growth. Our ERGs partner with recruiters to help build relationships and recruit diverse talent through National Society of Black Engineers, Society of Hispanic Professional Engineers, Society of Women Engineers and Thurgood Marshall College Fund.

Our ERGs further engage our employees, helping contribute to development and retention. For example, Caterpillar's Latino Connection sponsors a mentoring program that connects diverse employees with senior leaders who can support their career goals through on-the-job project experience and leadership development. Additionally, WE Lead, Women Enabling Leadership, sponsored by our Women's Initiative Network engages female employees in early to mid-level management to help strengthen our female leader pipeline.

Compensation, Benefits and Employee Insights

Providing competitive benefits and compensation underpins our commitment to our engaged and productive employees. Our pay-for-performance philosophy aligns employee's individual contributions, behaviors and business results with individual rewards. Our comprehensive Total Health programs focus on purpose, as well as physical, emotional, financial, and social health. The annual Employee Insights Survey provides all employees the opportunity to confidentially share their perspectives and engages leaders to listen, learn and respond to employee feedback.

Employment

Management aligns employment levels with the needs of the business. We believe we have the appropriate human capital resources to successfully operate and deliver our enterprise strategy. As of December 31, 2020, we employed about 97,300 full-time persons of whom approximately 57,000 were located outside the United States. In the United States, we employed approximately 40,300 full-time persons, most of whom are at-will employees and, therefore, not subject to any type of employment contract or agreement. At select business units, we have hired certain highly specialized employees under employment contracts that specify a term of employment, pay and other benefits.

Full-Time Employees at Year-End

	2020	2019
Inside U.S.	40,300	43,600
Outside U.S.	57,000	58,700
Total	97,300	102,300
By Region:		
North America	40,500	43,900
EAME	17,700	18,400
Latin America	15,900	16,400
Asia/Pacific	23,200	23,600
Total	97,300	102,300

As of December 31, 2020, there were approximately 6,900 U.S. hourly production employees who were covered by collective bargaining agreements with various labor unions, including The United Automobile, Aerospace and Agricultural Implement Workers of America (UAW), The International Association of Machinists and The United Steelworkers. Outside the United States, the company enters into employment contracts and agreements in those countries in which such relationships are mandatory or customary. The provisions of these agreements generally correspond in each case with the required or customary terms in the subject jurisdiction.

Environmental Matters

The company is regulated by federal, state and international environmental laws governing our use, transport and disposal of substances and control of emissions. In addition to governing our manufacturing and other operations, these laws often impact the development of our products, including, but not limited to, required compliance with air emissions standards applicable to internal combustion engines. We have made, and will continue to make, significant research and development and capital expenditures to comply with these emissions standards.

We are engaged in remedial activities at a number of locations, often with other companies, pursuant to federal and state laws. When it is probable we will pay remedial costs at a site, and those costs can be reasonably estimated, the investigation, remediation, and operating and maintenance costs of the remedial action are accrued against our earnings. Costs are accrued based on consideration of currently available data and information with respect to each individual site, including available technologies, current applicable laws and regulations, and prior remediation experience. Where no amount within a range of estimates is more likely, we accrue the minimum. Where multiple potentially responsible parties are involved, we consider our proportionate share of the probable costs. In formulating the estimate of probable costs, we do not consider amounts expected to be recovered from insurance companies or others. We reassess these accrued amounts on a quarterly basis. The amount recorded for environmental remediation is not material and is included in the line item "Accrued expenses" in Statement 3 — "Consolidated Financial Position at December 31" of Part II, Item 8 "Financial Statements and Supplementary Data." There is no more than a remote chance that a material amount for remedial activities at any individual site, or at all the sites in the aggregate, will be required.

Available Information

The company files electronically with the Securities and Exchange Commission (SEC) required reports on Form 8-K, Form 10-Q, Form 10-K and Form 11-K; proxy materials; ownership reports for insiders as required by Section 16 of the Securities Exchange Act of 1934 (Exchange Act); registration statements on Forms S-3 and S-8, as necessary; and other forms or reports as required. The SEC maintains a website (www.sec.gov) that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. The company maintains a website (www.Caterpillar.com) and copies of our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to these reports filed or furnished with the SEC are available free of charge through our website (www.Caterpillar.com/secfilings) as soon as reasonably practicable after filing with the SEC. Copies of our board committee charters, our board's Guidelines on Corporate Governance Issues, Worldwide Code of Conduct and other corporate governance information are available on our website (www.Caterpillar.com/governance). The information contained on the company's website is not included in, or incorporated by reference into, this annual report on Form 10-K.

Item 1A. Risk Factors.

The statements in this section describe the most significant risks to our business and should be considered carefully in conjunction with Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and the “Notes to Consolidated Financial Statements” of Part II, Item 8 “Financial Statements and Supplementary Data” to this Form 10-K. In addition, the statements in this section and other sections of this Form 10-K, including in Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” include “forward-looking statements” as that term is defined in the Private Securities Litigation Reform Act of 1995 and involve uncertainties that could significantly impact results. Forward-looking statements give current expectations or forecasts of future events about the company or our outlook. You can identify forward-looking statements by the fact they do not relate to historical or current facts and by the use of words such as “believe,” “expect,” “estimate,” “anticipate,” “will be,” “should,” “plan,” “forecast,” “target,” “guide,” “project,” “intend,” “could” and similar words or expressions.

Forward-looking statements are based on assumptions and on known risks and uncertainties. Although we believe we have been prudent in our assumptions, any or all of our forward-looking statements may prove to be inaccurate, and we can make no guarantees about our future performance. Should known or unknown risks or uncertainties materialize or underlying assumptions prove inaccurate, actual results could materially differ from past results and/or those anticipated, estimated or projected.

We undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events or otherwise. You should, however, consult any subsequent disclosures we make in our filings with the SEC on Form 10-Q or Form 8-K.

The following is a cautionary discussion of risks, uncertainties and assumptions that we believe are material to our business. In addition to the factors discussed elsewhere in this report, the following are some of the important factors that, individually or in the aggregate, we believe could make our actual results differ materially from those described in any forward-looking statements. It is impossible to predict or identify all such factors and, as a result, you should not consider the following factors to be a complete discussion of risks, uncertainties and assumptions.

RISKS RELATED TO THE COVID-19 PANDEMIC

The COVID-19 pandemic could materially adversely affect our business, results of operations and/or financial condition.

COVID-19 was identified in late 2019 and has spread globally. The rapid spread has resulted in weaker demand and constrained supply and the implementation of numerous measures to try to contain the virus, such as travel bans and restrictions, quarantines, shelter in place orders and shutdowns. These factors have impacted and may continue to impact all or portions of our workforce and operations.

The COVID-19 pandemic caused a global recession and it is uncertain when a sustained economic recovery may occur. The COVID-19 pandemic has also significantly increased economic and demand uncertainty and has led to a decrease in demand for the Company’s products and services and caused supply chain disruptions. Economic uncertainties could continue to affect demand for the Company’s products and services, the value of the equipment financed or leased, the demand for financing and the financial condition and credit risk of our dealers and customers.

Uncertainties related to the magnitude and duration of the COVID-19 pandemic, including new strains, may significantly adversely affect our business. These uncertainties include: the duration and impact of the resurgence in COVID-19 cases in any country, state, or region; prolonged reduction or closure of the Company’s operations, or a delayed recovery in our operations; disruptions in the supply chain; increased logistics costs; the impact of the pandemic on the Company’s customers and dealers; the impact of disruptions in the global capital markets and/or declines in our financial performance or credit ratings, which could impact the Company’s ability to obtain funding in the future; and the impact of the pandemic on demand for our products and services as discussed above. It is unclear when a sustained economic recovery could occur and what a recovery may look like. All of these factors could materially and adversely affect our business, results of operations and/or financial condition.

The ultimate impact of the COVID-19 pandemic on the Company’s financial and operational results will be determined by the length of time that the pandemic continues, its effect on the demand for the Company’s products and services and the supply chain, as well as the effect of governmental regulations imposed in response to the pandemic. The overall magnitude of the COVID-19 pandemic and the continued fluidity of the situation could materially and adversely impact our business, results of operations and/or financial condition.

MACROECONOMIC RISKS

Our business and the industries we serve are highly sensitive to global and regional economic conditions.

Our results of operations are materially affected by economic conditions globally and regionally and in the particular industries we serve. The demand for our products and services tends to be cyclical and can be significantly reduced in periods of economic weakness characterized by lower levels of government and business investment, lower levels of business confidence, lower corporate earnings, high real interest rates, lower credit activity or tighter credit conditions, perceived or actual industry overcapacity, higher unemployment and lower consumer spending. A prolonged period of economic weakness may also result in increased expenses due to higher allowances for doubtful accounts and potential goodwill and asset impairment charges. Economic conditions vary across regions and countries, and demand for our products and services generally increases in those regions and countries experiencing economic growth and investment. Slower economic growth or a change in the global mix of regions and countries experiencing economic growth and investment could have an adverse effect on our business, results of operations and financial condition.

The energy, transportation and mining industries are major users of our products, including the coal, iron ore, gold, copper, oil and natural gas industries. Customers in these industries frequently base their decisions to purchase our products and services on the expected future performance of these industries, which in turn are dependent in part on commodity prices. Prices of commodities in these industries are frequently volatile and can change abruptly and unpredictably in response to general economic conditions and trends, government actions, regulatory actions, commodity inventories, production and consumption levels, technological innovations, commodity substitutions, market expectations and any disruptions in production or distribution or changes in consumption. Economic conditions affecting the industries we serve may in the future also lead to reduced capital expenditures by our customers. Reduced capital expenditures by our customers are likely to lead to a decrease in the demand for our products and services and may also result in a decrease in demand for aftermarket parts as customers are likely to extend preventative maintenance schedules and delay major overhauls when possible.

The rates of infrastructure spending, commercial construction and housing starts also play a significant role in our results. Our products are an integral component of these activities, and as these activities decrease, demand for our products may be significantly impacted, which could negatively impact our results.

Commodity price changes, material price increases, fluctuations in demand for our products, significant disruptions to our supply chains or significant shortages of material may adversely impact our financial results or our ability to meet commitments to customers.

We are a significant user of steel and many other commodities required for the manufacture of our products. Increases in the prices of such commodities would increase our costs, negatively impacting our business, results of operations and financial condition if we are unable to fully offset the effect of these increased costs through price increases, productivity improvements or cost reduction programs.

We rely on suppliers to produce or secure material required for the manufacture of our products. Production challenges at suppliers (including suppliers of semiconductors), a disruption in deliveries to or from suppliers or decreased availability of raw materials or commodities could have an adverse effect on our ability to meet our commitments to customers or increase our operating costs. On the other hand, in circumstances where demand for our products is less than we expect, we may experience excess inventories and be forced to incur additional costs and our profitability may suffer. Additionally, we have experienced and expect to continue to experience transportation delays for parts, components and finished machines due to significant demands in global transportation and congestion at ports throughout the globe. Our business, competitive position, results of operations or financial condition could be negatively impacted if supply is insufficient for our operations, if significant transportation delays interfere with deliveries, if we experience excess inventories or if we are unable to adjust our production schedules or our purchases from suppliers to reflect changes in customer demand and market fluctuations on a timely basis.

Changes in government monetary or fiscal policies may negatively impact our results.

Most countries where our products and services are sold have established central banks to regulate monetary systems and influence economic activities, generally by adjusting interest rates. Interest rate changes affect overall economic growth, which affects demand for residential and nonresidential structures, as well as energy and mined products, which in turn affects sales of our products and services that support these activities. Interest rate changes may also affect our customers' ability to finance machine purchases, can change the optimal time to keep machines in a fleet and can impact the ability of our suppliers to finance the production of parts and components necessary to manufacture and support our products. Increases in interest rates could negatively impact sales and create supply chain inefficiencies.

Central banks and other policy arms of many countries may take actions to vary the amount of liquidity and credit available in an economy. The impact from a change in liquidity and credit policies could negatively affect the customers and markets we serve or our suppliers, create supply chain inefficiencies and could adversely impact our business, results of operations and financial condition.

Changes in monetary and fiscal policies, along with other factors, may cause currency exchange rates to fluctuate. Actions that lead the currency exchange rate of a country where we manufacture products to increase relative to other currencies could reduce the competitiveness of products made in that country, which could adversely affect our competitive position, results of operations and financial condition.

Government policies on taxes and spending also affect our business. Throughout the world, government spending finances a significant portion of infrastructure development, such as highways, rail systems, airports, sewer and water systems, waterways and dams. Tax regulations determine asset depreciation lives and impact the after-tax returns on business activity and investment, both of which influence investment decisions. Unfavorable developments, such as decisions to reduce public spending or to increase taxes, could negatively impact our results.

Our global operations are exposed to political and economic risks, commercial instability and events beyond our control in the countries in which we operate.

Our global operations are dependent upon products manufactured, purchased and sold in the U.S. and internationally, including in countries with political and economic instability or uncertainty. Some countries have greater political and economic volatility and greater vulnerability to infrastructure and labor disruptions than others. Our business could be negatively impacted by adverse fluctuations in freight costs, limitations on shipping and receiving capacity, and other disruptions in the transportation and shipping infrastructure at important geographic points of exit and entry for our products. Operating in different regions and countries exposes us to a number of risks, including:

- multiple and potentially conflicting laws, regulations and policies that are subject to change;
- imposition of currency restrictions, restrictions on repatriation of earnings or other restraints;
- imposition of new or additional tariffs or quotas;
- withdrawal from or modification of trade agreements or the negotiation of new trade agreements;
- imposition of new or additional trade and economic sanctions laws imposed by the U.S. or foreign governments;
- war or acts of terrorism; and
- political and economic instability or civil unrest that may severely disrupt economic activity in affected countries.

The occurrence of one or more of these events may negatively impact our business, results of operations and financial condition.

OPERATIONAL RISKS

The success of our business depends on our ability to develop, produce and market quality products that meet our customers' needs.

Our business relies on continued global demand for our brands and products. To achieve business goals, we must develop and sell products that appeal to our dealers, OEMs and end-user customers. This is dependent on a number of factors, including our ability to maintain key dealer relationships, our ability to produce products that meet the quality, performance and price expectations of our customers and our ability to develop effective sales, advertising and marketing programs. In addition, our continued success in selling products that appeal to our customers is dependent on leading-edge innovation, with respect to both products and operations, and on the availability and effectiveness of legal protection for our innovations. Failure to continue to deliver high quality, innovative, competitive products to the marketplace, to adequately protect our intellectual property rights, to supply products that meet applicable regulatory requirements, including engine exhaust emission requirements or to predict market demands for, or gain market acceptance of, our products, could have a negative impact on our business, results of operations and financial condition.

We operate in a highly competitive environment, which could adversely affect our sales and pricing.

We operate in a highly competitive environment. We compete on the basis of a variety of factors, including product performance, customer service, quality and price. There can be no assurance that our products will be able to compete successfully with other companies' products. Thus, our share of industry sales could be reduced due to aggressive pricing or product strategies pursued by competitors, unanticipated product or manufacturing difficulties, our failure to price our products competitively, our failure to produce our products at a competitive cost or an unexpected buildup in competitors' new machine or dealer-owned rental fleets, which could lead to downward pressure on machine rental rates and/or used equipment prices.

Lack of customer acceptance of price increases we announce from time to time, changes in customer requirements for price discounts, changes in our customers' behavior or a weak pricing environment could have an adverse impact on our business, results of operations and financial condition.

In addition, our results and ability to compete may be impacted negatively by changes in our geographic and product mix of sales.

Increased information technology security threats and more sophisticated computer crime pose a risk to our systems, networks, products and services.

We rely upon information technology systems and networks, some of which are managed by third parties, in connection with a variety of business activities. Additionally, we collect and store sensitive information relating to our business, customers, dealers, suppliers and employees. Operating these information technology systems and networks and processing and maintaining this data in a secure manner, is critical to our business operations and strategy. Information technology security threats -- from user error to cybersecurity attacks designed to gain unauthorized access to our systems, networks and data -- are increasing in frequency and sophistication. Cybersecurity attacks may range from random attempts to coordinated and targeted attacks, including sophisticated computer crime and advanced persistent threats. These threats pose a risk to the security of our systems and networks and the confidentiality, availability and integrity of our data. Cybersecurity attacks could also include attacks targeting customer data or the security, integrity and/or reliability of the hardware and software installed in our products. It is possible that our information technology systems and networks, or those managed or provided by third parties, could have vulnerabilities, which could go unnoticed for a period of time. While various procedures and controls have been and are being utilized to mitigate such risks, there can be no guarantee that the actions and controls we have implemented and are implementing, or which we cause or have caused third party service providers to implement, will be sufficient to protect our systems, information or other property.

We have experienced cyber security threats and vulnerabilities in our systems and those of our third party providers, and we have experienced viruses and attacks targeting our information technology systems and networks. Such prior events, to date, have not had a material impact on our financial condition, results of operations or liquidity. However, the potential consequences of a future material cybersecurity attack include reputational damage, litigation with third parties, government enforcement actions, penalties, disruption to systems, unauthorized release of confidential or otherwise protected information, corruption of data, diminution in the value of our investment in research, development and engineering, and increased cybersecurity protection and remediation costs, which in turn could adversely affect our competitiveness, results of operations and financial condition. Due to the evolving nature of such security threats, the potential impact of any future incident cannot be predicted. Further, the amount of insurance coverage we maintain may be inadequate to cover claims or liabilities relating to a cybersecurity attack.

In addition, data we collect, store and process is subject to a variety of U.S. and international laws and regulations, such as the European Union's General Data Protection Regulation that became effective in May 2018, which may carry significant potential penalties for noncompliance.

Our business is subject to the inventory management decisions and sourcing practices of our dealers and our OEM customers.

We sell finished products primarily through an independent dealer network and directly to OEMs and are subject to risks relating to their inventory management decisions and operational and sourcing practices. Both carry inventories of finished products as part of ongoing operations and adjust those inventories based on their assessments of future needs and market conditions, including levels of used equipment inventory and machine rental usage rates. Such adjustments may impact our results positively or negatively. If the inventory levels of our dealers and OEM customers are higher than they desire, they may postpone product purchases from us, which could cause our sales to be lower than the end-user demand for our products and negatively impact our results. Similarly, our results could be negatively impacted through the loss of time-sensitive sales if our dealers and OEM customers do not maintain inventory levels sufficient to meet customer demand.

We may not realize all of the anticipated benefits of our acquisitions, joint ventures or divestitures, or these benefits may take longer to realize than expected.

In pursuing our business strategy, we routinely evaluate targets and enter into agreements regarding possible acquisitions, divestitures and joint ventures. We often compete with others for the same opportunities. To be successful, we conduct due diligence to identify valuation issues and potential loss contingencies, negotiate transaction terms, complete complex transactions and manage post-closing matters such as the integration of acquired businesses. Further, while we seek to mitigate risks and liabilities of such transactions through due diligence, among other things, there may be risks and liabilities that our due diligence efforts fail to discover, that are not accurately or completely disclosed to us or that we inadequately assess. We may incur unanticipated costs or expenses following a completed acquisition, including post-closing asset impairment charges, expenses associated with eliminating duplicate facilities, litigation, and other liabilities. Risks associated with our past or future acquisitions also include the following:

- the failure to achieve the acquisition's revenue or profit forecast;
- the business culture of the acquired business may not match well with our culture;
- technological and product synergies, economies of scale and cost reductions may not occur as expected;
- unforeseen expenses, delays or conditions may be imposed upon the acquisition, including due to required regulatory approvals or consents;
- we may acquire or assume unexpected liabilities or be subject to unexpected penalties or other enforcement actions;
- faulty assumptions may be made regarding the macroeconomic environment or the integration process;
- unforeseen difficulties may arise in integrating operations, processes and systems;
- higher than expected investments may be required to implement necessary compliance processes and related systems, including information technology systems, accounting systems and internal controls over financial reporting;
- we may fail to retain, motivate and integrate key management and other employees of the acquired business;
- higher than expected costs may arise due to unforeseen changes in tax, trade, environmental, labor, safety, payroll or pension policies in any jurisdiction in which the acquired business conducts its operations; and
- we may experience problems in retaining customers and integrating customer bases.

Many of these factors will be outside of our control and any one of them could result in increased costs, decreases in the amount of expected revenues and diversion of management's time and attention. They may also delay the realization of the benefits we anticipate when we enter into a transaction.

In order to conserve cash for operations, we may undertake acquisitions financed in part through public offerings or private placements of debt or equity securities, or other arrangements. Such acquisition financing could result in a decrease in our earnings and adversely affect other leverage measures. If we issue equity securities or equity-linked securities, the issued securities may have a dilutive effect on the interests of the holders of our common shares.

Failure to implement our acquisition strategy, including successfully integrating acquired businesses, could have an adverse effect on our business, financial condition and results of operations. Furthermore, we make strategic divestitures from time to time. In the case of divestitures, we may agree to indemnify acquiring parties for certain liabilities arising from our former businesses. These divestitures may also result in continued financial involvement in the divested businesses following the transaction, including through guarantees or other financial arrangements. Lower performance by those divested businesses could affect our future financial results.

Union disputes or other labor matters could adversely affect our operations and financial results.

Some of our employees are represented by labor unions in a number of countries under various collective bargaining agreements with varying durations and expiration dates. There can be no assurance that any current or future issues with our employees will be resolved or that we will not encounter future strikes, work stoppages or other disputes with labor unions or our employees. We may not be able to satisfactorily renegotiate collective bargaining agreements in the United States and other countries when they expire. If we fail to renegotiate our existing collective bargaining agreements, we could encounter strikes or work stoppages or other disputes with labor unions. In addition, existing collective bargaining agreements may not prevent a strike or work stoppage at our facilities in the future. We may also be subject to general country strikes or work stoppages unrelated to our business or collective bargaining agreements. A work stoppage or other limitations on production at our facilities for any reason could have an adverse effect on our business, results of operations and financial condition. In addition, many of our customers and suppliers have unionized work forces. Strikes or work stoppages experienced by our customers or suppliers could have an adverse effect on our business, results of operations and financial condition.

Unexpected events may increase our cost of doing business or disrupt our operations.

The occurrence of one or more unexpected events, including war, acts of terrorism or violence, civil unrest, fires, tornadoes, tsunamis, hurricanes, earthquakes, floods and other forms of severe weather in the United States or in other countries in which we operate or in which our suppliers are located could adversely affect our operations and financial performance. Natural disasters, pandemic illness, including the current COVID-19 outbreak, equipment failures, power outages or other unexpected events could result in physical damage to and complete or partial closure of one or more of our manufacturing facilities or distribution centers, temporary or long-term disruption in the supply of component products from some local and international suppliers, and disruption and delay in the transport of our products to dealers, end-users and distribution centers. Existing insurance coverage may not provide protection for all of the costs that may arise from such events.

FINANCIAL RISKS

Disruptions or volatility in global financial markets could limit our sources of liquidity, or the liquidity of our customers, dealers and suppliers.

Continuing to meet our cash requirements over the long-term requires substantial liquidity and access to varied sources of funds, including capital and credit markets. Global economic conditions may cause volatility and disruptions in the capital and credit markets. Market volatility, changes in counterparty credit risk, the impact of government intervention in financial markets and general economic conditions may also adversely impact our ability to access capital and credit markets to fund operating needs. Global or regional economic downturns could cause financial markets to decrease the availability of liquidity, credit and credit capacity for certain issuers, including certain customers, dealers and suppliers. An inability to access capital and credit markets may have an adverse effect on our business, results of operations, financial condition and competitive position. Furthermore, changes in global economic conditions, including material cost increases and decreases in economic activity in key markets we serve, and the success of plans to manage cost increases, inventory and other important elements of our business may significantly impact our ability to generate funds from operations.

In addition, demand for our products generally depends on customers' ability to pay for our products, which, in turn, depends on their access to funds. Changes in global economic conditions may result in customers experiencing increased difficulty in generating funds from operations. Capital and credit market volatility and uncertainty may cause financial institutions to revise their lending standards, resulting in customers' decreased access to capital. If capital and credit market volatility occurs, customers' liquidity may decline which, in turn, would reduce their ability to purchase our products.

Failure to maintain our credit ratings would increase our cost of borrowing and could adversely affect our cost of funds, liquidity, competitive position and access to capital markets.

Each of Caterpillar's and Cat Financial's costs of borrowing and their respective ability to access the capital markets are affected not only by market conditions but also by the short- and long-term credit ratings assigned to their respective debt by the major credit rating agencies. These ratings are based, in significant part, on each of Caterpillar's and Cat Financial's performance as measured by financial metrics such as net worth, interest coverage and leverage ratios, as well as transparency with rating agencies and timeliness of financial reporting. There can be no assurance that Caterpillar and Cat Financial will be able to maintain their credit ratings. We receive debt ratings from the major credit rating agencies. Moody's long- and short-term ratings of Caterpillar and Cat Financial are A3 and Prime-2 ("low-A"), while other major credit rating agencies maintain a "mid-A" debt rating. A downgrade of our credit rating by any of the major credit rating agencies would result in increased borrowing costs and could adversely affect Caterpillar's and Cat Financial's liquidity, competitive position and access to the capital markets, including restricting, in whole or in part, access to the commercial paper market. There can be no assurance that the commercial paper market will continue to be a reliable source of short-term financing for Cat Financial or an available source of short-term financing for Caterpillar. An inability to access the capital markets could have an adverse effect on our cash flow, results of operations and financial condition.

Our Financial Products segment is subject to risks associated with the financial services industry.

Cat Financial is significant to our operations and provides financing support for a significant share of our global sales. The inability of Cat Financial to access funds to support its financing activities to our customers could have an adverse effect on our business, results of operations and financial condition.

Continuing to meet Cat Financial's cash requirements over the long-term could require substantial liquidity and access to sources of funds, including capital and credit markets. Cat Financial has continued to maintain access to key global medium term note and commercial paper markets, but there can be no assurance that such markets will continue to represent a reliable source of financing. If global economic conditions were to deteriorate, Cat Financial could face materially higher financing costs, become unable to access adequate funding to operate and grow its business and/or meet its debt service obligations as they mature, and be required to draw upon contractually committed lending agreements and/or seek other funding sources. However, there can be no assurance that such agreements and other funding sources would be available or sufficient under extreme market conditions. Any of these events could negatively impact Cat Financial's business, as well as our and Cat Financial's results of operations and financial condition.

Market disruption and volatility may also lead to a number of other risks in connection with these events, including but not limited to:

- Market developments that may affect customer confidence levels and cause declines in the demand for financing and adverse changes in payment patterns, causing increases in delinquencies and default rates, which could impact Cat Financial's write-offs and provision for credit losses.
- The process Cat Financial uses to estimate losses inherent in its credit exposure requires a high degree of management's judgment regarding numerous subjective qualitative factors, including forecasts of economic conditions and how economic predictors might impair the ability of its borrowers to repay their loans. Financial market disruption and volatility may impact the accuracy of these judgments.
- Cat Financial's ability to engage in routine funding transactions or borrow from other financial institutions on acceptable terms or at all could be adversely affected by disruptions in the capital markets or other events, including actions by rating agencies and deteriorating investor expectations.
- As Cat Financial's lending agreements are primarily with financial institutions, their ability to perform in accordance with any of its underlying agreements could be adversely affected by market volatility and/or disruptions in financial markets.

Changes in interest rates or market liquidity conditions could adversely affect Cat Financial's and our earnings and/or cash flow.

Changes in interest rates and market liquidity conditions could have an adverse impact on Cat Financial's and our earnings and cash flows. Because a significant number of the loans made by Cat Financial are made at fixed interest rates, its business results are subject to fluctuations in interest rates. Certain loans made by Cat Financial and various financing extended to Cat Financial are made at variable rates that use LIBOR as a benchmark for establishing the interest rate. LIBOR is the subject of recent proposals for reform. On July 27, 2017, the United Kingdom's Financial Conduct Authority ("FCA") announced that it intends to stop persuading or compelling banks to submit LIBOR rates after 2021. On November 18, 2020, ICE Benchmark Administration ("IBA"), the administrator of USD LIBOR, announced plans to consult on its intention to cease the publication of all GBP, EUR, CHF and JPY LIBOR settings immediately following the LIBOR publication on December 31, 2021. On November 30, 2020, IBA, with the support of the United States Federal Reserve and the FCA, announced plans to consult on ceasing publication of USD LIBOR on December 31, 2021 for only the one week and two month USD LIBOR tenors, and on June 30, 2023 for all other USD LIBOR tenors. While the November 30th announcement extends the transition period to June 2023, the United States Federal Reserve concurrently issued a statement advising banks to stop new USD LIBOR issuances by the end of 2021. These reforms may cause LIBOR to cease to exist, new methods of calculating LIBOR to be established such that LIBOR continues to exist after 2021 or the establishment of an alternative reference rate(s). Several offerings of securities that include such an alternative reference rate have now been completed by other companies. The consequences of these developments cannot be entirely predicted and could have an adverse impact on the market value for or value of LIBOR-linked securities, loans, derivatives, and other financial obligations or extensions of credit held by or due to Cat Financial, as well as the revenue and expenses associated with those securities, loans and financial instruments. Cat Financial has created a cross-functional team that will assess risk across multiple categories as it relates to the use of LIBOR in securities, loans, derivatives, and other financial obligations or extensions of credit held by or due to us. Other changes in market interest rates may influence Cat Financial's borrowing costs and could reduce its and our earnings and cash flows, returns on financial investments and the valuation of derivative contracts. Cat Financial manages interest rate and market liquidity risks through a variety of techniques that include a match funding strategy, the selective use of derivatives and a broadly diversified funding program. There can be no assurance, however, that fluctuations in interest rates and market liquidity conditions will not have an adverse impact on its and our earnings and cash flows. If any of the variety of instruments and strategies Cat Financial uses to hedge its exposure to these types of risk is ineffective, this may have an adverse impact on our earnings and cash flows. With respect to Insurance Services' investment activities, changes in the equity and bond markets could result in a decline in value of its investment portfolio, resulting in an unfavorable impact to earnings.

An increase in delinquencies, repossessions or net losses of Cat Financial customers could adversely affect its results.

Inherent in the operation of Cat Financial is the credit risk associated with its customers. The creditworthiness of each customer and the rate of delinquencies, repossessions and net losses on customer obligations are directly impacted by several factors, including relevant industry and economic conditions, the availability of capital, the experience and expertise of the customer's management team, commodity prices, political events and the sustained value of the underlying collateral. Any increase in delinquencies, repossessions and net losses on customer obligations could have a material adverse effect on Cat Financial's and our earnings and cash flows. In addition, although Cat Financial evaluates and adjusts its allowance for credit losses related to past due and non-performing receivables on a regular basis, adverse economic conditions or other factors that might cause deterioration of the financial health of its customers could change the timing and level of payments received and necessitate an increase in Cat Financial's estimated losses, which could also have a material adverse effect on Cat Financial's and our earnings and cash flows.

Currency exchange rate fluctuations affect our results of operations.

We conduct operations in many countries involving transactions denominated in a variety of currencies. We are subject to currency exchange rate risk to the extent that our costs are denominated in currencies other than those in which we earn revenues. Fluctuations in currency exchange rates have had, and will continue to have, an impact on our results as expressed in U.S. dollars. There can be no assurance that currency exchange rate fluctuations will not adversely affect our results of operations, financial condition and cash flows. While the use of currency hedging instruments may provide us with protection from adverse fluctuations in currency exchange rates, by utilizing these instruments we potentially forego the benefits that might result from favorable fluctuations in currency exchange rates. In addition, our outlooks do not assume fluctuations in currency exchange rates. Adverse fluctuations in currency exchange rates from the date of our outlooks could cause our actual results to differ materially from those anticipated in our outlooks and adversely impact our business, results of operations and financial condition.

We also face risks arising from the imposition of exchange controls and currency devaluations. Exchange controls may limit our ability to convert foreign currencies into U.S. dollars or to remit dividends and other payments by our foreign subsidiaries or businesses located in or conducted within a country imposing controls. Currency devaluations result in a diminished value of funds denominated in the currency of the country instituting the devaluation.

Restrictive covenants in our debt agreements could limit our financial and operating flexibility.

We maintain a number of credit facilities to support general corporate purposes (facilities) and have issued debt securities to manage liquidity and fund operations (debt securities). The agreements relating to a number of the facilities and the debt securities contain certain restrictive covenants applicable to us and certain subsidiaries, including Cat Financial. These covenants include maintaining a minimum consolidated net worth (defined as the consolidated shareholder's equity including preferred stock but excluding the pension and other post-retirement benefits balance within accumulated other comprehensive income (loss)), limitations on the incurrence of liens and certain restrictions on consolidation and merger. Cat Financial has also agreed under certain of these agreements not to exceed a certain leverage ratio (consolidated debt to consolidated net worth, calculated (1) on a monthly basis as the average of the leverage ratios determined on the last day of each of the six preceding calendar months and (2) at each December 31), to maintain a minimum interest coverage ratio (profit excluding income taxes, interest expense and net gain/(loss) from interest rate derivatives to interest expense, calculated at the end of each calendar quarter for the rolling four quarter period then most recently ended) and not to terminate, amend or modify its support agreement with us.

A breach of one or more of the covenants could result in adverse consequences that could negatively impact our business, results of operations and financial condition. These consequences may include the acceleration of amounts outstanding under certain of the facilities, triggering of an obligation to redeem certain debt securities, termination of existing unused commitments by our lenders, refusal by our lenders to extend further credit under one or more of the facilities or to enter into new facilities or the lowering or modification of our credit ratings or those of one or more of our subsidiaries.

Sustained increases in funding obligations under our pension plans may impair our liquidity or financial condition.

We maintain certain defined benefit pension plans for our employees, which impose on us certain funding obligations. In determining our future payment obligations under the plans, we assume certain rates of return on the plan assets and a certain level of future benefit payments. Significant adverse changes in credit or capital markets could result in actual rates of return being materially lower than projected and result in increased contribution requirements. Our assumptions for future benefit payments may also change over time and could be materially higher than originally projected. We expect to make contributions to our pension plans in the future, and may be required to make contributions that could be material. We may fund contributions through the use of cash on hand, the proceeds of borrowings, shares of our common stock or a combination of the foregoing, as permitted by applicable law. Our assumptions for future benefit payments may change over time and could be materially higher than projected. These factors could significantly increase our payment obligations under the plans, and as a result, adversely affect our business and overall financial condition.

LEGAL & REGULATORY RISKS

Our global operations are subject to a wide-range of trade and anti-corruption laws and regulations.

Due to the international scope of our operations, we are subject to a complex system of import- and export-related laws and regulations, including U.S. regulations issued by Customs and Border Protection, the Bureau of Industry and Security, the Office of Antiboycott Compliance, the Directorate of Defense Trade Controls and the Office of Foreign Assets Control, as well as the counterparts of these agencies in other countries. Any alleged or actual violations may subject us to increased government scrutiny, investigation and civil and criminal penalties, and may limit our ability to import or export our products or to provide services outside the United States. Furthermore, embargoes and sanctions imposed by the U.S. and other governments restricting or prohibiting sales to specific persons or countries or based on product classification may expose us to potential criminal and civil sanctions. We cannot predict the nature, scope or effect of future regulatory requirements to which our operations might be subject or in certain locations the manner in which existing laws might be administered or interpreted.

In addition, the U.S. Foreign Corrupt Practices Act and similar foreign anti-corruption laws generally prohibit companies and their intermediaries from making improper payments or providing anything of value to improperly influence foreign government officials for the purpose of obtaining or retaining business, or obtaining an unfair advantage. Recent years have seen a substantial increase in the global enforcement of anti-corruption laws. Our operations outside the United States, including in developing countries, expose us to the risk of such violations. Violations of anti-corruption laws or regulations by our employees, intermediaries acting on our behalf, or our joint venture partners may result in severe criminal or civil sanctions, could disrupt our business, and result in an adverse effect on our reputation, business and results of operations or financial condition.

International trade policies may impact demand for our products and our competitive position.

Government policies on international trade and investment such as import quotas, capital controls or tariffs, whether adopted by individual governments or addressed by regional trade blocs, can affect the demand for our products and services, impact the competitive position of our products or prevent us from being able to sell products in certain countries. The implementation of more restrictive trade policies, such as more detailed inspections, higher tariffs or new barriers to entry, in countries where we sell large quantities of products and services could negatively impact our business, results of operations and financial condition. For example, a government's adoption of "buy national" policies or retaliation by another government against such policies could have a negative impact on our results of operations.

We may incur additional tax expense or become subject to additional tax exposure.

We are subject to income taxes in the United States and numerous other jurisdictions. Our future results of operations could be adversely affected by changes in the effective tax rate as a result of a change in the mix of earnings between U.S. and non-U.S. jurisdictions or among jurisdictions with differing statutory tax rates, changes in our overall profitability, changes in tax laws or treaties or in their application or interpretation, changes in tax rates, changes in generally accepted accounting principles, changes in the valuation of deferred tax assets and liabilities, changes in the amount of earnings indefinitely reinvested in certain non-U.S. jurisdictions, the results of audits and examinations of previously filed tax returns and continuing assessments of our tax exposures. We are also subject to the continuous examination of our income tax returns by the U.S. Internal Revenue Service and other tax authorities. We regularly assess the likelihood of an adverse outcome resulting from these examinations. If our effective tax rates were to increase, or if the ultimate determination of our taxes owed is for an amount in excess of amounts previously accrued, our operating results, cash flows and financial condition could be adversely affected. For information regarding additional legal matters related to our taxes, please see Note 6 — "Income taxes" and Note 22 — "Environmental and legal matters" of Part II, Item 8 "Financial Statements and Supplementary Data" to this Annual Report on Form 10-K.

Costs associated with lawsuits or investigations or adverse rulings in enforcement or other legal proceedings may have an adverse effect on our results of operations.

We are subject to a variety of legal proceedings and legal compliance risks in virtually every part of the world. We face risk of exposure to various types of claims, lawsuits and government investigations. We are involved in various claims and lawsuits related to product design, manufacture and performance liability (including claimed asbestos exposure), contracts, employment issues, environmental matters, intellectual property rights, tax, securities and other legal proceedings that arise in and outside of the ordinary course of our business. The industries in which we operate are also periodically reviewed or investigated by regulators, which could lead to enforcement actions, fines and penalties or the assertion of private litigation claims. It is not possible to predict with certainty the outcome of claims, investigations and lawsuits, and we could in the future incur judgments, fines or penalties or enter into settlements of lawsuits and claims that could have an adverse effect on our reputation, business, results of operations or financial condition in any particular period.

The global and diverse nature of our operations means that legal and compliance risks will continue to exist and additional legal proceedings and other contingencies, the outcome of which cannot be predicted with certainty, may arise from time to time. In addition, subsequent developments in legal proceedings may affect our assessment and estimates of loss contingencies recorded as a reserve and require us to make payments in excess of our reserves, which could have an adverse effect on our reputation, business and results of operations or financial condition.

New regulations or changes in financial services regulation could adversely impact Caterpillar and Cat Financial.

Cat Financial's operations are highly regulated by governmental authorities in the locations where it operates, which can impose significant additional costs and/or restrictions on its business. In the United States, for example, certain Cat Financial activities are subject to the U.S. Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank), which includes extensive provisions regulating the financial services industry. As a result, Cat Financial has become and could continue to become subject to additional regulatory costs that could be significant and have an adverse effect on Cat Financial's and our results of operations and financial condition. Changes in regulations or additional regulations in the United States or internationally impacting the financial services industry could also add significant cost or operational constraints that might have an adverse effect on Cat Financial's and our results of operations and financial condition.

We are subject to stringent environmental laws and regulations that impose significant compliance costs.

Our facilities, operations and products are subject to increasingly stringent environmental laws and regulations globally, including laws and regulations governing emissions to noise, air, releases to soil and discharges to water and the generation, handling, storage, transportation, treatment and disposal of non-hazardous and hazardous waste materials. Some environmental laws impose strict, retroactive and joint and several liability for the remediation of the release of hazardous substances, even for conduct that was lawful at the time it occurred, or for the conduct of, or conditions caused by, prior operators, predecessors or other third parties. Failure to comply with environmental laws could expose us to penalties or clean-up costs, civil or criminal liability and sanctions on certain of our activities, as well as damage to property or natural resources. The potential liabilities, sanctions, damages and remediation efforts related to any non-compliance with such laws and regulations could negatively impact our ability to conduct our operations and our financial condition and results of operations. In addition, there can be no assurances that we will not be adversely affected by costs, liabilities or claims with respect to existing or subsequently acquired operations or under present laws and regulations or those that may be adopted or imposed in the future.

Environmental laws and regulations may change from time to time, as may related interpretations and other guidance. Changes in environmental laws or regulations could result in higher expenses and payments, and uncertainty relating to environmental laws or regulations may also affect how we conduct our operations and structure our investments and could limit our ability to enforce our rights. Changes in environmental and climate change laws or regulations, including laws relating to greenhouse gas emissions, could lead to new or additional investment in product designs and could increase environmental compliance expenditures. Changes in climate change concerns, or in the regulation of such concerns, including greenhouse gas emissions, could subject us to additional costs and restrictions, including increased energy and raw materials costs. If environmental laws or regulations are either changed or adopted and impose significant operational restrictions and compliance requirements upon us or our products, they could negatively impact our reputation, business, capital expenditures, results of operations, financial condition and competitive position.

Item 1B. Unresolved Staff Comments.

None.

Item 1C. Executive Officers of the Registrant.

Name and age	Present Caterpillar Inc. position and date of initial election	Principal positions held during the past five years if other than Caterpillar Inc. position currently held
D. James Umpleby III (62)	Chairman of the Board (2018) and Chief Executive Officer (2017)	Group President (2013-2016)
Andrew R.J. Bonfield (58)	Chief Financial Officer (2018)	Group Chief Financial Officer for a multinational electricity and gas utility company (2010-2018)
Bob De Lange (51)	Group President (2017)	Vice President (2015-2016), Worldwide Product Manager, Medium Wheel Loaders, (2013-2014)
Denise C. Johnson (54)	Group President (2016)	Vice President (2012-2016)
Joseph E. Creed (45)	Group President (2021)	Vice President, Oil & Gas and Marine Division (2019-2020), Interim Chief Financial Officer (2018), Vice President, Finance Services Division (2017), Group Chief Financial Officer, Energy and Transportation (2013-2016)
Anthony D. Fassino (50)	Group President (2021)	Vice President, Building Construction Products (2018-2020), Director of Worldwide Forestry Products (2016-2018)
Suzette M. Long (55)	Chief Legal Officer and General Counsel (2017)	Interim Executive Vice President, Law and Public Policy (2017), Deputy General Counsel (2013-2017)
Cheryl C. Johnson (60)	Chief Human Resources Officer (2017)	Executive Vice President of Human Resources for a global multi-industry aerospace, defense and industrial manufacturing company (2012-2017)
G. Michael Marvel (59)	Chief Accounting Officer (2019)	Director of Corporate Financial Reporting (2018-2019), Chief Financial Officer for Solar Turbines Incorporated (2013-2018)

Item 2. Properties.
General Information

Caterpillar's operations are highly integrated. Although the majority of our plants are involved primarily in production relating to our Construction Industries, Resource Industries or Energy & Transportation segments, several plants are involved in manufacturing relating to more than one business segment. In addition, several plants reported in our financial statements under the All Other segment are involved in the manufacturing of components that are used in the assembly of products for more than one business segment. Caterpillar's parts distribution centers are involved in the storage and distribution of parts for Construction Industries, Resource Industries and Energy & Transportation. The research and development activities carried on at our Technical Centers in Aurora and Mossville, Illinois involve products for Construction Industries, Resource Industries and Energy & Transportation.

We believe the properties we own to be generally well maintained and adequate for present use. Through planned capital expenditures, we expect these properties to remain adequate for future needs. Properties we lease are covered by leases expiring over terms of generally one to ten years. We do not anticipate any difficulty in retaining occupancy of any leased facilities, either by renewing leases prior to expiration or by replacing them with equivalent leased facilities.

Headquarters and Other Key Offices

Our corporate headquarters is in a leased office located in Deerfield, Illinois. Our Financial Products business is headquartered in offices in Nashville, Tennessee. Additional key offices are located inside and outside the United States.

Technical Center, Training Centers, Demonstration Areas and Proving Grounds

We operate Technical Centers located in Aurora and Mossville, Illinois; Wuxi, China; and Chennai, India. Our demonstration centers are located in Tinaja Hills, Arizona; Edwards, Illinois; Chichibu, Japan and Malaga, Spain. We have various other technical and training centers, demonstration areas and proving grounds located both inside and outside the United States.

Parts Distribution Centers

Distribution of our parts is conducted from parts distribution centers inside and outside the United States. We operate parts distribution centers in the following locations: Arvin, California; Denver, Colorado; Miami, Florida; Atlanta, Georgia; Morton, Illinois; St. Paul, Minnesota; Clayton, Ohio; York, Pennsylvania; Waco, Texas; Spokane, Washington; Melbourne, Australia; Queensland, Australia; Grimbergen, Belgium; Piracicaba, Brazil; Shanghai, China; Sagami, Japan; San Luis Potosi, Mexico; Singapore, Republic of Singapore; Moscow, Russia; Johannesburg, South Africa; and Dubai, United Arab Emirates. We also own or lease other facilities that support our distribution activities.

Remanufacturing and Components

Remanufacturing of our products is reported in our Energy & Transportation segment and is conducted primarily at the facilities in the following locations: Franklin, Indiana; Bogor, Indonesia; Corinth, Mississippi; Prentiss County, Mississippi; West Fargo, North Dakota; Piracicaba, Brazil; Shanghai, China; and Nuevo Laredo, Mexico.

Component manufacturing is reported in the All Other segment and is conducted primarily at facilities in the following locations: East Peoria, Illinois; Mapleton, Illinois; Peoria, Illinois; Bogor, Indonesia; Menominee, Michigan; Boonville, Missouri; West Plains, Missouri; Goldsboro, North Carolina; Sumter, South Carolina; Tianjin, China; Xuzhou, China; Atessa, Italy; Bazzano, Italy; Frosinone, Italy; San Eusebio, Italy; Ramos Arizpe, Mexico; Pyeongtaek, South Korea; and Skinningrove, United Kingdom.

We also lease or own other facilities that support our remanufacturing and component manufacturing activities.

Manufacturing

Manufacturing of products for our Construction Industries, Resource Industries and Energy & Transportation segments is conducted primarily at the locations listed below. These facilities are believed to be suitable for their intended purposes, with adequate capacities for current and projected needs for existing products.

Our principal manufacturing facilities include those used by the following segments in the following locations:

Segment	U.S. Facilities	Facilities Outside the U.S.
Construction Industries	Arkansas: North Little Rock Georgia: Athens Illinois: Decatur, East Peoria Kansas: Wamego Minnesota: Brooklyn Park North Carolina: Clayton, Sanford Texas: Victoria	Brazil: Campo Largo, Piracicaba China: Suzhou, Wujiang, Xuzhou, Qingzhou France: Grenoble, Echirolles Hungary: Godollo India: Thiruvallur Indonesia: Jakarta Italy: Minerbio Japan: Akashi Mexico: Torreon Netherlands: Den Bosch Poland: Janow, Sosnowiec Thailand: Rayong United Kingdom: Desford, Stockton

Item 3. Legal Proceedings.

Certain legal proceedings in which we are involved are discussed in Note 22 — "Environmental and legal matters" of Part II, Item 8 "Financial Statements and Supplementary Data" and should be considered an integral part of Part I, Item 3 "Legal Proceedings", which is hereby incorporated by reference.

Item 4. Mine Safety Disclosures.

Not applicable.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Common Stock (NYSE: CAT)

Listing Information: Caterpillar common stock is listed on the New York Stock Exchange in the United States, and on stock exchanges in France and Switzerland.

Number of Shareholders: Shareholders of record at the end of 2020 totaled 23,299, compared with 25,985 at the end of 2019.

Performance Graph: Total Cumulative Shareholder Return for Five-Year Period Ending December 31, 2020

The graph below shows the cumulative shareholder return assuming an investment of \$100 on December 31, 2015, and reinvestment of dividends issued thereafter.

	2015	2016	2017	2018	2019	2020
Caterpillar Inc.	\$ 100.00	\$ 142.11	\$ 248.73	\$ 205.06	\$ 245.08	\$ 311.16
S&P 500	\$ 100.00	\$ 111.96	\$ 136.40	\$ 130.42	\$ 171.49	\$ 203.04
S&P 500 Machinery	\$ 100.00	\$ 133.94	\$ 190.59	\$ 162.68	\$ 211.97	\$ 261.61

Non-U.S. Employee Stock Purchase Plans

As of December 31, 2020, we had 28 employee stock purchase plans (the “EIP Plans”) administered outside the United States for our non-U.S. employees, which had approximately 13,000 active participants in the aggregate. During the fourth quarter of 2020, approximately 91,000 shares of Caterpillar common stock were purchased by the EIP Plans pursuant to the terms of such plans.

Issuer Purchases of Equity Securities

In July 2018, the Board approved a share repurchase authorization of up to \$10.0 billion of Caterpillar common stock effective January 1, 2019, with no expiration (the “2018 Authorization”). As of December 31, 2020, approximately \$4.8 billion remained available under the 2018 Authorization. Due to current economic uncertainty, we temporarily suspended our share repurchase program during the second half of 2020. The existing share repurchase program remains authorized by the Board, and we may resume share repurchases in the future at any time depending upon market conditions, our capital needs and other factors.

¹ Profit (loss) attributable to common shareholders.

² Computed on weighted-average number of shares outstanding.

³ Computed on weighted-average number of shares outstanding diluted by assumed exercise of stock-based compensation awards, using the treasury stock method. In 2016, the assumed exercise of stock-based compensation awards was not considered because the impact would be antidilutive.

⁴ Represents profit (loss) divided by average shareholders' equity (beginning of year shareholders' equity plus end of year shareholders' equity divided by two).

Additional information required by Item 6 is included in Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

This Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with our discussion of cautionary statements and significant risks to the company's business under Item 1A. Risk Factors of the 2020 Form 10-K.

OVERVIEW

Our sales and revenues for 2020 were \$41.748 billion, a decrease of \$12.052 billion, or 22 percent, compared with \$53.800 billion in 2019. The decline was due to lower **sales volume** driven by lower end-user demand for equipment and **services** and the impact from changes in **dealer inventories** across the three primary segments. Sales were lower across all regions and in the three primary segments. Profit per share was \$5.46 in 2020, compared with profit per share of \$10.74 in 2019. Profit was \$2.998 billion in 2020, compared with \$6.093 billion in 2019. The decrease was primarily due to lower sales volume, unfavorable **price realization**, lower profit from **Financial Products** and higher **restructuring costs**, partially offset by lower selling, general and administrative (SG&A) and research and development (R&D) expenses and favorable **manufacturing costs**.

Fourth-quarter 2020 sales and revenues were \$11.235 billion, down \$1.909 billion, or 15 percent, from \$13.144 billion in the fourth quarter of 2019. Fourth-quarter 2020 profit was \$1.42 per share, compared with \$1.97 per share in the fourth quarter of 2019. Fourth-quarter 2020 profit was \$780 million, compared with \$1.098 billion in 2019.

Highlights for 2020 include:

- Sales and revenues for 2020 were \$41.748 billion, a decrease of 22 percent from 2019. Sales were lower across all regions and in the three primary segments.
- Operating profit as a percent of sales and revenues was 10.9 percent in 2020, compared with 15.4 percent in 2019.
- Profit was \$5.46 per share for 2020, and excluding the items in the table below, **adjusted profit per share** was \$6.56. For 2019 profit was \$10.74 per share, and excluding the items in the table below, adjusted profit per share was \$11.40.
- In order for our results to be more meaningful to our readers, we have separately quantified the impact of several significant items. A detailed reconciliation of GAAP to non-GAAP financial measures is included on page 56.

¹ At statutory tax rates.

Certain amounts may not add due to rounding.

- Enterprise operating cash flow was \$6.3 billion in 2020. Caterpillar ended 2020 with \$9.4 billion of enterprise cash and more than \$14 billion of available liquidity sources.

Response to COVID-19 and Global Business Conditions

We continue to implement safeguards in our facilities to protect team members, including increased frequency of cleaning and disinfecting, social distancing practices and other measures consistent with specific governmental requirements and guidance from health authorities. At the end of 2020, globally and across our three primary segments, nearly all of our primary production facilities continued to operate. This continues to fluctuate as conditions warrant, including the pace of economic recovery and the potential for additional COVID-related temporary shutdowns. We have continued to take actions to reduce costs and prioritize our spending to provide for investment in services and expanded offerings, key elements of our strategy for profitable growth, which was introduced in 2017.

Notes:

- Glossary of terms included on pages 41-43; first occurrence of terms shown in bold italics.
- Information on non-GAAP financial measures is included on page 56.

- Some amounts within this report are rounded to the millions or billions and may not add. In addition, the sum of the components reported across periods may not equal the total amount reported year-to-date due to rounding.

2020 COMPARED WITH 2019

CONSOLIDATED SALES AND REVENUES

The chart above graphically illustrates reasons for the change in consolidated sales and revenues between 2019 (at left) and 2020 (at right). Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees.

Total sales and revenues for 2020 were \$41.748 billion, a decrease of \$12.052 billion, or 22 percent, compared with \$53.800 billion in 2019. The decline was due to lower sales volume driven by lower end-user demand for equipment and services and the impact from changes in dealer inventories across the three primary segments. Dealers decreased machine and engine inventories about \$2.9 billion during 2020, compared with an increase of about \$800 million during 2019.

Sales were lower across all regions and in the three primary segments.

North America sales declined 31 percent driven by lower end-user demand and the impact from changes in dealer inventories. Dealers decreased inventories during 2020, compared with an increase during 2019.

Sales decreased 28 percent in **Latin America** due to lower sales volume across the region, driven by lower end-user demand and the impact from changes in dealer inventories. In addition, sales were lower due to unfavorable **currency** impacts from a weaker Brazilian real. Dealers decreased inventories during 2020 and increased inventories during 2019.

EAME sales decreased 12 percent due to lower sales volume in most countries across the region, driven by lower end-user demand and the impact from changes in dealer inventories. Dealers decreased inventories more during 2020 than 2019.

Asia/Pacific sales decreased 16 percent due to lower demand across the region. Lower demand was driven by the impact from changes in dealer inventories and lower end-user demand. Dealers decreased inventories during 2020 and increased inventories during 2019.

Dealers decreased machine and engine inventories about \$2.9 billion during 2020, compared with an increase of about \$800 million during 2019. Dealers are independent, and the reasons for changes in their inventory levels vary, including their expectations of future demand and product delivery times. Dealers' demand expectations take into account seasonal changes, macroeconomic conditions, machine rental rates and other factors. Delivery times can vary based on availability of product from Caterpillar factories and product distribution centers. We do not expect a significant dealer inventory reduction in 2021.

¹ Includes revenues from Machinery, Energy & Transportation of \$362 million and \$524 million in 2020 and 2019, respectively.

CONSOLIDATED OPERATING PROFIT

The chart above graphically illustrates reasons for the change in consolidated operating profit between 2019 (at left) and 2020 (at right). Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees. The bar entitled Other includes *consolidating adjustments* and *Machinery, Energy & Transportation other operating (income) expenses*.

Operating profit was \$4.553 billion in 2020, a decrease of \$3.737 billion, or 45 percent, compared with \$8.290 billion in 2019. The decrease was due to lower sales volume and unfavorable price realization, partially offset by lower SG&A/R&D expenses and favorable manufacturing costs.

Lower SG&A/R&D expenses reflected reduced short-term incentive compensation expense and other cost reductions related to lower sales volumes.

Favorable manufacturing costs were mostly driven by lower period manufacturing costs and material costs, partially offset by higher warranty expense. Period manufacturing costs declined primarily due to a reduction in short-term incentive compensation expense and other cost reductions related to lower sales volumes.

Short-term incentive compensation expense is directly related to financial and operational performance, measured against targets set annually. In the first quarter, in response to the continued global economic uncertainty due to the COVID-19 pandemic, Caterpillar suspended 2020 short-term incentive compensation plans for many employees and all senior executives. As a result, no short-term incentive compensation expense was recognized during 2020, compared with about \$700 million during 2019.

For 2021, we expect short-term incentive compensation expense will be about \$900 million.

Operating profit margin was 10.9 percent in 2020, compared with 15.4 percent in 2019.

Profit by Segment

(Millions of dollars)	2020	2019	\$ Change	% Change
Construction Industries	\$ 2,373	\$ 3,931	\$ (1,558)	(40 %)
Resource Industries	896	1,629	(733)	(45 %)
Energy & Transportation	2,405	3,910	(1,505)	(38 %)
All Other Segment	28	4	24	600 %
Corporate Items and Eliminations	(1,381)	(1,504)	123	
Machinery, Energy & Transportation	4,321	7,970	(3,649)	(46 %)
Financial Products Segment	590	832	(242)	(29 %)
Corporate Items and Eliminations	(53)	(81)	28	
Financial Products	537	751	(214)	(28 %)
Consolidating Adjustments	(305)	(431)	126	
Consolidated Operating Profit	\$ 4,553	\$ 8,290	\$ (3,737)	(45 %)

Other Profit/Loss and Tax Items

- Interest expense excluding Financial Products in 2020 was \$514 million, compared with \$421 million in 2019. The increase was due to higher average debt outstanding during 2020, compared with 2019.

Other income/expense in 2020 was expense of \$44 million, compared with expense of \$57 million in 2019. The change was due to a higher expected return on *pension and other postretirement benefit (OPEB)* costs that include lower mark-to-market losses for remeasurement of pension and OPEB plans, partially offset by unfavorable impacts from foreign currency exchange gains (losses); lower investment and interest income; and the absence of realized gains that occurred in 2019.

- The provision for income taxes for 2020 reflected an annual effective tax rate of 27.8 percent compared with 25 percent for 2019, excluding the discrete items discussed in the following paragraph. The increase from 2019 primarily related to changes in the geographic mix of profits from a tax perspective.

The provision for income taxes for 2020 also included the following:

- A tax benefit of \$80 million to adjust prior year U.S. taxes including the impact of regulations received in 2020 compared to \$178 million in 2019.
- A tax benefit of \$82 million related to \$383 million of pension and OPEB mark-to-market losses in 2020, compared to a \$105 million tax benefit related to \$468 million of mark-to-market losses in 2019.
- A tax benefit of \$49 million in 2020, compared with \$41 million in 2019, for the settlement of stock-based compensation awards with associated tax deductions in excess of cumulative U.S. GAAP compensation expense.

Construction Industries

Construction Industries' total sales were \$16.918 billion in 2020, a decrease of \$5.731 billion, or 25 percent, compared with \$22.649 billion in 2019. The decrease was due to lower sales volume, driven by lower end-user demand and the impact from changes in dealer inventories. Dealers decreased inventories during 2020, compared with an increase during 2019.

- In North America, sales decreased mostly due to lower sales volume driven by lower end-user demand and the impact from changes in dealer inventories. Dealers decreased inventories during 2020, compared with an increase during 2019.
- Sales declined in Latin America primarily due to the impact from changes in dealer inventories and unfavorable currency impacts from a weaker Brazilian real. Dealers decreased inventories during 2020, compared with a slight increase during 2019.
- In EAME, sales decreased mostly due to lower end-user demand and the impact from changes in dealer inventories across most countries in the region. Dealers decreased inventories more in 2020 than in 2019.

- Sales declined in Asia/Pacific primarily due to lower sales volume driven by the impact of changes in dealer inventories, lower end-user demand across most of the region and unfavorable price realization due to competitive market conditions in China.

Construction Industries' profit was \$2.373 billion in 2020, a decrease of \$1.558 billion, or 40 percent, compared with \$3.931 billion in 2019. The decrease was mainly due to lower sales volume and unfavorable price realization primarily due to the geographic mix of sales, partially offset by favorable manufacturing costs and lower SG&A/R&D expenses. Favorable manufacturing costs were primarily due to lower period manufacturing costs, material costs and favorable cost absorption, partially offset by higher warranty expense. Cost absorption was favorable as inventory decreased in 2019, compared with inventory that was about flat in 2020. Lower SG&A/R&D expenses and period manufacturing costs both reflected a reduction in short-term incentive compensation expense and other cost reductions related to lower sales volumes.

Construction Industries' profit as a percent of total sales was 14.0 percent in 2020, compared with 17.4 percent in 2019.

Resource Industries

Resource Industries' total sales were \$7.906 billion in 2020, a decrease of \$2.370 billion, or 23 percent, compared with \$10.276 billion in 2019. The decrease was due to lower sales volume, driven by lower end-user demand for equipment and aftermarket parts and the impact from changes in dealer inventories. Dealers decreased inventories during 2020, compared with an increase during 2019. Lower end-user demand was primarily driven by equipment supporting heavy construction and quarry and aggregates. Mining equipment end-user demand and aftermarket parts demand were also down in 2020, though to a lesser extent. Mining equipment sales were impacted by mining company delays in capital expenditures due to pricing in certain commodities and overall economic uncertainty.

Resource Industries' profit was \$896 million in 2020, a decrease of \$733 million, or 45 percent, compared with \$1.629 billion in 2019. The decrease was mainly due to lower sales volume, partially offset by favorable manufacturing costs. Favorable manufacturing costs were mostly due to lower period manufacturing costs and material costs, partially offset by the unfavorable impact of cost absorption. Lower period manufacturing costs were driven by lower short-term incentive compensation expense, other cost-reduction actions implemented in response to lower sales volumes and the benefits of prior restructuring programs. Cost absorption was unfavorable as inventory increased during 2019, compared with inventory levels that were about flat during 2020.

Resource Industries' profit as a percent of total sales was 11.3 percent for 2020, compared with 15.9 percent for 2019.

Energy & Transportation

Sales by Application

(Millions of dollars)

	2020	2019	\$ Change	% Change
Oil and Gas	\$ 3,701	\$ 5,205	\$ (1,504)	(29 %)
Power Generation	3,963	4,474	(511)	(11 %)
Industrial	2,945	3,749	(804)	(21 %)
Transportation	4,055	5,057	(1,002)	(20 %)
External Sales	14,664	18,485	(3,821)	(21 %)
Inter-Segment	2,806	3,612	(806)	(22 %)
Total Sales	<u>\$ 17,470</u>	<u>\$ 22,097</u>	<u>\$ (4,627)</u>	<u>(21 %)</u>

Energy & Transportation's total sales were \$17.470 billion in 2020, a decrease of \$4.627 billion, or 21 percent, compared with \$22.097 billion in 2019. Sales declined across all applications and inter-segment engine sales.

- Oil and Gas – Sales decreased mainly due to lower demand in North America for reciprocating engines used in gas compression and decreased sales of engine aftermarket parts and lower sales of turbines and turbine-related services across most regions.
- Power Generation – Sales decreased primarily due to lower sales volume for reciprocating engines and aftermarket parts, as well as lower sales in turbines and turbine-related services.
- Industrial – Sales decreased due to lower demand across all regions.
- Transportation – Sales declined in rail due to lower rail services and deliveries of locomotives, primarily in North America, and in marine applications primarily in EAME and Asia/Pacific.

Energy & Transportation's profit was \$2.405 billion in 2020, a decrease of \$1.505 billion, or 38 percent, compared with \$3.910 billion in 2019. The decrease was due to lower sales volume, partially offset by lower SG&A/R&D expenses and manufacturing costs. SG&A/R&D expenses and manufacturing costs were both impacted by a reduction in short-term incentive compensation expense and other cost reductions related to lower sales volumes. In addition, segment profit was unfavorably impacted by increased restructuring costs and certain asset impairments.

Energy & Transportation's profit as a percent of total sales was 13.8 percent in 2020, compared with 17.7 percent in 2019.

Financial Products Segment

Financial Products' segment revenues were \$3.044 billion in 2020, a decrease of \$390 million, or 11 percent, from 2019. The decrease was primarily because of lower average financing rates across all regions and lower average *earning assets* in North America.

Financial Products' segment profit was \$590 million in 2020, compared with \$832 million in 2019. The decrease was due to higher provision for credit losses at Cat Financial, lower average earning assets, an unfavorable impact from equity securities in Insurance Services, lower net yield on average earning assets and an unfavorable impact from returned or repossessed equipment. These unfavorable impacts were partially offset by a reduction in SG&A expenses primarily due to lower incentive compensation.

At the end of 2020, past dues at Cat Financial were 3.49 percent, compared with 3.14 percent at the end of 2019. Past dues increased primarily due to the impact of the COVID-19 pandemic, partially offset by decreases in the Caterpillar Power Finance, EAME and Latin American portfolios. Write-offs, net of recoveries, were \$222 million for 2020, compared with \$237 million for 2019. As of December 31, 2020, Cat Financial's allowance for credit losses totaled \$479 million, or 1.77 percent of finance receivables, compared with \$424 million, or 1.50 percent of finance receivables at December 31, 2019.

Corporate Items and Eliminations

Expense for corporate items and eliminations was \$1.434 billion in 2020, a decrease of \$151 million from 2019. The decrease was primarily due to segment reporting methodology differences and lower corporate costs, partially offset by increased pension and OPEB costs.

FOURTH QUARTER 2020 COMPARED WITH FOURTH QUARTER 2019

CONSOLIDATED SALES AND REVENUES

The chart above graphically illustrates reasons for the change in consolidated sales and revenues between the fourth quarter of 2019 (at left) and the fourth quarter of 2020 (at right). Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees.

Total sales and revenues for the fourth quarter of 2020 were \$11.235 billion, a decrease of \$1.909 billion, or 15 percent, compared with \$13.144 billion in the fourth quarter of 2019. The decline was mostly due to lower sales volume driven by lower end-user demand for equipment and services and the impact from changes in dealer inventories. Dealers decreased inventories more during the fourth quarter of 2020 than during the fourth quarter of 2019.

Sales were lower across the three primary segments, with the largest decline in Energy & Transportation.

The largest sales decrease was in North America, which declined 22 percent due to lower sales volume driven by lower end-user demand and the impact from changes in dealer inventories. Dealers decreased inventories more during the fourth quarter of 2020 than during the fourth quarter of 2019.

Sales decreased 9 percent in Latin America primarily due to the unfavorable currency impacts from a weaker Brazilian real.

EAME sales decreased 11 percent primarily due to lower end-user demand for equipment and aftermarket parts, partially offset by favorable currency impacts from a stronger euro and price realization.

Asia/Pacific sales decreased 8 percent primarily due to lower sales volume and unfavorable price realization, partially offset by favorable currency impacts from a stronger Australian dollar and Chinese yuan. Sales volume declined due to lower end-user demand and the impact from changes in dealer inventories. Dealers decreased inventories during the fourth quarter of 2020, compared with dealer inventories that were about flat during the fourth quarter of 2019.

Dealers decreased machine and engine inventories about \$1.100 billion during the fourth quarter of 2020, compared with a decrease of about \$700 million during the fourth quarter of 2019. Dealers are independent, and the reasons for changes in their inventory levels vary, including their expectations of future demand and product delivery times. Dealers' demand expectations take into account seasonal changes, macroeconomic conditions, machine rental rates and other factors. Delivery times can vary based on availability of product from Caterpillar factories and product distribution centers.

Sales and Revenues by Segment

CONSOLIDATED OPERATING PROFIT

The chart above graphically illustrates reasons for the change in consolidated operating profit between the fourth quarter of 2019 (at left) and the fourth quarter of 2020 (at right). Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees. The bar entitled Other includes consolidating adjustments and Machinery, Energy & Transportation other operating (income) expenses.

Operating profit for the fourth quarter of 2020 was \$1.380 billion, a decrease of \$470 million, or 25 percent, compared with \$1.850 billion in the fourth quarter of 2019. The decrease was primarily the result of lower sales volume partially offset by lower manufacturing costs and SG&A/R&D expenses. In addition, operating profit declined due to lower profit from Financial Products.

Manufacturing costs were lower due to favorable impact from cost absorption, lower material and period manufacturing costs, partially offset by higher warranty expense. Cost absorption was favorable as inventory decreased more in the fourth quarter of 2019 than in the fourth quarter of 2020.

SG&A/R&D expenses and period manufacturing costs benefited from reduced short-term incentive compensation expense and other cost reductions related to lower sales volumes, partially offset by higher labor and benefits costs.

Short-term incentive compensation expense is directly related to financial and operational performance, measured against targets set annually. In the first quarter, in response to the continued global economic uncertainty due to the COVID-19 pandemic, Caterpillar suspended 2020 short-term incentive compensation plans for many employees and all senior executives. As a result, no short-term incentive compensation expense was recognized in the fourth quarter of 2020, compared with about \$120 million in the fourth quarter of 2019.

Operating profit margin was 12.3 percent for the fourth quarter of 2020, compared with 14.1 percent for the fourth quarter of 2019.

Profit (Loss) by Segment

(Millions of dollars)	Fourth Quarter 2020	Fourth Quarter 2019	\$ Change	% Change
Construction Industries	\$ 630	\$ 659	\$ (29)	(4 %)
Resource Industries	273	261	12	5 %
Energy & Transportation	687	1,165	(478)	(41 %)
All Other Segment	(3)	(11)	8	73 %
Corporate Items and Eliminations	(281)	(325)	44	
Machinery, Energy & Transportation	1,306	1,749	(443)	(25 %)
Financial Products Segment	195	210	(15)	(7 %)
Corporate Items and Eliminations	(47)	(6)	(41)	
Financial Products	148	204	(56)	(27 %)
Consolidating Adjustments	(74)	(103)	29	
Consolidated Operating Profit	\$ 1,380	\$ 1,850	\$ (470)	(25 %)

Other Profit/Loss and Tax Items

- Interest expense excluding Financial Products in the fourth quarter of 2020 was \$130 million, compared with \$112 million in the fourth quarter of 2019.
- Other income (expense) in the fourth quarter of 2020 was an expense of \$309 million, compared with an expense of \$373 million in the fourth quarter of 2019. The change was primarily driven by lower pension and OPEB costs including lower mark-to-market losses for remeasurement of pension and OPEB plans and impacts from gains (losses) on marketable securities at Insurance Services, partially offset by unfavorable impacts from foreign currency exchange gains (losses). The favorable impact of gains (losses) on marketable securities reflected unrealized gains in the fourth quarter of 2020, compared with unrealized losses in the fourth quarter of 2019 and the absence of realized gains that occurred in the fourth quarter of 2019.
- The provision for income taxes for the fourth quarter of 2020 reflected an annual effective tax rate of 27.8 percent, compared with 25 percent for the fourth quarter of 2019, excluding the discrete items discussed in the following paragraph. The increase from 2019 was primarily related to changes in the geographic mix of profits from a tax perspective.

The provision for income taxes for the fourth quarter of 2020 also included the following:

- A tax benefit of \$96 million for the change from the third-quarter estimated annual tax rate of 31 percent, compared to a \$64 million tax benefit for the reduction in the annual effective tax rate in the fourth quarter of 2019.
- A tax benefit of \$92 million related to \$438 million of pension and OPEB mark-to-market losses in the fourth quarter of 2020, compared to a \$105 million tax benefit related to \$468 million of mark-to-market losses in the fourth quarter of 2019.
- A tax benefit of \$28 million in the fourth quarter of 2020, compared to \$13 million in the fourth quarter of 2019, for the settlement of stock-based compensation awards with associated tax deductions in excess of cumulative U.S. GAAP compensation expense.

Construction Industries

Construction Industries' total sales were \$4.508 billion in the fourth quarter of 2020, a decrease of \$512 million, or 10 percent, compared with \$5.020 billion in the fourth quarter of 2019. The decrease was due to lower sales volume, driven by the impact from changes in dealer inventories and slightly lower end-user demand. Dealers decreased inventories more during the fourth quarter of 2020 than during the fourth quarter of 2019.

- In North America, sales decreased mostly due to lower sales volume driven by the impact from changes in dealer inventories and lower end-user demand. The lower end-user demand was primarily the result of weaker pipeline and road construction. Dealers decreased inventories more during the fourth quarter of 2020 than during the fourth quarter of 2019.
- Sales declined in Latin America primarily due to the unfavorable currency impacts from a weaker Brazilian real and lower sales volume.

- In EAME, sales were about flat as lower sales volume across several countries in the region was offset by favorable price realization and favorable currency impacts from a stronger euro. Lower sales volume was driven by lower end-user demand, partially offset by the impact of changes in dealer inventories. Dealers decreased inventories more during the fourth quarter of 2019 than during the fourth quarter of 2020.
- Sales decreased in Asia/Pacific primarily due to lower sales volume and unfavorable price realization, partially offset by favorable currency impacts from both a stronger Chinese yuan and Australian dollar. The decrease in sales was mainly driven by China, where higher end-user demand was more than offset by unfavorable impacts from changes in dealer inventories. This was partially offset by higher demand in several other countries.

Construction Industries' profit was \$630 million in the fourth quarter of 2020, a decrease of \$29 million, or 4 percent, compared with \$659 million in the fourth quarter of 2019. The decrease was mainly due to lower sales volume and higher warranty expense, partially offset by favorable impact of cost absorption and lower SG&A/R&D expenses. Cost absorption was favorable as inventory increased during the fourth quarter of 2020, compared with a decrease during the fourth quarter of 2019. SG&A/R&D expenses benefited from reduced short-term incentive compensation expense and other cost reductions related to lower sales volumes.

Construction Industries' profit as a percent of total sales was 14.0 percent in the fourth quarter of 2020, compared with 13.1 percent in the fourth quarter of 2019.

Resource Industries

Resource Industries' total sales were \$2.180 billion in the fourth quarter of 2020, a decrease of \$215 million, or 9 percent, compared with \$2.395 billion in the fourth quarter of 2019. The decrease was due to lower end-user demand for equipment and aftermarket parts. End-user demand was lower for heavy construction and quarry and aggregates and was also lower in mining, but to a lesser extent.

Resource Industries' profit was \$273 million in the fourth quarter of 2020, an increase of \$12 million, or 5 percent, compared with \$261 million in the fourth quarter of 2019. The increase was mainly due to favorable manufacturing costs and lower SG&A/R&D expenses which was mostly offset by lower sales volume. Favorable manufacturing costs reflected favorable variable labor and burden, impact of cost absorption, period manufacturing costs and material costs. Cost absorption was favorable as inventory decreased in the fourth quarter of 2019 compared with being about flat in the fourth quarter of 2020. SG&A/R&D expenses, along with period manufacturing costs, benefited from lower short-term incentive compensation expense, other cost-reduction actions implemented and benefits from prior restructuring programs.

Resource Industries' profit as a percent of total sales was 12.5 percent in the fourth quarter of 2020, compared with 10.9 percent in the fourth quarter of 2019.

Energy & Transportation

Sales by Application

(Millions of dollars)	Fourth Quarter 2020	Fourth Quarter 2019	\$ Change	% Change
Oil and Gas	\$ 1,079	\$ 1,523	\$ (444)	(29 %)
Power Generation	1,180	1,294	(114)	(9 %)
Industrial	736	908	(172)	(19 %)
Transportation	1,035	1,441	(406)	(28 %)
External Sales	4,030	5,166	(1,136)	(22 %)
Inter-Segment	781	783	(2)	— %
Total Sales	\$ 4,811	\$ 5,949	\$ (1,138)	(19 %)

Energy & Transportation's total sales were \$4.811 billion in the fourth quarter of 2020, a decrease of \$1.138 billion, or 19 percent, compared with \$5.949 billion in the fourth quarter of 2019. Sales declined across all applications.

- Oil and Gas – Sales decreased mainly due to lower demand in North America for reciprocating engines used in gas compression and well servicing. In addition, sales were lower for turbines and turbine-related services.
- Power Generation – Sales decreased primarily due to lower sales volume in small reciprocating engines, turbines and turbine-related services and engine aftermarket parts.
- Industrial – Sales decreased due to lower demand across all regions.

- Transportation – Sales declined in rail due to lower rail services and locomotives deliveries, primarily in North America. Marine sales were also lower.

Energy & Transportation's profit was \$687 million in the fourth quarter of 2020, a decrease of \$478 million, or 41 percent, compared with \$1.165 billion in the fourth quarter of 2019. The decrease was due to lower sales volume, partially offset by lower SG&A/R&D expenses and period manufacturing costs. SG&A/R&D expenses and period manufacturing costs were mostly impacted by a reduction in short-term incentive compensation expense and other cost-reduction actions implemented in response to lower sales volumes.

Energy & Transportation's profit as a percent of total sales was 14.3 percent in the fourth quarter of 2020, compared with 19.6 percent in the fourth quarter of 2019.

Financial Products Segment

Financial Products' segment revenues were \$743 million in the fourth quarter of 2020, a decrease of \$103 million, or 12 percent, from the fourth quarter of 2019. The decrease was primarily because of lower average financing rates across all regions and lower average earning assets in North America.

Financial Products' segment profit was \$195 million in the fourth quarter of 2020, compared with \$210 million in the fourth quarter of 2019. The decrease was primarily due to higher provision for credit losses, an unfavorable impact from returned or repossessed equipment and lower average earning assets at Cat Financial. These unfavorable impacts were partially offset by a reduction in SG&A expenses primarily due to lower short-term incentive compensation and a favorable impact from equity securities in Insurance Services.

Corporate Items and Eliminations

Expense for corporate items and eliminations was \$328 million in the fourth quarter of 2020, a decrease of \$3 million from the fourth quarter of 2019.

2019 COMPARED WITH 2018

For discussions related to the consolidated sales and revenue and consolidated operating profit between 2019 and 2018, refer to Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2019, which was filed with the United States Securities and Exchange Commission on February 19, 2020.

RESTRUCTURING COSTS

We expect to incur about \$400 million of restructuring costs in 2021. We expect that prior restructuring actions will result in an incremental benefit to operating costs, primarily Costs of goods sold and SG&A expenses of about \$150 million in 2021 compared with 2020.

Additional information related to restructuring costs is included in Note 24 - "Restructuring Costs" of Part II, Item 8 "Financial Statements and Supplemental Data."

GLOSSARY OF TERMS

1. **Adjusted Profit Per Share** – Profit per share excluding pension and OPEB mark-to-market losses and restructuring costs. In 2019, adjusted profit per share also excludes a discrete tax benefit related to U.S. tax reform.
2. **All Other Segment** – Primarily includes activities such as: business strategy; product management and development; manufacturing and sourcing of filters and fluids, undercarriage, ground engaging tools, fluid transfer products, precision seals, rubber sealing and connecting components primarily for Cat® products; parts distribution; integrated logistics solutions; distribution services responsible for dealer development and administration, including a wholly owned dealer in Japan; dealer portfolio management and ensuring the most efficient and effective distribution of machines, engines and parts; brand management and marketing strategy; and digital investments for new customer and dealer solutions that integrate data analytics with state-of-the-art digital technologies while transforming the buying experience.
3. **Consolidating Adjustments** – Elimination of transactions between Machinery, Energy & Transportation and Financial Products.

4. **Construction Industries** – A segment primarily responsible for supporting customers using machinery in infrastructure and building construction applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes asphalt pavers; backhoe loaders; compactors; cold planers; compact track and multi-terrain loaders; mini, small, medium and large track excavators; motor graders; pipelayers; road reclaimers; skid steer loaders; telehandlers; small and medium track-type tractors; track-type loaders; utility vehicles; wheel excavators; compact, small and medium wheel loaders; and related parts and work tools.
5. **Corporate Items and Eliminations** – Includes corporate-level expenses, timing differences (as some expenses are reported in segment profit on a cash basis), methodology differences between segment and consolidated external reporting, certain restructuring costs, and inter-segment eliminations.
6. **Currency** – With respect to sales and revenues, currency represents the translation impact on sales resulting from changes in foreign currency exchange rates versus the U.S. dollar. With respect to operating profit, currency represents the net translation impact on sales and operating costs resulting from changes in foreign currency exchange rates versus the U.S. dollar. Currency only includes the impact on sales and operating profit for the Machinery, Energy & Transportation lines of business; currency impacts on Financial Products revenues and operating profit are included in the Financial Products portions of the respective analyses. With respect to other income/expense, currency represents the effects of forward and option contracts entered into by the company to reduce the risk of fluctuations in exchange rates (hedging) and the net effect of changes in foreign currency exchange rates on our foreign currency assets and liabilities for consolidated results (translation).
7. **Dealer Inventories** – Represents dealer machine and engine inventories, excluding aftermarket parts.
8. **EAME** – A geographic region including Europe, Africa, the Middle East and the Commonwealth of Independent States (CIS).
9. **Earning Assets** – Assets consisting primarily of total finance receivables net of unearned income, plus equipment on operating leases, less accumulated depreciation at Cat Financial.
10. **Energy & Transportation** – A segment primarily responsible for supporting customers using reciprocating engines, turbines, diesel-electric locomotives and related parts across industries serving Oil and Gas, Power Generation, Industrial and Transportation applications, including marine- and rail-related businesses. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales, and product support. The product portfolio includes turbine machinery and integrated systems and solutions and turbine-related services, reciprocating engine-powered generator sets, integrated systems used in the electric power generation industry, reciprocating engines and integrated systems and solutions for the marine and oil and gas industries, and reciprocating engines supplied to the industrial industry as well as Cat machinery. Responsibilities also include the remanufacturing of Caterpillar engines and components and remanufacturing services for other companies; the business strategy, product design, product management and development, manufacturing, remanufacturing, leasing and service of diesel-electric locomotives and components and other rail-related products and services; and product support of on-highway vocational trucks for North America.
11. **Financial Products** – The company defines Financial Products as our finance and insurance subsidiaries, primarily Caterpillar Financial Services Corporation (Cat Financial) and Caterpillar Insurance Holdings Inc. (Insurance Services). Financial Products' information relates to the financing to customers and dealers for the purchase and lease of Caterpillar and other equipment.
12. **Financial Products Segment** – Provides financing alternatives to customers and dealers around the world for Caterpillar products, as well as financing for vehicles, power generation facilities and marine vessels that, in most cases, incorporate Caterpillar products. Financing plans include operating and finance leases, installment sale contracts, working capital loans and wholesale financing plans. The segment also provides insurance and risk management products and services that help customers and dealers manage their business risk. Insurance and risk management products offered include physical damage insurance, inventory protection plans, extended service coverage for machines and engines, and dealer property and casualty insurance. The various forms of financing, insurance and risk management products offered to customers and dealers help support the purchase and lease of Caterpillar equipment. The segment also earns revenues from Machinery, Energy & Transportation, but the related costs are not allocated to operating segments. Financial Products' segment profit is determined on a pretax basis and includes other income/expense items.
13. **Latin America** – A geographic region including Central and South American countries and Mexico.
14. **Machinery, Energy & Transportation (ME&T)** – The company defines ME&T as Caterpillar Inc. and its subsidiaries, excluding Financial Products. ME&T's information relates to the design, manufacturing and marketing of its products.

15. **Machinery, Energy & Transportation Other Operating (Income) Expenses** – Comprised primarily of gains/losses on disposal of long-lived assets, gains/losses on divestitures and legal settlements, and accruals.
16. **Manufacturing Costs** – Manufacturing costs exclude the impacts of currency and represent the volume-adjusted change for variable costs and the absolute dollar change for period manufacturing costs. Variable manufacturing costs are defined as having a direct relationship with the volume of production. This includes material costs, direct labor and other costs that vary directly with production volume, such as freight, power to operate machines and supplies that are consumed in the manufacturing process. Period manufacturing costs support production but are defined as generally not having a direct relationship to short-term changes in volume. Examples include machinery and equipment repair, depreciation on manufacturing assets, facility support, procurement, factory scheduling, manufacturing planning and operations management.
17. **Mark-to-market gains/losses** – Represents the net gain or loss of actual results differing from the company's assumptions and the effects of changing assumptions for our defined benefit pension and OPEB plans. These gains and losses are immediately recognized through earnings upon the annual remeasurement in the fourth quarter, or on an interim basis as triggering events warrant remeasurement.
18. **Pension and Other Postemployment Benefit (OPEB)** – The company's defined-benefit pension and postretirement benefit plans.
19. **Price Realization** – The impact of net price changes excluding currency and new product introductions. Price realization includes geographic mix of sales, which is the impact of changes in the relative weighting of sales prices between geographic regions.
20. **Resource Industries** – A segment primarily responsible for supporting customers using machinery in mining, heavy construction, quarry and aggregates, waste and material handling applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales, and product support. The product portfolio includes large track-type tractors, large mining trucks, hard rock vehicles, longwall miners, electric rope shovels, draglines, hydraulic shovels, rotary drills, large wheel loaders, off-highway trucks, articulated trucks, wheel tractor scrapers, wheel dozers, landfill compactors, soil compactors, select work tools, machinery components, electronics and control systems, and related parts. In addition to equipment, Resource Industries also develops and sells technology products and services to provide customers fleet management, equipment management analytics and autonomous machine capabilities. Resource Industries also manages areas that provide services to other parts of the company, including integrated manufacturing and research and development.
21. **Restructuring Costs** – May include costs for employee separation, long-lived asset impairments and contract terminations. These costs are included in Other operating (income) expenses except for defined-benefit plan curtailment losses and special termination benefits, which are included in Other income (expense). Restructuring costs also include other exit-related costs, which may consist of accelerated depreciation, inventory write-downs, building demolition, equipment relocation and project management costs and LIFO inventory decrement benefits from inventory liquidations at closed facilities, all of which are primarily included in Cost of goods sold.
22. **Sales Volume** – With respect to sales and revenues, sales volume represents the impact of changes in the quantities sold for Machinery, Energy & Transportation as well as the incremental sales impact of new product introductions, including emissions-related product updates. With respect to operating profit, sales volume represents the impact of changes in the quantities sold for Machinery, Energy & Transportation combined with product mix as well as the net operating profit impact of new product introductions, including emissions-related product updates. Product mix represents the net operating profit impact of changes in the relative weighting of Machinery, Energy & Transportation sales with respect to total sales. The impact of sales volume on segment profit includes inter-segment sales.
23. **Services** – Enterprise services include, but are not limited to, aftermarket parts, Financial Products revenues and other service-related revenues. Machinery, Energy & Transportation segments exclude most Financial Products revenues.

LIQUIDITY AND CAPITAL RESOURCES

Sources of funds

We generate significant capital resources from operating activities, which are the primary source of funding for our ME&T operations. Funding for these businesses is also available from commercial paper and long-term debt issuances. Financial Products' operations are funded primarily from commercial paper, term debt issuances and collections from its existing portfolio. During 2020, we experienced favorable liquidity conditions globally in both our ME&T and Financial Products' operations. On a consolidated basis, we ended 2020 with \$9.35 billion of cash, an increase of \$1.07 billion from year-end 2019. We intend to maintain a strong cash and liquidity position.

Consolidated operating cash flow for 2020 was \$6.33 billion, down \$585 million compared to 2019. The decrease was primarily due to profit adjusted for non-cash items, including lower accruals for short-term incentive compensation and postretirement benefits. Partially offsetting lower profit were the absence of a discretionary pension contribution, reduced working capital requirements and lower payments for short-term incentive compensation during 2020. Within working capital, changes to accounts receivable and accounts payable favorably impacted cash flow, but were partially offset by unfavorable changes in accrued expenses, inventories and customer advances. See further discussion of operating cash flow under ME&T and Financial Products.

Total debt as of December 31, 2020 was \$37.16 billion, a decrease of \$494 million from year-end 2019. Debt related to Financial Products decreased \$2.51 billion, while debt related to ME&T increased \$2.02 billion in 2020. The increase was due to the issuance of new debt to maintain our strong financial position and increase liquidity. In April 2020, we issued \$800 million of ten-year bonds at 2.6 percent and \$1.2 billion of 30-year bonds at 3.25 percent.

We have three global credit facilities with a syndicate of banks totaling \$10.50 billion (Credit Facility) available in the aggregate to both Caterpillar and Cat Financial for general liquidity purposes. Based on management's allocation decision, which can be revised from time to time, the portion of the Credit Facility available to ME&T as of December 31, 2020 was \$2.75 billion. Information on our Credit Facility is as follows:

- The 364-day facility of \$3.15 billion (of which \$0.82 billion is available to ME&T) expires in September 2021.
- The three-year facility, as amended and restated in September 2019, of \$2.73 billion (of which \$0.72 billion is available to ME&T) expires in September 2022.
- The five-year facility, as amended and restated in September 2019, of \$4.62 billion (of which \$1.21 billion is available to ME&T) expires in September 2024.

At December 31, 2020, Caterpillar's consolidated net worth was \$15.41 billion, which was above the \$9.00 billion required under the Credit Facility. The consolidated net worth is defined as the consolidated shareholder's equity including preferred stock but excluding the pension and other postretirement benefits balance within Accumulated other comprehensive income (loss).

At December 31, 2020, Cat Financial's covenant interest coverage ratio was 1.72 to 1. This is above the 1.15 to 1 minimum ratio, calculated as (1) profit excluding income taxes, interest expense and net gain/(loss) from interest rate derivatives to (2) interest expense calculated at the end of each calendar quarter for the rolling four quarter period then most recently ended, required by the Credit Facility.

In addition, at December 31, 2020, Cat Financial's six-month covenant leverage ratio was 6.74 to 1 and year-end covenant leverage ratio was 6.95 to 1. This is below the maximum ratio of debt to net worth of 10 to 1, calculated (1) on a monthly basis as the average of the leverage ratios determined on the last day of each of the six preceding calendar months and (2) at each December 31, required by the Credit Facility.

In the event Caterpillar or Cat Financial does not meet one or more of their respective financial covenants under the Credit Facility in the future (and are unable to obtain a consent or waiver), the syndicate of banks may terminate the commitments allocated to the party that does not meet its covenants. Additionally, in such event, certain of Cat Financial's other lenders under other loan agreements where similar financial covenants or cross default provisions are applicable, may, at their election, choose to pursue remedies under those loan agreements, including accelerating the repayment of outstanding borrowings. At December 31, 2020, there were no borrowings under the Credit Facility.

Our total credit commitments and available credit as of December 31, 2020 were:

(Millions of dollars)	December 31, 2020		
	Consolidated	Machinery, Energy & Transportation	Financial Products
Credit lines available:			
Global credit facilities	\$ 10,500	\$ 2,750	\$ 7,750
Other external	3,178	146	3,032
Total credit lines available	13,678	2,896	10,782
Less: Commercial paper outstanding	(1,321)	—	(1,321)
Less: Utilized credit	(744)	(10)	(734)
Available credit	\$ 11,613	\$ 2,886	\$ 8,727

The other consolidated credit lines with banks as of December 31, 2020 totaled \$3.18 billion. These committed and uncommitted credit lines, which may be eligible for renewal at various future dates or have no specified expiration date, are used primarily by our subsidiaries for local funding requirements. Caterpillar or Cat Financial may guarantee subsidiary borrowings under these lines.

Since the outbreak of the COVID-19 global pandemic, Caterpillar has taken actions to maintain our strong financial position and increase liquidity. During 2020, we raised \$2.0 billion of incremental cash by issuing \$800 million of ten-year bonds at 2.6 percent and \$1.2 billion of 30-year bonds at 3.25 percent. We also entered into an incremental \$3.9 billion short-term credit facility that was set to expire on December 31, 2020 and registered for \$4.2 billion in commercial paper support programs available in the United States and Canada. In addition, Cat Financial issued \$3.25 billion of medium-term notes to refinance maturing medium-term notes and supplement its liquidity position. Due to our strong liquidity position, we chose to early terminate the \$3.9 billion short-term credit facility on September 2, 2020. We also do not have any outstanding borrowings under either commercial paper support program as of the date of this filing.

We receive debt ratings from the major credit rating agencies. Moody's rates our debt as "low-A", while Fitch and S&P maintain a "mid-A" debt rating. This split rating has not had a material impact on our borrowing costs or our overall financial health. However, a downgrade of our credit ratings by any of the major credit rating agencies would result in increased borrowing costs and could make access to certain credit markets more difficult. In the event economic conditions deteriorate such that access to debt markets becomes unavailable, ME&T's operations would rely on cash flow from operations, use of existing cash balances, borrowings from Cat Financial and access to our Credit Facility. Our Financial Products' operations would rely on cash flow from its existing portfolio, existing cash balances, access to our Credit Facility and other credit line facilities of Cat Financial and potential borrowings from Caterpillar. In addition, we maintain a support agreement with Cat Financial, which requires Caterpillar to remain the sole owner of Cat Financial and may, under certain circumstances, require Caterpillar to make payments to Cat Financial should Cat Financial fail to maintain certain financial ratios.

We facilitate voluntary supply chain finance programs (the "Programs") through participating financial institutions. The Programs are available to a wide range of suppliers and allows them the option to manage their cash flow. We are not a party to the agreements between the participating financial institutions and the suppliers in connection with the Programs. The range of payment terms we negotiate with our suppliers is consistent, irrespective of whether a supplier participates in the Programs. The amounts payable to participating financial institutions for suppliers who voluntarily participate in the Programs and included in accounts payable in the Consolidated Statement of Financial Position were \$533 million and \$575 million at December 31, 2020 and December 31, 2019, respectively. The amounts settled through the Programs and paid to participating financial institutions were \$3.2 billion and \$4.1 billion in 2020 and 2019, respectively. We account for payments made under the Programs, the same as our other accounts payable, as a reduction to our cash flows from operations. We do not believe that changes in the availability of supply chain financing will have a significant impact on our liquidity.

Machinery, Energy & Transportation

Net cash provided by operating activities was \$4.05 billion in 2020, compared with \$4.87 billion in 2019. The decrease was primarily due to lower profit in 2020 adjusted for non-cash items, which included lower accruals for short-term compensation payments and postretirement benefits. Partially offsetting lower profit were the absence of a discretionary pension contribution, lower payments for short-term incentive compensation and reduced working capital requirements. Within working capital, changes to accounts payable and accounts receivable favorably impacted cash flow, but were partially offset by changes in accrued expenses, inventories and customer advances.

Net cash used for investing activities in 2020 was \$1.34 billion, compared with net cash used of \$48 million in 2019. The change was primarily due to increased intercompany lending with Financial Products during 2020.

Net cash used for financing activities during 2020 was \$1.18 billion, compared with net cash used of \$4.48 billion in 2019. The change was primarily due to a decrease in share repurchases of \$2.92 billion and greater proceeds from the issuance of debt of \$512 million compared to 2019.

While our short-term priorities for the use of cash may vary from time to time as business needs and conditions dictate, our long-term cash deployment strategy is focused on the following priorities. Our top priority is to maintain a strong financial position in support of a Mid-A rating. Next, we intend to fund operational requirements and commitments. Then, we intend to fund priorities that profitably grow the company and return capital to shareholders through dividend growth and share repurchases. Additional information on cash deployment is as follows:

Strong financial position — Our top priority is to maintain a strong financial position in support of a mid-A rating. We track a diverse group of financial metrics that focus on liquidity, leverage, cash flow and margins which align with our cash deployment actions and the various methodologies used by the major credit rating agencies.

Operational excellence and commitments — Capital expenditures were \$994 million during 2020, compared to \$1.07 billion in 2019. We expect ME&T's capital expenditures in 2021 to be between \$1.0 billion and \$1.2 billion. We made \$262 million of contributions to our pension and other postretirement benefit plans during 2020. By comparison, we made \$1.81 billion of contributions to our pension and other postretirement plans in 2019, including a \$1.5 billion discretionary contribution made to our U.S. pension plans. We expect to make approximately \$310 million of contributions to our pension and OPEB plans in 2021.

Fund strategic growth initiatives and return capital to shareholders — We intend to utilize our liquidity and debt capacity to fund targeted investments that drive long-term profitable growth focused in the areas of expanded offerings and services, including acquisitions.

As part of our capital allocation strategy, ME&T free cash flow is a liquidity measure we use to determine the cash generated and available for financing activities including debt repayments, dividends and share repurchases. We define ME&T free cash flow as cash from ME&T operations excluding discretionary pension and other postretirement benefit plan contributions less capital expenditures. A goal of our capital allocation strategy is to return substantially all ME&T free cash flow to shareholders through the cycles in the form of dividends and share repurchases, while maintaining our mid-A rating.

Our share repurchase plans are subject to the company's cash deployment priorities and are evaluated on an ongoing basis considering the financial condition of the company and the economic outlook, corporate cash flow, the company's liquidity needs and the health and stability of global credit markets. The timing and amount of future repurchases may vary depending on market conditions and investing priorities. In July 2018, the Board of Directors approved an authorization to repurchase up to \$10 billion of Caterpillar common stock (the 2018 Authorization) effective January 1, 2019, with no expiration. In 2020, we repurchased \$1.13 billion of Caterpillar common stock, with \$4.82 billion remaining under the 2018 Authorization as of December 31, 2020. Caterpillar's basic shares outstanding as of December 31, 2020 were approximately 545 million. Due to current economic uncertainty, we have temporarily suspended our share repurchase program in 2020. The existing share repurchase program remains authorized by the Board, and we may resume share repurchases in the future at any time depending upon market conditions, our capital needs and other factors.

Each quarter, our Board of Directors reviews the company's dividend for the applicable quarter. The Board evaluates the financial condition of the company and considers the economic outlook, corporate cash flow, the company's liquidity needs, and the health and stability of global credit markets to determine whether to maintain or change the quarterly dividend. In December 2020, the Board of Directors approved maintaining our quarterly dividend representing \$1.03 per share and we continue to expect our strong financial position to support the dividend. Dividends paid totaled \$2.24 billion in 2020.

Financial Products

Financial Products operating cash flow was \$1.27 billion in 2020, compared with \$1.50 billion in 2019. Net cash provided by investing activities was \$791 million in 2020, compared with net cash used for investing activities of \$414 million in 2019. The change was primarily due to lower additions to finance receivables and other portfolio related activity. Net cash used for financing activities was \$2.50 billion in 2020, compared with \$991 million in 2019. The change was primarily due to lower portfolio funding requirements, partially offset by the increase in intercompany borrowings from ME&T.

Contractual obligations

The company has committed cash outflow related to long-term debt, operating lease agreements, postretirement benefit obligations, purchase obligations, interest on long-term debt and other long-term contractual obligations. As of December 31, 2020, minimum payments for these obligations were:

(Millions of dollars)	2021	2022-2023	2024-2025	After 2025	Total
Long-term debt:					
Machinery, Energy & Transportation	\$ 1,420	\$ 620	\$ 1,021	\$ 8,699	\$ 11,760
Financial Products	7,738	10,866	4,298	1,063	23,965
Total long-term debt ¹	9,158	11,486	5,319	9,762	35,725
Operating leases	174	206	117	182	679
Postretirement benefit obligations ²	310	695	729	1,778	3,512
Purchase obligations:					
Accounts payable ³	6,128	—	—	—	6,128
Purchase orders ⁴	5,554	5	—	—	5,559
Other contractual obligations ⁵	106	145	57	1	309
Total purchase obligations	11,788	150	57	1	11,996
Interest on long-term debt ⁶	830	1,228	862	7,109	10,029
Other long-term obligations ⁷	560	506	196	87	1,349
Total contractual obligations	\$ 22,820	\$ 14,271	\$ 7,280	\$ 18,919	\$ 63,290

¹ Amounts exclude unamortized discounts, debt issuance costs, and fair value adjustments.

² Amounts represent expected contributions to our pension and other postretirement benefit plans through 2030, offset by expected Medicare Part D subsidy receipts.

³ Amount represents invoices received and recorded as liabilities in 2020, but scheduled for payment in 2021. These represent short-term obligations made in the ordinary course of business.

⁴ Amounts represent contractual obligations for material and services on order at December 31, 2020 but not yet delivered. These represent short-term obligations made in the ordinary course of business.

⁵ Amounts represent long-term commitments entered into with key suppliers for minimum purchases quantities.

⁶ Amounts represent estimated contractual interest payments on long-term debt, including finance lease interest payments.

⁷ Amounts represent contractual obligations primarily for logistics services agreements related to our former third party logistics business, software license and development contracts and IT consulting contracts and outsourcing contracts for benefit plan administration and software system support.

The total amount of gross unrecognized tax benefits for uncertain tax positions, including positions impacting only the timing of tax benefits, was \$1,759 million at December 31, 2020. Payment of these obligations would result from settlements with taxing authorities. Due to the difficulty in determining the timing of settlements, these obligations are not included in the table above. We do not expect to make a tax payment related to these obligations within the next year that would significantly impact liquidity.

Off-balance sheet arrangements

We are a party to certain off-balance sheet arrangements, primarily in the form of guarantees. Information related to guarantees appears in Note 21 – “Guarantees and product warranty” of Part II, Item 8 “Financial Statements and Supplementary Data”.

RECENT ACCOUNTING PRONOUNCEMENTS

For a discussion of recent accounting pronouncements, see Note 1J — “New accounting guidance” of Part II, Item 8 “Financial Statements and Supplementary Data.”

CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect reported amounts. The more significant estimates include: residual values for leased assets, fair values for goodwill impairment tests, warranty liability, reserves for product liability and insurance losses, postretirement benefits, post-sale discounts, credit losses and income taxes. We have incorporated many years of data into the determination of each of these estimates and we have not historically experienced significant adjustments. We review these assumptions at least annually with the Audit Committee of the Board of Directors. Following are the methods and assumptions used in determining our estimates and an indication of the risks inherent in each.

Residual values for leased assets – We determine the residual value of Cat Financial’s leased equipment based on its estimated end-of-term market value. We estimate the residual value of leased equipment at the inception of the lease based on a number of factors, including historical wholesale market sales prices, past remarketing experience and any known significant market/product trends. We also consider the following critical factors in our residual value estimates: lease term, market size and demand, total expected hours of usage, machine configuration, application, location, model changes, quantities, third-party residual guarantees and contractual customer purchase options.

Upon termination of the lease, the equipment is either purchased by the lessee or sold to a third party, in which case we may record a gain or a loss for the difference between the estimated residual value and the sale price.

During the term of our leases, we monitor residual values. For operating leases, we record adjustments to depreciation expense reflecting changes in residual value estimates prospectively on a straight-line basis. For finance leases, we recognize residual value adjustments through a reduction of finance revenue over the remaining lease term.

We evaluate the carrying value of equipment on operating leases for potential impairment when we determine a triggering event has occurred. When a triggering event occurs, we perform a test for recoverability by comparing projected undiscounted future cash flows to the carrying value of the equipment on operating leases. If the test for recoverability identifies a possible impairment, we measure the fair value of the equipment on operating leases in accordance with the fair value measurement framework. We recognize an impairment charge for the amount by which the carrying value of the equipment on operating leases exceeds its estimated fair value.

At December 31, 2020, the aggregate residual value of equipment on operating leases was \$2.07 billion. Without consideration of other factors such as third-party residual guarantees or contractual customer purchase options, a 10 percent non-temporary decrease in the market value of our equipment subject to operating leases would reduce residual value estimates and result in the recognition of approximately \$95 million of additional annual depreciation expense.

Fair values for goodwill impairment tests – We test goodwill for impairment annually, at the reporting unit level, and whenever events or circumstances make it more likely than not that an impairment may have occurred, such as a significant adverse change in the business climate or a decision to sell all or a portion of a reporting unit. We perform our annual goodwill impairment test as of October 1 and monitor for interim triggering events on an ongoing basis.

We review goodwill for impairment utilizing either a qualitative assessment or a quantitative goodwill impairment test. If we choose to perform a qualitative assessment and determine the fair value more likely than not exceeds the carrying value, no further evaluation is necessary. For reporting units where we perform the quantitative goodwill impairment test, we compare the fair value of each reporting unit, which we primarily determine using an income approach based on the present value of discounted cash flows, to the respective carrying value, which includes goodwill. If the fair value of the reporting unit exceeds its carrying value, we do not consider the goodwill impaired. If the carrying value is higher than the fair value, we recognize the difference as an impairment loss.

The impairment test process requires valuation of the respective reporting unit, which we primarily determine using an income approach based on a discounted five year forecasted cash flow with a year-five residual value. We compute the residual value using the constant growth method, which values the forecasted cash flows in perpetuity. We support the income approach by a reconciliation of our calculated fair value for Caterpillar to the company's market capitalization. The assumptions about future cash flows and growth rates are based on each reporting unit's long-term forecast and are subject to review and approval by senior management. A reporting unit's discount rate is a risk-adjusted weighted average cost of capital, which we believe approximates the rate from a market participant's perspective. The estimated fair value could be impacted by changes in market conditions, interest rates, growth rates, tax rates, costs, pricing and capital expenditures. We categorize the fair value determination as Level 3 in the fair value hierarchy due to its use of internal projections and unobservable measurement inputs.

Our annual impairment tests completed in the fourth quarter of 2020 indicated the fair value of each reporting unit was substantially above its respective carrying value, including goodwill. Caterpillar's market capitalization has remained significantly above the net book value of the Company.

An unfavorable change in our expectations for the financial performance of our reporting units, particularly long-term growth and profitability, would reduce the fair value of our reporting units. The demand for our equipment and related parts is highly cyclical and significantly impacted by commodity prices, although the impact may vary by reporting unit. The energy and mining industries are major users of our products, including the coal, iron ore, gold, copper, oil and natural gas industries. Decisions to purchase our products are dependent upon the performance of those industries, which in turn are dependent in part on commodity prices. Lower commodity prices or industry specific circumstances that have a negative impact to the valuation assumptions may reduce the fair value of our reporting units. Should such events occur and it becomes more likely than not that a reporting unit's fair value has fallen below its carrying value, we will perform an interim goodwill impairment test(s), in addition to the annual impairment test. Future impairment tests may result in a goodwill impairment, depending on the outcome of the quantitative impairment test. We would report a goodwill impairment as a non-cash charge to earnings.

Warranty liability – At the time we recognize a sale, we record estimated future warranty costs. We determine the warranty liability by applying historical claim rate experience to the current field population and dealer inventory. Generally, we base historical claim rates on actual warranty experience for each product by machine model/engine size by customer or dealer location (inside or outside North America). We develop specific rates for each product shipment month and update them monthly based on actual warranty claim experience. Warranty costs may differ from those estimated if actual claim rates are higher or lower than our historical rates.

Product liability and insurance loss reserve – We determine these reserves based upon reported claims in process of settlement and actuarial estimates for losses incurred but not reported. Loss reserves, including incurred but not reported reserves, are based on estimates and ultimate settlements may vary significantly from such estimates due to increased claims frequency or severity over historical levels. The amount of these reserves totaled \$1.2 billion and \$1.1 billion as of December 31, 2020 and 2019, respectively. The majority of the balance in both 2020 and 2019 consisted of unearned insurance premiums.

Postretirement benefits – We sponsor defined benefit pension plans and/or other postretirement benefit plans (retirement healthcare and life insurance) to employees in many of our locations throughout the world. There are assumptions used in the accounting for these defined benefit plans that include discount rate, expected return on plan assets, expected rate of compensation increase, the future health care trend rate, mortality and other economic and demographic assumptions. The actuarial assumptions we use may change or differ significantly from actual results, which may result in a material impact to our consolidated financial statements.

The effects of actual results differing from our assumptions and the effects of changing assumptions are considered actuarial gains or losses. We utilize a mark-to-market approach in recognizing actuarial gains or losses immediately through earnings upon the annual remeasurement in the fourth quarter, or on an interim basis as triggering events warrant remeasurement.

Primary actuarial assumptions were determined as follows:

- We use the assumed discount rate to discount future benefit obligations back to today's dollars. The U.S. discount rate is based on a benefit cash flow-matching approach and represents the rate at which our benefit obligations could effectively be settled as of our measurement date, December 31. The benefit cash flow-matching approach involves analyzing Caterpillar's projected cash flows against a high quality bond yield curve, calculated using a wide population of corporate Aa bonds available on the measurement date. We use a similar approach to determine the assumed discount rate for our most significant non-U.S. plans. In estimating the service and interest cost components of net periodic benefit cost, we utilize a full yield curve approach in determining a discount rate. This approach applies the specific spot rates along the yield curve used in the determination of the benefit obligation to the relevant projected cash flows.

Discount rates are sensitive to changes in interest rates. A decrease in the discount rate would increase our obligation and future expense.

- The expected long-term rate of return on plan assets is based on our estimate of long-term passive returns for equities and fixed income securities weighted by the allocation of our plan assets. Based on historical performance, we increase the passive returns due to our active management of the plan assets. This rate is impacted by changes in general market conditions, but because it represents a long-term rate, it is not significantly impacted by short-term market swings. Changes in our allocation of plan assets would also impact this rate. For example, a shift to more fixed income securities would lower the rate. A decrease in the rate would increase our expense. The expected return on plan assets is calculated using the fair value of plan assets as of our measurement date, December 31.
- We use the expected rate of compensation increase to develop benefit obligations using projected pay at retirement. It represents average long-term salary increases. This rate is influenced by our long-term compensation policies. An increase in the rate would increase our obligation and expense.
- The assumed health care trend rate represents the rate at which health care costs are assumed to increase and is based on historical and expected experience. Changes in our projections of future health care costs due to general economic conditions and those specific to health care (e.g., technology driven cost changes) will impact this trend rate. An increase in the trend rate would increase our obligation and expense.
- We use the mortality assumption to estimate the life expectancy of plan participants. An increase in the life expectancy of plan participants will result in an increase in our obligation and expense.

Postretirement Benefit Plan Actuarial Assumptions Sensitivity

The effects of a one percentage-point change in certain actuarial assumptions on 2020 pension and OPEB costs and obligations are as follows:

(Millions of dollars)	2020 Benefit Cost Increase (Decrease)		Year-end Benefit Obligation Increase (Decrease)	
	One percentage-point increase	One percentage-point decrease	One percentage-point increase	One percentage-point decrease
U.S. Pension benefits:				
Assumed discount rate	\$ 93	\$ (121)	\$ (2,091)	\$ 2,551
Expected rate of compensation increase ¹	—	—	—	—
Expected long-term rate of return on plan assets	(155)	155	—	—
Non-U.S. Pension benefits:				
Assumed discount rate	18	(26)	(662)	847
Expected rate of compensation increase	5	(4)	43	(37)
Expected long-term rate of return on plan assets	(42)	42	—	—
Other postretirement benefits:				
Assumed discount rate	10	(12)	(381)	458
Expected rate of compensation increase	—	—	1	(1)
Expected long-term rate of return on plan assets	(2)	2	—	—

¹ Effective December 31, 2019, all U.S. pension benefits were frozen, and accordingly this assumption is no longer applicable.

Actuarial Assumptions

	U.S. Pension Benefits			Non-U.S. Pension Benefits			Other Postretirement Benefits		
	2020	2019	2018	2020	2019	2018	2020	2019	2018
Weighted-average assumptions used to determine benefit obligation, end of year:									
Discount rate	2.4 %	3.2 %	4.2 %	1.4 %	1.9 %	2.5 %	2.3 %	3.2 %	4.2 %
Rate of compensation increase ¹	— %	— %	4.0 %	2.0 %	2.0 %	3.0 %	4.0 %	4.0 %	4.0 %
Weighted-average assumptions used to determine net periodic benefit cost:									
Discount rate used to measure service cost ¹	— %	4.3 %	3.7 %	1.5 %	2.5 %	2.3 %	3.2 %	4.1 %	3.5 %
Discount rate used to measure interest cost	2.8 %	3.9 %	3.2 %	1.7 %	2.3 %	2.2 %	2.8 %	3.9 %	3.2 %
Expected rate of return on plan assets	5.1 %	5.9 %	6.3 %	3.3 %	3.8 %	5.2 %	7.0 %	7.2 %	7.5 %
Rate of compensation increase ¹	— %	4.0 %	4.0 %	2.0 %	3.0 %	4.0 %	4.0 %	4.1 %	4.0 %
Health care cost trend rates at year-end:									
Health care trend rate assumed for next year							5.8 %	6.1 %	6.1 %
Rate that the cost trend rate gradually declines to							5.0 %	5.0 %	5.0 %
Year that the cost trend rate reaches ultimate rate							2025	2025	2025

¹ Effective December 31, 2019, all U.S. pension benefits were frozen, and accordingly this assumption is no longer applicable.

See Note 12 - "Postemployment benefit plans" of Part II, Item 8 "Financial Statement and Supplemental Data" for further information regarding the accounting for postretirement benefits.

Post-sale discount reserve – We provide discounts to dealers through merchandising programs. We have numerous programs that are designed to promote the sale of our products. The most common dealer programs provide a discount when the dealer sells a product to a targeted end user. The amount of accrued post-sale discounts was \$1.4 billion and \$1.7 billion as of December 31, 2020 and 2019, respectively. The reserve represents discounts that we expect to pay on previously sold units and is reviewed at least quarterly. We adjust the reserve if discounts paid differ from those estimated. Historically, those adjustments have not been material.

Allowance for credit losses - The allowance for credit losses is management's estimate of expected losses over the life of our finance receivable portfolio calculated using loss forecast models that take into consideration historical credit loss experience, current economic conditions and forecasts and scenarios that capture country and industry-specific economic factors. In addition, we consider qualitative factors not able to be fully captured in our loss forecast models, including borrower-specific and company-specific factors. These qualitative factors are subjective and require a degree of management judgment.

We measure the allowance for credit losses on a collective (pool) basis when similar risk characteristics exist and on an individual basis when we determine that similar risk characteristics do not exist. We identify finance receivables for individual evaluation based on past-due status and information available about the customer, such as financial statements, news reports and published credit ratings, as well as general information regarding industry trends and the economic environment in which our customers operate. The allowance for credit losses attributable to finance receivables that are individually evaluated is based on the present value of expected future cash flows discounted at the receivables' effective interest rate, the fair value of the collateral for collateral-dependent receivables or the observable market price of the receivable. In determining collateral value, we estimate the current fair market value of the collateral less selling costs. We also consider credit enhancements such as additional collateral and contractual third-party guarantees.

While management believes it has exercised prudent judgment and applied reasonable assumptions, there can be no assurance that in the future, changes in economic conditions or other factors would not cause changes in the financial health of our customers. If the financial health of our customers deteriorates, the timing and level of payments received could be impacted and therefore, could result in a change to our estimated losses.

Income taxes – We are subject to the income tax laws of the many jurisdictions in which we operate. These tax laws are complex, and the manner in which they apply to our facts is sometimes open to interpretation. In establishing the provision for income taxes, we must make judgments about the application of these inherently complex tax laws. Our income tax positions and analysis are based on currently enacted tax law. Future changes in tax law or related interpretations could significantly impact the provision for income taxes, the amount of taxes payable, and the deferred tax asset and liability balances. Changes in tax law are reflected in the period of enactment with related interpretations considered in the period received.

Despite our belief that our tax return positions are consistent with applicable tax laws, we believe that taxing authorities could challenge certain positions. Settlement of any challenge can result in no change, a complete disallowance, or some partial adjustment reached through negotiations or litigation. We record tax benefits for uncertain tax positions based upon management's evaluation of the information available at the reporting date. To be recognized in the financial statements, a tax benefit must be at least more likely than not of being sustained based on technical merits. The benefit for positions meeting the recognition threshold is measured as the largest benefit more likely than not of being realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. Significant judgment is required in making these determinations and adjustments to unrecognized tax benefits may be necessary to reflect actual taxes payable upon settlement. Adjustments related to positions impacting the effective tax rate affect the provision for income taxes. Adjustments related to positions impacting the timing of deductions impact deferred tax assets and liabilities. For tax years 2007 to 2012 including the impact of a loss carryback to 2005, the IRS has proposed to tax in the United States profits earned from certain parts transactions by Caterpillar SARL (CSARL), based on the IRS examination team's application of "substance-over-form" or "assignment-of-income" judicial doctrines. CSARL is primarily taxable locally in Switzerland. We are vigorously contesting the proposed increases to tax and penalties for these years of approximately \$2.3 billion. We believe that the relevant transactions complied with applicable tax laws and did not violate judicial doctrines. The purchase of parts by CSARL from unrelated parties and the subsequent sale of those parts to unrelated dealers outside the United States have substantial legal, commercial, and economic consequences for the parties involved. Therefore, we have concluded that the largest amount of benefit that is more likely than not to be sustained related to this position is the entire benefit. As a result, no amount related to these IRS adjustments is reflected in unrecognized tax benefits. We have filed U.S. income tax returns on this same basis for years after 2012. We currently believe the ultimate disposition of this matter will not have a material adverse effect on our consolidated financial position, liquidity or results of operations.

Deferred tax assets generally represent tax benefits for tax deductions or credits available in future tax returns. Certain estimates and assumptions are required to determine whether it is more likely than not that all or some portion of the benefit of a deferred tax asset will not be realized. In making this assessment, management analyzes the trend of U.S. GAAP earnings and estimates the impact of future taxable income, reversing temporary differences and available prudent and feasible tax planning strategies. We give less weight in this analysis to mark-to-market adjustments to remeasure our pension and OPEB plans as we do not consider these adjustments indicative of ongoing earnings trends. Should a change in facts or circumstances lead to a change in judgment about the ultimate realizability of a deferred tax asset, we record or adjust the related valuation allowance in the period that the change in facts and circumstances occurs, along with a corresponding increase or decrease in the provision for income taxes.

Additional information related to income taxes is included in Note 6 - "Income taxes" of Part II, Item 8 "Financial statements and Supplementary Data."

OTHER MATTERS

Information related to legal proceedings appears in Note 22—Environmental and Legal Matters of Part II, Item 8 "Financial Statements and Supplementary Data."

RETIREMENT BENEFITS

We recognize mark-to-market gains and losses immediately through earnings upon the remeasurement of our pension and OPEB plans. Mark-to-market gains and losses represent the effects of actual results differing from our assumptions and the effects of changing assumptions. Changes in discount rates and differences between the actual return on plan assets and the expected return on plan assets generally have the largest impact on mark-to-market gains and losses.

The table below summarizes the amounts of net periodic benefit cost recognized for 2020, 2019 and 2018, respectively, and includes expected cost for 2021.

(Millions of dollars)	2021 Expected	2020	2019	2018
U.S. Pension Benefits	\$ (388)	\$ (309)	\$ (7)	\$ (149)
Non-U.S. Pension Benefits	(18)	18	19	(69)
Other Postretirement Benefits	117	147	158	138
Mark-to-market loss (gain)	— ¹	383	468	495
Total net periodic benefit cost (benefit)	<u>\$ (289)</u>	<u>\$ 239</u>	<u>\$ 638</u>	<u>\$ 415</u>

¹ Expected net periodic benefit cost (benefit) does not include an estimate for mark-to-market gains or losses.

- **Expected decrease in expense in 2021 compared to 2020** - Excluding the impact of mark-to-market gains and losses, our net periodic benefit cost is expected to decrease \$145 million in 2021. This expected decrease is primarily due to lower interest cost in 2021 as a result of lower discount rates at year-end 2020 partially offset by lower expected return on plan assets in 2021 (U.S. pension plans expected return on plan assets is 4.2 percent for 2021 compared to 5.1 percent in 2020).
- **Decrease in expense in 2020 compared to 2019** - Primarily due to lower interest cost in 2020 as a result of lower discount rates at year-end 2019, the elimination of service cost for our U.S. pension plans freezing benefit accruals and lower mark-to-market losses in 2020 compared to 2019.
- **Increase in expense in 2019 compared to 2018** - Primarily due to lower expected return on plan assets (U.S. pension plans had an expected rate of return of 5.9 percent in 2019 compared to 6.3 percent in 2018) and higher interest costs due to higher discount rates at year-end 2018.

The primary factors that resulted in mark-to-market losses for 2020, 2019 and 2018 are described below. We include the net mark-to-market losses in Other income (expense) in the Results of Operations.

- **2020 net mark-to-market loss of \$383 million** - Primarily due to lower discount rates at the end of 2020 compared to the end of 2019. This was partially offset by a higher actual return on plan assets compared to the expected return on plan

assets (U.S. pension plans had an actual rate of return of 16.7 percent compared to an expected rate of return of 5.1 percent).

- **2019 net mark-to-market loss of \$468 million** - Primarily due to lower discount rates at the end of 2019 compared to the end of 2018. This was partially offset by a higher actual return on plan assets compared to the expected return on plan assets (U.S. pension plans had an actual rate of return of 22.3 percent compared to an expected rate of return of 5.9 percent).
- **2018 net mark-to-market loss of \$495 million** - Primarily due to the difference between the actual return on plan assets compared to the expected return on plan assets (U.S. pension plans had an actual rate of return of negative 5.4 percent compared to an expected rate of return of 6.3 percent). This was partially offset by higher discount rates at the end of 2018 compared to the end of 2017.

SENSITIVITY

Foreign Exchange Rate Sensitivity

ME&T operations use foreign currency forward and option contracts to manage unmatched foreign currency cash inflow and outflow. Our objective is to minimize the risk of exchange rate movements that would reduce the U.S. dollar value of our foreign currency cash flow. Our policy allows for managing anticipated foreign currency cash flow for up to approximately five years. Based on the anticipated and firmly committed cash inflow and outflow for our ME&T operations for the next 12 months and the foreign currency derivative instruments in place at year-end, a hypothetical 10 percent weakening of the U.S. dollar relative to all other currencies would adversely affect our expected 2021 cash flow for our ME&T operations by approximately \$126 million. Last year similar assumptions and calculations yielded a potential \$225 million adverse impact on 2020 cash flow. We determine our net exposures by calculating the difference in cash inflow and outflow by currency and adding or subtracting outstanding foreign currency derivative instruments. We multiply these net amounts by 10 percent to determine the sensitivity.

In managing foreign currency risk for our Financial Products operations, our objective is to minimize earnings volatility resulting from conversion and the remeasurement of net foreign currency balance sheet positions and future transactions denominated in foreign currencies. Since our policy allows the use of foreign currency forward, option and cross currency contracts to offset the risk of currency mismatch between our assets and liabilities and exchange rate risk associated with future transactions denominated in foreign currencies, a 10 percent change in the value of the U.S. dollar relative to all other currencies would not have a material effect on our consolidated financial position, results of operations or cash flow. Neither our policy nor the effect of a 10 percent change in the value of the U.S. dollar has changed from that reported at the end of last year.

The effect of the hypothetical change in exchange rates ignores the effect this movement may have on other variables, including competitive risk. If it were possible to quantify this competitive impact, the results would probably be different from the sensitivity effects shown above. In addition, it is unlikely that all currencies would uniformly strengthen or weaken relative to the U.S. dollar. In reality, some currencies may weaken while others may strengthen. Our primary exposure (excluding competitive risk) is to exchange rate movements in the Australian dollar, Chinese yuan, Japanese yen, Euro, and Swiss franc.

Interest Rate Sensitivity

For our ME&T operations, we have the option to use interest rate contracts to lower the cost of borrowed funds by attaching fixed-to-floating interest rate contracts to fixed-rate debt, and by entering into forward rate agreements on future debt issuances. A hypothetical 100 basis point adverse move in interest rates along the entire interest rate yield curve would have a minimal impact to the 2021 pre-tax earnings of ME&T. Last year, similar assumptions and calculations yielded a minimal impact to 2020 pre-tax earnings.

For our Financial Products operations, we use interest rate derivative instruments primarily to meet our match-funding objectives and strategies. We have a match-funding policy that addresses the interest rate risk by aligning the interest rate profile (fixed or floating rate and duration) of our debt portfolio with the interest rate profile of our finance receivable portfolio within a predetermined range on an ongoing basis. In connection with that policy, we use interest rate derivative instruments to modify the debt structure to match assets within the finance receivable portfolio. Match funding reduces the volatility of margins between interest-bearing assets and interest-bearing liabilities, regardless of which direction interest rates move.

In order to properly manage sensitivity to changes in interest rates, Financial Products measures the potential impact of different interest rate assumptions on pre-tax earnings. All on-balance sheet positions, including derivative financial instruments, are included in the analysis. The primary assumptions included in the analysis are that there are no new fixed rate assets or liabilities, the proportion of fixed rate debt to fixed rate assets remains unchanged and the level of floating rate assets and debt remain constant. An analysis of the December 31, 2020 balance sheet, using these assumptions, estimates the impact of a 100 basis point immediate and sustained adverse change in interest rates to have a minimal impact on 2021 pre-tax earnings. Last year, similar assumptions and calculations yielded a minimal impact to 2020 pre-tax earnings.

This analysis does not necessarily represent our current outlook of future market interest rate movement, nor does it consider any actions management could undertake in response to changes in interest rates. Accordingly, no assurance can be given that actual results would be consistent with the results of our estimate.

NON-GAAP FINANCIAL MEASURES

We provide the following definitions for the non-GAAP financial measures used in this report. These non-GAAP financial measures have no standardized meaning prescribed by U.S. GAAP and therefore are unlikely to be comparable to the calculation of similar measures for other companies. Management does not intend these items to be considered in isolation or as a substitute for the related GAAP measures.

We believe it is important to separately quantify the profit impact of three significant items in order for our results to be meaningful to our readers. These items consist of (i) pension and OPEB mark-to-market losses resulting from plan remeasurements, (ii) restructuring costs, which were incurred to generate longer-term benefits, and (iii) U.S. tax reform impact in 2019. We do not consider these items indicative of earnings from ongoing business activities and believe the non-GAAP measures will provide investors with useful perspective on underlying business results and trends and aid with assessing our period-over-period results. In addition, we provide a calculation of ME&T free cash flow as we believe it is an important measure for investors to determine the cash generation available for financing activities including debt repayments, dividends and share repurchases.

Reconciliations of adjusted results to the most directly comparable GAAP measures are as follows:

(Dollars in millions except per share data)	Operating Profit	Operating Profit Margin	Profit Before Taxes	Provision (Benefit) for Income Taxes	Effective Tax Rate	Profit	Profit per Share
Three Months Ended December 31, 2020 - US GAAP	\$ 1,380	12.3 %	\$ 941	\$ 167	17.7 %	\$ 780	\$ 1.42
Pension/OPEB mark-to-market (gains) losses	—	— %	438	92	21.0 %	346	\$ 0.63
Restructuring costs	58	0.5 %	58	18	31.0 %	40	\$ 0.07

Restructuring costs	236	0.4 %	236	45	19.0 %	191	\$ 0.34
U.S. tax reform impact	—	— %	—	178	— %	(178)	\$ (0.31)
Twelve Months Ended December 31, 2019 - Adjusted	\$ 8,526	15.8 %	\$ 8,516	\$ 2,074	24.4 %	\$ 6,469	\$ 11.40

Reconciliations of ME&T free cash flow to the most directly comparable GAAP measure, net cash provided by operating activities are as follows:

Millions of dollars	Twelves Months Ended December 31,	
	2020	2019
ME&T net cash provided by operating activities ¹	\$ 4,054	\$ 4,871
ME&T discretionary pension contributions	\$ —	\$ 1,500
ME&T capital expenditures	\$ (994)	\$ (1,074)
ME&T free cash flow	\$ 3,060	\$ 5,297

¹ See reconciliation of ME&T net cash provided by operating activities to consolidated net cash provided by operating activities on page 60.

Supplemental Consolidating Data

We are providing supplemental consolidating data for the purpose of additional analysis. We have grouped the data as follows:

Consolidated – Caterpillar Inc. and its subsidiaries.

Machinery, Energy & Transportation – We define ME&T as it is presented in the supplemental data as Caterpillar Inc. and its subsidiaries, excluding Financial Products. ME&T's information relates to the design, manufacturing and marketing of our products.

Financial Products – We define Financial Products as it is presented in the supplemental data as our finance and insurance subsidiaries, primarily Caterpillar Financial Services Corporation (Cat Financial) and Cat Insurance Holdings Inc. (Insurance Services). Financial Products' information relates to the financing to customers and dealers for the purchase and lease of Caterpillar and other equipment.

Consolidating Adjustments – Eliminations of transactions between ME&T and Financial Products.

The nature of the ME&T and Financial Products businesses is different, especially with regard to the financial position and cash flow items. Caterpillar management utilizes this presentation internally to highlight these differences. We believe this presentation will assist readers in understanding our business.

Pages 58 to 65 reconcile ME&T and Financial Products to Caterpillar Inc. consolidated financial information. Certain amounts for prior periods have been reclassified to conform to current year presentation.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Information required by Item 7A appears in Note 1 — “Operations and summary of significant accounting policies,” Note 4 — “Derivative financial instruments and risk management,” Note 18 — “Fair value disclosures” and Note 19 — “Concentration of credit risk” of Part II, Item 8 “Financial Statements and Supplementary Data.” Other information required by Item 7A is included in Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

Item 8. Financial Statements and Supplementary Data.

**MANAGEMENT’S REPORT ON
INTERNAL CONTROL OVER FINANCIAL REPORTING**

The management of Caterpillar Inc. (company) is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in Rule 13a-15(f) under the Exchange Act. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the company’s internal control over financial reporting as of December 31, 2020. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control—Integrated Framework* (2013). Based on our assessment we concluded that, as of December 31, 2020, the company’s internal control over financial reporting was effective based on those criteria.

The effectiveness of the company’s internal control over financial reporting as of December 31, 2020 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm. Their report appears on pages 68-69.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Caterpillar Inc.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated statement of financial position of Caterpillar Inc. and its subsidiaries (the “Company”) as of December 31, 2020 and 2019, and the related consolidated statements of results of operations, comprehensive income (loss), changes in shareholders’ equity, and cash flow for each of the three years in the period ended December 31, 2020, including the related notes (collectively referred to as the “consolidated financial statements”). We also have audited the Company’s internal control over financial reporting as of December 31, 2020, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2020 and 2019, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2020 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2020, based on criteria established in Internal Control - Integrated Framework (2013) issued by the COSO.

Basis for Opinions

The Company’s management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on the Company’s consolidated financial statements and on the Company’s internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Uncertain Tax Position - Caterpillar SARL IRS Examination

As described in Note 6 to the consolidated financial statements, as a result of the audits of the Company's U.S. 2007 to 2012 income tax returns, including the impact of a loss carryback to 2005, the Internal Revenue Service ("IRS") has proposed to tax in the U.S. profits earned from certain parts transactions by Caterpillar SARL ("CSARL"). This proposal is based on the IRS examination team's application of the "substance-over-form" or "assignment-of-income" judicial doctrines. As described by management, the Company is vigorously contesting the proposed increases to tax and penalties for these years of approximately \$2.3 billion, as management believes that the relevant transactions complied with applicable tax laws and did not violate judicial doctrines. As disclosed by management, the purchase of parts by CSARL from unrelated parties and the subsequent sale of those parts to unrelated dealers outside the U.S. have substantial legal, commercial, and economic consequences for the parties involved. Management has concluded that the largest amount of benefit that is more likely than not to be sustained related to this position is the entire benefit. As a result, no amount related to these IRS adjustments is reflected in the Company's unrecognized tax benefits. The Company has filed U.S. income tax returns on this same basis for years after 2012.

The principal considerations for our determination that performing procedures relating to the uncertain tax position arising from the CSARL IRS Examination is a critical audit matter are there was significant judgment by management in evaluating the amount of the benefit that is more likely than not to be sustained related to the position, which in turn led to a high degree of auditor judgment, subjectivity and effort in performing procedures to evaluate whether the position was more likely than not to be sustained. Also, the audit effort involved the use of professionals with specialized skill and knowledge to assist in evaluating the audit evidence obtained from these procedures.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the uncertain tax position arising from the CSARL IRS Examination. These procedures also included, among others, (i) evaluating management's process for determining the reasonableness of the uncertain tax position, including reading certain intercompany and third-party agreements which are relevant to evaluating the legal form and substance of the CSARL transaction flows; (ii) evaluating management's assessment of whether the position was more likely than not to produce a tax benefit and the determination by management of the largest amount of benefit that is more likely than not to be sustained related to this position; and (iii) evaluating the Revenue Agent Reports ("RARs") from the IRS and management's protests of the RARs. Professionals with specialized skill and knowledge were used to assist in evaluating the applicable tax laws and judicial doctrines related to this matter as well as changes in relevant tax regulations, rulings, and case law.

Increase (decrease) in cash and short-term investments and restricted cash	1,074	402	(430)
Cash and short-term investments and restricted cash at beginning of period	8,292	7,890	8,320
Cash and short-term investments and restricted cash at end of period	\$ 9,366	\$ 8,292	\$ 7,890

All short-term investments, which consist primarily of highly liquid investments with original maturities of three months or less, are considered to be cash equivalents.

See accompanying notes to Consolidated Financial Statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Operations and summary of significant accounting policies

A. Nature of operations

Information in our financial statements and related commentary are presented in the following categories:

Machinery, Energy & Transportation (ME&T) – We define ME&T as Caterpillar Inc. and its subsidiaries, excluding Financial Products. ME&T's information relates to the design, manufacturing and marketing of our products.

Financial Products – We define Financial Products as our finance and insurance subsidiaries, primarily Caterpillar Financial Services Corporation (Cat Financial) and Caterpillar Insurance Holdings Inc. (Insurance Services). Financial Products information relates to the financing to customers and dealers for the purchase and lease of Caterpillar and other equipment.

We sell our products primarily under the brands “Caterpillar,” “CAT,” design versions of “CAT” and “Caterpillar,” “EMD,” “FG Wilson,” “MaK,” “MWM,” “Perkins,” “Progress Rail,” “SEM” and “Solar Turbines”.

We conduct operations in our ME&T line of business under highly competitive conditions, including intense price competition. We place great emphasis on the high quality and performance of our products and our dealers' service support. Although no one competitor is believed to produce all of the same types of equipment that we do, there are numerous companies, large and small, which compete with us in the sale of each of our products.

We distribute our machines principally through a worldwide organization of dealers (dealer network), 45 located in the United States and 116 located outside the United States, serving 192 countries. We sell reciprocating engines principally through the dealer network and to other manufacturers for use in products. We also sell some of the reciprocating engines manufactured by our subsidiary Perkins Engines Company Limited through its worldwide network of 92 distributors covering 183 countries. We sell the FG Wilson branded electric power generation systems primarily manufactured by our subsidiary Caterpillar Northern Ireland Limited through its worldwide network of 150 distributors covering 109 countries. We also sell some of the large, medium speed reciprocating engines under the MaK brand through a worldwide network of 20 distributors covering 130 countries. Our dealers do not deal exclusively with our products; however, in most cases sales and servicing of our products are the dealers' principal business. We sell some products, primarily turbines and locomotives, to end customers through sales forces employed by the company. At times, these employees are assisted by independent sales representatives.

The Financial Products line of business also conducts operations under highly competitive conditions. Financing for users of Caterpillar products is available through a variety of competitive sources, principally commercial banks and finance and leasing companies. We offer various financing, insurance and risk management products designed to support sales of our products and generate financing income for our company. We conduct a significant portion of Financial Products activity in North America, with additional offices in Latin America, Asia/Pacific, Europe, Africa and the Middle East.

B. Basis of presentation

The consolidated financial statements include the accounts of Caterpillar Inc. and its subsidiaries where we have a controlling financial interest.

Investments in companies where our ownership exceeds 20 percent and we do not have a controlling interest or where the ownership is less than 20 percent and for which we have a significant influence are accounted for by the equity method.

We consolidate all variable interest entities (VIEs) where Caterpillar Inc. is the primary beneficiary. For VIEs, we assess whether we are the primary beneficiary as prescribed by the accounting guidance on the consolidation of VIEs. The primary beneficiary of a VIE is the party that has both the power to direct the activities that most significantly impact the entity's economic performance and the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE. See Note 21 for further discussion on a consolidated VIE.

Cat Financial has end-user customers that are VIEs of which we are not the primary beneficiary. Although we have provided financial support to these entities and therefore have a variable interest, we do not have the power to direct the activities that most significantly impact their economic performance. Our maximum exposure to loss from our involvement with these VIEs is limited to the credit risk inherently present in the financial support that we have provided. These risks were evaluated and reflected in our financial statements as part of our overall portfolio of finance receivables and related allowance for credit losses.

We include shipping and handling costs in Cost of goods sold in Statement 1. Other operating (income) expenses primarily include Cat Financial's depreciation on equipment leased to others, Insurance Services' underwriting expenses, (gains) losses on disposal of long-lived assets, long-lived asset impairment charges, legal settlements and accruals, contract termination costs and employee separation charges.

Prepaid expenses and other current assets in Statement 3 primarily include prepaid insurance, contract assets, right of return assets, prepaid and refundable income taxes, assets held for sale, core to be returned for remanufacturing, restricted cash and other short-term investments.

Certain amounts for prior years have been reclassified to conform with the current-year financial statement presentation.

C. Inventories

We state inventories at the lower of cost or net realizable value. We principally determine cost using the last-in, first-out (LIFO) method. The value of inventories on the LIFO basis represented about 60 percent of total inventories at December 31, 2020 and 2019.

If the FIFO (first-in, first-out) method had been in use, inventories would have been \$2,132 million and \$2,086 million higher than reported at December 31, 2020 and 2019, respectively.

D. Depreciation and amortization

We compute depreciation of plant and equipment principally using accelerated methods. We compute depreciation on equipment leased to others, primarily for Financial Products, using the straight-line method over the term of the lease. The depreciable basis is the original cost of the equipment less the estimated residual value of the equipment at the end of the lease term. In 2020, 2019 and 2018, Cat Financial depreciation on equipment leased to others was \$758 million, \$813 million and \$819 million, respectively, which we include in Other operating (income) expenses in Statement 1. In 2020, 2019 and 2018, consolidated depreciation expense was \$2,122 million, \$2,253 million and \$2,435 million, respectively. We compute amortization of purchased finite-lived intangibles principally using the straight-line method, generally not to exceed a period of 20 years.

E. Foreign currency translation

The functional currency for most of our ME&T consolidated subsidiaries is the U.S. dollar. The functional currency for most of our Financial Products consolidated subsidiaries is the respective local currency. We include gains and losses resulting from the remeasurement of foreign currency amounts to the functional currency in Other income (expense) in Statement 1. We include gains and losses resulting from translating assets and liabilities from the functional currency to U.S. dollars in Accumulated other comprehensive income (loss) in Statement 3.

F. Derivative financial instruments

Our earnings and cash flow are subject to fluctuations due to changes in foreign currency exchange rates, interest rates and commodity prices. Our Risk Management Policy (policy) allows for the use of derivative financial instruments to prudently manage foreign currency exchange rate, interest rate and commodity price exposures. Our policy specifies that derivatives are not to be used for speculative purposes. Derivatives that we use are primarily foreign currency forward, option and cross currency contracts, interest rate contracts and commodity forward and option contracts. All derivatives are recorded at fair value. See Note 4 for more information.

G. Income taxes

We determine the provision for income taxes using the asset and liability approach taking into account guidance related to uncertain tax positions. Tax laws require items to be included in tax filings at different times than the items are reflected in the financial statements. We recognize a current liability for the estimated taxes payable for the current year. Deferred taxes represent the future tax consequences expected to occur when the reported amounts of assets and liabilities are recovered or paid. We adjust deferred taxes for enacted changes in tax rates and tax laws. We record valuation allowances to reduce deferred tax assets when it is more likely than not that a tax benefit will not be realized. See Note 6 for further discussion.

H. Goodwill

For acquisitions accounted for as a business combination, goodwill represents the excess of the cost over the fair value of the net assets acquired. We are required to test goodwill for impairment, at the reporting unit level, annually and when events or circumstances make it more likely than not that an impairment may have occurred. A reporting unit is an operating segment or one level below an operating segment (referred to as a component) to which goodwill is assigned when initially recorded. We assign goodwill to reporting units based on our integration plans and the expected synergies resulting from the acquisition. Because Caterpillar is a highly integrated company, the businesses we acquire are sometimes combined with or integrated into existing reporting units. When changes occur in the composition of our operating segments or reporting units, we reassign goodwill to the affected reporting units based on their relative fair values.

We perform our annual goodwill impairment test as of October 1 and monitor for interim triggering events on an ongoing basis. We review goodwill for impairment utilizing either a qualitative assessment or a quantitative goodwill impairment test. If we choose to perform a qualitative assessment and determine the fair value more likely than not exceeds the carrying value, no further evaluation is necessary. For reporting units where we perform the quantitative goodwill impairment test, we compare the fair value of each reporting unit, which we primarily determine using an income approach based on the present value of discounted cash flows, to the respective carrying value, which includes goodwill. If the fair value of the reporting unit exceeds its carrying value, we do not consider the goodwill impaired. If the carrying value is higher than the fair value, we would recognize the difference as an impairment loss. See Note 10 for further details.

I. Estimates in financial statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect reported amounts. The more significant estimates include: residual values for leased assets; fair values for goodwill impairment tests; warranty liability and reserves for product liability and insurance losses, postretirement benefits, post-sale discounts, credit losses and income taxes.

J. New accounting guidance

A. Adoption of new accounting standards

Credit losses (Accounting Standards Update (ASU) 2016-13) – In June 2016, the Financial Accounting Standards Board (FASB) issued new accounting guidance to introduce a new model for recognizing credit losses on financial instruments based on an estimate of current expected credit losses. The new guidance applies to loans, accounts receivable, trade receivables, other financial assets measured at amortized cost, loan commitments and other off-balance sheet credit exposures. The new guidance also applies to debt securities and other financial assets measured at fair value through other comprehensive income. The new guidance was effective January 1, 2020. We applied the new guidance using a modified retrospective approach through a cumulative effect adjustment to retained earnings as of January 1, 2020. We have not recast prior period comparative information, which we continue to report under the accounting guidance in effect for those periods. Our adoption of the new guidance did not have a material impact on our financial statements.

We adopted the following ASUs during 2020, none of which had a material impact on our financial statements:

<u>ASU</u>	<u>Description</u>	<u>Effective Date</u>
2018-13	Fair value measurement	January 1, 2020
2018-15	Internal-use software	January 1, 2020
2018-19	Codification improvements - Credit losses	January 1, 2020
2019-04	Codification improvements - Credit losses, Derivatives & hedging, and Financial instruments	January 1, 2020
2019-05	Financial instruments - Credit losses	January 1, 2020
2019-11	Codification improvements - Credit losses	January 1, 2020
2019-12	Simplifying accounting for income taxes	January 1, 2020
2020-02	Financial instruments - Credit losses	January 1, 2020
2020-03	Codification improvements - Financial instruments	January 1, 2020
2018-14	Disclosure requirements - Defined benefit plans	December 31, 2020

B. Accounting standards issued but not yet adopted

Reference rate reform (ASU 2020-04) – In March 2020, the FASB issued accounting guidance to ease the potential burden in accounting for reference rate reform related activities that impact debt, leases, derivatives and other contracts. The guidance is optional and may be elected over time as reference rate reform activities occur between March 12, 2020 through December 31, 2022. In January 2021, we elected to adopt optional expedients impacting our derivative instruments. We continue to evaluate the impact of reference rate reform on our other contracts and assess the impacts of adopting this guidance on our financial statements.

We consider the applicability and impact of all ASUs. We assessed ASUs not listed above and determined that they either were not applicable or were not expected to have a material impact on our financial statements.

2. Sales and revenue recognition

A. Sales of Machinery, Energy & Transportation

We recognize sales of ME&T when all the following criteria are satisfied: (i) a contract with an independently owned and operated dealer or an end user exists which has commercial substance; (ii) it is probable we will collect the amount charged to the dealer or end user; and (iii) we have completed our performance obligation whereby the dealer or end user has obtained control of the product. A contract with commercial substance exists once we receive and accept a purchase order under a dealer sales agreement, or once we enter into a contract with an end user. If collectibility is not probable, the sale is deferred and not recognized until collection is probable or payment is received. Control of our products typically transfers when title and risk of ownership of the product has transferred to the dealer or end user. Typically, where product is produced and sold in the same country, title and risk of ownership transfer when we ship the product. Products that are exported from a country for sale typically transfer title and risk of ownership at the border of the destination country.

Our remanufacturing operations are primarily focused on the remanufacture of Cat engines and components and rail related products. In this business, we inspect, clean and remanufacture used engines and related components (core). In connection with the sale of our remanufactured product to dealers, we collect a deposit that is repaid if the dealer returns an acceptable core within a specified time period. Caterpillar owns and has title to the cores when they are returned from dealers. The rebuilt engine or component (the core plus any new content) is then sold as a remanufactured product to dealers and end users. We recognize revenue pursuant to the same transfer of control criteria as ME&T sales noted above. At the time of sale, we recognize the deposit in Other current liabilities in Statement 3, and we recognize the core to be returned as an asset in Prepaid expenses and other current assets in Statement 3 at the estimated replacement cost (based on historical experience with usable cores). Upon receipt of an acceptable core, we repay the deposit and relieve the liability. We then transfer the returned core asset into inventory. In the event that the deposit is forfeited (i.e., upon failure by the dealer to return an acceptable core in the specified time period), we recognize the core deposit and the cost of the core in Sales and Cost of goods sold, respectively.

We provide discounts to dealers through merchandising programs. We have numerous programs that are designed to promote the sale of our products. The most common dealer programs provide a discount when the dealer sells a product to a targeted end user. Generally, we estimate the cost of these discounts for each product by model by geographic region based on historical experience and known changes in merchandising programs. We report the cost of these discounts as a reduction to the transaction price when we recognize the product sale. We accrue a corresponding post-sale discount reserve in Statement 3, which represents discounts we expect to pay on units sold. If discounts paid differ from those estimated, we report the difference as a change in the transaction price.

Except for replacement parts, no right of return exists on the sale of our products. We estimate replacement part returns based on historical experience and recognize a parts return asset in Prepaid expenses and other current assets in Statement 3, which represents our right to recover replacement parts we expect will be returned. We also recognize a refund liability in Other current liabilities in Statement 3 for the refund we expect to pay for returned parts. If actual replacement part returns differ from those estimated, we recognize the difference in the estimated replacement part return asset and refund liability in Cost of goods sold and Sales, respectively.

Our standard dealer invoice terms are established by marketing region. Our invoice terms for end user sales are established by the responsible business unit. Payments from dealers are due shortly after the time of sale. When we make a sale to a dealer, the dealer is responsible for payment even if the product is not sold to an end user. Dealers and end users must make payment within the established invoice terms to avoid potential interest costs. Interest at or above prevailing market rates may be charged on any past due balance, and generally our practice is to not forgive this interest. In addition, Cat Financial provides wholesale inventory financing for a dealer's purchase of inventory. Wholesale inventory receivables have varying payment terms. We include wholesale inventory receivables in Receivables – trade and other and Long-term receivables – trade and other in Statement 3. See Note 7 for further information. Trade receivables from dealers and end users were \$6,310 million, \$7,648 million and \$7,743 million as of December 31, 2020, 2019 and 2018, respectively. We recognize trade receivables from dealers and end users in Receivables – trade and other in Statement 3. Long-term trade receivables from dealers and end users were \$657 million, \$693 million and \$674 million as of December 31, 2020, 2019 and 2018, respectively. We recognize long-term trade receivables from dealers and end users in Long-term receivables – trade and other in Statement 3.

We establish an allowance for credit losses for ME&T receivables when it becomes probable that we will not collect the receivable. Our allowance for credit losses is not significant.

We invoice in advance of recognizing the sale of certain products. We recognize advanced customer payments as a contract liability in Customer advances and Other liabilities in Statement 3. Contract liabilities were \$1,526 million, \$1,654 million and \$1,680 million as of December 31, 2020, 2019 and 2018, respectively. We reduce the contract liability when we recognize revenue. During 2020, we recognized \$1,012 million of revenue that was recorded as a contract liability at the beginning of 2020. During 2019, we recognized \$1,171 million of revenue that was recorded as a contract liability at the beginning of 2019.

We have elected the practical expedient to not adjust the amount of revenue to be recognized under a contract with a dealer or end user for the effects of time value of money when the timing difference between receipt of payment and recognition of revenue is less than one year.

As of December 31, 2020, we have entered into contracts with dealers and end users for which sales have not been recognized as we have not satisfied our performance obligations and transferred control of the products. The dollar amount of unsatisfied performance obligations for contracts with an original duration greater than one year is \$5.7 billion, of which \$2.2 billion is expected to be completed and revenue recognized in the twelve months following December 31, 2020. We have elected the practical expedient to not disclose unsatisfied performance obligations with an original contract duration of one year or less. Contracts with an original duration of one year or less are primarily sales to dealers for machinery, engines and replacement parts.

We exclude sales and other related taxes from the transaction price. We account for shipping and handling costs associated with outbound freight after control over a product has transferred as a fulfillment cost which is included in Cost of goods sold.

We provide a standard manufacturer's warranty of our products at no additional cost. At the time we recognize a sale, we record estimated future warranty costs. See Note 21 for further discussion of our product warranty liabilities.

See Note 23 for further disaggregated sales and revenues information.

B. Revenues of Financial Products

Revenues of Financial Products are generated primarily from finance revenue on finance receivables and rental payments on operating leases. We record finance revenue over the life of the related finance receivable using the interest method, including the accretion of certain direct origination costs that are deferred. We recognize revenue from rental payments received on operating leases on a straight-line basis over the term of the lease.

We suspend recognition of finance revenue and operating lease revenue and place the account on non-accrual status when management determines that collection of future income is not probable (generally after 120 days past due). We resume recognition of revenue, and recognize previously suspended income, when the account becomes current and we consider collection of remaining amounts to be probable. We write off interest earned but uncollected prior to the receivable being placed on non-accrual status through Provision for credit losses when, in the judgment of management, we consider it to be uncollectible. See Note 7 for more information.

We present revenues net of sales and other related taxes.

3. Stock-based compensation

Our stock-based compensation plans primarily provide for the granting of stock options, restricted stock units (RSUs) and performance-based restricted stock units (PRSUs) to Officers and other key employees, as well as non-employee Directors. Stock options permit a holder to buy Caterpillar stock at the stock's price when the option was granted. RSUs are agreements to issue shares of Caterpillar stock at the time of vesting. PRSUs are similar to RSUs and include performance conditions in the vesting terms of the award.

Our long-standing practices and policies specify that the Compensation Committee (the Committee) of the Board of Directors approve all stock-based compensation awards. The award approval process specifies the grant date, value and terms of the award. We consistently apply the same terms and conditions to all employee grants, including Officers. The Committee approves all individual Officer grants. We determine the number of stock-based compensation award units included in an individual's award based on the methodology approved by the Committee. The exercise price methodology approved by the Committee is the closing price of the Company stock on the date of the grant. In June of 2014, shareholders approved the Caterpillar Inc. 2014 Long-Term Incentive Plan (the Plan) under which all new stock-based compensation awards are granted. In June of 2017, shareholders amended and restated the Plan. The Plan initially provided that up to 38,800,000 Common Shares would be reserved for future issuance under the Plan, subject to adjustment in certain events. Subsequent to the shareholder approval of the amendment and restatement of the Plan, an additional 36,000,000 Common Shares became available for all awards under the Plan.

Common stock issued from Treasury stock under the plans totaled 5,317,243 for 2020, 5,126,379 for 2019 and 5,590,641 for 2018. The total number of shares authorized for equity awards under the amended and restated Caterpillar Inc. 2014 Long-Term Incentive Plan is 74,800,000, of which 36,488,284 shares remained available for issuance as of December 31, 2020.

Stock option and RSU awards generally vest according to a three-year graded vesting schedule. One-third of the award will become vested on the first anniversary of the grant date, one-third of the award will become vested on the second anniversary of the grant date and one-third of the award will become vested on the third anniversary of the grant date. PRSU awards generally have a three-year performance period and cliff vest at the end of the period based upon achievement of performance targets established at the time of grant.

Upon separation from service, if the participant is 55 years of age or older with more than five years of service, the participant meets the criteria for a "Long Service Separation." Award terms for stock option and RSU grants allow for continued vesting as of each vesting date specified in the award document for employees who meet the criteria for a "Long Service Separation" and fulfill a requisite service period of six months. We recognize compensation expense for eligible employees for the grants over the period from the grant date to the end date of the six-month requisite service period. For employees who become eligible for a "Long Service Separation" subsequent to the end date of the six-month requisite service period and prior to the completion of the vesting period, we recognized compensation expense over the period from the grant date to the date eligibility is achieved.

For PRSU awards granted in 2018, only a prorated number of shares may vest at the end of the performance period based upon achievement of the performance target, with the proration based upon the number of months of continuous employment during the three-year performance period. Employees with a “Long Service Separation” must also fulfill a six-month requisite service period in order to be eligible for the prorated vesting of outstanding PRSU awards granted in 2018. We recognize compensation expense for the 2018 PRSU grant on a straight-line basis over the three-year performance period for all participants. Award terms for the 2020 and 2019 PRSU grants allowed for continued vesting upon achievement of the performance target specified in the award document for employees who meet the criteria for a “Long Service Separation” and fulfill a requisite service period of six months. We recognize compensation expense for the 2020 and 2019 PRSU grants with respect to employees who have met the criteria for a “Long Service Separation” over the period from the grant date to the end of the six-month requisite service period. For employees who become eligible for a “Long Service Separation” subsequent to the end date of the six-month requisite service period and prior to the completion of the vesting period, we recognize compensation expense over the period from the grant date to the date eligibility is achieved.

At grant, option awards have a term life of ten years. For awards granted prior to 2016, if the “Long Service Separation” criteria are met, the vested options have a life that is the lesser of ten years from the original grant date or five years from the separation date. For awards granted beginning in 2016, the vested options have a life equal to ten years from the original grant date.

Accounting guidance on share-based payments requires companies to estimate the fair value of options on the date of grant using an option-pricing model. The fair value of our option grants was estimated using the Black-Scholes option-pricing model. The Black-Scholes option-pricing model considers a range of assumptions related to volatility, risk-free interest rate and historical employee behavior. Expected volatility was based on historical Caterpillar stock price movement and current implied volatilities from traded options on Caterpillar stock. The risk-free interest rate was based on U.S. Treasury security yields at the time of grant. The weighted-average dividend yield was based on historical information. We determine the expected life from the actual historical employee exercise behavior. The following table provides the assumptions used in determining the fair value of the Option awards for the years ended December 31, 2020, 2019 and 2018, respectively.

	Grant Year		
	2020	2019	2018
Weighted-average dividend yield	2.5 %	2.6 %	2.7 %
Weighted-average volatility	25.7 %	29.1 %	30.2 %
Range of volatilities	24.5%-29.7%	25.1%-38.7%	21.5%- 33.0%
Range of risk-free interest rates	1.21%-1.39%	2.48%-2.68%	2.02%-2.87%
Weighted-average expected lives	8 years	7 years	8 years

Beginning with the 2018 grant, we credit RSU and PRSU awards with dividend equivalent units on each date that we pay a cash dividend to holders of Common stock. We determine the fair value of the RSU and PRSU awards granted in 2020, 2019 and 2018 as the closing stock price on the date of the grant.

Please refer to Tables I and II below for additional information on our stock-based compensation awards.

TABLE I — Financial Information Related to Stock-based Compensation

	Stock options		RSUs		PRSUs	
	Shares	Weighted-Average Exercise Price	Shares	Weighted-Average Grant Date Fair Value	Shares	Weighted-Average Grant Date Fair Value
Outstanding at January 1, 2020	14,464,994	\$ 99.29	1,369,203	\$ 132.88	670,115	\$ 144.46

Fair value of stock awards vested ²	\$ 87	\$ 110	\$ 180

PRSUs activity:

Weighted-average fair value per share of stock awards granted	\$ 128.41	\$ 138.67	\$ 150.98
Fair value of stock awards vested ²	\$ 59	\$ 59	\$ 70

¹ Based on the grant date fair value.

² Based on the underlying stock's closing market price on the vesting date.

In accordance with guidance on share-based payments, stock-based compensation expense is based on the grant date fair value and is classified within Cost of goods sold, Selling, general and administrative expenses and Research and development expenses corresponding to the same line item as the cash compensation paid to respective employees, officers and non-employee directors. We recognize stock-based compensation expense on a straight-line basis over the requisite service period for awards with terms that specify cliff or graded vesting and contain only service conditions. Stock-based compensation expense for PRSUs is based on the probable number of shares expected to vest and is recognized primarily on a straight-line basis.

Before tax, stock-based compensation expense for 2020, 2019 and 2018 was \$202 million, \$205 million and \$197 million, respectively, with a corresponding income tax benefit of \$34 million, \$35 million and \$36 million, respectively.

The amount of stock-based compensation expense capitalized for the years ended December 31, 2020, 2019 and 2018 did not have a significant impact on our financial statements.

At December 31, 2020, there was \$133 million of total unrecognized compensation cost from stock-based compensation arrangements granted under the plans, which is related to non-vested stock-based awards. We expect to recognize the compensation expense over a weighted-average period of approximately 1.6 years.

We currently use shares in Treasury stock to satisfy share award exercises.

The cash tax benefits realized from stock awards exercised for 2020, 2019 and 2018 were \$108 million, \$89 million and \$103 million, respectively. We use the direct only method and tax law ordering approach to calculate the tax effects of stock-based compensation.

4. Derivative financial instruments and risk management

Our earnings and cash flow are subject to fluctuations due to changes in foreign currency exchange rates, interest rates and commodity prices. Our Risk Management Policy (policy) allows for the use of derivative financial instruments to prudently manage foreign currency exchange rate, interest rate and commodity price exposures. Our policy specifies that derivatives are not to be used for speculative purposes. Derivatives that we use are primarily foreign currency forward, option and cross currency contracts, interest rate contracts and commodity forward and option contracts. Our derivative activities are subject to the management, direction and control of our senior financial officers. We present at least annually to the Audit Committee of the Board of Directors on our risk management practices, including our use of financial derivative instruments.

We recognize all derivatives in Statement 3 at their fair value. On the date the derivative contract is entered into, we designate the derivative as (1) a hedge of the fair value of a recognized asset or liability (fair value hedge), (2) a hedge of a forecasted transaction or the variability of cash flow (cash flow hedge) or (3) an undesignated instrument. We record in current earnings changes in the fair value of a derivative that is qualified, designated and highly effective as a fair value hedge, along with the gain or loss on the hedged recognized asset or liability that is attributable to the hedged risk. We record in Accumulated other comprehensive income (loss) (AOCI), to the extent effective, in Statement 3 changes in the fair value of a derivative that is qualified, designated and highly effective as a cash flow hedge until they are reclassified to earnings in the same period or periods during which the hedged transaction affects earnings. We report changes in the fair value of undesignated derivative instruments in current earnings. We classify cash flows from designated derivative financial instruments within the same category as the item being hedged on Statement 5. We include cash flows from undesignated derivative financial instruments in the investing category on Statement 5.

We formally document all relationships between hedging instruments and hedged items, as well as the risk-management objective and strategy for undertaking various hedge transactions. This process includes linking all derivatives that are designated as fair value hedges to specific assets and liabilities in Statement 3 and linking cash flow hedges to specific forecasted transactions or variability of cash flow.

We also formally assess, both at the hedge's inception and on an ongoing basis, whether the designated derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flow of hedged items. When a derivative is determined not to be highly effective as a hedge or the underlying hedged transaction is no longer probable, we discontinue hedge accounting prospectively, in accordance with the derecognition criteria for hedge accounting.

A. Foreign currency exchange rate risk

Foreign currency exchange rate movements create a degree of risk by affecting the U.S. dollar value of sales made and costs incurred in foreign currencies. Movements in foreign currency rates also affect our competitive position as these changes may affect business practices and/or pricing strategies of non-U.S.-based competitors. Additionally, we have balance sheet positions denominated in foreign currencies, thereby creating exposure to movements in exchange rates.

Our ME&T operations purchase, manufacture and sell products in many locations around the world. As we have a diversified revenue and cost base, we manage our future foreign currency cash flow exposure on a net basis. We use foreign currency forward and option contracts to manage unmatched foreign currency cash inflow and outflow. Our objective is to minimize the risk of exchange rate movements that would reduce the U.S. dollar value of our foreign currency cash flow. Our policy allows for managing anticipated foreign currency cash flow for up to approximately five years. As of December 31, 2020, the maximum term of these outstanding contracts was approximately 60 months.

We generally designate as cash flow hedges at inception of the contract any Australian dollar, Brazilian real, British pound, Canadian dollar, Chinese yuan, Indian rupee, Japanese yen, Mexican peso, Norwegian Krona, Singapore dollar or Thailand baht forward or option contracts that meet the requirements for hedge accounting and the maturity extends beyond the current quarter-end. We perform designation on a specific exposure basis to support hedge accounting. The remainder of ME&T foreign currency contracts are undesignated.

In managing foreign currency risk for our Financial Products operations, our objective is to minimize earnings volatility resulting from conversion and the remeasurement of net foreign currency balance sheet positions and future transactions denominated in foreign currencies. Our policy allows the use of foreign currency forward, option and cross currency contracts to offset the risk of currency mismatch between our assets and liabilities and exchange rate risk associated with future transactions denominated in foreign currencies. Our foreign currency forward and option contracts are primarily undesignated. We designate fixed-to-fixed cross currency contracts as cash flow hedges to protect against movements in exchange rates on foreign currency fixed-rate assets and liabilities.

B. Interest rate risk

Interest rate movements create a degree of risk by affecting the amount of our interest payments and the value of our fixed-rate debt. Our practice is to use interest rate contracts to manage our exposure to interest rate changes.

Our ME&T operations generally use fixed-rate debt as a source of funding. Our objective is to minimize the cost of borrowed funds. Our policy allows us to enter into fixed-to-floating interest rate contracts and forward rate agreements to meet that objective. We designate fixed-to-floating interest rate contracts as fair value hedges at inception of the contract, and we designate certain forward rate agreements as cash flow hedges at inception of the contract.

Financial Products operations has a match-funding policy that addresses interest rate risk by aligning the interest rate profile (fixed or floating rate and duration) of Cat Financial's debt portfolio with the interest rate profile of our receivables portfolio within predetermined ranges on an ongoing basis. In connection with that policy, we use interest rate derivative instruments to modify the debt structure to match assets within the receivables portfolio. This matched funding reduces the volatility of margins between interest-bearing assets and interest-bearing liabilities, regardless of which direction interest rates move.

Our policy allows us to use fixed-to-floating, floating-to-fixed and floating-to-floating interest rate contracts to meet the match-funding objective. We designate fixed-to-floating interest rate contracts as fair value hedges to protect debt against changes in fair value due to changes in the benchmark interest rate. We designate most floating-to-fixed interest rate contracts as cash flow hedges to protect against the variability of cash flows due to changes in the benchmark interest rate.

We have, at certain times, liquidated fixed-to-floating and floating-to-fixed interest rate contracts at both ME&T and Financial Products. We amortize the gains or losses associated with these contracts at the time of liquidation into earnings over the original term of the previously designated hedged item.

C. Commodity price risk

Commodity price movements create a degree of risk by affecting the price we must pay for certain raw materials. Our policy is to use commodity forward and option contracts to manage the commodity risk and reduce the cost of purchased materials.

Our ME&T operations purchase base and precious metals embedded in the components we purchase from suppliers. Our suppliers pass on to us price changes in the commodity portion of the component cost. In addition, we are subject to price changes on energy products such as natural gas and diesel fuel purchased for operational use.

Our objective is to minimize volatility in the price of these commodities. Our policy allows us to enter into commodity forward and option contracts to lock in the purchase price of a portion of these commodities within a five-year horizon. All such commodity forward and option contracts are undesignated.

The location and fair value of derivative instruments reported in Statement 3 were as follows:

(Millions of dollars)	Consolidated Statement of Financial Position Location		Asset (Liability) Fair Value	
			Years ended December 31,	
			2020	2019

		<u>\$ (63)</u>	<u>\$ (6)</u>	<u>\$ (74)</u>

We enter into International Swaps and Derivatives Association (ISDA) master netting agreements within ME&T and Financial Products that permit the net settlement of amounts owed under their respective derivative contracts. Under these master netting agreements, net settlement generally permits the company or the counterparty to determine the net amount payable for contracts due on the same date and in the same currency for similar types of derivative transactions. The master netting agreements generally also provide for net settlement of all outstanding contracts with a counterparty in the case of an event of default or a termination event.

Collateral is generally not required of the counterparties or of our company under the master netting agreements. As of December 31, 2020 and 2019, no cash collateral was received or pledged under the master netting agreements.

The effect of the net settlement provisions of the master netting agreements on our derivative balances upon an event of default or termination event was as follows:

December 31, 2020		Gross Amounts Not Offset in the Statement of Financial Position				
(Millions of dollars)	Gross Amount of Recognized Assets	Gross Amounts Offset in the Statement of Financial Position	Net Amount of Assets Presented in the Statement of Financial Position	Financial Instruments	Cash Collateral Received	Net Amount of Assets

¹Includes gains (losses) from foreign exchange derivative contracts. See Note 4 for further details.

6. Income taxes

Reconciliation of the U.S. federal statutory rate to effective rate:

(Millions of dollars)	Years ended December 31,					
	2020		2019		2018	
Taxes at U.S. statutory rate	\$ 839	21.0 %	\$ 1,641	21.0 %	\$ 1,643	21.0 %
(Decreases) increases resulting from:						
Non-U.S. subsidiaries taxed at other than the U.S. rate	285	7.1 %	365	4.7 %	282	3.6 %
State and local taxes, net of federal ¹	32	0.8 %	59	0.8 %	22	0.3 %
Interest and penalties, net of tax	28	0.7 %	34	0.4 %	33	0.4 %
U.S. tax incentives	(52)	(1.3)%	(149)	(1.9)%	(106)	(1.3)%
Net excess tax benefits from stock-based compensation	(49)	(1.2)%	(41)	(0.5)%	(56)	(0.7)%
Prior year tax adjustments	(80)	(2.0)%	—	— %	—	— %
Mandatory deemed repatriation of non-U.S. earnings	—	— %	(178)	(2.3)%	50	0.7 %
U.S. deferred tax rate change	—	— %	—	— %	(154)	(2.0)%
Valuation allowances	—	— %	—	— %	(29)	(0.4)%
Other—net	3	0.1 %	15	0.2 %	13	0.1 %
Provision (benefit) for income taxes	<u>\$ 1,006</u>	<u>25.2 %</u>	<u>\$ 1,746</u>	<u>22.4 %</u>	<u>\$ 1,698</u>	<u>21.7 %</u>

¹ Excludes amounts included in valuation allowances, mandatory deemed repatriation of non-U.S. earnings, and net excess tax benefits from stock-based compensation.

Included in the line item above labeled “Non-U.S. subsidiaries taxed at other than the U.S. rate” are the effects of local and U.S. taxes related to earnings of non-U.S. subsidiaries, changes in the amount of unrecognized tax benefits associated with these earnings, losses at non-U.S. subsidiaries without local tax benefits due to valuation allowances and other permanent differences between tax and U.S. GAAP results.

The line item above labeled "Prior year tax adjustments" was an adjustment to prior year U.S. taxes including the impact of regulations received in 2020.

Included in the line item above labeled “Valuation allowances” was a decrease in the valuation allowance for U.S. state deferred tax assets resulting in a \$63 million non-cash benefit in 2018, net of federal deferred tax adjustment. Also included in 2018 was a decrease in the valuation allowance for a non-U.S. subsidiary of \$25 million offset by a charge of \$59 million to correct for an error which resulted in an understatement of the valuation allowance offsetting deferred tax assets for prior years. Management has concluded that the error was not material to any period presented.

On December 22, 2017, U.S. tax legislation was enacted containing a broad range of tax reform provisions including a corporate tax rate reduction and changes in the U.S. taxation of non-U.S. earnings. In 2018, measurement period adjustments of \$104 million reduced the provisionally estimated charge of \$2.371 billion recognized during the fourth quarter of 2017. A \$154 million benefit revised the estimated impact of the write-down of U.S. net deferred tax assets to reflect the reduction in the U.S. corporate tax rate from 35 percent to 21 percent. This benefit primarily related to the decision to make an additional discretionary pension contribution of \$1.0 billion to U.S. pension plans in 2018 which was treated as deductible on the 2017 U.S. tax return. A \$50 million charge revised the estimated cost of a mandatory deemed repatriation of non-U.S. earnings, including changes in the deferred tax liability related to the amount of earnings considered not indefinitely reinvested as well as the amount of unrecognized tax benefits and state tax liabilities associated with these tax positions. During 2019, we recorded a \$178 million tax benefit to adjust previously unrecognized tax benefits as a result of receipt of additional guidance related to the calculation of the mandatory deemed repatriation of non-U.S. earnings.

As a result of U.S. tax reform legislation, distributions of profits from non-U.S. subsidiaries are not expected to cause a significant incremental U.S. tax impact in the future. However, these distributions may be subject to non-U.S. withholding taxes if profits are distributed from certain jurisdictions. Undistributed profits of non-U.S. subsidiaries of approximately \$14 billion are considered indefinitely reinvested. Determination of the amount of unrecognized deferred tax liability related to indefinitely reinvested profits is not feasible primarily due to our legal entity structure and the complexity of U.S. and local tax laws.

The components of profit (loss) before taxes were:

(Millions of dollars)	Years ended December 31,		
	2020	2019	2018
U.S.	\$ 590	\$ 2,888	\$ 2,131
Non-U.S.	3,405	4,924	5,691
	<u>\$ 3,995</u>	<u>\$ 7,812</u>	<u>\$ 7,822</u>

Profit before taxes, as shown above, is based on the location of the entity to which such earnings are attributable. Where an entity’s earnings are subject to taxation, however, may not correlate solely to where an entity is located. Thus, the income tax provision shown below as U.S. or non-U.S. may not correspond to the earnings shown above.

The components of the provision (benefit) for income taxes were:

(Millions of dollars)	Years ended December 31,		
	2020	2019	2018
Current tax provision (benefit):			
U.S. ¹	\$ 18	\$ 405	\$ 179
Non-U.S.	1,031	1,261	1,291
State (U.S.)	31	52	8
	<u>1,080</u>	<u>1,718</u>	<u>1,478</u>
Deferred tax provision (benefit):			
U.S. ¹	(44)	17	298
Non-U.S.	(34)	(7)	4
State (U.S.)	4	18	(82)
	<u>(74)</u>	<u>28</u>	<u>220</u>
Total provision (benefit) for income taxes	<u>\$ 1,006</u>	<u>\$ 1,746</u>	<u>\$ 1,698</u>

¹ Includes U.S. taxes related to non-U.S. earnings. We account for U.S. taxes on global intangible low-taxed income as a period cost.

We paid net income tax and related interest of \$1,311 million, \$1,847 million and \$1,429 million in 2020, 2019 and 2018, respectively.

Accounting for income taxes under U.S. GAAP requires that individual tax-paying entities of the company offset all deferred tax liabilities and assets within each particular tax jurisdiction and present them as a noncurrent deferred tax liability or asset in the Consolidated Financial Position. Amounts in different tax jurisdictions cannot be offset against each other. The amount of deferred income taxes at December 31, included on the following lines in Statement 3, were as follows:

(Millions of dollars)	December 31,	
	2020	2019
Assets:		
Noncurrent deferred and refundable income taxes	\$ 1,358	\$ 1,324
Liabilities:		
Other liabilities	418	414
Deferred income taxes—net	<u>\$ 940</u>	<u>\$ 910</u>

The components of deferred tax assets and liabilities were:

(Millions of dollars)	December 31,	
	2020	2019
Deferred income tax assets:		
Tax carryforwards	\$ 1,346	\$ 1,218
Postemployment benefits other than pensions	919	876
Pension	396	445
Warranty reserves	247	263
Research expenditures	193	219
Allowance for credit losses	126	171
Post sale discounts	153	200
Other employee compensation and benefits	186	197
Lease obligations	154	157
Stock-based compensation	81	107
Other—net	317	250
	<u>4,118</u>	<u>4,103</u>
Deferred income tax liabilities:		
Capital and intangible assets, including lease basis differences	(1,526)	(1,574)
Bond discount	(117)	(122)
Translation	(147)	(194)
Other outside basis differences	(284)	(257)
Undistributed profits of non-U.S. subsidiaries	(95)	(118)
	<u>(2,169)</u>	<u>(2,265)</u>
Valuation allowance for deferred tax assets	(1,009)	(928)
Deferred income taxes—net	<u>\$ 940</u>	<u>\$ 910</u>

At December 31, 2020, approximately \$1,399 million of U.S. state tax net operating losses (NOLs) and \$139 million of U.S. state tax credit carryforwards were available. The state NOLs primarily expire over the next twenty years. The state tax credit carryforwards primarily expire over the next fifteen years, with some credits having an unlimited carryforward period. In total, we have established a valuation allowance of \$183 million related to certain of these carryforwards.

At December 31, 2020, approximately \$350 million of U.S. foreign tax credits were available to carryforward on the U.S. federal tax return. These credits have a ten-year carryforward period and begin to expire in 2028.

At December 31, 2020, amounts and expiration dates of net operating loss and interest carryforwards in various non-U.S. taxing jurisdictions were:

(Millions of dollars)						
2021	2022	2023	2024-2026	2027-2041	Unlimited	Total
\$ 45	\$ 81	\$ 10	\$ 79	\$ 819	\$ 3,929	\$ 4,963

At December 31, 2020, non-U.S. entities that have not yet demonstrated consistent and/or sustainable profitability to support the realization of net deferred tax assets have recorded valuation allowances of \$803 million, including certain entities in Luxembourg.

A reconciliation of the beginning and ending amount of gross unrecognized tax benefits for uncertain tax positions, including positions impacting only the timing of tax benefits, follows.

Reconciliation of unrecognized tax benefits: ¹

(Millions of dollars)	Years ended December 31,		
	2020	2019	2018
Beginning balance	\$ 1,778	\$ 1,796	\$ 1,286
Additions for tax positions related to current year	44	72	61
Additions for tax positions related to prior years	46	112	461
Reductions for tax positions related to prior years	(12)	(201)	(5)
Reductions for settlements ²	(94)	—	(6)
Reductions for expiration of statute of limitations	(3)	(1)	(1)
Ending balance	\$ 1,759	\$ 1,778	\$ 1,796
Amount that, if recognized, would impact the effective tax rate	\$ 1,657	\$ 1,616	\$ 1,716

¹ Foreign currency impacts are included within each line as applicable.

² Includes cash payment or other reduction of assets to settle liability.

We classify interest and penalties on income taxes as a component of the provision for income taxes. We recognized a net provision for interest and penalties of \$38 million, \$43 million and \$42 million during the years ended December 31, 2020, 2019 and 2018, respectively. The total amount of interest and penalties accrued was \$264 million and \$233 million as of December 31, 2020 and 2019, respectively.

On January 31, 2018, we received a Revenue Agent's Report from the IRS indicating the end of the field examination of our U.S. income tax returns for 2010 to 2012. In the audits of 2007 to 2012 including the impact of a loss carryback to 2005, the IRS has proposed to tax in the United States profits earned from certain parts transactions by Caterpillar SARL (CSARL), based on the IRS examination team's application of the "substance-over-form" or "assignment-of-income" judicial doctrines. We are vigorously contesting the proposed increases to tax and penalties for these years of approximately \$2.3 billion. We believe that the relevant transactions complied with applicable tax laws and did not violate judicial doctrines. We have filed U.S. income tax returns on this same basis for years after 2012. Based on the information currently available, we do not anticipate a significant change to our unrecognized tax benefits for this position within the next 12 months. We currently believe the ultimate disposition of this matter will not have a material adverse effect on our consolidated financial position, liquidity or results of operations.

With the exception of a loss carryback to 2005, tax years prior to 2007 are generally no longer subject to U.S. tax assessment. In our major non-U.S. jurisdictions including Australia, Brazil, China, Germany, India, Japan, Mexico, Switzerland, Singapore and the U.K., tax years are typically subject to examination for three to ten years. Due to the uncertainty related to the timing and potential outcome of audits, we cannot estimate the range of reasonably possible change in unrecognized tax benefits in the next 12 months.

7. Cat Financial Financing Activities

A. Wholesale inventory receivables

Wholesale inventory receivables are receivables of Cat Financial that arise when Cat Financial provides financing for a dealer's purchase of inventory. We include these receivables in Receivables—trade and other and Long-term receivables—trade and other in Statement 3 and were \$1,233 million and \$1,401 million, at December 31, 2020 and 2019, respectively.

Contractual maturities of outstanding wholesale inventory receivables:
(Millions of dollars)

Amounts Due In	December 31, 2020		
	Wholesale Loans	Wholesale Leases	Total
2021	\$ 516	\$ 52	\$ 568
2022	241	37	278
2023	141	27	168
2024	62	20	82
2025	23	13	36
Thereafter	10	4	14
Total	993	153	1,146
Guaranteed residual value ¹	51	36	87
Unguaranteed residual value	2	33	35
Less: Unearned income	(11)	(24)	(35)
Total	\$ 1,035	\$ 198	\$ 1,233

¹ For Wholesale loans, represents residual value on failed sale leasebacks.

Cat Financial's wholesale inventory receivables generally may be repaid or refinanced without penalty prior to contractual maturity.

Please refer to Note 18 and Table III for fair value information.

B. Finance receivables

Finance receivables are receivables of Cat Financial and are reported in Statement 3 net of an allowance for credit losses.

Contractual maturities of outstanding finance receivables:
(Millions of dollars)

Amounts Due In	December 31, 2020		
	Retail Loans	Retail Leases	Total
2021	\$ 6,305	\$ 3,222	\$ 9,527
2022	3,617	2,032	5,649
2023	2,621	1,107	3,728
2024	1,378	467	1,845
2025	464	171	635
Thereafter	384	56	440
Total	14,769	7,055	21,824
Guaranteed residual value ¹	44	412	456
Unguaranteed residual value	2	771	773
Less: Unearned income	(280)	(613)	(893)
Total	\$ 14,535	\$ 7,625	\$ 22,160

¹ For Retail loans, represents residual value on failed sale leasebacks.

Cat Financial's finance receivables generally may be repaid or refinanced without penalty prior to contractual maturity.

Please refer to Note 18 and Table III for fair value information.

C. Allowance for credit losses

Effective January 1, 2020, we implemented the new credit loss guidance using a modified retrospective approach. Prior period comparative information has not been recast and continues to be reported under the accounting guidance in effect for those periods. See Note 1J for additional information.

Portfolio segments

A portfolio segment is the level at which Cat Financial develops a systematic methodology for determining its allowance for credit losses. Cat Financial's portfolio segments and related methods for estimating expected credit losses are as follows:

Customer

Cat Financial provides loans and finance leases to end-user customers primarily for the purpose of financing new and used Caterpillar machinery, engines and equipment for commercial use, the majority of which operate in construction-related industries. Cat Financial also provides financing for vehicles, power generation facilities and marine vessels that, in most cases, incorporate Caterpillar products. The average original term of Cat Financial's customer finance receivable portfolio was approximately 46 months with an average remaining term of approximately 26 months as of December 31, 2020.

Cat Financial typically maintains a security interest in financed equipment and requires physical damage insurance coverage on the financed equipment, both of which provide Cat Financial with certain rights and protections. If Cat Financial's collection efforts fail to bring a defaulted account current, Cat Financial generally can repossess the financed equipment, after satisfying local legal requirements, and sell it within the Caterpillar dealer network or through third-party auctions.

Cat Financial estimates the allowance for credit losses related to its customer finance receivables based on loss forecast models utilizing probabilities of default and the estimated loss given default based on past loss experience adjusted for current conditions and reasonable and supportable forecasts capturing country and industry-specific economic factors.

During the year ended December 31, 2020, Cat Financial's forecasts for the markets in which it operates reflected an overall decline in economic conditions resulting from a contracting economy, elevated unemployment rates and an increase in delinquencies due to the COVID-19 pandemic. The company believes the economic forecasts employed represent reasonable and supportable forecasts, followed by a reversion to long-term trends.

Dealer

Cat Financial provides financing to Caterpillar dealers in the form of wholesale financing plans. Cat Financial's wholesale financing plans provide assistance to dealers by financing their mostly new Caterpillar equipment inventory and rental fleets on a secured and unsecured basis. In addition, Cat Financial provides unsecured loans to Caterpillar dealers for working capital.

Cat Financial estimates the allowance for credit losses for dealer finance receivables based on historical loss rates with consideration of current economic conditions and reasonable and supportable forecasts.

Although our forecasts continued to indicate a decline in economic conditions, Cat Financial's Dealer portfolio segment has not historically experienced increased credit losses during prior economic downturns due to its close working relationships with the dealers and their financial strength. Therefore, we made no adjustments to historical loss rates during the year ended December 31, 2020.

Classes of finance receivables

Cat Financial further evaluates portfolio segments by the class of finance receivables, which is defined as a level of information (below a portfolio segment) in which the finance receivables have the same initial measurement attribute and a similar method for assessing and monitoring credit risk. Typically, Cat Financial's finance receivables within a geographic area have similar credit risk profiles and methods for assessing and monitoring credit risk. Cat Financial's classes, which align with management reporting for credit losses, are as follows:

- **North America** - Finance receivables originated in the United States and Canada.
- **EAME** - Finance receivables originated in Europe, Africa, the Middle East and the Commonwealth of Independent States.
- **Asia/Pacific** - Finance receivables originated in Australia, New Zealand, China, Japan, Southeast Asia and India.

- **Mining** - Finance receivables related to large mining customers worldwide.
- **Latin America** - Finance receivables originated in Mexico and Central and South American countries.
- **Caterpillar Power Finance** - Finance receivables originated worldwide related to marine vessels with Caterpillar engines and Caterpillar electrical power generation, gas compression and co-generation systems and non-Caterpillar equipment that is powered by these systems.

Receivable balances, including accrued interest, are written off against the allowance for credit losses when, in the judgment of management, they are considered uncollectible (generally upon repossession of the collateral). The amount of the write-off is determined by comparing the fair value of the collateral, less cost to sell, to the amortized cost. Subsequent recoveries, if any, are credited to the allowance for credit losses when received.

An analysis of the allowance for credit losses was as follows:

(Millions of dollars)	December 31, 2020		
	Customer	Dealer	Total
Allowance for Credit Losses:			
Balance at beginning of year	\$ 375	\$ 45	\$ 420
Adjustment to adopt new accounting guidance ¹	12	—	12
Receivables written off	(263)	—	(263)

Ending Balance	<u>\$ 18,687</u>	<u>\$ 3,710</u>	<u>\$ 22,397</u>

Credit quality of finance receivables

At origination, Cat Financial evaluates credit risk based on a variety of credit quality factors including prior payment experience, customer financial information, credit ratings, loan-to-value ratios, probabilities of default, industry trends, macroeconomic factors and other internal metrics. On an ongoing basis, Cat Financial monitors credit quality based on past-due status as there is a meaningful correlation between the past-due status of customers and the risk of loss. In determining past-due status, Cat Financial considers the entire finance receivable past due when any installment is over 30 days past due.

Customer

The table below summarizes the aging category of Cat Financial's amortized cost of finance receivables in the Customer portfolio segment by origination year:

(Millions of dollars)	December 31, 2020							
	2020	2019	2018	2017	2016	Prior	Revolving Finance Receivables	Total Finance Receivables
<u>North America</u>								
Current	\$ 3,777	\$ 2,423	\$ 1,344	\$ 522	\$ 212	\$ 27	\$ 89	\$ 8,394
31-60 days past due	52	49	33	16	7	2	—	159

91+ days past due	2	14	11	24	5	4	—	60
<u>Caterpillar Power Finance</u>								
Current	217	172	111	273	99	117	119	1,108
31-60 days past due	—	—	6	—	—	—	—	6
61-90 days past due	—	—	—	—	—	9	—	9
91+ days past due	2	—	20	3	25	79	—	129
Total Customer	\$ 8,162	\$ 5,403	\$ 2,901	\$ 1,357	\$ 575	\$ 492	\$ 348	\$ 19,238

Finance receivables in the Customer portfolio segment are substantially secured by collateral, primarily in the form of Caterpillar and other machinery. For those contracts where the borrower is experiencing financial difficulty, repayment of the outstanding amounts is generally expected to be provided through the operation or repossession and sale of the machinery.

Dealer

As of December 31, 2020, Cat Financial's total amortized cost of finance receivables within the Dealer portfolio segment was current, with the exception of \$81 million that was 91+ days past due in Latin America. Of these past due receivables, \$78 million were originated in 2017 and \$3 million were originated prior to 2016.

The table below summarizes Cat Financial's recorded investment in finance receivables by aging category.

(Millions of dollars)	December 31, 2019					
	31-60 Days Past Due	61-90 Days Past Due	91+ Days Past Due	Total Past Due	Current	Total Finance Receivables

Impaired finance receivables

A finance receivable is considered impaired, based on current information and events, if it is probable that Cat Financial will be unable to collect all amounts due according to the contractual terms. Impaired finance receivables include finance receivables that have been restructured and are considered to be troubled debt restructurings.

In Cat Financial's Customer portfolio segment, impaired finance receivables and the related unpaid principal balances and allowance were as follows:

(Millions of dollars)	December 31, 2019		
	Recorded Investment	Unpaid Principal Balance	Related Allowance
<u>Impaired Finance Receivables With No Allowance Recorded</u>

Latin America	93	6	105	5
Caterpillar Power Finance	450	14	508	19
Total	\$ 757	\$ 28	\$ 879	\$ 37

There were \$78 million in impaired finance receivables with a related allowance of \$39 million as of December 31, 2019 for the Dealer portfolio segment, all of which was in Latin America.

Non-accrual finance receivables

Recognition of income is suspended and the finance receivable is placed on non-accrual status when management determines that collection of future income is not probable. Contracts on non-accrual status are generally more than 120 days past due or have been restructured in a troubled debt restructuring (TDR). Recognition is resumed and previously suspended income is recognized when the finance receivable becomes current and collection of remaining amounts is considered probable. Payments received while the finance receivable is on non-accrual status are applied to interest and principal in accordance with the contractual terms. Interest earned but uncollected prior to the receivable being placed on non-accrual status is written off through Provision for credit losses when, in the judgment of management, it is considered uncollectible.

In Cat Financial's Customer portfolio segment, finance receivables which were on non-accrual status and finance receivables over 90 days past due and still accruing income were as follows:

(Millions of dollars)	December 31, 2020		
	Amortized Cost		
	Non-accrual With an Allowance	Non-accrual Without an Allowance	91+ Still Accruing
North America	\$ 86	\$ 1	\$ 34
EAME	113	1	1
Asia/Pacific	13	—	13
Mining	21	1	—
Latin America	63	—	1
Caterpillar Power Finance	170	17	—
Total	\$ 466	\$ 20	\$ 49

There was \$12 million of interest income recognized during the year ended December 31, 2020, for customer finance receivables on non-accrual status.

(Millions of dollars)	December 31, 2019	
	Recorded Investment	
	Non-accrual Finance Receivables	91+ Still Accruing
North America	\$ 44	\$ 15
EAME	165	4
Asia/Pacific	21	8
Mining	47	—
Latin America	89	2
Caterpillar Power Finance	361	—
Total	\$ 727	\$ 29

As of December 31, 2020 and 2019, finance receivables in our Dealer portfolio segment on non-accrual status were \$81 million and \$78 million, respectively, all of which was in Latin America. There were no finance receivables in Cat Financial's Dealer portfolio segment more than 90 days past due and still accruing income as of December 31, 2020 and 2019 and no interest income was recognized on dealer finance receivables on non-accrual status during the years ended December 31, 2020 and 2019.

Troubled Debt Restructurings

A restructuring of a finance receivable constitutes a TDR when the lender grants a concession it would not otherwise consider to a borrower experiencing financial difficulties. Concessions granted may include extended contract maturities, inclusion of interest only periods, below market interest rates, payment deferrals and reduction of principal and/or accrued interest.

There were no finance receivables modified as TDRs during the years ended December 31, 2020, 2019 and 2018 for the Dealer portfolio segment. Cat Financial's finance receivables in the Customer portfolio segment modified as TDRs were as follows:

(Millions of dollars)	Year ended December 31, 2020		
	Number of Contracts	Pre-TDR Amortized Cost	Post-TDR Amortized Cost
North America	40	\$ 13	\$ 13
EAME	4	—	—
Asia/Pacific ¹	183	12	12

Equipment leased to others	1-7	6,077	6,208
Construction-in-process	—	739	620
Total property, plant and equipment, at cost		29,271	29,217
Less: Accumulated depreciation		(16,870)	(16,313)
Property, plant and equipment—net		\$ 12,401	\$ 12,904

10. Intangible assets and goodwill

A. Intangible assets

Intangible assets were comprised of the following:

(Millions of dollars)	Weighted Amortizable Life (Years)	December 31, 2020		
		Gross Carrying Amount	Accumulated Amortization	Net
Customer relationships	15	\$ 2,493	\$ (1,600)	\$ 893
Intellectual property	12	1,439	(1,073)	366
Other	14	164	(115)	49
Total finite-lived intangible assets	14	<u>\$ 4,096</u>	<u>\$ (2,788)</u>	<u>\$ 1,308</u>

(Millions of dollars)	Weighted Amortizable Life (Years)	December 31, 2019		
		Gross Carrying Amount	Accumulated Amortization	Net
Customer relationships	15	\$ 2,450	\$ (1,406)	\$ 1,044
Intellectual property	12	1,510	(1,055)	455
Other	13	191	(125)	66
Total finite-lived intangible assets	14	<u>\$ 4,151</u>	<u>\$ (2,586)</u>	<u>\$ 1,565</u>

Finite-lived intangible assets are amortized over their estimated useful lives and tested for impairment if events or changes in circumstances indicate that the asset may be impaired.

Amortization expense related to intangible assets was \$311 million, \$324 million and \$331 million for 2020, 2019 and 2018, respectively.

As of December 31, 2020, amortization expense related to intangible assets is expected to be:

(Millions of dollars)					
2021	2022	2023	2024	2025	Thereafter
\$300	\$282	\$223	\$165	\$155	\$183

B. Goodwill

There were no goodwill impairments during 2020, 2019 or 2018.

The changes in carrying amount of goodwill by reportable segment for the years ended December 31, 2020 and 2019 were as follows:

(Millions of dollars)	December 31, 2019	Acquisitions	Other Adjustments ¹	December 31, 2020
Construction Industries				
Goodwill	\$ 306	\$ —	\$ 14	\$ 320

Net goodwill	\$ 6,217	\$ —	\$ (21)	\$ 6,196

¹ Other adjustments are comprised primarily of foreign currency translation.

² Includes All Other operating segment (See Note 23).

11. Investments in debt and equity securities

We have investments in certain debt and equity securities, primarily at Insurance Services, which we record at fair value and primarily include in Other assets in Statement 3.

We classify debt securities as available-for-sale, and we include the unrealized gains and losses arising from the revaluation of these debt securities, net of applicable deferred income taxes, in equity (Accumulated other comprehensive income (loss) in Statement 3). We include the unrealized gains and losses arising from the revaluation of the equity securities in Other income (expense) in Statement 1. We generally determine realized gains and losses on sales of investments using the specific identification method for debt and equity securities and include them in Other income (expense) in Statement 1.

The cost basis and fair value of debt securities with unrealized gains and losses included in equity (Accumulated other comprehensive income (loss) in Statement 3) were as follows:

(Millions of dollars)	December 31, 2020			December 31, 2019		
	Cost Basis	Unrealized Pretax Net Gains (Losses)	Fair Value	Cost Basis	Unrealized Pretax Net Gains (Losses)	Fair Value
Government debt						
U.S. treasury bonds	\$ 10	\$ —	\$ 10	\$ 9	\$ —	\$ 9
Other U.S. and non-U.S. government bonds	58	1	59	54	—	54
Corporate bonds						
Corporate bonds	962	50	1,012	836	20	856
Asset-backed securities	156	3	159	62	—	62
Mortgage-backed debt securities						
U.S. governmental agency	362	12	374	327	4	331
Residential	5	—	5	6	—	6
Commercial	60	4	64	46	1	47
Total debt securities	<u>\$ 1,613</u>	<u>\$ 70</u>	<u>\$ 1,683</u>	<u>\$ 1,340</u>	<u>\$ 25</u>	<u>\$ 1,365</u>

As of December 31, 2020, there was no available-for-sale investments with net losses in accumulated other comprehensive income. As of December 31, 2019, the total unrealized loss for available-for-sale investments in an unrealized loss position that were not other-than temporarily impaired was \$1 million.

The cost basis and fair value of the available-for-sale debt securities at December 31, 2020, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to prepay and creditors may have the right to call obligations.

(Millions of dollars)	December 31, 2020	
	Cost Basis	Fair Value
Due in one year or less	\$ 135	\$ 136
Due after one year through five years	702	737
Due after five years through ten years	279	295
Due after ten years	70	72
U.S. governmental agency mortgage-backed securities	362	374
Residential mortgage-backed securities	5	5
Commercial mortgage-backed securities	60	64
Total debt securities – available-for-sale	<u>\$ 1,613</u>	<u>\$ 1,683</u>

Sales of available-for-sale securities:

(Millions of dollars)	Years Ended December 31,		
	2020	2019	2018
Proceeds from the sale of available-for-sale securities	\$ 290	\$ 260	\$ 247
Gross gains from the sale of available-for-sale securities	\$ 2	\$ 1	\$ —
Gross losses from the sale of available-for-sale securities	\$ 1	\$ 1	\$ —

For the years ended December 31 2020 and 2019, the net unrealized gains (losses) for equity securities held at December 31, 2020 and 2019 were \$47 million and \$29 million, respectively.

12. Postemployment benefit plans

We provide defined benefit pension plans, defined contribution plans and/or other postretirement benefit plans (retirement health care and life insurance) to employees in many of our locations throughout the world. Our defined benefit pension plans provide a benefit based on years of service and/or the employee's average earnings near retirement. Our defined contribution plans allow employees to contribute a portion of their salary to help save for retirement, and in most cases, we provide a matching contribution. The benefit obligation related to our non-U.S. defined benefit pension plans are for employees located primarily in Europe, Japan and Brazil. For other postretirement benefits (OPEB), substantially all of our benefit obligation is for employees located in the United States.

Our U.S. defined benefit pension plans for support and management employees were frozen for certain employees on December 31, 2010 and were frozen for the remaining employees on December 31, 2019. On the respective transition dates employees moved to a retirement benefit that provided a frozen pension benefit and a 401(k) plan that will include a matching contribution and a new annual employer contribution.

A. Obligations, assets and funded status

	U.S. Pension Benefits		Non-U.S. Pension Benefits		Other Postretirement Benefits	
	2020	2019	2020	2019	2020	2019
Weighted-average assumptions used to determine benefit obligation, end of year:						
Discount rate	2.4 %	3.2 %	1.4 %	1.9 %	2.3 %	3.2 %
Rate of compensation increase ¹	— %	— %	2.0 %	2.0 %	4.0 %	4.0 %

¹ Effective December 31, 2019, all U.S. pension benefits were frozen, and accordingly this assumption is no longer applicable.

We use the assumed discount rate to discount future benefit obligations back to today's dollars. The U.S. discount rate is based on a benefit cash flow-matching approach and represents the rate at which our benefit obligations could effectively be settled as of our measurement date, December 31. The benefit cash flow-matching approach involves analyzing Caterpillar's projected cash flows against a high quality bond yield curve, calculated using a wide population of corporate Aa bonds available on the measurement date. We use a similar process to determine the assumed discount rate for our most significant non-U.S. plans. This rate is sensitive to changes in interest rates. A decrease in the discount rate would increase our obligation and future expense.

(Millions of dollars)	U.S. Pension Benefits		Non-U.S. Pension Benefits		Other Postretirement Benefits	
	2020	2019	2020	2019	2020	2019

Fair value of plan assets, end of year	<u>\$ 17,589</u>	<u>\$ 15,994</u>	<u>\$ 4,731</u>	<u>\$ 4,525</u>	<u>\$ 147</u>	<u>\$ 255</u>
Over (under) funded status	<u>\$ (1,588)</u>	<u>\$ (1,779)</u>	<u>\$ (116)</u>	<u>\$ (141)</u>	<u>\$ (3,904)</u>	<u>\$ (3,705)</u>
Components of net amount recognized in financial position:						
Other assets (non-current asset)	\$ 409	\$ 219	\$ 556	\$ 485	\$ —	\$ —
Accrued wages, salaries and employee benefits (current liability)	(44)	(42)	(25)	(19)	(186)	(161)
Liability for postemployment benefits (non-current liability) ³	(1,953)	(1,956)	(647)	(607)	(3,718)	(3,544)
Net liability recognized	<u>\$ (1,588)</u>	<u>\$ (1,779)</u>	<u>\$ (116)</u>	<u>\$ (141)</u>	<u>\$ (3,904)</u>	<u>\$ (3,705)</u>
Amounts recognized in Accumulated other comprehensive income (pre-tax) consist of:						
Prior service cost (credit)	\$ —	\$ —	\$ 24	\$ 16	\$ (46)	\$ (78)

¹ Effective December 31, 2019, all U.S. pension benefits were frozen, and accordingly there is no longer any service cost.

² For 2020, Actuarial loss (gain) impacting the benefit obligation was primarily due to lower discount rates at the end of 2020 compared to the end of 2019. For 2019, Actuarial loss (gain) impacting the benefit obligation was primarily due to lower discount rates at the end of 2019 compared to the end of 2018.

³ The Liability for postemployment benefits reported in Statement 3 includes our liability for other postemployment benefits and our liability for non-qualified deferred compensation plans. For 2020, these liabilities were \$63 million and \$491 million, respectively. For 2019, these liabilities were \$60 million and \$432 million, respectively.

(Millions of dollars)	U.S. Pension Benefits		Non-U.S. Pension Benefits	
	2020	2019	2020	2019
Pension plans with projected benefit obligation in excess of plan assets:				
Projected benefit obligation	\$ 15,300	\$ 14,037	\$ 2,171	\$ 2,010
Fair value of plan assets	\$ 13,302	\$ 12,039	\$ 1,499	\$ 1,384
Pension plans with accumulated benefit obligation in excess of plan assets:				
Accumulated benefit obligation	\$ 15,300	\$ 14,037	\$ 1,988	\$ 1,799
Fair value of plan assets	\$ 13,302	\$ 12,039	\$ 1,425	\$ 1,269

The accumulated postretirement benefit obligation exceeds plan assets for all of our other postretirement benefit plans for all years presented.

B. Net periodic benefit cost

(Millions of dollars)	U.S. Pension Benefits			Non-U.S. Pension Benefits			Other Postretirement Benefits		
	2020	2019	2018	2020	2019	2018	2020	2019	2018

Amortization of prior service (cost) credit	—	—	—	—	—	—	38	40	36
Total recognized in other comprehensive income	—	—	—	8	(4)	20	31	48	16
Total recognized in net periodic cost and other comprehensive income	\$ (147)	\$ 65	\$ 385	\$ 58	\$ 105	\$ 62	\$ 367	\$ 512	\$ 4
Weighted-average assumptions used to determine net periodic benefit cost:									
Discount rate used to measure service cost ¹	— %	4.3 %	3.7 %	1.5 %	2.5 %	2.3 %	3.2 %	4.1 %	3.5 %
Discount rate used to measure interest cost	2.8 %	3.9 %	3.2 %	1.7 %	2.3 %	2.2 %	2.8 %	3.9 %	3.2 %
Expected rate of return on plan assets ⁴	5.1 %	5.9 %	6.3 %	3.3 %	3.8 %	5.2 %	7.0 %	7.2 %	7.5 %
Rate of compensation increase ¹	— %	4.0 %	4.0 %	2.0 %	3.0 %	4.0 %	4.0 %	4.1 %	4.0 %

¹ Effective December 31, 2019, all U.S. pension benefits were frozen, and accordingly there is no longer any service cost and certain assumptions are no longer applicable.

² Actuarial loss (gain) represents the effects of actual results differing from our assumptions and the effects of changing assumptions. We recognize actuarial loss (gain) immediately through earnings upon the annual remeasurement in the fourth quarter, or on an interim basis as triggering events warrant remeasurement.

³ The service cost component is included in Operating costs and all other components are included in Other income (expense) in Statement 1.

⁴ The weighted-average rates for 2021 are 4.2 percent and 2.9 percent for U.S. and non-U.S. pension plans, respectively.

The discount rates used in the determination of our service and interest cost components utilize a full yield curve approach which applies specific spot rates along the yield curve used in the calculation of the benefit obligation to the relevant projected cash flows.

Our U.S. expected long-term rate of return on plan assets is based on our estimate of long-term passive returns for equities and fixed income securities weighted by the allocation of our pension assets. Based on historical performance, we increase the passive returns due to our active management of the plan assets. To arrive at our expected long-term return, the amount added for active management was 0.40 percent for 2020, 0.40 percent for 2019 and 0.75 percent for 2018. We use a similar process to determine this rate for our non-U.S. plans.

The assumed health care trend rate represents the rate at which health care costs are assumed to increase. We assumed a weighted-average increase of 6.1 percent in our calculation of 2020 benefit expense. We expect a weighted-average increase of 5.8 percent during 2021. The 2021 rates are assumed to decrease gradually to the ultimate health care trend rate of 5 percent in 2025. This rate represents 3 percent general inflation plus 2 percent additional health care inflation.

C. Expected contributions and benefit payments

The following table presents information about expected contributions and benefit payments for pension and other postretirement benefit plans:

(Millions of dollars)	2021						
Expected employer contributions:							
U.S. Pension Benefits	\$	45					
Non-U.S. Pension Benefits	\$	90					
Other Postretirement Benefits	\$	175					
Expected benefit payments:	2021	2022	2023	2024	2025	2026-2030	Total
U.S. Pension Benefits	\$ 1,040	\$ 1,020	\$ 1,020	\$ 1,020	\$ 1,020	\$ 4,995	\$ 10,115
Non-U.S. Pension Benefits	\$ 360	\$ 180	\$ 185	\$ 190	\$ 195	\$ 1,055	\$ 2,165
Other Postretirement Benefits	\$ 280	\$ 275	\$ 270	\$ 265	\$ 260	\$ 1,270	\$ 2,620
Expected Medicare Part D subsidy:	\$ 8	\$ 8	\$ 8	\$ 7	\$ 7	\$ 30	\$ 68

The above table reflects the total expected employer contributions and expected benefits to be paid from the plan or from company assets and does not include the participants' share of the cost. The expected benefit payments for our other postretirement benefits include payments for prescription drug benefits. The above table also includes Medicare Part D subsidy amounts expected to be received by the company which will offset other postretirement benefit payments.

D. Plan assets

In general, our strategy for both the U.S. and non-U.S. pensions includes ongoing alignment of our investments to our liabilities, while reducing risk in our portfolio. The current U.S. pension target asset allocation is 77 percent fixed income and 23 percent equities. We will revise this target allocation periodically to ensure it reflects our overall objectives. The non-U.S. pension weighted-average target allocations are 76 percent fixed income, 13 percent equities, 6 percent other and 5 percent real estate. The target allocations for each plan vary based upon local statutory requirements, demographics of plan participants and funded status. We primarily invest the non-U.S. plan assets in non-U.S. securities.

Our target allocation for the other postretirement benefit plans is 70 percent equities and 30 percent fixed income.

We rebalance the U.S. plans to within the appropriate target asset allocation ranges on a monthly basis. The frequency of rebalancing for the non-U.S. plans varies depending on the plan. As a result of our diversification strategies, there are no significant concentrations of risk within the portfolio of investments.

We permit the use of certain derivative instruments where appropriate and necessary for achieving overall investment policy objectives. The plans do not use derivative contracts for speculative purposes.

The accounting guidance on fair value measurements specifies a fair value hierarchy based upon the observability of inputs used in valuation techniques (Level 1, 2 and 3). Certain assets that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy. See Note 18 for a discussion of the fair value hierarchy.

We determine fair values as follows:

- Equity securities are primarily based on valuations for identical instruments in active markets.
- Fixed income securities are primarily based upon models that take into consideration such market-based factors as recent sales, risk-free yield curves and prices of similarly rated bonds.
- Real estate is stated at the fund's net asset value or at appraised value.
- Cash, short-term instruments and other are based on the carrying amount, which approximates fair value, or the fund's net asset value.

The fair value of the pension and other postretirement benefit plan assets by category is summarized below:

(Millions of dollars)	December 31, 2020				
	Level 1	Level 2	Level 3	Measured at NAV	Total Assets at Fair Value

E. Defined contribution plans

We have both U.S. and non-U.S. employee defined contribution plans to help employees save for retirement. Our primary U.S. 401(k) plan allows eligible employees to contribute a portion of their cash compensation to the plan on a tax-deferred basis. Employees with frozen defined benefit pension accruals are eligible for matching contributions equal to 100 percent of employee contributions to the plan up to 6 percent of cash compensation and an annual employer contribution that ranges from 3 to 5 percent of cash compensation (depending on years of service and age). Employees that were still accruing benefits under a defined benefit pension plan up to December 31, 2019 were eligible for matching contributions equal to 50 percent of employee contributions up to 6 percent of cash compensation. All our U.S. defined benefit pension plans were frozen on December 31, 2019 for remaining employees still accruing a benefit. Starting in 2020, these employees receive matching contributions equal to 100 percent of employee contributions to the plan up to 6 percent of cash compensation and an annual employer contribution that ranges from 3 to 5 percent of cash compensation (depending on years of service and age).

These 401(k) plans include various investment funds, including a non-leveraged employee stock ownership plan (ESOP). As of December 31, 2020 and 2019, the ESOP held 13.2 million and 14.9 million shares, respectively. We allocate all of the shares held by the ESOP to participant accounts. Dividends paid to participants are automatically reinvested into company shares unless the participant elects to have all or a portion of the dividend paid to the participant. Various other U.S. and non-U.S. defined contribution plans generally allow eligible employees to contribute a portion of their cash compensation to the plans, and in most cases, we provide a matching contribution to the funds.

Total company costs related to U.S. and non-U.S. defined contribution plans were as follows:

(Millions of dollars)	2020	2019	2018
U.S. plans	\$ 384	\$ 414	\$ 271
Non-U.S. plans	89	83	89
	<u>\$ 473</u>	<u>\$ 497</u>	<u>\$ 360</u>

13. Short-term borrowings

(Millions of dollars)	December 31,	
	2020	2019
Machinery, Energy & Transportation:		
Notes payable to banks	\$ 10	\$ 5
	10	5
Financial Products:

Debentures—\$500 million of 4.750% due 2064	4.81%	494	494
Debentures—\$246 million of 7.375% due 2097 ²	7.51%	241	241
Finance lease obligations & other		103	128
Total Machinery, Energy & Transportation		9,749	9,141
Financial Products:			
Medium-term notes		16,012	16,719
Other		238	421
Total Financial Products		16,250	17,140
Total long-term debt due after one year		\$ 25,999	\$ 26,281

¹ Effective yield to maturity includes the impact of discounts, premiums and debt issuance costs.

² Redeemable at our option in whole or in part at any time at a redemption price equal to the greater of (i) 100% of the principal amount or (ii) the discounted present value of the notes or debentures, calculated in accordance with the terms of such notes or debentures.

All outstanding notes and debentures are unsecured and rank equally with one another.

On September 19, 2019, we issued \$1.0 billion of 3.250% Senior Notes due 2049 and \$500 million of 2.600% Senior Notes due 2029. On April 9, 2020, we issued \$1.2 billion of 3.250% Senior Notes due 2050 and \$800 million of 2.600% Senior Notes due 2030.

Cat Financial's medium-term notes are offered by prospectus and are issued through agents at fixed and floating rates. Medium-term notes due after one year have a weighted average interest rate of 2.0% with remaining maturities up to 7 years at December 31, 2020.

The above table includes \$56 million of medium-term notes that can be called at par.

The aggregate amounts of maturities of long-term debt during each of the years 2021 through 2025, including amounts due within one year and classified as current, are:

(Millions of dollars)	December 31,				
	2021	2022	2023	2024	2025
Machinery, Energy & Transportation	\$ 1,420	\$ 520	\$ 99	\$ 1,010	\$ 9
Financial Products	7,729	6,679	4,168	2,664	1,621
	<u>\$ 9,149</u>	<u>\$ 7,199</u>	<u>\$ 4,267</u>	<u>\$ 3,674</u>	<u>\$ 1,630</u>

Interest paid on short-term and long-term borrowings for 2020, 2019 and 2018 was \$1,089 million, \$1,057 million and \$1,088 million, respectively.

Please refer to Note 18 and Table III for fair value information on long-term debt.

15. Credit commitments

(Millions of dollars)	December 31, 2020		
	Consolidated	Machinery, Energy & Transportation	Financial Products
Credit lines available:			
Global credit facilities	\$ 10,500	\$ 2,750	\$ 7,750
Other external	3,178	146	3,032
Total credit lines available	13,678	2,896	10,782
Less: Commercial paper outstanding	(1,321)	—	(1,321)
Less: Utilized credit	(744)	(10)	(734)
Available credit	<u>\$ 11,613</u>	<u>\$ 2,886</u>	<u>\$ 8,727</u>

We have three global credit facilities with a syndicate of banks totaling \$10.50 billion (Credit Facility) available in the aggregate to both Caterpillar and Cat Financial for general liquidity purposes. Based on management's allocation decision, which can be revised from time to time, the portion of the Credit Facility available to ME&T as of December 31, 2020 was \$2.75 billion. Information on our Credit Facility is as follows:

- The 364-day facility of \$3.15 billion (of which \$0.82 billion is available to ME&T) expires in September 2021.
- The three-year facility, as amended and restated in September 2019, of \$2.73 billion (of which \$0.72 billion is available to ME&T) expires in September 2022.
- The five-year facility, as amended and restated in September 2019, of \$4.62 billion (of which \$1.21 billion is available to ME&T) expires in September 2024.

Other consolidated credit lines with banks as of December 31, 2020 totaled \$3.18 billion. These committed and uncommitted credit lines, which may be eligible for renewal at various future dates or have no specified expiration date, are used primarily by our subsidiaries for local funding requirements. Caterpillar or Cat Financial may guarantee subsidiary borrowings under these lines.

At December 31, 2020, Caterpillar's consolidated net worth was \$15.41 billion, which was above the \$9.00 billion required under the Credit Facility. The consolidated net worth is defined as the consolidated shareholders' equity including preferred stock but excluding the pension and other postretirement benefits balance within Accumulated other comprehensive income (loss).

At December 31, 2020, Cat Financial's covenant interest coverage ratio was 1.72 to 1. This is above the 1.15 to 1 minimum ratio, calculated as (1) profit excluding income taxes, interest expense and net gain/(loss) from interest rate derivatives to (2) interest expense calculated at the end of each calendar quarter for the rolling four quarter period then most recently ended, required by the Credit Facility.

In addition, at December 31, 2020, Cat Financial's six-month covenant leverage ratio was 6.74 to 1 and year-end covenant leverage ratio was 6.95 to 1. This is below the maximum ratio of debt to net worth of 10 to 1, calculated (1) on a monthly basis as the average of the leverage ratios determined on the last day of each of the six preceding calendar months and (2) at each December 31, required by the Credit Facility.

In the event Caterpillar or Cat Financial does not meet one or more of their respective financial covenants under the Credit Facility in the future (and are unable to obtain a consent or waiver), the syndicate of banks may terminate the commitments allocated to the party that does not meet its covenants. Additionally, in such event, certain of Cat Financial's other lenders under other loan agreements where similar financial covenants or cross default provisions are applicable may, at their election, choose to pursue remedies under those loan agreements, including accelerating the repayment of outstanding borrowings. At December 31, 2020, there were no borrowings under the Credit Facility.

16. Profit per share

Computations of profit per share: (Dollars in millions except per share data)			
	2020	2019	2018
Profit for the period (A) ¹	\$ 2,998	\$ 6,093	\$ 6,147
Determination of shares (in millions):			
Weighted average number of common shares outstanding (B)	544.1	561.6	591.4
Shares issuable on exercise of stock awards, net of shares assumed to be purchased out of proceeds at average market price	4.5	5.9	8.0
Average common shares outstanding for fully diluted computation (C) ²	548.6	567.5	599.4
Profit per share of common stock:			
Assuming no dilution (A/B)	\$ 5.51	\$ 10.85	\$ 10.39
Assuming full dilution (A/C) ²	\$ 5.46	\$ 10.74	\$ 10.26
Shares outstanding as of December 31 (in millions)	545.3	550.1	575.5

¹ Profit attributable to common shareholders.

² Diluted by assumed exercise of stock-based compensation awards using the treasury stock method.

For the year ended December 31, 2020, 2019 and 2018, we excluded 4.6 million, 3.0 million and 1.5 million outstanding stock options, respectively, from the computation of diluted earnings per share because the effect would have been antidilutive.

In July 2018, the Board approved a new share repurchase authorization of up to \$10.0 billion of Caterpillar common stock effective January 1, 2019, with no expiration. As of December 31, 2020, approximately \$4.8 billion remained available under the 2018 Authorization.

During 2020, 2019 and 2018, we repurchased 10.1 million, 30.6 million and 27.7 million shares of Caterpillar common stock, respectively, at an aggregate cost of \$1.3 billion, \$4.0 billion and \$3.8 billion respectively. We made these purchases through a combination of accelerated stock repurchase agreements with third-party financial institutions and open market transactions.

17. Accumulated other comprehensive income (loss)

We present comprehensive income and its components in Statement 2. Changes in the balances for each component of Accumulated other comprehensive income (loss) were as follows:

(Millions of dollars)			
	2020	2019	2018

Total AOCI Ending Balance at December 31	\$ (888)	\$ (1,567)	\$ (1,684)

18. Fair value disclosures

A. Fair value measurements

The guidance on fair value measurements defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants. This guidance also specifies a fair value hierarchy based upon the observability of inputs used in valuation techniques. Observable inputs (highest level) reflect market data obtained from independent sources, while unobservable inputs (lowest level) reflect internally developed market assumptions. In accordance with this guidance, fair value measurements are classified under the following hierarchy:

- **Level 1** – Quoted prices for identical instruments in active markets.
- **Level 2** – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs or significant value-drivers are observable in active markets.
- **Level 3** – Model-derived valuations in which one or more significant inputs or significant value-drivers are unobservable.

When available, we use quoted market prices to determine fair value, and we classify such measurements within Level 1. In some cases where market prices are not available, we make use of observable market based inputs to calculate fair value, in which case the measurements are classified within Level 2. If quoted or observable market prices are not available, fair value is based upon valuations in which one or more significant inputs are unobservable, including internally developed models that use, where possible, current market-based parameters such as interest rates, yield curves and currency rates. These measurements are classified within Level 3.

We classify fair value measurements according to the lowest level input or value-driver that is significant to the valuation. We may therefore classify a measurement within Level 3 even though there may be significant inputs that are readily observable.

Fair value measurement includes the consideration of nonperformance risk. Nonperformance risk refers to the risk that an obligation (either by a counterparty or Caterpillar) will not be fulfilled. For financial assets traded in an active market (Level 1 and certain Level 2), the nonperformance risk is included in the market price. For certain other financial assets and liabilities (certain Level 2 and Level 3), our fair value calculations have been adjusted accordingly.

Investments in debt and equity securities

We have investments in certain debt and equity securities, primarily at Insurance Services, that are recorded at fair value. Fair values for our U.S. treasury bonds and large capitalization value and smaller company growth equity securities are based upon valuations for identical instruments in active markets. Fair values for other government bonds, corporate bonds and mortgage-backed debt securities are based upon models that take into consideration such market-based factors as recent sales, risk-free yield curves and prices of similarly rated bonds.

In addition, Insurance Services has an equity investment in a real estate investment trust (REIT) which is recorded at fair value based on the net asset value (NAV) of the investment and is not classified within the fair value hierarchy.

See Note 11 for additional information on our investments in debt and equity securities.

Derivative financial instruments

The fair value of interest rate contracts is primarily based on models that utilize the appropriate market-based forward swap curves and zero-coupon interest rates to determine discounted cash flows. The fair value of foreign currency and commodity forward, option and cross currency contracts is based on a valuation model that discounts cash flows resulting from the differential between the contract price and the market-based forward rate.

Assets and liabilities measured on a recurring basis at fair value, primarily related to Financial Products, included in Statement 3 as of December 31, 2020 and 2019 were as follows:

(Millions of dollars)	December 31, 2020

In addition to the amounts above, Cat Financial impaired loans are subject to measurement at fair value on a nonrecurring basis and are classified as Level 3 measurements. A loan is considered impaired when management determines that collection of contractual amounts due is not probable. In these cases, we may establish an allowance for credit losses based either on the present value of expected future cash flows discounted at the receivables' effective interest rate, the fair value of the collateral for collateral-dependent receivables, or the observable market price of the receivable. In determining collateral value, Cat Financial estimates the current fair market value of the collateral less selling costs. Cat Financial had impaired loans with a fair value of \$243 million and \$343 million for the years ended December 31, 2020 and 2019, respectively.

B. Fair values of financial instruments

In addition to the methods and assumptions we use to record the fair value of financial instruments as discussed in the Fair value measurements section above, we used the following methods and assumptions to estimate the fair value of our financial instruments:

Cash and short-term investments

Carrying amount approximated fair value.

Restricted cash and short-term investments

Carrying amount approximated fair value. We include restricted cash and short-term investments in Prepaid expenses and other current assets in Statement 3.

Finance receivables

We estimate fair value by discounting the future cash flows using current rates, representative of receivables with similar remaining maturities.

Wholesale inventory receivables

We estimate fair value by discounting the future cash flows using current rates, representative of receivables with similar remaining maturities.

Short-term borrowings

Carrying amount approximated fair value.

Long-term debt

We estimate fair value for fixed and floating rate debt based on quoted market prices.

Guarantees

The fair value of guarantees is based upon our estimate of the premium a market participant would require to issue the same guarantee in a stand-alone arms-length transaction with an unrelated party. If quoted or observable market prices are not available, fair value is based upon internally developed models that utilize current market-based assumptions.

Fair values of our financial instruments were as follows:

TABLE III—Fair Values of Financial Instruments							
(Millions of dollars)	2020		2019		Fair Value Levels	Reference	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value

¹ Represents finance leases and failed sale leasebacks of \$7,961 million and \$7,800 million at December 31, 2020 and 2019, respectively.

19. Concentration of credit risk

Financial instruments with potential credit risk consist primarily of trade and finance receivables and short-term and long-term investments. Additionally, to a lesser extent, we have a potential credit risk associated with counterparties to derivative contracts.

Trade receivables are primarily short-term receivables from independently owned and operated dealers and customers which arise in the normal course of business. We perform regular credit evaluations of our dealers and customers. Collateral generally is not required, and the majority of our trade receivables are unsecured. We do, however, when deemed necessary, make use of various devices such as security agreements and letters of credit to protect our interests. No single dealer or customer represents a significant concentration of credit risk.

Finance receivables and wholesale inventory receivables primarily represent receivables under installment sales contracts, receivables arising from leasing transactions and notes receivable. We typically maintain a security interest in retail financed equipment and, in some instances, wholesale financed equipment. We also typically require physical damage insurance coverage on financed equipment. No single customer or dealer represented a significant concentration of credit risk.

Short-term and long-term investments are held with high quality institutions and, by policy, the amount of credit exposure to any one institution is limited. Long-term investments, primarily included in Other assets in Statement 3, are comprised primarily of available-for-sale debt securities and equity securities at Insurance Services.

For derivative contracts, collateral is generally not required of the counterparties or of our company. The company generally enters into International Swaps and Derivatives Association (ISDA) master netting agreements within ME&T and Financial Products that permit the net settlement of amounts owed under their respective derivative contracts. Our exposure to credit loss in the event of nonperformance by the counterparties is limited to only those gains that we have recorded, but for which we have not yet received cash payment. The master netting agreements reduce the amount of loss the company would incur should the counterparties fail to meet their obligations. At December 31, 2020 and 2019, the maximum exposure to credit loss was \$281 million and \$116 million, respectively, before the application of any master netting agreements.

Please refer to Note 18 and Table III above for fair value information.

20. Leases

A. Lessee arrangements

We lease certain property, information technology equipment, warehouse equipment, vehicles and other equipment through operating leases. We recognize a lease liability and corresponding right-of-use asset based on the present value of lease payments. To determine the present value of lease payments for most of our leases, we use our incremental borrowing rate based on information available on the lease commencement date. For certain property and information technology equipment leases, we have elected to separate payments for lease components from non-lease components. For all other leases, we have elected not to separate payments for lease and non-lease components. Our lease agreements may include options to extend or terminate the lease. When it is reasonably certain that we will exercise that option, we have included the option in the recognition of right-of-use assets and lease liabilities. We have elected not to recognize right-of-use assets or lease liabilities for leases with a term of twelve months or less.

Our finance leases are not significant and therefore are not included in the following disclosures.

The components of lease costs were as follows:

(Millions of dollars)	Year Ended December 31,	
	2020	2019
Operating lease cost	\$ 204	\$ 232
Short-term lease cost	\$ 50	\$ 57

We recognize operating lease right-of-use assets in Other assets in Statement 3. We recognize the operating lease liabilities in Other current liabilities and Other liabilities.

Supplemental information related to leases was as follows:

(Millions of dollars)		December 31, 2020	December 31, 2019
Operating Leases			
Other assets	\$	603	\$ 624
Other current liabilities	\$	163	\$ 173
Other liabilities	\$	457	\$ 461
Weighted average remaining lease term			
Operating leases		7 years	7 years
Weighted average discount rates			
Operating leases		2 %	2 %

Maturities of operating lease liabilities were as follows:

(Millions of dollars)	December 31, 2020
Amounts Due In	
2021	\$ 174
2022	118
2023	88
2024	66
2025	51
Thereafter	182
Total lease payments	679
Less: Imputed interest	(59)
Total	<u>\$ 620</u>

Supplemental cash flow information related to leases was as follows:

(Millions of dollars)		Year ended December 31	
		2020	2019
Cash paid for amounts included in the measurement of lease liabilities			
Operating cash flows from operating leases	\$	201	\$ 224
Right-of-use assets obtained in exchange for lease obligations:			
Operating leases	\$	178	\$ 122

B. Lessor arrangements

We lease Caterpillar machinery, engines and other equipment to customers and dealers around the world, primarily through Cat Financial. Cat Financial leases to customers primarily through sales-type (non-tax) leases, where the lessee for tax purposes is considered to be the owner of the equipment during the term of the lease. Cat Financial also offers tax leases that are classified as either operating or direct finance leases for financial accounting purposes, depending on the characteristics of the lease. For tax purposes, Cat Financial is considered the owner of the equipment. Our lease agreements may include options for the lessee to purchase the underlying asset at the end of the lease term for either a stated fixed price or fair market value.

We determine the residual value of Cat Financial's leased equipment based on its estimated end-of-term market value. We estimate the residual value of leased equipment at the inception of the lease based on a number of factors, including historical wholesale market sales prices, past remarketing experience and any known significant market/product trends. We also consider the following critical factors in our residual value estimates: lease term, market size and demand, total expected hours of usage, machine configuration, application, location, model changes, quantities, third-party residual guarantees and contractual customer purchase options.

During the term of our leases, we monitor residual values. For operating leases, we record adjustments to depreciation expense reflecting changes in residual value estimates prospectively on a straight-line basis. For finance leases, we recognize residual value adjustments through a reduction of finance revenue over the remaining lease term.

See Note 7 for contractual maturities of finance lease receivables (sales-type and direct finance leases).

The carrying amount of equipment leased to others, included in Property, plant and equipment - net in Statement 3, under operating leases was as follows:

(Millions of dollars)	December 31,	
	2020	2019
Equipment leased to others - at original cost	\$ 6,077	\$ 6,208
Less: Accumulated depreciation	(2,035)	(1,960)
Equipment leased to others - net	<u>\$ 4,042</u>	<u>\$ 4,248</u>

Payments due for operating leases as of December 31, 2020, were as follows:

(Millions of dollars)	2021	2022	2023	2024	2025	Thereafter	Total
	\$842	\$494	\$260	\$134	\$64	\$64	\$1,858

Revenues from finance and operating leases, primarily included in Revenues of Financial Products on Statement 1, were as follows:

(Millions of dollars)	Year ended December 31	
	2020	2019
Finance lease revenue	\$ 492	\$ 521
Operating lease revenue	1,124	1,248
Total	<u>\$ 1,616</u>	<u>\$ 1,769</u>

We present revenues net of sales and other related taxes.

21. Guarantees and product warranty

Caterpillar dealer performance guarantees

We have provided an indemnity to a third-party insurance company for potential losses related to performance bonds issued on behalf of Caterpillar dealers. The bonds have varying terms and are issued to insure governmental agencies against nonperformance by certain dealers. We also provided guarantees to third-parties related to the performance of contractual obligations by certain Caterpillar dealers. These guarantees have varying terms and cover potential financial losses incurred by the third parties resulting from the dealers' nonperformance.

In 2016, we provided a guarantee to an end user related to the performance of contractual obligations by a Caterpillar dealer. Under the guarantee, which expires in 2025, non-performance by the Caterpillar dealer could require Caterpillar to satisfy the contractual obligations by providing goods, services or financial compensation to the end user up to an annual designated cap.

Supplier consortium performance guarantee

We have provided a guarantee to a customer in Europe related to the performance of contractual obligations by a supplier consortium to which one of our Caterpillar subsidiaries is a member. The guarantee covers potential damages incurred by the customer resulting from the supplier consortium's non-performance. The damages are capped except for failure of the consortium to meet certain obligations outlined in the contract in the normal course of business. The guarantee will expire when the supplier consortium performs all of its contractual obligations, which is expected to be completed in 2022.

We have dealer performance guarantees and third-party performance guarantees that do not limit potential payment to end users related to indemnities and other commercial contractual obligations. In addition, we have entered into contracts involving industry standard indemnifications that do not limit potential payment. For these unlimited guarantees, we are unable to estimate a maximum potential amount of future payments that could result from claims made.

No significant loss has been experienced or is anticipated under any of these guarantees. At both December 31, 2020 and 2019, the related recorded liability was \$5 million. The maximum potential amount of future payments (undiscounted and without reduction for any amounts that may possibly be recovered under recourse or collateralized provisions) we could be required to make under the guarantees at December 31 was as follows:

(Millions of dollars)	2020	2019
Caterpillar dealer performance guarantees	\$ 993	\$ 1,150
Supplier consortium performance guarantee	258	238
Other guarantees	234	221
Total guarantees	<u>\$ 1,485</u>	<u>\$ 1,609</u>

Cat Financial provides guarantees to repurchase certain loans of Caterpillar dealers from a special-purpose corporation (SPC) that qualifies as a variable interest entity. The purpose of the SPC is to provide short-term working capital loans to Caterpillar dealers. This SPC issues commercial paper and uses the proceeds to fund its loan program. Cat Financial has a loan purchase agreement with the SPC that obligates Cat Financial to purchase certain loans that are not paid at maturity. Cat Financial receives a fee for providing this guarantee, which provides a source of liquidity for the SPC. Cat Financial is the primary beneficiary of the SPC as its guarantees result in Cat Financial having both the power to direct the activities that most significantly impact the SPC's economic performance and the obligation to absorb losses, and therefore Cat Financial has consolidated the financial statements of the SPC. As of December 31, 2020 and 2019, the SPC's assets of \$1,026 million and \$1,453 million, respectively, were primarily comprised of loans to dealers, and the SPC's liabilities of \$1,025 million and \$1,452 million, respectively, were primarily comprised of commercial paper. The assets of the SPC are not available to pay Cat Financial's creditors. Cat Financial may be obligated to perform under the guarantee if the SPC experiences losses. No loss has been experienced or is anticipated under this loan purchase agreement.

Cat Financial has commitments to extend credit to customers and Caterpillar dealers through lines of credit and other pre-approved credit arrangements. Cat Financial applies the same credit policies and approval process for these commitments to extend credit as we do for other financing. Collateral is not required for these commitments, but if credit is extended, collateral may be required upon funding. The amount of unused commitments to extend credit to Caterpillar dealers was \$11.63 billion at December 31, 2020. The amount of unused commitments to extend credit to customers was \$675 million at December 31, 2020. A significant portion of these commitments is not expected to be fully drawn upon; therefore, the total commitment amounts do not represent a future cash requirement. Cat Financial generally has the right to unconditionally cancel, alter, or amend the terms of these commitments at any time.

We determine our product warranty liability by applying historical claim rate experience to the current field population and dealer inventory. Generally, we base historical claim rates on actual warranty experience for each product by machine model/engine size by customer or dealer location (inside or outside North America). We develop specific rates for each product shipment month and update them monthly based on actual warranty claim experience.

The reconciliation of the change in our product warranty liability balances for the years ended December 31 was as follows:

(Millions of dollars)	2020	2019
Warranty liability, beginning of period	\$ 1,541	\$ 1,391
Reduction in liability (payments)	(897)	(903)
Increase in liability (new warranties)	968	1,053
Warranty liability, end of period	\$ 1,612	\$ 1,541

22. Environmental and legal matters

The Company is regulated by federal, state and international environmental laws governing its use, transport and disposal of substances and control of emissions. In addition to governing our manufacturing and other operations, these laws often impact the development of our products, including, but not limited to, required compliance with air emissions standards applicable to internal combustion engines. We have made, and will continue to make, significant research and development and capital expenditures to comply with these emissions standards.

We are engaged in remedial activities at a number of locations, often with other companies, pursuant to federal and state laws. When it is probable we will pay remedial costs at a site, and those costs can be reasonably estimated, we accrue the investigation, remediation, and operating and maintenance costs against our earnings. We accrue costs based on consideration of currently available data and information with respect to each individual site, including available technologies, current applicable laws and regulations, and prior remediation experience. Where no amount within a range of estimates is more likely, we accrue the minimum. Where multiple potentially responsible parties are involved, we consider our proportionate share of the probable costs. In formulating the estimate of probable costs, we do not consider amounts expected to be recovered from insurance companies or others. We reassess these accrued amounts on a quarterly basis. The amount recorded for environmental remediation is not material and is included in Accrued expenses. We believe there is no more than a remote chance that a material amount for remedial activities at any individual site, or at all the sites in the aggregate, will be required.

On January 27, 2020, the Brazilian Federal Environmental Agency (“IBAMA”) issued Caterpillar Brasil Ltda a notice of violation regarding allegations around the requirements for use of imported oils at the Piracicaba, Brazil facility. We have instituted processes to address the allegations. While we are still discussing resolution of these allegations with IBAMA, the initial notice from IBAMA included a proposed fine of approximately \$300,000. We do not expect this fine or our response to address the allegations to have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

On January 7, 2015, the Company received a grand jury subpoena from the U.S. District Court for the Central District of Illinois. The subpoena requested documents and information from the Company relating to, among other things, financial information concerning U.S. and non-U.S. Caterpillar subsidiaries (including undistributed profits of non-U.S. subsidiaries and the movement of cash among U.S. and non-U.S. subsidiaries). The Company has received additional subpoenas relating to this investigation requesting additional documents and information relating to, among other things, the purchase and resale of replacement parts by Caterpillar Inc. and non-U.S. Caterpillar subsidiaries, dividend distributions of certain non-U.S. Caterpillar subsidiaries, and Caterpillar SARL (CSARL) and related structures. On March 2-3, 2017, agents with the Department of Commerce, the Federal Deposit Insurance Corporation and the Internal Revenue Service executed search and seizure warrants at three facilities of the Company in the Peoria, Illinois area, including its former corporate headquarters. The warrants identify, and agents seized, documents and information related to, among other things, the export of products from the United States, the movement of products between the United States and Switzerland, the relationship between Caterpillar Inc. and CSARL, and sales outside the United States. It is the Company's understanding that the warrants, which concern both tax and export activities, are related to the ongoing grand jury investigation. The Company is continuing to cooperate with this investigation. The Company is unable to predict the outcome or reasonably estimate any potential loss; however, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

In addition, we are involved in other unresolved legal actions that arise in the normal course of business. The most prevalent of these unresolved actions involve disputes related to product design, manufacture and performance liability (including claimed asbestos exposure), contracts, employment issues, environmental matters, intellectual property rights, taxes (other than income taxes) and securities laws. The aggregate range of reasonably possible losses in excess of accrued liabilities, if any, associated with these unresolved legal actions is not material. In some cases, we cannot reasonably estimate a range of loss because there is insufficient information regarding the matter. However, we believe there is no more than a remote chance that any liability arising from these matters would be material. Although it is not possible to predict with certainty the outcome of these unresolved legal actions, we believe that these actions will not individually or in the aggregate have a material adverse effect on our consolidated results of operations, financial position or liquidity.

23. Segment information

A. Basis for segment information

Our Executive Office is comprised of a Chief Executive Officer (CEO), four Group Presidents, a Chief Financial Officer (CFO), a Chief Legal Officer and General Counsel and a Chief Human Resources Officer. The Group Presidents and CFO are accountable for a related set of end-to-end businesses that they manage. The Chief Legal Officer and General Counsel leads the Law, Security and Public Policy Division. The Chief Human Resources Officer leads the Human Resources Organization. The CEO allocates resources and manages performance at the Group President/CFO level. As such, the CEO serves as our Chief Operating Decision Maker, and operating segments are primarily based on the Group President/CFO reporting structure.

Three of our operating segments, Construction Industries, Resource Industries and Energy & Transportation are led by Group Presidents. One operating segment, Financial Products, is led by the CFO who also has responsibility for Corporate Services. Corporate Services is a cost center primarily responsible for the performance of certain support functions globally and to provide centralized services; it does not meet the definition of an operating segment. One Group President leads one smaller operating segment that is included in the All Other operating segment. The Law, Security and Public Policy Division and the Human Resources Organization are cost centers and do not meet the definition of an operating segment.

B. Description of segments

We have five operating segments, of which four are reportable segments. Following is a brief description of our reportable segments and the business activities included in the All Other operating segment:

Construction Industries: A segment primarily responsible for supporting customers using machinery in infrastructure and building construction applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes asphalt pavers; backhoe loaders; compactors; cold planers; compact track and multi-terrain loaders; mini, small, medium and large track excavators; motor graders; pipelayers; road reclaimers; skid steer loaders; telehandlers; small and medium track-type tractors; track-type loaders; utility vehicles; wheel excavators; compact, small and medium wheel loaders; and related parts and work tools. Inter-segment sales are a source of revenue for this segment.

Resource Industries: A segment primarily responsible for supporting customers using machinery in mining, heavy construction, quarry and aggregates, waste and material handling applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales, and product support. The product portfolio includes large track-type tractors, large mining trucks, hard rock vehicles, longwall miners, electric rope shovels, draglines, hydraulic shovels, rotary drills, large wheel loaders, off-highway trucks, articulated trucks, wheel tractor scrapers, wheel dozers, landfill compactors, soil compactors, select work tools, machinery components, electronics and control systems, and related parts. In addition to equipment, Resource Industries also develops and sells technology products and services to provide customers fleet management, equipment management analytics and autonomous machine capabilities. Resource Industries also manages areas that provide services to other parts of the company, including integrated manufacturing and research and development. Inter-segment sales are a source of revenue for this segment.

Energy & Transportation: A segment primarily responsible for supporting customers using reciprocating engines, turbines, diesel-electric locomotives and related parts across industries serving Oil and Gas, Power Generation, Industrial and Transportation applications, including marine- and rail-related businesses. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales, and product support. The product portfolio includes turbine machinery and integrated systems and solutions and turbine-related services, reciprocating engine-powered generator sets, integrated systems used in the electric power generation industry, reciprocating engines and integrated systems and solutions for the marine and oil and gas industries, and reciprocating engines supplied to the industrial industry as well as Cat machinery. Responsibilities also include the remanufacturing of Caterpillar engines and components and remanufacturing services for other companies; the business strategy, product design, product management and development, manufacturing, remanufacturing, leasing and service of diesel-electric locomotives and components and other rail-related products and services; and product support of on-highway vocational trucks for North America. Inter-segment sales are a source of revenue for this segment.

Financial Products Segment: Provides financing alternatives to customers and dealers around the world for Caterpillar products, as well as financing for vehicles, power generation facilities and marine vessels that, in most cases, incorporate Caterpillar products. Financing plans include operating and finance leases, installment sale contracts, working capital loans and wholesale financing plans. The segment also provides insurance and risk management products and services that help customers and dealers manage their business risk. Insurance and risk management products offered include physical damage insurance, inventory protection plans, extended service coverage for machines and engines, and dealer property and casualty insurance. The various forms of financing, insurance and risk management products offered to customers and dealers help support the purchase and lease of Caterpillar equipment. The segment also earns revenues from ME&T, but the related costs are not allocated to operating segments. Financial Products' segment profit is determined on a pretax basis and includes other income/expense items.

All Other operating segment: Primarily includes activities such as: business strategy; product management and development; manufacturing and sourcing of filters and fluids, undercarriage, ground-engaging tools, fluid transfer products, precision seals, rubber sealing and connecting components primarily for Cat® products; parts distribution; integrated logistics solutions; distribution services responsible for dealer development and administration, including one wholly owned dealer in Japan; dealer portfolio management and ensuring the most efficient and effective distribution of machines, engines and parts; brand management and marketing strategy; and digital investments for new customer and dealer solutions that integrate data analytics with state-of-the-art digital technologies while transforming the buying experience. We include results for the All Other operating segment as a reconciling item between reportable segments and consolidated external reporting.

C. Segment measurement and reconciliations

There are several methodology differences between our segment reporting and our external reporting. The following is a list of the more significant methodology differences:

- ME&T segment net assets generally include inventories, receivables, property, plant and equipment, goodwill, intangibles, accounts payable and customer advances. Beginning in 2020, we revised how we allocate certain assets between segments. We have recast all prior period amounts to align with the current methodology. We generally manage at the corporate level liabilities other than accounts payable and customer advances, and we do not include these in segment operations. Financial Products Segment assets generally include all categories of assets.
- We value segment inventories and cost of sales using a current cost methodology.

- We amortize goodwill allocated to segments using a fixed amount based on a 20-year useful life. This methodology difference only impacts segment assets. We do not include goodwill amortization expense in segment profit. In addition, we have allocated to segments only a portion of goodwill for certain acquisitions made in 2011 or later.
- We generally manage currency exposures for ME&T at the corporate level and do not include in segment profit the effects of changes in exchange rates on results of operations within the year. We report the net difference created in the translation of revenues and costs between exchange rates used for U.S. GAAP reporting and exchange rates used for segment reporting as a methodology difference.
- We do not include stock-based compensation expense in segment profit.
- Postretirement benefit expenses are split; segments are generally responsible for service costs, with the remaining elements of net periodic benefit cost included as a methodology difference.
- We determine ME&T segment profit on a pretax basis and exclude interest expense and most other income/expense items. We determine Financial Products Segment profit on a pretax basis and include other income/expense items.

Reconciling items are created based on accounting differences between segment reporting and our consolidated external reporting. Please refer to pages 137 to 139 for financial information regarding significant reconciling items. Most of our reconciling items are self-explanatory given the above explanations. For the reconciliation of profit, we have grouped the reconciling items as follows:

- **Corporate costs:** These costs are related to corporate requirements primarily for compliance and legal functions for the benefit of the entire organization.
- **Restructuring costs:** May include costs for employee separation, long-lived asset impairments and contract terminations. These costs are included in Other operating (income) expenses except for defined-benefit plan curtailment losses and special termination benefits, which are included in Other income (expense). Restructuring costs also include other exit-related costs, which may consist of accelerated depreciation, inventory write-downs, building demolition, equipment relocation and project management costs and LIFO inventory decrement benefits from inventory liquidations at closed facilities, all of which are primarily included in Cost of goods sold. Only certain restructuring costs are excluded from segment profit. See Note 24 for more information.
- **Methodology differences:** See previous discussion of significant accounting differences between segment reporting and consolidated external reporting.
- **Timing:** Timing differences in the recognition of costs between segment reporting and consolidated external reporting. For example, we report certain costs on the cash basis for segment reporting and the accrual basis for consolidated external reporting.

For the years ended December 31, 2020, 2019 and 2018, sales and revenues by geographic region reconciled to consolidated sales and revenues were as follows:

Sales and Revenues by Geographic Region

(Millions of dollars)

2020

¹ Sales of ME&T are based on dealer or customer location. Revenues from services provided are based on where service is rendered.

24. Restructuring costs

Our accounting for employee separations is dependent upon how the particular program is designed. For voluntary programs, we recognize eligible separation costs at the time of employee acceptance unless the acceptance requires explicit approval by the company. For involuntary programs, we recognize eligible costs when management has approved the program, the affected employees have been properly notified and the costs are estimable.

Restructuring costs for 2020, 2019 and 2018 were as follows:

(Millions of dollars)	2020	2019	2018
Employee separations ¹	\$ 271	\$ 48	\$ 112
Contract terminations ¹	2	1	7
Long-lived asset impairments ¹	38	65	93
Defined benefit plan curtailments and termination benefits ²	—	—	(8)
Other ³	43	122	182
Total restructuring costs	\$ 354	\$ 236	\$ 386

¹ Recognized in Other operating (income) expenses.

² Recognized in Other income (expense).

³ Represents costs related to our restructuring programs, primarily for inventory write-downs, equipment relocation, project management, accelerated depreciation and building demolition, all of which are primarily included in Cost of goods sold.

The restructuring costs in 2020 were primarily related to various voluntary and involuntary employee separation programs implemented across the company and strategic actions to address certain product lines, which were partially offset by a gain on the sale of a manufacturing facility that had been closed. The restructuring costs in 2019 were primarily related to restructuring actions across the company. The restructuring costs in 2018 were primarily related to ongoing facility closures across the company.

Beginning in 2019, only certain restructuring costs were excluded from segment profit. Restructuring costs included in segment profit were as follows:

(Millions of dollars)	2020	2019	2018
Construction Industries	\$ 13	\$ 4	\$ —
Resource Industries	19	5	—
Energy & Transportation	55	7	—
Financial Products Segment	—	—	—
All Other operating segment	9	8	—

The following table summarizes the 2019 and 2020 employee separation activity:

(Millions of dollars)	2020	2019
Liability balance, beginning of period	\$ 48	\$ 85
Increase in liability (separation charges)	271	48
Reduction in liability (payments)	(155)	(85)
Liability balance, end of period	\$ 164	\$ 48

Most of the remaining liability balance as of December 31, 2020 is expected to be paid in 2021.

In September 2015, we announced a large scale restructuring plan (the Plan) including a voluntary retirement enhancement program for qualifying U.S. employees, several voluntary separation programs outside of the United States, additional involuntary programs throughout the company and manufacturing facility consolidations and closures. The largest action among those included in the Plan was related to our European manufacturing footprint which led to the Gosselies, Belgium facility closure. We incurred \$43 million and \$121 million of restructuring costs associated with these actions in 2019 and 2018, respectively. The Plan concluded in 2019, and total restructuring costs incurred since inception of the Plan were \$1,831 million.

25. Selected quarterly financial results (unaudited)

	2020 Quarter			
	1st	2nd	3rd	4th
(Dollars in millions except per share data)				
Sales and revenues	\$ 10,635	\$ 9,997	\$ 9,881	\$ 11,235
Less: Revenues	(721)	(687)	(653)	(665)

	2019 Quarter			
	1st	2nd	3rd	4th
(Dollars in millions except per share data)				
Sales and revenues	\$ 13,466	\$ 14,432	\$ 12,758	\$ 13,144
Less: Revenues	(742)	(761)	(784)	(758)
Sales	12,724	13,671	11,974	12,386
Cost of goods sold	9,003	9,941	8,569	9,117
Gross margin	3,721	3,730	3,405	3,269
Profit ¹	\$ 1,881 ⁴	\$ 1,620	\$ 1,494	\$ 1,098 ⁵
Profit per common share	\$ 3.29	\$ 2.85	\$ 2.69	\$ 2.00
Profit per common share—diluted ²	\$ 3.25	\$ 2.83	\$ 2.66	\$ 1.97

¹ Profit attributable to common shareholders.

² Diluted by assumed exercise of stock-based compensation awards using the treasury stock method.

³ The first quarter of 2020 includes pre-tax pension and other postretirement benefit plan actuarial gain of \$254 million. The second, third and fourth quarters of 2020 include pre-tax pension and other postretirement benefit actuarial losses of \$122 million, \$77 million and \$438 million, respectively. See Note 12 for additional information on these costs.

⁴ The first quarter of 2019 includes a benefit of \$178 million to adjust unrecognized tax benefits due to the receipt of final regulations providing additional guidance related to the calculation of the mandatory deemed repatriation of non-U.S. earnings due to U.S. tax reform.

⁵ The fourth quarter of 2019 includes pre-tax pension and other postretirement benefit plan actuarial loss of \$468 million. See Note 12 for additional information on these costs.

26. Subsequent event

On February 1, 2021, we acquired the Oil & Gas Division (“SPM Oil & Gas”) of the Weir Group PLC for approximately \$375 million. Headquartered near Fort Worth, Texas, SPM Oil & Gas will produce a full line of pumps, flow iron, consumable parts, wellhead and pressure control products that are offered via an extensive global network of service centers.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

Not Applicable.

Item 9A. Controls and Procedures.

Disclosure Controls and Procedures

An evaluation was performed under the supervision and with the participation of the company's management, including the Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of the design and operation of the company's disclosure controls and procedures, as that term is defined in Rule 13a-15(e) under the Exchange Act, as of the end of the period covered by this annual report. Based on that evaluation, the CEO and CFO concluded that the company's disclosure controls and procedures were effective as of the end of the period covered by this annual report.

Management's Report on Internal Control Over Financial Reporting

Management's report on the company's internal control over financial reporting as of December 31, 2020 is included on page 67 of Part II, Item 8 "Financial Statements and Supplementary Data." The effectiveness of the company's internal control over financial reporting as of December 31, 2020 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm. Their report appears on pages 68-69 of Part II, Item 8 "Financial Statements and Supplementary Data."

Changes in Internal Control over Financial Reporting

During the last fiscal quarter, there has been no significant change in the company's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

Item 9B. Other Information.

Not Applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance.

Identification of Directors and Business Experience

Information required by this Item is incorporated by reference from the 2021 Proxy Statement.

Identification of Executive Officers and Business Experience

Information required by this Item appears in Item 1C of this Form 10-K.

Family Relationships

There are no family relationships between the officers and directors of the company.

Legal Proceedings Involving Officers and Directors

If applicable, information required by this Item is incorporated by reference from the 2021 Proxy Statement.

Audit Committee Financial Expert

Information required by this Item is incorporated by reference from the 2021 Proxy Statement.

Identification of Audit Committee

Information required by this Item is incorporated by reference from the 2021 Proxy Statement.

Shareholder Recommendation of Board Nominees

Information required by this Item is incorporated by reference from the 2021 Proxy Statement.

Compliance with Section 16(a) of the Exchange Act

If applicable, information required by this Item relating to compliance with Section 16(a) of the Exchange Act is incorporated by reference from the 2021 Proxy Statement.

Code of Ethics

Our Worldwide Code of Conduct (Code), first published in 1974 and most recently updated in 2019, sets a high standard for honesty and ethical behavior by every director and employee, including the principal executive officer, principal financial officer and principal accounting officer. The Code is posted on our website at www.Caterpillar.com/code. To obtain a copy of the Code at no charge, submit a written request to the Corporate Secretary at 510 Lake Cook Road, Suite 100, Deerfield, IL 60015-4971. We post on our website at www.Caterpillar.com/code any required amendments to or waivers granted under our Code pursuant to SEC or New York Stock Exchange disclosure rules.

Item 11. Executive Compensation.

Information required by this Item is incorporated by reference from the 2021 Proxy Statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters.

Information required by this Item relating to security ownership of certain beneficial owners and management is incorporated by reference from the 2021 Proxy Statement.

Information required by this Item relating to securities authorized for issuance under equity compensation plans is included in the following table:

Equity Compensation Plan Information
(as of December 31, 2020)

Plan category	(a) Number of securities to be issued upon exercise of outstanding options, warrants and rights	(b) Weighted- average exercise price of outstanding options, warrants and rights	(c) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a))
Equity compensation plans approved by security holders	13,006,391	\$ 109.60	36,488,284
Equity compensation plans not approved by security holders	N/A	N/A	N/A
Total	13,006,391	\$ 109.60	36,488,284

Item 13. Certain Relationships and Related Transactions, and Director Independence.

Information required by this Item is incorporated by reference from the 2021 Proxy Statement.

Item 14. Principal Accountant Fees and Services.

Information required by this Item is incorporated by reference from the 2021 Proxy Statement.

PART IV

CATERPILLAR INC.
SUPPLEMENTAL Retirement PLAN
PREAMBLE

The Caterpillar Inc. Supplemental Retirement Plan (formerly known as the Caterpillar Inc. Supplemental Pension Benefit Plan and hereinafter referred to as the “Plan”) was established as of January 1, 1976 by Caterpillar Inc. (the “Company”) to provide additional pension benefits to individuals who participate in the Caterpillar Inc. Retirement Income Plan, as amended, or any successor(s) to such plan (not including the applicable supplement of the Caterpillar Inc. Retirement Income Plan that reflects the provisions and benefits of the Solar Turbines Incorporated Retirement Plan on and after the merger of the Solar Turbines Incorporated Retirement Plan with and into the Caterpillar Retirement Income Plan effective as of 11:59 PM CST on December 31, 2014) (“RIP”), but whose benefits are limited due to the application of Section 401(a)(17) and/or Section 415 of the Internal Revenue Code of 1986, as amended. The Plan also provides the benefits that would otherwise be payable pursuant to RIP but for (i) an individual’s deferral of compensation under the Caterpillar Inc. Deferred Employees’ Investment Plan, the Caterpillar Inc. Supplemental Employees’ Investment Plan, or the Caterpillar Inc. Supplemental Deferred Compensation Plan or (ii) the exclusions from “Total Earnings” under RIP for an individual’s lump sum discretionary awards and variable base pay. This amended and restated Plan is effective as of January 1, 2020.

For avoidance of doubt, all references in the Plan to RIP shall not include the applicable supplement of the Caterpillar Inc. Retirement Income Plan that reflects the provisions and benefits of the Solar Turbines Incorporated Retirement Plan on and after the merger of the Solar Turbines Incorporated Retirement Plan with and into the Caterpillar Retirement Income Plan effective as of 11:59 PM CST on December 31, 2014 and benefits under the Plan shall in no way be affected by benefits provided or not provided under such applicable supplement.

ARTICLE I
DEFINITIONS

1. General.

When a word or phrase appears in the Plan with the initial letter capitalized, and the word or phrase does not begin a sentence, the word or phrase shall generally be a term defined in this Article I. The following words and phrases used in the Plan with the initial letter capitalized shall have the meanings set forth in this Article I, unless a clearly different meaning is required by the context in which the word or phrase is used or the word or phrase is defined for a limited purpose elsewhere in the Plan document:

a. “Adopting Affiliate” means any Affiliate that has been authorized by the Company to adopt the Plan and which has adopted the Plan in accordance with Section 2.5. All Affiliates that adopted the Plan on or before the Effective Date and that had not terminated such adoption shall continue to be Adopting Affiliates of the Plan.

- b. **“Affiliate”** means a parent business that controls, or a subsidiary business that is controlled by, the Company.
- c. **“Beneficiary”** means, with respect to a Participant, the person or persons entitled to receive distributions of the Participant’s death benefits under RIP.
- d. **“Benefit Determination Date”** means the following:
- i. **“On or After January 1, 2005, But Prior to January 1, 2009.”** On or after January 1, 2005, but prior to January 1, 2009, a Participant’s Benefit Determination Date shall be the date as of which the Participant has elected to commence benefits under RIP.
- ii. **“On or After January 1, 2009.”** On or after January 1, 2009, a Participant’s Benefit Determination Date shall be the date determined under (1) or (2) below:
- I. With respect to (x) a Participant’s PEP Benefit (as defined in Section 3.2(b)), (y) a Choice Participant’s benefits under this Plan, or (z) a Participant’s Traditional Benefit (as defined in Section 3.2(a)) where the Participant satisfies the requirements under Section 5.2(d)(1)(i), (ii), (iii), (iv), or (v) as of the Participant’s Separation from Service, the Participant’s Benefit Determination Date shall be the first day of the month following the Participant’s Separation from Service.
- II. With respect to a Participant’s Traditional Benefit (as defined in Section 3.2(a)) for a Participant other than a Choice Participant where the Participant does not satisfy the requirements under Section 5.2(d)(1)(i), (ii), (iii), (iv), or (v) as of the Participant’s Separation from Service, the Participant’s Benefit Determination Date shall be the first day of the month following the date that the Participant first satisfies the requirements under Section 5.2(d)(1)(i), (ii), (iii), (iv), or (v).
- e. **“Benefit Payment Date”** means the date as of which the Participant’s benefit amounts under the Plan shall be payable, as determined in accordance with Section 5.2(d).
- f. **“Board”** means the Board of Directors of the Company, or any authorized committee of the Board.
- g. **“Choice Participant”** means a Participant who (i) has a “frozen traditional benefit” under RIP as a result of the election made by such Participant to cease accruing a benefit under the traditional benefit formula of RIP and to begin accruing a benefit under the pension equity formula of RIP and (ii) had accrued a Traditional Benefit (as defined in Section 3.2(a)) under this Plan as of June 30, 2003.
- h. **“Code”** means the Internal Revenue Code of 1986, as amended from time to time, and any regulations promulgated thereunder.
- i. **“Company”** means Caterpillar Inc., and, to the extent provided in Section 8.8 below, any successor corporation or other entity resulting from a merger or

consolidation into or with the Company or a transfer or sale of substantially all of the assets of the Company.

- j. **“DEIP”** means the Caterpillar Inc. Deferred Employees’ Investment Plan, as amended.
- k. **“Director”** means the Company’s Director of Total Rewards.
- l. **“Disability”** or **“Disabled”** means that a Participant is determined to be totally disabled by the United States Social Security Administration.
- m. **“Effective Date”** means January 1, 2020.
- n. **“ERISA”** means the Employee Retirement Income Security Act of 1974, as amended from time to time, and any regulations promulgated thereunder.
- o. **“GSCS”** means Caterpillar Logistics Services LLC (f/k/a Caterpillar Logistics Services, Inc.).
- p. **“GSCS Closing Date”** means the date on which the sale of GSCS to an entity that is not an Affiliate is completed.
- q. **“GSCS Participant”** means a Participant who is employed by GSCS upon the closing of the sale of GSCS to an entity that is not an Affiliate.
- r. **“Lump Sum Discretionary Award”** means a lump sum discretionary award paid to a Participant in accordance with the established pay practices of the Company and Adopting Affiliates and designated with earnings code 208 or 212 in the Company’s payroll system (or the equivalent earnings code for Adopting Affiliates that do not use the Company’s payroll system, or predecessor or subsequent payroll systems).
- s. **“Participant”** means an employee of the Company or any Adopting Affiliate who satisfies the eligibility requirements for participation in the Plan.
- t. **“Plan”** means the Caterpillar Inc. Supplemental Retirement Plan, as set forth herein and as it may be amended from time to time.
- u. **“Plan Administrator”** means the Director.
- v. **“Plan Year”** means the calendar year.
- w. **“RIP”** means the Caterpillar Inc. Retirement Income Plan, as amended or any successor(s) to such plan, other than the applicable supplement of the Caterpillar Inc. Retirement Income Plan that reflects the provisions and benefits of the Solar Turbines Incorporated Retirement Plan on and after the merger of the Solar Turbines Incorporated Retirement Plan with and into the Caterpillar Retirement Income Plan effective as of 11:59 PM CST on December 31, 2014.

- x. **“SDCP”** means the Caterpillar Inc. Supplemental Deferred Compensation Plan, as amended or any successor(s) to such plan.
- y. **“SEIP”** means the Caterpillar Inc. Supplemental Employees’ Investment Plan, as amended.
- z. **“Separation from Service”** means separation from service as determined in accordance with any regulations, rulings or other guidance issued by the Department of the Treasury pursuant to Section 409A(a)(2)(A)(i) of the Code, as it may be amended or replaced from time to time.
- aa. **“Specified Employee”** means a “key employee” as defined in Section 416(i) of the Code without regard to Section 416(i)(5) and determined in accordance with Section 409A(a)(2)(B)(i) of the Code.
- bb. **“Sunset Participant”** means a Participant who is classified as a “Sunset Participant” under the terms of RIP.
- cc. **“Unforeseeable Emergency”** means a severe financial hardship to the Participant resulting from an illness or accident of the Participant, the Participant’s spouse, or a dependent (as defined in Section 152(a) of the Code) of the Participant, loss of the Participant’s property due to casualty, or other similar extraordinary and unforeseeable circumstances arising as a result of events beyond the control of the Participant. For purposes of the Plan, an “Unforeseeable Emergency” shall not include a Participant’s need to send his or her child to college or a Participant’s desire to purchase a home. Any determination as to whether a Participant has incurred an Unforeseeable Emergency shall be made in the sole discretion of the Plan Administrator in accordance with rules prescribed pursuant to Section 409A of the Code.
- dd. **“Variable Base Pay”** means the variable base pay paid to a Participant as determined in accordance with the established pay practices of the Company and Adopting Affiliates.

1.2 **Construction.**

The masculine gender, when appearing in the Plan, shall include the feminine gender (and vice versa), and the singular shall include the plural, unless the Plan clearly states to the contrary. Headings and subheadings are for the purpose of reference only and are not to be considered in the construction of the Plan. If any provision of the Plan is determined to be for any reason invalid or unenforceable, the remaining provisions shall continue in full force and effect. All of the provisions of the Plan shall be construed and enforced according to the laws of the State of Illinois without regard to conflict of law principles and shall be administered according to the laws of such state, except as otherwise required by ERISA, the Code, or other Federal law.

ARTICLE II ELIGIBILITY; ADOPTION BY AFFILIATES

2.1 Eligible Employees.

The purpose of the Plan is to provide supplemental retirement benefits to a select group of management or highly compensated employees. This group of employees is sometimes referred to as a “top hat group.” The Plan constitutes an unfunded supplemental retirement plan and is fully exempt from Parts 2, 3, and 4 of Title I of ERISA. The Plan shall be governed and construed in accordance with Title I of ERISA.

2.2 Existing Participants.

Each individual who was a Participant in the Plan as of the date of execution of this plan document shall continue as such, subject to the provisions hereof.

2.3 New Participants.

An employee shall participate in the Plan if the employee is receiving, is eligible to receive, or is accruing retirement benefits pursuant to RIP; and

- a. the employee’s RIP benefits are limited by application of Section 401(a)(17) of the Code;
- b. the employee’s RIP benefits are limited by application of Section 415(b) of the Code;
- c. the employee’s RIP benefits are decreased due to the employee’s deferral of salary or incentive compensation under SEIP, DEIP or SDCP; or
- d. the employee’s RIP benefits are limited due to the exclusions from “Total Earnings” (as defined under RIP) for the employee’s Lump Sum Discretionary Awards and Variable Base Pay.

2.4 Discontinuance of Participation.

As a general rule, once an individual is a Participant, he will continue as such for all future Plan Years until his retirement or other termination of employment. In addition, prior to retirement or other termination of employment, the Plan Administrator shall discontinue an individual’s participation in the Plan if the Plan Administrator concludes, in the exercise of his discretion, that the individual is no longer properly included in the top hat group. If an individual’s participation is discontinued, the individual will no longer be eligible to accrue a benefit under the Plan. The individual will not be entitled to receive a distribution, however, until the occurrence of another event (e.g., death or Separation from Service) that entitles the individual to receive a distribution.

2.5 Adoption by Affiliates.

An employee of an Affiliate may not become a Participant in the Plan unless the Affiliate has previously adopted the Plan. An Affiliate of the Company may adopt the Plan only with the approval of the Company. By adopting the Plan, the Affiliate shall be deemed to have agreed to assume the obligations and liabilities imposed upon it by the Plan, agreed to comply with all of the other terms and provisions of the Plan, delegated to the Plan Administrator the power and responsibility to administer the Plan with respect to the Affiliate's employees, and delegated to the Company the full power to amend or terminate the Plan with respect to the Affiliate's employees. Notwithstanding the foregoing, an Affiliate that has previously adopted the Plan may terminate its participation in the Plan in accordance with such rules and procedures that are promulgated by the Company.

ARTICLE III DETERMINATION OF BENEFIT

3.1 General.

Benefit amounts payable under the Plan shall be determined pursuant to Section 3.2 and, if applicable, adjusted pursuant to Section 3.4. Such determinations shall be made by reference to (a) the benefit amounts that would be payable to the Participant under RIP if SEIP, DEIP and SDCP deferrals and any Lump Sum Discretionary Awards or Variable Base Pay were taken into account in determining the Participant's benefits thereunder and (b) without regard to the applicable limitations under Sections 401(a)(17) and 415 of the Code. For avoidance of doubt, effective January 1, 2011, any Participant who is not a Sunset Participant shall not receive any additional benefit accruals under this Article III, and any Sunset Participant shall not receive any additional benefit accruals under this Article III effective as of the earlier of: (1) the date he is no longer a Sunset Participant or (2) January 1, 2020.

3.1 Amount of Benefit Payable to Participant.

The monthly benefit payable to the Participant by the Plan shall be equal to the sum of the Participant's "Traditional Benefit" and "PEP Benefit" amounts (both as defined below), if any, determined under subsections (a) and (b) below as of the Participant's Benefit Determination Date:

a. "Traditional Benefit". Any benefit payable to the Participant by the Plan under the "traditional benefit" provisions of RIP, as it may be amended from time to time, shall be determined as follows:

1. **Step One.** The Plan Administrator shall determine the benefit that would be payable to the Participant pursuant to RIP if SEIP, DEIP and SDCP deferrals and any Lump Sum Discretionary Awards or Variable Base Pay were taken into account and without regard to the applicable limitations under Sections 401(a)(17) and 415 of the Code. For purposes of this Section 3.2(a)(1), the parenthetical phrase of Section 5.2 of RIP reading "(2% for Participants in salary grades 30 or 31 pursuant to the Company's standard salary grades or such salary grade equivalents, 2.25% for Participants in salary grade 32 pursuant to the Company's standard salary grades or such salary grade equivalents, 2.4% for Participants in salary grades 33

or higher pursuant to the Company's standard salary grades or such salary grade equivalents)" shall be disregarded.

2. **Step Two.** The Plan Administrator shall determine the Participant's benefit that would be payable pursuant to RIP (as calculated as of the Participant's Benefit Determination Date).

3. **Step Three.** The amount determined pursuant to paragraph (2) above shall be subtracted from the amount determined pursuant to paragraph (1) above to determine the benefit payable to the Participant pursuant to this Section 3.2(a) of the Plan (herein referred to as a Participant's "Traditional Benefit").

b. **"PEP Benefit"**. Any benefit payable by the Plan to the Participant under the "pension equity formula" provisions of RIP, as it may be amended from time to time, shall be determined as follows:

1. **Step One.** The Plan Administrator shall determine the single sum amount that would be payable to the Participant pursuant to RIP if SEIP, DEIP and SDCP deferrals and any Lump Sum Discretionary Awards or Variable Base Pay were taken into account and without regard to the applicable limitations under Sections 401(a)(17) and 415 of the Code.

2. **Step Two.** The Plan Administrator shall determine the Participant's single sum amount that would be payable pursuant to RIP (as calculated as of the Participant's Benefit Determination Date).

3. **Step Three.** The amount determined pursuant to paragraph (2) above shall be subtracted from the amount determined pursuant to paragraph (1) above to determine the single sum amount payable to the Participant pursuant to this Section 3.2(b) of the Plan (herein referred to as a Participant's "PEP Benefit").

3.3 Survivor Benefits.

In the event a Participant dies after becoming vested under the Plan pursuant to Section 4.1 but prior to commencing his benefits under the Plan pursuant to Article V, a survivor benefit shall be payable as follows:

a. **Traditional Benefit.** With respect to a Participant's Traditional Benefit, if any, determined under Section 3.2(a) (and, if applicable, adjusted under Section 3.4), the Participant's surviving spouse, if any, shall be entitled to a monthly survivor benefit payable during the spouse's lifetime and terminating with the payment for the month in which such spouse's death occurs. The monthly benefit payable to the surviving spouse shall be the portion of the amount determined under Section 3.2(a) (and, if applicable, adjusted under Section 3.4) as of the Participant's Benefit Determination Date that the surviving spouse would have been entitled to receive under this Plan if the Participant had separated from service on the date of his death, commenced benefits in accordance with Article V in the form of a 50% joint and survivor

annuity, and then died immediately thereafter. A surviving spouse who was not married to the deceased Participant for at least one year at the date of death shall not be eligible for the monthly survivor benefit pursuant to this Section 3.3.

a. PEP Benefit. With respect to a Participant's PEP Benefit, if any, determined under Section 3.2(b), such benefit shall be paid to the Participant's Beneficiary in a single sum amount as soon as administratively feasible after the Benefit Determination Date.

b. Certain Choice Participant Benefits. Notwithstanding the provisions of (a) and (b) above, with respect to a Choice Participant who does not make a contrary election pursuant to Section 5.2(c)(3), such Participant's Beneficiary shall receive a single sum amount equal to the actuarial equivalent present value (using the actuarial assumptions under RIP applicable to the Participant as of his or her Benefit Determination Date) of the Participant's Traditional Benefit and PEP Benefit calculated as of the date specified in Section 5.2(d)(1)(i), or date of death if later, and as further adjusted by using the actuarial assumptions under RIP applicable to the Beneficiary as of the Participant's Benefit Determination Date. Notwithstanding the foregoing, if a Choice Participant makes an election pursuant to Section 5.2(c)(3) to receive his or her benefits under the Plan in the form of monthly annuity payments, his or her Beneficiary, in lieu of the single sum amount described in the preceding sentence, shall receive a monthly benefit paid for the remainder of the Beneficiary's life; provided that, the Beneficiary's monthly benefit shall be equal to the actuarially equivalent monthly benefit of such single sum amount (using the actuarial assumptions under RIP applicable to the Beneficiary as of the Participant's Benefit Determination Date); provided further that, in no event shall the Beneficiary's monthly benefit be less than the monthly survivor benefit determined under Section 3.3(a) that, but for this Section 3.3(c), would have been payable to the Participant's surviving spouse (or, if there is no surviving spouse, would have been payable under Section 3.3(a) had the Participant died with a surviving spouse). Any single sum amount or monthly benefit determined under this Section 3.3(c) shall be payable to the Participant's Beneficiary as soon as administratively feasible after the date of the Participant's death.

3.4 Early Retirement Reductions.

a. General. Benefits determined pursuant to this Article III shall be subject to the same reductions for early commencement as applicable under RIP.

b. CEO. Notwithstanding Section 3.4(a) or anything else herein to the contrary, if the employment of the person who occupied the position of Chief Executive Officer of the Company on December 10, 2015 (the "CEO") terminates for any reason other than death or Disability prior to the attainment of age 65, the benefit determined pursuant to this Article III shall be reduced in accordance with the early retirement provisions of RIP but substituting age 65 for age 62. Upon termination of the CEO's employment due to death or Disability, the benefits determined pursuant to this Article III for the CEO shall be subject to the same reductions for early retirement as applicable under RIP.

3.5 Future Adjustments. Any benefit amounts payable under this Plan may be adjusted to take into account future amendments to RIP and increases in retirement income that are

granted under RIP due to cost-of-living increases. Any benefit amounts payable under this Plan shall be adjusted to take into account future factors and adjustments made by the Secretary of the Treasury (in regulations or otherwise) to the limitations under Sections 401(a)(17) and 415 of the Code, except as provided under Section 8.11(e).

ARTICLE IV VESTING

4.1 Vesting.

Subject to Section 8.1, each Participant shall be vested in his or her benefit, if any, that becomes payable under Article V of the Plan to the same extent that the Participant is vested in his or her benefit accrued under RIP. Notwithstanding the foregoing provisions of this Section 4.1, each GSCS Participant shall be fully vested at all times from and after the GSCS Closing Date in his or her benefit payable under the Plan.

ARTICLE V PAYMENT OF BENEFIT

5.1 Payments on or After January 1, 2005, But Prior to January 1, 2009. In accordance with the transitional guidance issued by the Internal Revenue Service and the Department of Treasury in Section 3 of IRS Notice 2007-86, any payment of benefits to a Participant or his Beneficiary commencing on or after January 1, 2005, but prior to January 1, 2009 shall be made pursuant to the Participant's applicable payment election or the applicable pre-retirement survivor provisions under RIP.

5.2 Payments on or After January 1, 2009.

Any payment of benefits to a Participant commencing on or after January 1, 2009 shall be determined in accordance with this Section 5.2.

a. Limitation on Right to Receive Distribution. A Participant shall not be entitled to receive a distribution prior to the first to occur of the following events:

1. The Participant's Separation from Service, or in the case of a Participant who is a Specified Employee, the date which is six months after the Participant's Separation from Service;
2. The date the Participant becomes Disabled;
3. The Participant's death;
4. A specified time (or pursuant to a fixed schedule) specified at the date of deferral of compensation;
5. An Unforeseeable Emergency; or

6. To the extent provided by the Secretary of the Treasury, a change in the ownership or effective control of the Company or an Adopting Affiliate or in the ownership of a substantial portion of the assets of the Company or an Adopting Affiliate.

This Section 5.2(a) restates the restrictions on distributions set forth in Section 409A of the Code and is intended to impose restrictions on distributions pursuant to the Plan accordingly. This Section 5.2(a) does not describe the instances in which distributions will be made. Rather, distributions will be made only if and when permitted both by this Section 5.2(a) and another provision of the Plan.

b. General Right to Receive Distribution. Following a Participant's termination of employment or death, the Participant's benefit amounts will be paid to the Participant in the manner and at the time provided in Sections 5.2(c) and 5.2(d), as applicable. A transfer of a Participant from the Company or any Affiliate to any other Affiliate or the Company shall not be deemed to be a termination of employment for purposes of this Section 5.2(b).

c. Form of Payment.

1. **Traditional Benefit.** Any monthly benefit payable to a Participant under Section 3.2(a) (and, if applicable, adjusted under Section 3.4) shall be paid in the form of annuity payments as follows:

i. **Unmarried Participants.** The benefits of an unmarried Participant shall be paid in the form of a single life annuity for the Participant's life. No payments shall be made after the Participant dies. Notwithstanding the foregoing, in accordance with uniform rules and procedures as may be adopted by the Plan Administrator from time to time, an unmarried Participant may elect, in lieu of a single life annuity, to have his or her benefits paid in any actuarially equivalent form of annuity permitted under RIP.

ii. **Married Participants.** Subject to Section 3.3, the benefits of a married Participant shall be paid in the form of a joint and survivor annuity in a reduced monthly benefit for the Participant's life (as determined in accordance with the applicable actuarial assumptions in effect under RIP) and then, if the Participant's spouse is still alive, a benefit equal to 50% of the Participant's monthly benefit is paid to the spouse for the remainder of his or her life. If the Participant's spouse is not alive when the Participant dies, no further payments shall be made. Notwithstanding the foregoing, in accordance with uniform rules and procedures as may be adopted by the Plan Administrator from time to time, a married Participant may, with the written consent of the Participant's spouse, elect to waive the joint and survivor annuity of this subparagraph (ii) and instead elect a single life annuity or any actuarially equivalent form of annuity permitted under RIP.

In addition, if the Participant's Benefit Payment Date, as described in clauses (i)-(v) of Section 5.2(d)(1), is delayed pursuant to the last sentence of Section 5.2(d)(1), then any monthly benefit amounts that would have been paid if not for such last sentence will be credited with interest at five percent (5%) per annum through the Participant's Benefit Payment

Date. Such delayed monthly benefit amounts and interest shall be paid in a single sum amount as soon as administratively feasible after such Benefit Payment Date.

2. **PEP Benefit.** Any benefit payable to a Participant determined under Section 3.2(b) shall be paid in a single sum amount. In addition, if the Participant's Benefit Payment Date, as described in Section 5.2(d)(2), is delayed pursuant to the first sentence of Section 5.2(d)(2), then any single sum amount that would have been paid if not for such first sentence will be credited with interest at five percent (5%) per annum through the Participant's Benefit Payment Date. Such interest shall be paid in a single sum amount as soon as administratively feasible after such Benefit Payment Date.

3. **Special One-Time Election for Choice Participants.** Pursuant to the transitional guidance issued by the Internal Revenue Service and the Department of Treasury, the Plan Administrator shall provide a special one-time election to Choice Participants whose benefits have not commenced as of December 31, 2008, to elect to have their benefits paid other than in the forms otherwise described in (1) and (2) above, subject to such procedures as are established by the Plan Administrator; provided that, if a Choice Participant does not make such an election, any benefit amounts under the Plan that become payable to such Choice Participant shall be paid in the forms described in (1) and (2) above, as applicable. In addition, if the Participant's Benefit Payment Date, as described in Section 5.2(d)(3), is delayed pursuant to Section 5.2(d)(3), then any monthly benefit amounts or single sum amounts that would have been paid if not for such delay will be credited with interest at five percent (5%) per annum through the Participant's Benefit Payment Date in accordance with the applicable provisions of (1) and (2) above. Such delayed monthly benefit amounts or single sum amounts and interest shall be paid in a single sum amount as soon as administratively feasible after such Benefit Payment Date.

d. Timing of Payment.

1. **Traditional Benefit.** Except as provided below, any benefit determined under Section 3.2(a) (and, if applicable, adjusted under Section 3.4) that becomes payable to the Participant following Separation from Service shall commence on the first day of the month following the earliest of the following:

- i. the Participant's attainment of age 65 or, if later, the Participant's fifth anniversary of the date he or she commenced participation under RIP;
- ii. the Participant's attainment of age 55 with the number of the Participant's years of vesting service plus his or her age equaling at least 85;
- iii. the Participant's attainment of age 60 after completing at least 10 years of vesting service;
- iv. the Participant's attainment of age 55 after completing at least 15 years of vesting service; or

- v. the Participant's completing at least 30 years of vesting service.

For purposes of (ii), (iii), (iv) or (v) above, the Plan Administrator shall determine the Participant's "years of vesting service" by reference to the applicable terms under RIP in existence as of the date the Participant first commenced participation under this Plan.

Notwithstanding the foregoing provisions of this Section 5.2(d)(1), in no event shall any benefit payable to a Participant under Section 3.2(a) (and, if applicable, adjusted under Section 3.4) commence earlier than the first day of the month coincident with or next following a date that is at least six months after the Participant's Separation from Service, except in the event of the Participant's death, in which case any benefit payable to the Participant's Beneficiary shall commence as of the applicable date specified in Section 3.3(a).

2. **PEP Benefit.** Any benefit determined under Section 3.2(b) that becomes payable to the Participant following Separation from Service shall be paid on the first day of the month that is at least six months after the Participant's Separation from Service. Notwithstanding the foregoing, in the event of the Participant's death, any benefit payable to the Participant's Beneficiary will be paid as soon as administratively feasible after the date of the Participant's death.

3. **Certain Choice Participant Benefits.** Any benefits that become payable to a Choice Participant following Separation from Service shall be paid on the first day of the month that is at least six months after the Participant's Separation from Service. Notwithstanding the foregoing, in the event of the Participant's death, any benefit payable to the Participant's Beneficiary will be paid as soon as administratively feasible after the date of the Participant's death.

5.3 Automatic Lump Sum Distributions.

Notwithstanding any provision of the Plan to the contrary:

a. **Certain Distributions on or After January 1, 2005, But Prior to January 1, 2009.** Effective as of January 1, 2005, but prior to January 1, 2009, if the actuarial equivalent present value of an individual's benefit amounts payable under this Plan (as determined in accordance with the applicable actuarial assumptions in effect under RIP as of the individual's Benefit Determination Date) is less than or equal to \$10,000, the individual's benefit amounts under the Plan shall be distributed in a single sum amount as soon as administratively feasible on or after such Benefit Determination Date.

b. **Certain Distributions on or After January 1, 2009.** Effective January 1, 2009, if the sum of (i) the actuarial equivalent present value of an individual's benefit amounts payable under this Plan (as determined in accordance with the applicable actuarial assumptions in effect under RIP as of the individual's Benefit Determination Date) and (ii) the interest, if any, credited on such amounts through the individual's Benefit Payment Date (as determined in accordance with the applicable provisions of Section 5.2(c)) is less than or equal to the dollar

limitation under Section 402(g)(1)(B) of the Code in effect for the calendar year in which the individual's Benefit Payment Date occurs, the individual's benefit amounts under the Plan shall be distributed in a single sum amount equal to the sum of (i) and (ii) above as soon as administratively feasible on or after such Benefit Payment Date.

5.4 Withholding.

All distributions will be subject to all applicable tax and withholding requirements.

5.5 Ban on Acceleration of Benefits.

Neither the time nor the schedule of any payment under the Plan may be accelerated except as permitted in regulations or other guidance issued by the Internal Revenue Service or the Department of the Treasury and as incorporated herein.

ARTICLE VI ADMINISTRATION OF THE PLAN

6.1 General Powers and Duties.

The following list of powers and duties is not intended to be exhaustive, and the Plan Administrator shall, in addition, exercise such other powers and perform such other duties as he may deem advisable in the administration of the Plan, unless such powers or duties are expressly assigned to another pursuant to the provisions of the Plan.

6.2 General.

The Plan Administrator shall perform the duties and exercise the powers and discretion given to him in the Plan document and by applicable law and his decisions and actions shall be final and conclusive as to all persons affected thereby. The Company and the Adopting Affiliates shall furnish the Plan Administrator with all data and information that the Plan Administrator may reasonably require in order to perform his functions. The Plan Administrator may rely without question upon any such data or information.

a. Disputes. Any and all disputes that may arise involving Participants or beneficiaries shall be referred to the Plan Administrator and his decision shall be final. Furthermore, if any question arises as to the meaning, interpretation or application of any provisions of the Plan, the decision of the Plan Administrator shall be final.

b. Agents. The Plan Administrator may engage agents, including recordkeepers, to assist him and he may engage legal counsel who may be counsel for the Company. The Plan Administrator shall not be responsible for any action taken or omitted to be taken on the advice of such counsel, including written opinions or certificates of any agent, counsel, actuary or physician.

c. Insurance. At the Director's request, the Company shall purchase liability insurance to cover the Director in his activities as the Plan Administrator.

d. Allocations. The Plan Administrator is given specific authority to allocate responsibilities to others and to revoke such allocations. When the Plan Administrator has allocated authority pursuant to this paragraph, the Plan Administrator is not to be liable for the acts or omissions of the party to whom such responsibility has been allocated.

e. Records. The Plan Administrator shall supervise the establishment and maintenance of records by his agents, the Company and each Adopting Affiliate containing all relevant data pertaining to any person affected hereby and his or her rights under the Plan.

f. Interpretations. The Plan Administrator, in his sole discretion, shall interpret and construe the provisions of the Plan (and any underlying documents or policies).

g. Electronic Administration. The Plan Administrator shall have the authority to employ alternative means (including, but not limited to, electronic, internet, intranet, voice response or telephonic) by which Participants may submit elections, directions and forms required for participation in, and the administration of, the Plan. If the Plan Administrator chooses to use these alternative means, any elections, directions or forms submitted in accordance with the rules and procedures promulgated by the Plan Administrator will be deemed to satisfy any provision of the Plan calling for the submission of a written election, direction or form.

h. Delegation. The Plan Administrator may delegate his authority hereunder, in whole or in part, in his sole and absolute discretion.

6.3 Claims Procedures.

Benefit claims under the Plan shall be resolved in accordance with Code Section 409A and uniform and nondiscriminatory procedures adopted by the Plan Administrator in accordance with Section 503 of ERISA.

ARTICLE VII AMENDMENT

7.1 Amendment.

The Company reserves the right at any time to amend, modify or suspend any or all of the provisions of this Plan, in whole or in part, at any time as designated by a written instrument duly adopted on behalf of the Company.

7.2 Effect of Amendment.

Any amendment of the Plan shall not directly or indirectly reduce the benefits previously accrued by the Participant.

7.3 Termination. The Company expressly reserves the right to terminate the Plan.

a. **General.** In the event of termination, the Company shall specify whether termination will change the time at which distributions are made; provided that any acceleration of a distribution is consistent with Section 409A of the Code. In the absence of such specification, the timing of distributions shall be unaffected by termination.

b. **GSCS Termination.** Pursuant to the Company's authority to terminate the Plan, the Plan is irrevocably terminated with respect to all GSCS Participants upon the GSCS Closing Date and no GSCS Participant shall accrue any benefits under the Plan for any purpose after the GSCS Closing Date. Pursuant to termination of the Plan with respect to GSCS Participants pursuant to this Section 7.3(b), the present value of each GSCS Participant's benefit amounts payable under the Plan shall be distributed to the GSCS Participant in a single sum amount as soon as practicable after the GSCS Closing Date, but in no event later than December 31 next following the GSCS Closing Date. Termination of the Plan with respect to GSCS Participants will change the time at which distributions are made to GSCS Participants. Payments to GSCS Participants pursuant to this Section 7.3(b) are intended to comply with section 409A of the Code and applicable guidance issued thereunder.

ARTICLE VIII GENERAL PROVISIONS

8.1 Participant's Rights Unsecured.

The Plan at all times shall be entirely unfunded and no provision shall at any time be made with respect to segregating any assets of the Company for payment of any distributions hereunder. The right of a Participant or his or her Beneficiary to receive benefits hereunder shall be an unsecured claim against the general assets of the Company, and neither the Participant nor his Beneficiary shall have any rights in or against any specific assets of the Company. All amounts accrued by Participants hereunder shall constitute general assets of the Company and may be disposed of by the Company at such time and for such purposes as it may deem appropriate. Nothing in this Section shall preclude the Company from establishing a "Rabbi Trust," but the assets in the Rabbi Trust must be available to pay the claims of the Company's general creditors in the event of the Company's insolvency.

8.2 No Guaranty of Benefits.

Nothing contained in the Plan shall constitute a guaranty by the Company or any other person or entity that the assets of the Company will be sufficient to pay any benefit hereunder.

8.3 No Enlargement of Employee Rights.

No Participant shall have any right to receive a distribution from the Plan except in accordance with the terms of the Plan. Participation in the Plan shall not be construed to give any Participant the right to be retained in the service of the Company or an Adopting Affiliate.

8.4 Section 409A Compliance.

The Company intends that the Plan meet the requirements of Section 409A of the Code and the guidance issued thereunder. The Plan shall be administered, construed and interpreted in a manner consistent with that intention.

8.5 Spendthrift Provision.

No interest of any person or entity in, or right to receive a distribution under, the Plan shall be subject in any manner to sale, transfer, assignment, pledge, attachment, garnishment, or other alienation or encumbrance of any kind; nor shall any such interest or right to receive a distribution be taken, either voluntarily or involuntarily, for the satisfaction of the debts of, or other obligations or claims against, such person or entity, including claims in bankruptcy proceedings. This Section shall not preclude arrangements for the withholding of taxes from deferrals, credits, or benefit payments, arrangements for the recovery of benefit overpayments, arrangements for the transfer of benefit rights to another plan, or arrangements for direct deposit of benefit payments to an account in a bank, savings and loan association or credit union (provided that such arrangement is not part of an arrangement constituting an assignment or alienation).

8.6 Domestic Relations Orders.

Notwithstanding any provision of the Plan to the contrary, and to the extent permitted by law, the amounts payable pursuant to the Plan may be assigned or alienated pursuant to a “Domestic Relations Order” (as such term is defined in Section 414(p)(1)(B) of the Code), subject to such uniform rules and procedures as may be adopted by the Plan Administrator from time to time.

8.7 Incapacity of Recipient.

If the Plan Administrator is served with a court order holding that a person entitled to a distribution under the Plan is incapable of personally receiving and giving a valid receipt for such distribution, the Plan Administrator shall postpone payment until such time as a claim therefore shall have been made by a duly appointed guardian or other legal representative of such person. The Plan Administrator is under no obligation to inquire or investigate as to the competency of any person entitled to a distribution. Any payment to an appointed guardian or other legal representative under this Section shall be a payment for the account of the incapacitated person and a complete discharge of any liability of the Company and the Plan therefor.

8.8 Successors.

The Plan shall be binding upon the successors and assigns of the Company and upon the heirs, beneficiaries and personal representatives of the individuals who become Participants hereunder.

8.9 Limitations on Liability.

Notwithstanding any of the preceding provisions of the Plan, neither the Plan Administrator, the Director, or the Company, nor any individual acting as the Plan Administrator's, the Director's, or the Company's employee, agent, or representative shall be liable to any Participant, former Participant, Beneficiary or other person for any claim, loss, liability or expense incurred in connection with the Plan.

8.10 Overpayments.

If it is determined that the benefits under the Plan should not have been paid or should have been paid in a lesser amount, written notice thereof shall be given to the recipient of such benefits (or his legal representative) and he shall repay the amount of overpayment to the Company. If he fails to repay such amount of overpayment promptly, the Company shall arrange to recover for the Plan the amount of the overpayment by making an appropriate deduction or deductions from any future benefit payment or payments payable to that person (or his survivor or beneficiary) under the Plan or from any other benefit plan of the Company.

8.11 Plan Frozen.

As a result of the freeze of RIP, participation and benefit accruals are frozen under the Plan. This Section 8.11 provides clarification regarding the freeze of the Plan.

a. Participation Frozen. The Plan is frozen to (1) all employees hired after November 30, 2010 and (2) all employees rehired after December 31, 2010. Any employee hired or rehired after the applicable date in the preceding sentence shall not be eligible for the Plan and, in the case of a rehire, shall accrue no additional benefits under the Plan for any period of employment after such date. Similarly, the Plan is frozen to all individuals hired or rehired by the Company or any Affiliate thereof prior to the applicable date in the first sentence who, as of such date, were not Participants in the Plan and therefore such individuals will never become eligible to participate in the Plan.

b. Benefits Frozen – Non-Sunset Participants. Effective January 1, 2011, the Plan is frozen with respect to any Participant who is not classified as a Sunset Participant on December 31, 2010. Any Participant who was not a Sunset Participant on December 31, 2010 shall no longer accrue any additional benefits under the Plan for periods of employment on or after January 1, 2011.

c. Benefits Frozen – Sunset Participants.

1. The Plan is frozen with respect to any Participant who is a Sunset Participant on December 31, 2010, but who later loses his status as a Sunset Participant, on the date such Participant loses status as a Sunset Participant.

2. Effective January 1, 2020, the Plan is frozen for all employees including by way of example but not limitation, Sunset Participants.

d. Plan Completely Frozen – January 1, 2020. For avoidance of doubt, no individual shall: (1) become a new Participant in the Plan after November 30, 2010 regardless of hire date or transfer date; and (2) accrue any benefits under the Plan for any period of employment on or after January 1, 2020.

e. No Reallocation of Benefits. For avoidance of doubt, effective as of January 1, 2020, no benefit payments shall be reallocated from the Plan to RIP, or from RIP to the Plan, by virtue of any changes to the applicable limitations under Sections 401(a)(17) and 415 of the Code or otherwise.

f. Vesting Service Continues. For avoidance of doubt, a Participant shall continue to receive vesting service for any period of employment on or after the applicable freeze date referenced in this Section 8.11 for purposes of determining his or her vesting under Section 4.1 and his or her eligibility to commence benefits under Section 5.2(d).

8.12 Special Rules for Participants With Same-Sex Domestic Partners.

a. Generally. Effective January 1, 2013, except as specified under this Section 8.12 or as prohibited by applicable law, to the extent the Plan provides for any benefit, right, feature, restriction, or obligation relating to, or upon, a Participant's "spouse", "Beneficiary", "survivor", or "surviving spouse" (or any individual having a similar relationship to the Participant), the Plan Administrator shall also apply such benefit, right, feature, restriction, or obligation to a Participant's "same-sex domestic partner" (as defined in (b) below) in a uniform and non-discriminatory manner that is similar to how an opposite-gender spouse would be treated under the Plan.

b. Definition of "Same-Sex Domestic Partner". For purposes of this Section 8.12, the term "same-sex domestic partner" means the sole, same-sex person who is in a civil union, domestic partnership, or legal relationship similar thereto, with the Participant as recognized under the laws of the federal government or a state government of the United States of America, including its territories and possessions and the District of Columbia (or, with respect to any other country, legally recognized by the equivalent government(s) thereof). The Plan shall continue to treat such relationship as a same-sex domestic partnership, regardless of whether the Participant and his same-sex domestic partner remain in the jurisdiction where the relationship was legally entered into. In the event more than one person meets this definition for a given Participant, then the "same-sex domestic partner" shall be the person who first met the criteria in this definition. Notwithstanding anything herein to the contrary, if a Participant has a spouse recognized for purposes of federal law, no person will qualify as the Participant's same-sex domestic partner unless such Participant's marriage to such spouse is first lawfully dissolved. Except with respect to determining the length of time the same-sex domestic partner has satisfied the definition of same-sex domestic partner under the Plan, a Participant shall be considered to have a same-sex domestic partner only with respect to periods beginning on or after January 1, 2013, regardless of when such same-sex partnership was created.

c. Exceptions.

1. **Determination of Status as a “married Participant”**. For purposes of Section 5.2(c)(1), a Participant shall be considered a “married Participant” only if the Participant has a spouse recognized for purposes of federal law. For avoidance of doubt, a Participant with a same-sex domestic partner is considered to be an “unmarried Participant” and is not required to obtain the same-sex domestic partner’s consent for the election of any form of payment provided under the Plan, and the normal form of benefit for purposes of Section 5.2(c)(1) for any such Participant shall be a single life annuity for the Participant’s life.

2. **Determination of Unforeseeable Emergency**. Only a spouse recognized for purposes of federal law shall be considered a “spouse” for purposes of applying the definition of “Unforeseeable Emergency” in Section 1.1(cc).

3. **Domestic Relations Orders**. Only a spouse recognized for purposes of federal law or another “alternate payee” (as defined under Section 414(p) of the Code) may enforce a domestic relations order against the Plan or a Participant’s interests hereunder pursuant to Section 8.6.

8.13 Determination of “spouse”.

The term “spouse” means the person who is the Participant’s spouse for federal tax purposes.

SECTION 302 CERTIFICATION

I, D. James Umpleby III, certify that:

1. I have reviewed this annual report on Form 10-K of Caterpillar Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a) all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION PURSUANT TO
18 U.S.C. SECTION 1350
AS ADOPTED PURSUANT TO
SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the annual report of Caterpillar Inc. (the “Company”) on Form 10-K for the period ending December 31, 2020 as filed with the Securities and Exchange Commission on the date hereof (the “Report”), the undersigned hereby certify pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that to the best of our knowledge:

- (1) The Report fully complies with the requirements of section 13(a) or 15(d) of the Securities and Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the Company.

COLLABORATING DURING THE PANDEMIC

Innovation has been a Caterpillar hallmark since our founding. So it's no surprise that throughout the COVID-19 pandemic, innovative thinking and ingenuity have helped Caterpillar and our employees, dealers and customers continue to do essential work and support communities. Here are a few ways that Caterpillar and our dealers have delivered equipment, services and support during this extraordinary time.

MOBILE POWER

Dealer Al-Bahar mobilized to deliver rental power generators for drive-through testing centers, quarantine facilities and field clinics in the United Arab Emirates and Kuwait. In Italy, dealer CGT S.p.A. donated rental generator sets for backup power at a field hospital in the Bergamo Province.

HEALTHCARE CAPACITY

The Lei Shing Hong Machinery Engine Division donated four Perkins-powered generator sets to help construct a new hospital for COVID-19 patients in Wuhan, China. In New York City, tugboats powered by Cat® 3516E Tier 4 engines guided the USNS Comfort hospital ship into the city's harbor.

CUSTOMER CARE

Throughout the pandemic, our focus has been on helping our customers work with minimal disruption so they can focus on running successful businesses. The Cat Financial Customer Care Program offered payment relief that has allowed customers to stay afloat and retain employees.

COMMUNITY SUPPORT

The Caterpillar Foundation committed \$10 million to support global communities affected by the virus. This investment has supported crisis-relief nonprofits, medical facilities, food banks and STEM education programs.

Dividend Aristocrat Status

CHAIRMAN & CEO MESSAGE

“

We remain committed to our strategy for long-term profitable growth, which is yielding strong results, and to living our Values in Action.

”

DEAR FELLOW SHAREHOLDERS,

Throughout 2021, Caterpillar’s dedicated global team achieved strong results in a challenging and dynamic operating environment. They worked to meet strong customer demand while remaining focused on executing our strategy for long-term profitable growth.

We delivered 2021 adjusted operating profit margin and Machinery, Energy & Transportation (ME&T) free cash flow consistent with the long-term targets we set at our 2019 Investor Day while continuing to invest in expanded offerings and services. Our strong free cash flow enabled us to return \$5 billion to shareholders through dividends and share repurchases. Our team’s safety-first mindset contributed to achieving our best year on record for employee safety for the third year in a row.

We continued our status as a Dividend Aristocrat, marking the 28th consecutive year we have paid a higher annual dividend.

EXECUTING OUR ENTERPRISE STRATEGY

Our strategy has served us well since its launch in 2017, as demonstrated by our continued strong results.

In 2021, services sales grew 17% to \$19 billion over 2020, benefitting from investments in our digital capabilities and expanded commercial offerings. In collaboration with our dealers, we are working closely with customers to help them reduce total owning and operating costs. We are leveraging data and analytics from our more than 1.2 million connected assets to proactively provide customers with insights and tools to manage their fleets and operations for increased productivity.

CONTRIBUTING TO A BETTER, MORE SUSTAINABLE WORLD

Caterpillar supports global efforts to mitigate climate change, and sustainability is an important element of our long-term strategy for profitable growth. We believe the energy transition represents an opportunity for Caterpillar to create shareholder value while contributing to a reduced-carbon future. In 2021, Caterpillar and our customers announced a number of projects to contribute to that lower-carbon future. A few are highlighted on page 6 of this report. Our 2021 Sustainability Report provides a more detailed look at our accomplishments.

We responded to needs worldwide through the Caterpillar Foundation – including a record number of natural disasters, continued COVID-19 assistance and an increase in the number of communities receiving contributions. This includes support for both urgent and long-term needs of humanitarian crises.

We amplified our commitment to diversity and inclusion with our first Diversity and Inclusion Report and first-ever Diversity & Inclusion Conference. We value diverse perspectives and strive to ensure our global team reflects the many communities and customers we serve around the world.

We remain committed to our strategy for long-term profitable growth, which is yielding strong results, and to living our Values in Action. We are excited about the tremendous opportunities ahead as our dedicated employees provide the solutions that help our customers build a better, more sustainable world.

Jim Umpleby
Chairman and CEO

EXECUTING OUR STRATEGY

In 2021, we continued to execute our strategy for long-term profitable growth while striving to meet strong customer demand. The three core elements of the strategy remain: services, expanded offerings and operational excellence. We invested in services and digital technologies, as well as electrification, autonomous and alternative fuel product capabilities, despite the challenging environment while meeting Investor Day targets.

SERVICES SALES REACH A NEW HIGH

Ensuring an easy-to-buy, easy-to-own customer experience through eCommerce, Customer Value Agreements, repair options and rebuilds drove year-over-year double-digit services sales growth in 2021. Leveraging dealer data and telematics data from our more than 1.2 million connected assets, we generate insights by using advanced analytics and machine learning to deliver value-added services that help our customers improve safety, minimize unplanned downtime and maximize productivity. These significant achievements position us to realize our aspirational goal of doubling services sales to \$28 billion by 2026.

INVESTOR DAY TARGETS: COMMITTED AND ACHIEVED

In 2021, we met our target for adjusted operating profit margin. We also met our target for free cash flow for Machinery, Energy and Transportation (ME&T). Our 2021 adjusted operating profit margin of 13.7% was achieved while investing in new product launches, services and sustainability. Meanwhile, ME&T generated \$6 billion in free cash flow, in line with our targets.

SUPPORT FOR CUSTOMERS' ENERGY TRANSITION

Customers around the world are looking to lower their carbon footprint, and Caterpillar is providing the products, technologies and services to help them achieve their climate-related objectives. In 2021, we shared several announcements that further demonstrate our commitment to supporting our customers' sustainability goals. These announcements include a collaboration to fully power a customer's mine with an all-electric fleet of machines for a zero-emission site, key collaboration agreements to explore hydrogen fuel cell backup power for data centers, and hydrogen fuel cell power for line-haul locomotives. We also announced a collaboration with a data center customer to provide stand-by power utilizing engines capable of running on 100% hydrotreated vegetable oil (HVO) renewable fuel and any blend level with diesel.

LEVERAGING LEAN AND CUTTING-EDGE TECHNOLOGY TO TRANSFORM PARTS DISTRIBUTION

Caterpillar has continued to invest in modernizing our parts distribution network, implementing automated and autonomous solutions that work together to densify our existing footprint and form state-of-the-art, efficient ecosystems within our distribution centers across the globe. By utilizing Lean principles, deploying sustainable solutions and investing in technology, we are enhancing safety and enabling a streamlined distribution model to support customers and profitable services growth.

AN IMPRESSIVE AUTONOMY MILESTONE

Autonomous technology continues to revolutionize mining by delivering new productivity levels for customers and enhancing safety. In 2021, we surpassed 500 autonomous trucks using Cat Command in operation at 18 sites on three continents. With more than 4 billion tonnes of material moved with no injuries, there is no doubt about the efficacy of this technology. We're not stopping there, as we scale this technology in construction, quarry and aggregates, and beyond to support customer safety and productivity goals.

OUR SAFEST YEAR ON RECORD

We relentlessly strive to ensure our workforce returns home safely every day, and 2021 marked the third consecutive year that we achieved our best safety performance on record. This record underscores a deeply ingrained safety culture where every individual is accountable for their safety and those around them.

HELPING OUR CUSTOMERS ACHIEVE THEIR CLIMATE-RELATED GOALS

Sustainability is an important part of Caterpillar's history and integral to our future. It is one of our five Values in Action and a critical element of our strategy for long-term profitable growth.

Our longstanding commitment to sustainability inspires us to improve the quality of the environment and the communities where we live and work. We provide products and services that help our customers fulfill society's basic needs – such as shelter, clean water, sanitation, food and reliable power – in a sustainable way.

2021 HIGHLIGHTS

Our actions reflect our commitment to further reducing Caterpillar's greenhouse gas emissions while helping our customers meet their climate-related objectives.

- Launched seven 2030 sustainability goals
- Appointed our first Chief Sustainability & Strategy Officer
- Announced environmental, social and governance (ESG) performance will be incorporated into the 2022 incentive plan for executives
- Committed to utilize the Task Force on Climate-Related Financial Disclosures (TCFD) framework to further enhance our sustainability reporting beginning in 2023

To learn more about our sustainability journey and 2021 progress, read our Sustainability Report on caterpillar.com/sustainability.

ENERGY, FUEL ECONOMY & EMISSIONS

We are committed to a reduced-carbon future. We demonstrate this in many ways, including our significant progress in reducing greenhouse gas (GHG) emissions from our operations and our continued investment in new products, technologies and services to help our customers achieve climate-related objectives.

REMANUFACTURING

Remanufacturing and rebuild options deliver multiple sustainability benefits and help Caterpillar contribute to the circular economy. Through these activities, we recycle millions of pounds of end-of-life products annually. Because we are in the business of returning end-of-life components to like-new condition, we reduce waste and minimize the need for raw material, energy and water associated with producing new parts.

MATERIAL PROCUREMENT

As the world's leading manufacturer of construction and mining equipment, off-highway diesel and natural gas engines, industrial gas turbines and diesel-electric locomotives, Caterpillar responsibly sources the raw materials used to build our products.

PEOPLE

We strive to create an environment where our employees can reach their full potential. Our values-driven culture reflects our commitment to the health, safety, integrity, excellence, teamwork and inclusivity of the diverse backgrounds and experiences of our employees. Our values unite us across cultural, language, geographic and business boundaries, making us a stronger team. We invite you to learn more about our progress by visiting caterpillar.com/diversity.

PHILANTHROPY

In 2021, the Caterpillar Foundation invested more than \$41 million in helping improve the lives of people in more than 40 countries around the world. Together with the help of Foundation partners, we impacted the lives of more than 3 million people, restored 530,000 acres and removed, sequestered or captured more than 2.5 million short tons of carbon.

2030 SUSTAINABILITY GOALS

Operations Energy & Emissions ^{1,2}

We have set a science-based Scope 1 and 2 goal to reduce absolute greenhouse gas emissions from our operations by **30%** from 2018 to 2030.

Operations Water ²

Implement water management strategies at **100%** of facilities located in water high-risk areas by 2030.

Operations Waste ²

Reduce landfill intensity by **50%** from 2018 to 2030.

Customer Safety

Provide leadership in the safety of people who work in, on and around our products.

Product Emissions & Energy Efficiency ^{1,2}

100% of Caterpillar's new products through 2030 will be more sustainable than the previous generation through collaborating with customers, reduced waste, improved design for rebuild/remanufacturing, lower emissions or improved efficiency.

Remanufacturing ^{1,2}

Increase sales and revenues from remanufacturing offerings by **25%** from 2018 to 2030.

Employee Health & Safety ¹

We aspire to prevent all injuries and will further our industry-leading safety results by reducing Recordable Injury Frequency (RIF) by **50%** from 2018 to 2030.

¹ Sustainability Accounting Standards Board Topic ² Climate- and Environmental-related Goal

END-MARKET HIGHLIGHTS

CONSTRUCTION INDUSTRIES

Highlights and Market Dynamics

- Double-digit growth across all regions in 2021
- Strong demand from residential construction in North America
- Growing infrastructure spending in key regions
- Investment continued in expanded offerings to deliver differentiated customer solutions such as our XE, GC and GX models
- Growth in services driven by customer-focused solutions such as Customer Value Agreements, Prioritized Service Events and customized repair and rebuild offerings
- Expansion of Cat Command technologies to hydraulic excavators and medium dozers, providing customers with enhanced safety and greater productivity by allowing operators to quickly and easily switch between machines

Revenue

\$22.1B*

Operating Profit

\$3.7B

RESOURCE INDUSTRIES

Highlights and Market Dynamics

- Double-digit growth across all regions in 2021
- Strong commodity pricing and the average fleet age drove mining demand
- Strong demand in heavy construction and quarry and aggregates
- Collaboration agreements signed with customers to support their sustainability objectives; including zero-exhaust emissions machines enabled by key technologies such as electrification and automation
- Deployment of the world's first fully autonomous water truck
- Growth in services through solutions such as Caterpillar Mining Performance Solutions (MPS), which uses data to drive performance gain

Revenue

\$10.0B*

Operating Profit

\$1.3B

ENERGY & TRANSPORTATION

Highlights and Market Dynamics

- Demand increased across all applications, including double-digit growth in Industrial and Oil & Gas
- Services growth continued to be a focus, including the strategic acquisition of Weir Oil & Gas
- Availability of designed-to-order generator sets capable of operating 100% on hydrogen
- Acquisition of CarbonPoint Solutions, which added carbon capture capability to our oil & gas and electric power solutions
- Key collaboration agreements announced with Microsoft and Ballard to explore hydrogen fuel cell backup power for data centers and with Chevron and BNSF to explore hydrogen fuel cell power for line-haul locomotives

Revenue

\$20.3B*

Operating Profit

\$2.8B

PART I

ITEM 1. Business.

General

Originally organized as Caterpillar Tractor Co. in 1925 in the State of California, our company was reorganized as Caterpillar Inc. in 1986 in the State of Delaware. As used herein, the term “Caterpillar,” “we,” “us,” “our” or “the company” refers to Caterpillar Inc. and its subsidiaries unless designated or identified otherwise.

Overview

With 2021 sales and revenues of \$50.971 billion, Caterpillar is the world’s leading manufacturer of construction and mining equipment, off-highway diesel and natural gas engines, industrial gas turbines and diesel-electric locomotives. The company principally operates through its three primary segments - Construction Industries, Resource Industries and Energy & Transportation - and also provides financing and related services through its Financial Products segment. Caterpillar is also a leading U.S. exporter. Through a global network of independent dealers and direct sales of certain products, Caterpillar builds long-term relationships with customers around the world.

Currently, we have five operating segments, of which four are reportable segments and are described below.

Categories of Business Organization

1. **Machinery, Energy & Transportation** – Caterpillar Inc. and its subsidiaries, excluding Financial Products. Machinery, Energy & Transportation information relates to the design, manufacturing and marketing of our products.
2. **Financial Products** – Our finance and insurance subsidiaries, primarily Caterpillar Financial Services Corporation (Cat Financial) and Caterpillar Insurance Holdings Inc. (Insurance Services). Financial Products information relates to the financing to customers and dealers for the purchase and lease of Caterpillar and other equipment.

Other information about our operations in 2021, including certain risks associated with our operations, is included in Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

The Construction Industries product portfolio includes the following machines and related parts and work tools:

- asphalt pavers
- backhoe loaders
- compactors
- cold planers
- compact track and multi-terrain loaders
- mini, small, medium and large excavators
- forestry excavators
- motorgraders
- pipelayers
- road reclaimers
- site prep tractors
- skid steer loaders
- telehandlers
- small and medium track-type tractors
- track-type loaders
- wheel excavators
- compact, small and medium wheel loaders
- utility vehicles

Construction Industries

Our Construction Industries segment is primarily responsible for supporting customers using machinery in infrastructure, forestry and building construction. The majority of machine sales in this segment are made in the heavy and general construction, rental, quarry and aggregates markets and mining.

The nature of customer demand for construction machinery varies around the world. Customers in developing economies often prioritize purchase price in making their investment decisions, while customers in developed economies generally weigh productivity and other performance criteria that contribute to lower owning and operating costs over the lifetime of the machine. To meet customer expectations in developing economies, Caterpillar developed differentiated product offerings that target customers in those markets, including our SEM brand machines. We believe that these customer-driven product innovations enable us to compete more effectively in developing economies. The majority of Construction Industries’ research and development spending in 2021 focused on the next generation of construction machines.

The competitive environment for construction machinery is characterized by some global competitors and many regional and specialized local competitors. Examples of global competitors include CASE (part of CNH Industrial N.V.), Deere Construction & Forestry (part of Deere & Company), Doosan Infracore Co., Ltd., Hitachi Construction Machinery Co., Ltd., Hyundai Construction Equipment Co., Ltd., Hyundai Doosan Infracore Co., Ltd. and Hyundai Construction Equipment Co., Ltd. (both part of Hyundai Heavy Industries Holdings Co.), J.C. Bamford Excavators Ltd., Kobelco Construction Machinery (part of Kobe Steel, Ltd), Komatsu Ltd., Kubota Farm & Industrial Machinery (part of Kubota Corporation), and Volvo Construction Equipment (part of the Volvo Group). As an example of regional and local competitors, our competitors in China also include Guangxi LiuGong Machinery Co., Ltd., Longking Holdings Ltd., Sany Heavy Industry Co., Ltd., XCMG Construction Machinery Co., Ltd., Shandong Lingong Construction Machinery Co., Ltd. (SDLG, part of the Volvo Group) and Shantui Construction Machinery Co., Ltd., (part of Shandong Heavy Industry Group Co.). Each of these companies has varying product lines that compete with Caterpillar products, and each has varying degrees of regional focus.

Resource Industries

The Resource Industries segment is primarily responsible for supporting customers using machinery in mining and heavy construction and quarry and aggregates. Caterpillar offers a broad product range and services to deliver comprehensive solutions for our customers. We develop and manufacture high productivity equipment for both surface and underground mining operations around the world, as well as provide drivetrains, hydraulic systems, electronics and software for Caterpillar machines and engines. Our equipment is used to extract and haul copper, iron ore, coal, oil sands, aggregates, gold and other minerals and ores, as well as a variety of heavy construction applications. In addition to equipment, Resource Industries also develops and sells technology products and services to provide customers fleet management systems, equipment management analytics and autonomous machine capabilities.

Customers in most markets place an emphasis on equipment that is highly productive, reliable and provides the lowest total cost

The Resource Industries product portfolio includes the following machines and related parts and services

- electric rope shovels
- draglines
- hydraulic shovels
- rotary drills
- hard rock vehicles
- large track-type tractors
- large mining trucks
- longwall miners
- large wheel loaders
- off-highway trucks
- articulated trucks
- wheel tractor scrapers
- wheel dozers
- fleet management
- landfill compactors
- soil compactors
- machinery components
- autonomous ready vehicles and solutions
- select work tools
- safety services and mining performance solutions

Energy & Transportation

Our Energy & Transportation segment supports customers in oil and gas, power generation, marine, rail and industrial applications, including Caterpillar machines. The product and services portfolio includes reciprocating engines, generator sets, integrated systems and solutions, turbines and turbine-related services, the remanufacturing of Caterpillar engines and components and remanufacturing services for other companies, diesel-electric locomotives and other rail-related products and services and product support of on-highway vocational trucks for North America.

Regulatory emissions standards require us to continue to make investments as new products and new regulations are introduced. Ongoing compliance with these regulations remains a focus. Emissions compliance in developing markets is complex due to rapidly evolving and unique requirements where enforcement processes can often vary. We employ robust product development, manufacturing processes and testing to help us comply with these regulations.

The competitive environment for reciprocating engines in marine, oil and gas, industrial and electric power generation systems along with turbines in oil and gas and electric power generation consists of a few larger global competitors that compete in a variety of markets that Caterpillar serves, and a substantial number of smaller companies that compete in a limited-size product range, geographic region and/or application. Principal global competitors include Cummins Inc., Deutz AG, INNIO Jenbacher GmbH, Rolls-Royce Power Systems and Wärtsilä Corp. Other competitors, such as Fiat Industrial SpA (Iveco Group), GE Power, Kawasaki Heavy Industries Energy Solutions & Marine Engineering, MAN Energy Solutions (VW), Mitsubishi Heavy Industries Ltd., Siemens Energy Global GmbH, Volvo Penta AB, Weichai Power Co., Ltd., and other emerging market competitors compete in certain markets in which Caterpillar competes. An additional set of competitors, including Aggreko plc, Baker Hughes Co., Generac Holdings, Kohler Power Systems, and others, are primarily packagers who source engines and/or other components from domestic

of ownership over the life of the equipment. In some developing markets, customers often prioritize purchase price in making their investment decisions. We believe our ability to control the integration and design of key machine components represents a competitive advantage. Our research and development efforts remain focused on providing customers the lowest total cost of ownership enabled through the highest quality, most productive products and services in the industry.

The competitive environment for Resource Industries consists of a few larger global competitors that compete in several of the markets that we serve and a substantial number of smaller companies that compete in a more limited range of products, applications, and regional markets. Our global surface competitors include Deere Construction & Forestry (part of Deere & Company), Epiroc AB, Hitachi Construction Machinery Co., Ltd., Komatsu Ltd., Liebherr-International AG, Sandvik AB, and Volvo Construction Equipment. Our global underground competitors include Epiroc AB, Komatsu Ltd., and Sandvik AB.

and international suppliers and market products regionally and internationally through a variety of distribution channels. In rail-related businesses, our global competitors include Alstom SA, CRRC Corp., LTD., The Greenbrier Companies, Siemens Mobility, Voestalpine AG, Vossloh AG and Wabtec Freight. We also compete with other companies on a more limited range of products, services and/or geographic regions.

The Energy & Transportation portfolio includes the following products and related parts:

- Reciprocating engine powered generator sets
- Reciprocating engines and integrated systems and solutions supplied to the industrial industry as well as Caterpillar machinery
- Integrated systems and solutions used in the electric power generation industry
- Turbines, centrifugal gas compressors and related services
- Reciprocating engines and integrated systems and solutions for the marine and oil and gas industries
- Remanufactured reciprocating engines and components
- Diesel-electric locomotives and components and other rail-related products and services

Financial Products Segment

The business of our Financial Products Segment is primarily conducted by Cat Financial, Insurance Services and their respective subsidiaries and affiliates. Cat Financial is a wholly owned finance subsidiary of Caterpillar Inc. and it provides retail and wholesale financing to customers and dealers around the world for Caterpillar products and services, as well as financing for vehicles, power generation facilities and marine vessels that, in most cases, incorporate Caterpillar products. Retail financing is primarily comprised of installment sale contracts and other equipment-related loans, working capital loans, finance leases and operating leases. Wholesale financing to Caterpillar dealers consists primarily of inventory and rental fleet financing. In addition, Cat Financial purchases short-term wholesale

trade receivables from Caterpillar. The various financing plans offered by Cat Financial are designed to support sales of Caterpillar products and services and generate financing income for Cat Financial. A significant portion of our activity is conducted in North America and we have additional offices and subsidiaries in Latin America, Asia/Pacific, Europe, Africa and the Middle East.

For over 40 years, Cat Financial has been providing financing for Caterpillar products, contributing to our knowledge of asset values, industry trends, financing structures and customer needs.

In certain instances, Cat Financial's operations are subject to supervision and regulation by state, federal and various foreign governmental authorities, and may be subject to various laws and judicial and administrative decisions imposing various requirements and restrictions which, among other things, (i) regulate credit granting activities and the administration of loans, (ii) establish maximum interest rates, finance charges and other charges, (iii) require disclosures to customers, (iv) govern secured transactions, (v) set collection, foreclosure, repossession and other trade practices and (vi) regulate the use and reporting of information related to a borrower's credit experience. Cat Financial's ability to comply with these and other governmental and legal requirements and restrictions affects its operations.

Cat Financial's retail loans (totaling 48 percent*) include:

- Loans that allow customers and dealers to use their Caterpillar equipment or other assets as collateral to obtain financing.
- Installment sale contracts, which are equipment loans that enable customers to purchase equipment with a down payment or trade-in and structure payments over time.

Cat Financial's retail leases (totaling 36 percent*) include:

- Finance (non-tax) leases, where the lessee for tax purposes is considered to be the owner of the equipment during the term of the lease, that either require or allow the customer to purchase the equipment for a fixed price at the end of the term.
- Tax leases that are classified as either operating or finance leases for financial accounting purposes, depending on the characteristics of the lease. For tax purposes, we are considered the owner of the equipment.
- Governmental lease-purchase plans in the U.S. that offer low interest rates and flexible terms to qualified non-federal government agencies.

Cat Financial also purchases short-term receivables from Caterpillar (15 percent*).

Cat Financial's wholesale loans and leases (1 percent*) include inventory/rental programs, which provide assistance to dealers by financing their new Caterpillar inventory and rental fleets.

Cat Financial operates in a highly competitive environment, with financing for users of Caterpillar equipment and services available through a variety of sources, principally commercial banks and finance and leasing companies. Our competitors include Wells Fargo Equipment Finance Inc., Banc of America Leasing & Capital LLC, BNP Paribas Leasing Solutions Limited, Australia and New Zealand Banking Group Limited, Société Générale S.A. and various other banks and finance companies. In addition, many of the manufacturers that compete with Caterpillar also own financial subsidiaries, such as John Deere Capital Corporation, Komatsu Financial L.P., Volvo Financial Services and Kubota Credit Corporation, which utilize many below-market interest

rate programs (funded by the manufacturer) to support machine sales. We and Caterpillar work together to provide a broad array of financial merchandising programs to compete around the world.

Cat Financial's financial results are largely dependent upon the ability of Caterpillar dealers to sell equipment and customers' willingness to enter into financing or leasing agreements. Cat Financial is also affected by, among other things, the availability of funds from its financing sources, its cost of funds relative to its competitors and general economic conditions such as inflation and market interest rates.

Cat Financial has a match-funding policy that addresses interest rate risk by aligning the interest rate profile (fixed or floating rate and duration) of its debt portfolio with the interest rate profile of its receivables portfolio within predetermined ranges on an ongoing basis. In connection with that policy, Cat Financial uses interest rate derivative instruments to modify the debt structure to match assets within the receivables portfolio. This matched funding reduces the volatility of margins between interest-bearing assets and interest-bearing liabilities, regardless of which direction interest rates move. For more information regarding match funding, please see Note 4 — "Derivative financial instruments and risk management" of Part II, Item 8 "Financial Statements and Supplementary Data." See also the risk factors associated with our financial products business included in Item 1 A. of this Form 10-K.

In managing foreign currency risk for Cat Financial's operations, the objective is to minimize earnings volatility resulting from conversion and the remeasurement of net foreign currency balance sheet positions, and future transactions denominated in foreign currencies. This policy allows the use of foreign currency forward, option and cross currency contracts to offset the risk of currency mismatch between the assets and liabilities, and exchange rate risk associated with future transactions denominated in foreign currencies.

Cat Financial provides financing only when certain criteria are met. Credit decisions are based on a variety of credit quality factors including prior payment experience, customer financial information, credit ratings, loan-to-value ratios and other internal metrics. Cat Financial typically maintains a security interest in retail-financed equipment and requires physical damage insurance coverage on financed equipment. Cat Financial finances a significant portion of Caterpillar dealers' sales and inventory of Caterpillar equipment throughout the world. Cat Financial's competitive position is improved by marketing programs offered in conjunction with Caterpillar and/or Caterpillar dealers. Under these programs, Caterpillar, or the dealer, funds an amount at the outset of the transaction, which Cat Financial then recognizes as revenue over the term of the financing. We believe that these marketing programs provide Cat Financial a significant competitive advantage in financing Caterpillar products.

Caterpillar Insurance Company, a wholly owned subsidiary of Caterpillar Insurance Holdings Inc., is a U.S. insurance company domiciled in Missouri and primarily regulated by the Missouri Department of Insurance. Caterpillar Insurance Company is licensed to conduct property and casualty insurance business in 50 states, the District of Columbia and Guam, and as such, is also regulated in those jurisdictions. The State of Missouri acts as the lead regulatory authority and monitors Caterpillar Insurance Company's financial status to ensure that it is in compliance with minimum solvency requirements, as well as other financial ratios prescribed by the National Association of Insurance Commissioners. Caterpillar Insurance Company is also licensed to conduct insurance business

* Indicates the percentage of Cat Financial's total portfolio at December 31, 2021. We define total portfolio as total finance receivables (net of unearned income and allowance for credit losses) plus equipment on operating leases, less accumulated depreciation. For more information on the above and Cat Financial's concentration of credit risk, please refer to Note 7 — "Cat Financial Financing Activities" of Part II, Item 8 "Financial Statements and Supplementary Data."

through a branch in Zurich, Switzerland and, as such, is regulated by the Swiss Financial Market Supervisory Authority.

Caterpillar Life Insurance Company, a wholly owned subsidiary of Caterpillar, is a U.S. insurance company domiciled in Missouri and primarily regulated by the Missouri Department of Insurance. Caterpillar Life Insurance Company is licensed to conduct life and accident and health insurance business in 26 states and the District of Columbia and, as such, is also regulated in those jurisdictions. The State of Missouri acts as the lead regulatory authority and it monitors the financial status to ensure that it is in compliance with minimum solvency requirements, as well as other financial ratios prescribed by the National Association of Insurance Commissioners. Caterpillar Life Insurance Company provides reinsurance coverage to Caterpillar Insurance Company. Specifically, Caterpillar Life Insurance Company has entered into a reinsurance agreement with Caterpillar Insurance Company, assuming 100% of the risk of an Accident and Health Stop Loss Insurance Policy to cover a Caterpillar Voluntary Employees' Benefits Association (VEBA) Trust for medical losses sustained by a select group of Caterpillar retirees and dependents.

Caterpillar Insurance Co. Ltd., a wholly owned subsidiary of Caterpillar Insurance Holdings Inc., is a captive insurance company domiciled in Bermuda and regulated by the Bermuda Monetary Authority. Caterpillar Insurance Co. Ltd. holds a Class 2 license (as defined by the Bermuda Insurance Amendment Act of 1995), which primarily insures its parent and affiliates. Caterpillar Insurance Co. Ltd. also provides reinsurance to Caterpillar Insurance Company under quota share reinsurance agreements for contractual liability and contractors' equipment programs in the United States. Finally, Caterpillar Insurance Co. Ltd. holds a Class B license to provide life and disability reinsurance covering Caterpillar Inc.'s International employee benefits program. The Bermuda Monetary Authority is responsible for monitoring Caterpillar Insurance Co. Ltd.'s compliance with solvency requirements, and requires an Annual Financial Filing for this purpose.

Caterpillar Product Services Corporation (CPSC), a wholly owned subsidiary of Caterpillar, is a warranty company domiciled in Missouri. CPSC previously conducted a machine extended service contract program in Germany and France by providing machine extended warranty reimbursement protection to dealers in Germany and France. The program was discontinued effective January 1, 2013, though CPSC continues to provide extended warranty reimbursement protection under existing contracts.

Caterpillar Insurance Services Corporation, a wholly owned subsidiary of Caterpillar Insurance Holdings Inc., is a Tennessee insurance agency licensed in all 50 states, the District of Columbia and Guam. It provides insurance services for all property and casualty and life and health lines of business.

Caterpillar's insurance group provides protection and service for claims under the following programs:

- Contractual Liability Insurance to insure certain service contract obligations of Caterpillar and its affiliates, Caterpillar dealers and original equipment manufacturers (OEMs).
- Cargo reinsurance for the worldwide cargo risks of Caterpillar products.
- Contractors' Equipment Physical Damage Insurance for equipment manufactured by Caterpillar or OEMs, which is leased, rented or sold by third party dealers to customers.
- General liability, employer's liability, auto liability and property insurance for Caterpillar.
- Life, health and disability reinsurance for Caterpillar's international employee benefits program (non-U.S.).

- Reinsurance to cover VEBA Trust for medical claims of certain Caterpillar retirees and dependents.
- Brokerage and insurance services for property and casualty and life and health business.

Competitive Environment

Caterpillar products and services are sold worldwide into a variety of highly competitive markets. In all markets, we compete on the basis of product performance, customer service, quality and price. From time to time, the intensity of competition results in price discounting in a particular industry or region. Such price discounting puts pressure on margins and can negatively impact operating profit. Outside the United States, certain competitors enjoy competitive advantages inherent to operating in their home countries or regions.

Raw Materials and Component Products

We source our raw materials and manufactured components from suppliers both domestically and internationally. These purchases include unformed materials and rough and finished parts. Unformed materials include a variety of steel products, which are then cut or formed to shape and machined in our facilities. Rough parts include various sized steel and iron castings and forgings, which are machined to final specification levels inside our facilities. Finished parts are ready to assemble components, which are made either to Caterpillar specifications or to supplier developed specifications. We machine and assemble some of the components used in our machines, engines and power generation units and to support our after-market dealer parts sales. We also purchase various goods and services used in production, logistics, offices and product development processes. We maintain global strategic sourcing models to meet our global facilities' production needs while building long-term supplier relationships and leveraging enterprise spend. We expect our suppliers to maintain, at all times, industry-leading levels of quality and the ability to timely deliver raw materials and component products for our machine and engine products. However, in some cases, increases in demand or supply chain disruptions have led to parts and components constraints across some products. We use a variety of agreements with suppliers to protect our intellectual property and processes to monitor and mitigate risks of the supply base causing a business disruption. The risks monitored include supplier financial viability, the ability to increase or decrease production levels, business continuity, quality and delivery.

Patents and Trademarks

We own a number of patents and trademarks, which have been obtained over a period of years and relate to the products we manufacture and the services we provide. These patents and trademarks are generally considered beneficial to our business. We do not regard our business as being dependent upon any single patent or group of patents.

Order Backlog

The dollar amount of backlog believed to be firm was approximately \$23.1 billion at December 31, 2021 and \$14.2 billion at December 31, 2020. Compared with year-end 2020, the order backlog increased across the three primary segments, with the largest increase in Energy & Transportation. Of the total backlog at December 31, 2021, approximately \$4.3 billion was not expected to be filled in 2022.

Dealers and Distributors

We distribute our machines principally through a worldwide organization of dealers (dealer network), 44 located in the United States and 116 located outside the United States, serving 193 countries. We sell reciprocating engines principally through the dealer network and to other manufacturers for use in products. We also sell some of the reciprocating engines manufactured by our subsidiary Perkins Engines Company Limited through its worldwide network of 90 distributors covering 171 countries. We sell the FG Wilson branded electric power generation systems through its worldwide network of 110 distributors covering 109 countries. We also sell some of the large, medium speed reciprocating engines under the MaK brand through a worldwide network of 20 distributors covering 130 countries.

Our dealers do not deal exclusively with our products; however, in most cases sales and servicing of our products are the dealers' principal business. We sell some products, primarily turbines and locomotives, directly to end customers through sales forces employed by the company. At times, these employees are assisted by independent sales representatives.

While the large majority of our worldwide dealers are independently owned and operated, we own and operate a dealership in Japan that covers approximately 80% of the Japanese market: Nippon Caterpillar Division. We are currently operating this Japanese dealer directly and we report its results in the All Other operating segment. There are also three independent dealers in the Southern Region of Japan.

HUMAN CAPITAL

Core Values

Caterpillar's global workforce is united by Our Values In Action, Caterpillar's Code of Conduct. Integrity, Excellence, Teamwork, Commitment and Sustainability provide the foundation for our values-based culture. Our diversity and inclusion principles are embedded in our values. Our values unite us, and reflect our diverse cultures, languages, geographies, and businesses, as one Caterpillar team.

Health and Safety

The health and safety of our employees is an important focus at Caterpillar, and we strive to continually reduce our recordable injuries. As part of this focus on health and safety, Caterpillar has established a peer-to-peer safety mentorship and education program for manufacturing new hires to accelerate acclimation to our safety culture in many global locations. In 2021, the Company achieved a recordable injury frequency rate of 0.41, compared to the 2020 recordable injury frequency rate of 0.42.

The COVID-19 pandemic has continued to further reinforce the importance of a safe and healthy workforce. In response to the pandemic, the Company continues to utilize safeguards to protect our essential employees, including increased frequency of cleaning and disinfecting, social distancing practices, face coverings, temperature screening, supporting vaccination opportunities in many workplaces and paid time off to receive vaccinations away from work. We implemented workplace pandemic measures consistent with specific regulatory requirements and guidance from health authorities. We also maintained travel restrictions and remote work, for employees who were able to work from home. Our medical teams provide ongoing training and education to support the emotional health and resilience of our workforce.

For Caterpillar branded products, the company's relationship with each of its independent dealers is memorialized in standard sales and service agreements. Pursuant to these agreements, the company grants the dealer the right to purchase and sell its products and to service the products in a specified geographic service territory. The company establishes prices to dealers after receiving input from dealers on transactional pricing in the marketplace. The company also agrees to defend its intellectual property and to provide warranty and technical support to the dealer. The agreement further grants the dealer a non-exclusive license to use the company's trademarks, service marks and brand names. In some instances, a separate trademark agreement exists between the company and a dealer.

In exchange for these rights, the agreement obligates the dealer to develop and promote the sale of the company's products to current and prospective customers in the dealer's service territory. Each dealer agrees to employ adequate sales and support personnel to market, sell and promote the company's products, demonstrate and exhibit the products, perform the company's product improvement programs, inform the company concerning any features that might affect the safe operation of any of the company's products and maintain detailed books and records of the dealer's financial condition, sales and inventories and make these books and records available at the company's reasonable request.

These sales and service agreements are terminable at will by either party primarily upon 90 days written notice.

Talent Development and Training

In addition to our focus on values and safety, we strive to continually attract, develop, engage, and retain a high-performing diverse global team that executes our enterprise strategy of long-term profitable growth.

We are committed to employee development and helping individuals reach their full potential, by making on-going investments in our team. Our global internships, engineering co-ops, and career programs for engineering, marketing, and manufacturing provide development opportunities for early career employees. We also have a continual focus on strengthening technical, professional and leadership capabilities at every level. Strategic talent reviews and succession planning occur at a minimum, annually, across our businesses.

Our leadership development programs and focus on encouraging a variety of experiences to help employees broaden understanding and increase perspective. Our leadership curriculums include managing for inclusion as a core development principle and a professional skill.

Additionally, skill-based programs to upskill our manufacturing employees are developed locally and tailored to the specific needs of the business. In China, we continue to invest in programs that encourage women to pursue engineering management and leadership roles. In India, we tailored recruiting campaigns and on-site benefits to attract female employees. Caterpillar, along with other companies across industries, participates in the OneTen coalition. The coalition is committed to upskill, hire and advance Black Americans over the next 10 years into family-sustaining careers.

Diversity and Inclusion

We are committed to fostering a diverse workforce and an inclusive environment. Our 14 Employee Resource Groups (ERGs), which are sponsored and supported by leadership, help ensure different voices and perspectives contribute to our strategy for long-term profitable growth. They also engage our employees, helping contribute to development and retention.

Our ERGs provide many contributions, such as mentoring programs that connect diverse employees with senior leaders who can support their career goals, partnerships with recruiters and diverse early career and professional organizations that can assist in strengthening the diverse talent pipeline and programs that educate and inform on the richness of the global cultures that we share.

Compensation, Benefits and Employee Insights

Providing competitive benefits and compensation underpins our commitment to our engaged and productive employees. Our pay-for-performance philosophy aligns employee's individual contributions, behaviors and business results with individual rewards. Our comprehensive Total Health programs focus on purpose, as well as physical, emotional, financial, and social health. The annual Employee Insights Survey provides all employees the opportunity to confidentially share their perspectives and engages leaders to listen, learn and respond to employee feedback.

Employment

Management aligns employment levels with the needs of the business. We believe we have the appropriate human capital resources to successfully operate and deliver our enterprise strategy. As of December 31, 2021, we employed about 107,700 full-time persons of whom approximately 63,400 were located outside the United States. In the United States, we employed approximately 44,300 full-time persons, most of whom are at-will employees and, therefore, not subject to any type of employment contract or agreement. At select business units, we have hired certain highly specialized employees under employment contracts that specify a term of employment, pay and other benefits.

Full-Time Employees at Year-End		
	2021	2020
Inside U.S.	44,300	40,300
Outside U.S.	63,400	57,000
Total	107,700	97,300
By Region:		
North America	44,700	40,500
EAME	17,600	17,700
Latin America	19,500	15,900
Asia/Pacific	25,900	23,200
Total	107,700	97,300

As of December 31, 2021, there were approximately 7,710 hourly production employees in the United States who were covered by collective bargaining agreements with various labor unions, including The United Automobile, Aerospace and Agricultural Implement Workers of America (UAW), The International

Association of Machinists and The United Steelworkers. Outside the United States, the company enters into employment contracts and agreements in those countries in which such relationships are mandatory or customary. The provisions of these agreements generally correspond in each case with the required or customary terms in the subject jurisdiction.

Environmental Matters

The company is regulated by federal, state and international environmental laws governing our use, transport and disposal of substances and control of emissions. In addition to governing our manufacturing and other operations, these laws often impact the development of our products, including, but not limited to, required compliance with air emissions standards applicable to internal combustion engines. We have made, and will continue to make, significant research and development and capital expenditures to comply with these emissions standards.

We are engaged in remedial activities at a number of locations, often with other companies, pursuant to federal and state laws. When it is probable we will pay remedial costs at a site, and those costs can be reasonably estimated, the investigation, remediation, and operating and maintenance costs of the remedial action are accrued against our earnings. Costs are accrued based on consideration of currently available data and information with respect to each individual site, including available technologies, current applicable laws and regulations, and prior remediation experience. Where no amount within a range of estimates is more likely, we accrue the minimum. Where multiple potentially responsible parties are involved, we consider our proportionate share of the probable costs. In formulating the estimate of probable costs, we do not consider amounts expected to be recovered from insurance companies or others. We reassess these accrued amounts on a quarterly basis. The amount recorded for environmental remediation is not material and is included in the line item "Accrued expenses" in Statement 3 — "Consolidated Financial Position at December 31" of Part II, Item 8 "Financial Statements and Supplementary Data." There is no more than a remote chance that a material amount for remedial activities at any individual site, or at all the sites in the aggregate, will be required.

Available Information

The company files electronically with the Securities and Exchange Commission (SEC) required reports on Form 8-K, Form 10-Q, Form 10-K and Form 11-K; proxy materials; ownership reports for insiders as required by Section 16 of the Securities Exchange Act of 1934 (Exchange Act); registration statements on Forms S-3 and S-8, as necessary; and other forms or reports as required. The SEC maintains a website (www.sec.gov) that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. The company maintains a website (www.Caterpillar.com) and copies of our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to these reports filed or furnished with the SEC are available free of charge through our website (www.Caterpillar.com/secfilings) as soon as reasonably practicable after filing with the SEC. Copies of our board committee charters, our board's Guidelines on Corporate Governance Issues, Worldwide Code of Conduct and other corporate governance information are available on our website (www.Caterpillar.com/governance). The information contained on the company's website is not included in, or incorporated by reference into, this annual report on Form 10-K.

ITEM 1A. Risk Factors.

The statements in this section describe the most significant risks to our business and should be considered carefully in conjunction with Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and the “Notes to Consolidated Financial Statements” of Part II, Item 8 “Financial Statements and Supplementary Data” to this Form 10-K. In addition, the statements in this section and other sections of this Form 10-K, including in Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” include “forward-looking statements” as that term is defined in the Private Securities Litigation Reform Act of 1995 and involve uncertainties that could significantly impact results. Forward-looking statements give current expectations or forecasts of future events about the company or our outlook. You can identify forward-looking statements by the fact they do not relate to historical or current facts and by the use of words such as “believe,” “expect,” “estimate,” “anticipate,” “will be,” “should,” “plan,” “forecast,” “target,” “guide,” “project,” “intend,” “could” and similar words or expressions.

Forward-looking statements are based on assumptions and on known risks and uncertainties. Although we believe we have been prudent in our assumptions, any or all of our forward-looking statements may prove to be inaccurate, and we can make no guarantees about our future performance. Should known or unknown risks or uncertainties materialize or underlying assumptions prove inaccurate, actual results could materially differ from past results and/or those anticipated, estimated or projected.

We undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events or otherwise. You should, however, consult any subsequent disclosures we make in our filings with the SEC on Form 10-Q or Form 8-K.

The following is a cautionary discussion of risks, uncertainties and assumptions that we believe are material to our business. In addition to the factors discussed elsewhere in this report, the following are some of the important factors that, individually or in the aggregate, we believe could make our actual results differ materially from those described in any forward-looking statements. It is impossible to predict or identify all such factors and, as a result, you should not consider the following factors to be a complete discussion of risks, uncertainties and assumptions.

RISKS RELATED TO THE COVID-19 PANDEMIC

The COVID-19 pandemic could materially adversely affect our business, results of operations and/or financial condition.

COVID-19 was identified in late 2019 and spread globally. Efforts to combat the virus have been complicated by viral variants and access to, and acceptance and effectiveness of, vaccines globally. COVID 19 has had, and continues to have, a significant impact around the world, prompting governments and businesses to take unprecedented measures in response. Such measures have included travel bans and restrictions, quarantines, shelter in place orders and shutdowns. These measures have impacted and may continue to impact all or portions of our workforce and operations

and the operations of our customers, dealers and suppliers. Although certain restrictions related to the COVID-19 pandemic have eased, uncertainty continues to exist regarding such measures and potential future measures. Current material and component shortages, logistics constraints and labor inefficiencies have limited and could continue to limit our ability to meet customer demand, which could have a material adverse effect on our business, results of operations and/or financial condition.

The COVID-19 pandemic caused a global recession and the sustainability of the economic recovery observed in 2021 remains unclear. The COVID-19 pandemic has also significantly increased economic and customer demand uncertainty, has caused inflationary pressure in the U.S. and elsewhere and has led to volatility in customer demand for the Company’s products and services and caused supply chain disruptions. Economic uncertainties could continue to affect customer demand for the Company’s products and services, the value of the equipment financed or leased, the demand for financing and the financial condition and credit risk of our dealers and customers.

Continued uncertainties related to the magnitude, duration and persistent effects of the COVID-19 pandemic may adversely affect our business. These uncertainties include, among other things: the duration and impact of the resurgence in COVID-19 cases in any country, state, or region; the emergence, contagiousness, and threat of new and different strains of the virus; the availability, acceptance, and effectiveness of vaccines; prolonged reduction or closure of the Company’s operations; disruptions in the supply chain; labor inefficiencies; increased logistics costs; the impact of the pandemic on the Company’s customers and dealers; the impact of disruptions in the global capital markets and/or declines in our financial performance or credit ratings, which could impact the Company’s ability to obtain funding in the future; and the impact of the pandemic on customer demand for our products and services as discussed above. All of these factors could materially and adversely affect our business, results of operations and/or financial condition.

The ultimate impact of the COVID-19 pandemic on the Company’s financial and operational results will be determined by the length of time that the pandemic continues, its effect on the demand for the Company’s products and services and the supply chain, as well as the effect of governmental regulations imposed in response to the pandemic. The overall magnitude of the COVID-19 pandemic and the continued fluidity of the situation could materially and adversely impact our business, results of operations and/or financial condition.

MACROECONOMIC RISKS

Our business and the industries we serve are highly sensitive to global and regional economic conditions.

Our results of operations are materially affected by economic conditions globally and regionally and in the particular industries we serve. The demand for our products and services tends to be cyclical and can be significantly reduced in periods of economic weakness characterized by lower levels of government and business

investment, lower levels of business confidence, lower corporate earnings, high real interest rates, lower credit activity or tighter credit conditions, perceived or actual industry overcapacity, higher unemployment and lower consumer spending. A prolonged period of economic weakness may also result in increased expenses due to higher allowances for doubtful accounts and potential goodwill and asset impairment charges. Economic conditions vary across regions and countries, and demand for our products and services generally increases in those regions and countries experiencing economic growth and investment. Slower economic growth or a change in the global mix of regions and countries experiencing economic growth and investment could have an adverse effect on our business, results of operations and financial condition.

The energy, transportation and mining industries are major users of our products, including the mineral extraction, oil and natural gas industries. Customers in these industries frequently base their decisions to purchase our products and services on the expected future performance of these industries, which in turn are dependent in part on commodity prices. Prices of commodities in these industries are frequently volatile and can change abruptly and unpredictably in response to general economic conditions and trends, government actions, regulatory actions, commodity inventories, production and consumption levels, technological innovations, commodity substitutions, market expectations and any disruptions in production or distribution or changes in consumption. Economic conditions affecting the industries we serve may in the future also lead to reduced capital expenditures by our customers. Reduced capital expenditures by our customers are likely to lead to a decrease in the demand for our products and services and may also result in a decrease in demand for aftermarket parts as customers are likely to extend preventative maintenance schedules and delay major overhauls when possible.

The rates of infrastructure spending, commercial construction and housing starts also play a significant role in our results. Our products are an integral component of these activities, and as these activities decrease, demand for our products and services may be significantly impacted, which could negatively impact our results.

Commodity price changes, material price increases, fluctuations in demand for our products and services, significant disruptions to our supply chains or significant shortages of labor and material may adversely impact our financial results or our ability to meet commitments to customers.

We are a significant user of steel and many other commodities required for the manufacture of our products. Increases in the prices of such commodities would increase our costs, negatively impacting our business, results of operations and financial condition if we are unable to fully offset the effect of these increased costs through price increases, productivity improvements or cost reduction programs.

We rely on suppliers to produce or secure material required for the manufacture of our products. Production challenges at suppliers (including suppliers of semiconductors), a disruption in deliveries to or from suppliers or decreased availability of raw materials or commodities could have an adverse effect on our ability to meet our commitments to customers or increase our operating costs. On the other hand, in circumstances where demand for our products is less than we expect, we may experience excess inventories and be forced to incur additional costs and our profitability may suffer. Additionally, we have experienced and expect to continue to experience transportation delays for parts, components and finished machines due to significant demands in global transportation and congestion at ports throughout the globe. Our business, competitive position, results of operations or financial condition could be negatively impacted if supply is insufficient for our operations, if significant transportation delays interfere with deliveries, if we experience excess inventories or if

we are unable to adjust our production schedules or our purchases from suppliers to reflect changes in customer demand and market fluctuations on a timely basis.

Changes in government monetary or fiscal policies may negatively impact our results.

Most countries where our products and services are sold have established central banks to regulate monetary systems and influence economic activities, generally by adjusting interest rates. Interest rate changes affect overall economic growth, which affects demand for residential and nonresidential structures, as well as energy and mined products, which in turn affects sales of our products and services that support these activities. Interest rate changes may also affect our customers' ability to finance machine purchases, can change the optimal time to keep machines in a fleet and can impact the ability of our suppliers to finance the production of parts and components necessary to manufacture and support our products. Increases in interest rates could negatively impact sales and create supply chain inefficiencies.

Central banks and other policy arms of many countries may take actions to vary the amount of liquidity and credit available in an economy. The impact from a change in liquidity and credit policies could negatively affect the customers and markets we serve or our suppliers, create supply chain inefficiencies and could adversely impact our business, results of operations and financial condition.

Changes in monetary and fiscal policies, along with other factors, may cause currency exchange rates to fluctuate. Actions that lead the currency exchange rate of a country where we manufacture products to increase relative to other currencies could reduce the competitiveness of products made in that country, which could adversely affect our competitive position, results of operations and financial condition.

Government policies on taxes and spending also affect our business. Throughout the world, government spending finances a significant portion of infrastructure development, such as highways, rail systems, airports, sewer and water systems, waterways and dams. Tax regulations determine asset depreciation lives and impact the after-tax returns on business activity and investment, both of which influence investment decisions. Unfavorable developments, such as decisions to reduce public spending or to increase taxes, could negatively impact our results.

Our global operations are exposed to political and economic risks, commercial instability and events beyond our control in the countries in which we operate.

Our global operations are dependent upon products manufactured, purchased and sold in the U.S. and internationally, including in countries with political and economic instability or uncertainty. Some countries have greater political and economic volatility and greater vulnerability to infrastructure and labor disruptions than others. Our business could be negatively impacted by adverse fluctuations in freight costs, limitations on shipping and receiving capacity, and other disruptions in the transportation and shipping infrastructure at important geographic points of exit and entry for our products. Operating in different regions and countries exposes us to numerous risks, including:

- multiple and potentially conflicting laws, regulations and policies that are subject to change;
- imposition of currency restrictions, restrictions on repatriation of earnings or other restraints;
- imposition of new or additional tariffs or quotas;

- withdrawal from or modification of trade agreements or the negotiation of new trade agreements;
- imposition of new or additional trade and economic sanctions laws imposed by the U.S. or foreign governments;
- war or acts of terrorism; and
- political and economic instability or civil unrest that may severely disrupt economic activity in affected countries.

The occurrence of one or more of these events may negatively impact our business, results of operations and financial condition.

OPERATIONAL RISKS

The success of our business depends on our ability to develop, produce and market quality products that meet our customers' needs.

Our business relies on continued global demand for our brands and products. To achieve business goals, we must develop and sell products that appeal to our dealers, OEMs and end-user customers. This is dependent on a number of factors, including our ability to maintain key dealer relationships; our ability to produce products that meet the quality, performance and price expectations of our customers and our ability to develop effective sales, advertising and marketing programs. In addition, our continued success in selling products that appeal to our customers is dependent on leading-edge innovation, with respect to both products and operations, and on the availability and effectiveness of legal protection for our innovations. Failure to continue to deliver high quality, innovative, competitive products to the marketplace, to adequately protect our intellectual property rights; to supply products that meet applicable regulatory requirements, including engine exhaust emission requirements or to predict market demands for, or gain market acceptance of, our products, could have a negative impact on our business, results of operations and financial condition.

We operate in a highly competitive environment, which could adversely affect our sales and pricing.

We operate in a highly competitive environment. We compete on the basis of a variety of factors, including product performance, customer service, quality and price. There can be no assurance that our products will be able to compete successfully with other companies' products. Thus, our share of industry sales could be reduced due to aggressive pricing or product strategies pursued by competitors, unanticipated product or manufacturing difficulties, our failure to price our products competitively, our failure to produce our products at a competitive cost or an unexpected buildup in competitors' new machine or dealer-owned rental fleets, which could lead to downward pressure on machine rental rates and/or used equipment prices.

Lack of customer acceptance of price increases we announce from time to time, changes in customer requirements for price discounts, changes in our customers' behavior or a weak pricing environment could have an adverse impact on our business, results of operations and financial condition.

In addition, our results and ability to compete may be impacted negatively by changes in our geographic and product mix of sales.

Increased information technology security threats and more sophisticated computer crime pose a risk to our systems, networks, products and services.

We rely upon information technology systems and networks, some of which are managed by third parties, in connection with a variety of business activities. Additionally, we collect and store sensitive information relating to our business, customers, dealers,

suppliers and employees. Operating these information technology systems and networks and processing and maintaining this data in a secure manner, is critical to our business operations and strategy. Information technology security threats – from user error to cybersecurity attacks designed to gain unauthorized access to our systems, networks and data – are increasing in frequency and sophistication. Cybersecurity attacks from threat actors globally range from random attempts to coordinated and targeted attacks, including sophisticated computer crime and advanced persistent threats. These threats pose a risk to the security of our systems and networks and the confidentiality, availability and integrity of our data. Cybersecurity attacks could also include attacks targeting customer data or the security, integrity and/or reliability of the hardware and software installed in our products. It is possible that our information technology systems and networks, or those managed or provided by third parties, could have vulnerabilities, which could go unnoticed for a period of time. While various procedures and controls have been and are being utilized to mitigate such risks, there can be no guarantee that the actions and controls we have implemented and are implementing, or which we cause or have caused third-party service providers to implement, will be sufficient to protect and mitigate associated risks to our systems, information or other property.

We have experienced cyber security threats and vulnerabilities in our systems and those of our third party providers, and we have experienced viruses and attacks targeting our information technology systems and networks. Such prior events, to date, have not had a material impact on our financial condition, results of operations or liquidity. However, the potential consequences of a future material cybersecurity attack include reputational damage, litigation with third parties, government enforcement actions, penalties, disruption to systems, unauthorized release of confidential or otherwise protected information, corruption of data, diminution in the value of our investment in research, development and engineering, and increased cybersecurity protection and remediation costs, which in turn could adversely affect our competitiveness, results of operations and financial condition. Due to the evolving nature of such security threats, the potential impact of any future incident cannot be predicted. Further, the amount of insurance coverage we maintain may be inadequate to cover claims or liabilities relating to a cybersecurity attack.

In addition, data we collect, store and process are subject to a variety of U.S. and international laws and regulations, such as the European Union's General Data Protection Regulation that became effective in May 2018 and the California Consumer Privacy Act that became effective in January 2020, which may carry significant potential penalties for noncompliance.

Our business is subject to the inventory management decisions and sourcing practices of our dealers and our OEM customers.

We sell finished products primarily through an independent dealer network and directly to OEMs and are subject to risks relating to their inventory management decisions and operational and sourcing practices. Both carry inventories of finished products as part of ongoing operations and adjust those inventories based on their assessments of future needs and market conditions, including levels of used equipment inventory and machine rental usage rates. Such adjustments may impact our results positively or negatively. If the inventory levels of our dealers and OEM customers are higher than they desire, they may postpone product purchases from us, which could cause our sales to be lower than the end-user demand for our products and negatively impact our results. Similarly, our results could be negatively impacted through the loss of time-sensitive sales if our dealers and OEM customers do not maintain inventory levels sufficient to meet customer demand.

We may not realize all of the anticipated benefits of our acquisitions, joint ventures or divestitures, or these benefits may take longer to realize than expected.

In pursuing our business strategy, we routinely evaluate targets and enter into agreements regarding possible acquisitions, divestitures and joint ventures. We often compete with others for the same opportunities. To be successful, we conduct due diligence to identify valuation issues and potential loss contingencies, negotiate transaction terms, complete complex transactions and manage post-closing matters such as the integration of acquired businesses. Further, while we seek to mitigate risks and liabilities of such transactions through due diligence, among other things, there may be risks and liabilities that our due diligence efforts fail to discover, that are not accurately or completely disclosed to us or that we inadequately assess. We may incur unanticipated costs or expenses following a completed acquisition, including post-closing asset impairment charges, expenses associated with eliminating duplicate facilities, litigation, and other liabilities. Risks associated with our past or future acquisitions also include the following:

- the failure to achieve the acquisition's revenue or profit forecast;
- the business culture of the acquired business may not match well with our culture;
- technological and product synergies, economies of scale and cost reductions may not occur as expected;
- unforeseen expenses, delays or conditions may be imposed upon the acquisition, including due to required regulatory approvals or consents;
- we may acquire or assume unexpected liabilities or be subject to unexpected penalties or other enforcement actions;
- faulty assumptions may be made regarding the macroeconomic environment or the integration process;
- unforeseen difficulties may arise in integrating operations, processes and systems;
- higher than expected investments may be required to implement necessary compliance processes and related systems, including information technology systems, accounting systems and internal controls over financial reporting;
- we may fail to retain, motivate and integrate key management and other employees of the acquired business;
- higher than expected costs may arise due to unforeseen changes in tax, trade, environmental, labor, safety, payroll or pension policies in any jurisdiction in which the acquired business conducts its operations; and
- we may experience problems in retaining customers and integrating customer bases.

Many of these factors will be outside of our control and any one of them could result in increased costs, decreases in the amount of expected revenues and diversion of management's time and attention. They may also delay the realization of the benefits we anticipate when we enter into a transaction.

In order to conserve cash for operations, we may undertake acquisitions financed in part through public offerings or private placements of debt or equity securities, or other arrangements. Such acquisition financing could result in a decrease in our earnings and adversely affect other leverage measures. If we issue equity securities or equity-linked securities, the issued securities may have a dilutive effect on the interests of the holders of our common shares.

Failure to implement our acquisition strategy, including successfully integrating acquired businesses, could have an adverse effect on our

business, financial condition and results of operations. Furthermore, we make strategic divestitures from time to time. In the case of divestitures, we may agree to indemnify acquiring parties for certain liabilities arising from our former businesses. These divestitures may also result in continued financial involvement in the divested businesses following the transaction, including through guarantees or other financial arrangements. Lower performance by those divested businesses could affect our future financial results.

Union disputes or other labor matters could adversely affect our operations and financial results.

Some of our employees are represented by labor unions in a number of countries under various collective bargaining agreements with varying durations and expiration dates. There can be no assurance that any current or future issues with our employees will be resolved or that we will not encounter future strikes, work stoppages or other disputes with labor unions or our employees. We may not be able to satisfactorily renegotiate collective bargaining agreements in the United States and other countries when they expire. If we fail to renegotiate our existing collective bargaining agreements, we could encounter strikes or work stoppages or other disputes with labor unions. In addition, existing collective bargaining agreements may not prevent a strike or work stoppage at our facilities in the future. We may also be subject to general country strikes or work stoppages unrelated to our business or collective bargaining agreements. A work stoppage or other limitations on production at our facilities for any reason could have an adverse effect on our business, results of operations and financial condition. In addition, many of our customers and suppliers have unionized work forces. Strikes or work stoppages experienced by our customers or suppliers could have an adverse effect on our business, results of operations and financial condition.

Unexpected events may increase our cost of doing business or disrupt our operations.

The occurrence of one or more unexpected events, including war, acts of terrorism or violence, civil unrest, fires, tornadoes, tsunamis, hurricanes, earthquakes, floods and other forms of severe weather in the United States or in other countries in which we operate or in which our suppliers are located could adversely affect our operations and financial performance. Natural disasters, pandemic illness, including the current COVID-19 outbreak, equipment failures, power outages or other unexpected events could result in physical damage to and complete or partial closure of one or more of our manufacturing facilities or distribution centers, temporary or long-term disruption in the supply of component products from some local and international suppliers, and disruption and delay in the transport of our products to dealers, end-users and distribution centers. Existing insurance coverage may not provide protection for all of the costs that may arise from such events.

FINANCIAL RISKS

Disruptions or volatility in global financial markets could limit our sources of liquidity, or the liquidity of our customers, dealers and suppliers.

Continuing to meet our cash requirements over the long-term requires substantial liquidity and access to varied sources of funds, including capital and credit markets. Global economic conditions may cause volatility and disruptions in the capital and credit markets. Market volatility, changes in counterparty credit risk, the impact of government intervention in financial markets and general economic conditions may also adversely impact our ability to access capital and credit markets to fund operating needs. Global or regional

economic downturns could cause financial markets to decrease the availability of liquidity, credit and credit capacity for certain issuers, including certain customers, dealers and suppliers. An inability to access capital and credit markets may have an adverse effect on our business, results of operations, financial condition and competitive position. Furthermore, changes in global economic conditions, including material cost increases and decreases in economic activity in key markets we serve, and the success of plans to manage cost increases, inventory and other important elements of our business may significantly impact our ability to generate funds from operations.

In addition, demand for our products generally depends on customers' ability to pay for our products, which, in turn, depends on their access to funds. Changes in global economic conditions may result in customers experiencing increased difficulty in generating funds from operations. Capital and credit market volatility and uncertainty may cause financial institutions to revise their lending standards, resulting in customers' decreased access to capital. If capital and credit market volatility occurs, customers' liquidity may decline which, in turn, would reduce their ability to purchase our products.

Failure to maintain our credit ratings would increase our cost of borrowing and could adversely affect our cost of funds, liquidity, competitive position and access to capital markets.

Each of Caterpillar's and Cat Financial's costs of borrowing and their respective ability to access the capital markets are affected not only by market conditions but also by the short- and long-term credit ratings assigned to their respective debt by the major credit rating agencies. These ratings are based, in significant part, on each of Caterpillar's and Cat Financial's performance as measured by financial metrics such as net worth, interest coverage and leverage ratios, as well as transparency with rating agencies and timeliness of financial reporting. There can be no assurance that Caterpillar and Cat Financial will be able to maintain their credit ratings. We receive debt ratings from the major credit rating agencies. A downgrade of our credit rating by any of the major credit rating agencies would result in increased borrowing costs and could adversely affect Caterpillar's and Cat Financial's liquidity, competitive position and access to the capital markets, including restricting, in whole or in part, access to the commercial paper market. There can be no assurance that the commercial paper market will continue to be a reliable source of short-term financing for Cat Financial or an available source of short-term financing for Caterpillar. An inability to access the capital markets could have an adverse effect on our cash flow, results of operations and financial condition.

Our Financial Products segment is subject to risks associated with the financial services industry.

Cat Financial is significant to our operations and provides financing support for a significant share of our global sales. The inability of Cat Financial to access funds to support its financing activities to our customers could have an adverse effect on our business, results of operations and financial condition.

Continuing to meet Cat Financial's cash requirements over the long-term could require substantial liquidity and access to sources of funds, including capital and credit markets. Cat Financial has continued to maintain access to key global medium-term note and commercial paper markets, but there can be no assurance that such markets will continue to represent a reliable source of financing. If global economic conditions were to deteriorate, Cat Financial could face materially higher financing costs, become unable to access adequate funding to operate and grow its business and/or meet its debt service obligations as they mature. Cat Financial also could and be required to draw upon contractually committed lending agreements and/or seek other funding sources. However,

there can be no assurance that such agreements and other funding sources would be sufficient or even available under extreme market conditions. Any of these events could negatively impact Cat Financial's business, as well as our and Cat Financial's results of operations and financial condition.

Market disruption and volatility may also lead to numerous risks in connection with these events, including but not limited to:

- Market developments that may affect customer confidence levels and cause declines in the demand for financing and adverse changes in payment patterns, causing increases in delinquencies and default rates, which could increase Cat Financial's write-offs and provision for credit losses.
- The process Cat Financial uses to estimate losses inherent in its credit exposure requires a high degree of management's judgment regarding numerous subjective qualitative factors, including forecasts of economic conditions and how economic predictors might impair the ability of its borrowers to repay their loans. Financial market disruption and volatility may impact the accuracy of these judgments.
- Cat Financial's ability to engage in routine funding transactions or to engage or to borrow from other financial institutions on acceptable terms or at all could be adversely affected by disruptions in the capital markets or other events, including actions by rating agencies and deteriorating investor expectations.
- As Cat Financial's lending agreements are primarily with financial institutions, their ability to perform in accordance with any of our underlying agreements could be adversely affected by market volatility and/or disruptions in financial markets.

Changes in interest rates or market liquidity conditions could adversely affect Cat Financial's and our earnings and/or cash flow.

Changes in interest rates and market liquidity conditions could have an adverse impact on Cat Financial's and our earnings and cash flows. Because a significant number of the loans made by Cat Financial are made at fixed interest rates, its business results are subject to fluctuations in interest rates. Certain loans made by Cat Financial and various financing extended to Cat Financial are made at variable rates that use LIBOR as a benchmark for establishing the interest rate. LIBOR is the subject of recent proposals for reform. On July 27, 2017, the United Kingdom's Financial Conduct Authority ("FCA") announced that it intends to stop persuading or compelling banks to submit LIBOR rates after 2021. On November 18, 2020, ICE Benchmark Administration ("IBA"), the administrator of USD LIBOR, announced plans to consult on its intention to cease the publication of all GBP, EUR, CHF and JPY LIBOR settings immediately following the LIBOR publication on December 31, 2021. On November 30, 2020, IBA, with the support of the United States Federal Reserve and the FCA, announced plans to consult on ceasing publication of USD LIBOR on December 31, 2021 for only the one-week and two-month USD LIBOR tenors, and on June 30, 2023 for all other USD LIBOR tenors. While the November 30 announcement extends the transition period to June 2023, the United States Federal Reserve concurrently issued a statement advising banks to stop new USD LIBOR issuances by the end of 2021. These reforms may cause LIBOR to cease to exist, new methods of calculating LIBOR to be established if LIBOR continues to exist after 2021 or alternative reference rates to be established. The consequences of these developments cannot be entirely predicted and could have an adverse impact on the market value for or value of LIBOR-linked securities, loans, derivatives, and other financial obligations or extensions of credit held by or due to Cat Financial, as well as the revenue and expenses associated with those securities, loans and financial instruments. Cat Financial has created a cross-functional team that will assess risk across multiple categories as it relates to the use of LIBOR in securities,

loans, derivatives, and other financial obligations or extensions of credit held by or due to us. Other changes in market interest rates may influence Cat Financial's borrowing costs and could reduce its and our earnings and cash flows, returns on financial investments and the valuation of derivative contracts. Cat Financial manages interest rate and market liquidity risks through a variety of techniques that include a match funding strategy, the selective use of derivatives and a broadly diversified funding program. There can be no assurance, however, that fluctuations in interest rates and market liquidity conditions will not have an adverse impact on its and our earnings and cash flows. If any of the variety of instruments and strategies Cat Financial uses to hedge its exposure to these types of risk is ineffective, this may have an adverse impact on our earnings and cash flows. With respect to Insurance Services' investment activities, changes in the equity and bond markets could result in a decline in value of its investment portfolio, resulting in an unfavorable impact to earnings.

An increase in delinquencies, repossessions or net losses of Cat Financial customers could adversely affect its results.

Inherent in the operation of Cat Financial is the credit risk associated with its customers. The creditworthiness of each customer and the rate of delinquencies, repossessions and net losses on customer obligations are directly impacted by several factors, including relevant industry and economic conditions, the availability of capital, the experience and expertise of the customer's management team, commodity prices, political events and the sustained value of the underlying collateral. Any increase in delinquencies, repossessions and net losses on customer obligations could have a material adverse effect on Cat Financial's and our earnings and cash flows. Cat Financial evaluates and adjusts its allowance for credit losses related to past due and non-performing receivables on a regular basis. However, adverse economic conditions or other factors that might cause deterioration of the financial health of its customers could change the timing and level of payments received and necessitate an increase in Cat Financial's estimated losses, which could also have a material adverse effect on Cat Financial's and our earnings and cash flows.

Currency exchange rate fluctuations affect our results of operations.

We conduct operations in many countries involving transactions denominated in a variety of currencies. We are subject to currency-exchange rate risk to the extent that our costs are denominated in currencies other than those in which we earn revenues. Fluctuations in currency exchange rates have had, and will continue to have, an impact on our results as expressed in U.S. dollars. There can be no assurance that currency exchange rate fluctuations will not adversely affect our results of operations, financial condition and cash flows. While the use of currency hedging instruments may provide us with protection from adverse fluctuations in currency exchange rates, by utilizing these instruments we potentially forego the benefits that might result from favorable fluctuations in currency exchange rates. In addition, our outlooks do not assume fluctuations in currency exchange rates. Adverse fluctuations in currency exchange rates from the date of our outlooks could cause our actual results to differ materially from those anticipated in any outlooks and adversely impact our business, results of operations and financial condition.

We also face risks arising from the imposition of exchange controls and currency devaluations. Exchange controls may limit our ability to convert foreign currencies into U.S. dollars or to remit dividends and other payments by our foreign subsidiaries or businesses located in or conducted within a country imposing controls. Currency devaluations result in a diminished value of funds denominated in the currency of the country instituting the devaluation.

Restrictive covenants in our debt agreements could limit our financial and operating flexibility.

We maintain a number of credit facilities to support general corporate purposes (facilities) and have issued debt securities to manage liquidity and fund operations (debt securities). The agreements relating to a number of the facilities and the debt securities contain certain restrictive covenants applicable to us and certain subsidiaries, including Cat Financial. These covenants include maintaining a minimum consolidated net worth (defined as the consolidated shareholder's equity including preferred stock but excluding the pension and other post-retirement benefits balance within accumulated other comprehensive income (loss)), limitations on the incurrence of liens and certain restrictions on consolidation and merger. Cat Financial has also agreed under certain of these agreements not to exceed a certain leverage ratio (consolidated debt to consolidated net worth, calculated (1) on a monthly basis as the average of the leverage ratios determined on the last day of each of the six preceding calendar months and (2) at each December 31), to maintain a minimum interest coverage ratio (profit excluding income taxes, interest expense and net gain/(loss) from interest rate derivatives to interest expense, calculated at the end of each calendar quarter for the rolling four quarter period then most recently ended) and not to terminate, amend or modify its support agreement with us.

A breach of one or more of the covenants could result in adverse consequences that could negatively impact our business, results of operations and financial condition. These consequences may include the acceleration of amounts outstanding under certain of the facilities, triggering of an obligation to redeem certain debt securities, termination of existing unused commitments by our lenders, refusal by our lenders to extend further credit under one or more of the facilities or to enter into new facilities or the lowering or modification of our credit ratings or those of one or more of our subsidiaries.

Sustained increases in funding obligations under our pension plans may impair our liquidity or financial condition.

We maintain certain defined benefit pension plans for our employees, which impose on us certain funding obligations. In determining our future payment obligations under the plans, we assume certain rates of return on the plan assets and a certain level of future benefit payments. Significant adverse changes in credit or capital markets could result in actual rates of return being materially lower than projected and result in increased contribution requirements. We expect to make contributions to our pension plans in the future, and may be required to make contributions that could be material. We may fund contributions through the use of cash on hand, the proceeds of borrowings, shares of our common stock or a combination of the foregoing, as permitted by applicable law. These factors could significantly increase our payment obligations under the plans, and as a result, adversely affect our business and overall financial condition.

LEGAL & REGULATORY RISKS

Our global operations are subject to a wide-range of trade and anti-corruption laws and regulations.

Due to the international scope of our operations, we are subject to a complex system of import- and export-related laws and regulations. These include U.S. regulations issued by Customs and Border Protection, the Bureau of Industry and Security, the Office of Antiboycott Compliance, the Directorate of Defense Trade Controls and the Office of Foreign Assets Control, as well as the counterparts of these agencies in other countries. Any alleged or actual violations may subject us to increased government scrutiny, investigation and civil and criminal penalties, and may limit our ability

to import or export our products or to provide services outside the United States. Furthermore, embargoes and sanctions imposed by the U.S. and other governments restricting or prohibiting sales to specific persons or countries or based on product classification may expose us to potential criminal and civil sanctions. We cannot predict the nature, scope or effect of future regulatory requirements to which our operations might be subject. We also cannot predict in certain locations the manner in which existing laws might be administered or interpreted.

In addition, the U.S. Foreign Corrupt Practices Act and similar foreign anti-corruption laws generally prohibit companies and their intermediaries from making improper payments or providing anything of value to improperly influence foreign government officials for the purpose of obtaining or retaining business or obtaining an unfair advantage. Recent years have seen a substantial increase in the global enforcement of anti-corruption laws. Our operations outside the United States, including in developing countries, expose us to the risk of such violations. Violations of anti-corruption laws or regulations by our employees, intermediaries acting on our behalf, or our joint venture partners may result in severe criminal or civil sanctions. Violations may also disrupt our business, and may result in an adverse effect on our reputation, business and results of operations or financial condition.

International trade policies may impact demand for our products and our competitive position.

Government policies on international trade and investment such as import quotas, capital controls or tariffs, whether adopted by individual governments or addressed by regional trade blocs, can affect the demand for our products and services, impact the competitive position of our products or prevent us from being able to sell products in certain countries. The implementation of more restrictive trade policies (such as more detailed inspections, higher tariffs or new barriers to entry) in countries where we sell large quantities of products and services could negatively impact our business, results of operations and financial condition. For example, a government's adoption of "buy national" policies or retaliation by another government against such policies could have a negative impact on our results of operations.

We may incur additional tax expense or become subject to additional tax exposure.

We are subject to income taxes in the United States and numerous other jurisdictions. Our future results of operations could be adversely affected by changes in the effective tax rate as a result of a change in the mix of earnings between U.S. and non-U.S. jurisdictions or among jurisdictions with differing statutory tax rates. In addition, our future results of operations could also be adversely affected by changes in our overall profitability, changes in tax laws or treaties or in their application or interpretation, changes in tax rates, changes in generally accepted accounting principles, changes in the valuation of deferred tax assets and liabilities, changes in the amount of earnings indefinitely reinvested in certain non-U.S. jurisdictions, the results of audits and examinations of previously filed tax returns and continuing assessments of our tax exposures. We are also subject to the continuous examination of our income tax returns by the U.S. Internal Revenue Service and other tax authorities. We regularly assess the likelihood of an adverse outcome resulting from these examinations. If our effective tax rates were to increase, or if the ultimate determination of our taxes owed is for an amount in excess of amounts previously accrued, our operating results, cash flows and financial condition could be adversely affected. For information regarding additional legal matters related to our taxes, please see Note 6 — "Income taxes" and Note 22 — "Environmental and legal matters" of Part II, Item 8 "Financial Statements and Supplementary Data" to this Annual Report on Form 10-K.

Costs associated with lawsuits or investigations or adverse rulings in enforcement or other legal proceedings may have an adverse effect on our results of operations.

We are subject to a variety of legal proceedings and legal compliance risks in virtually every part of the world. We face risk of exposure to various types of claims, lawsuits and government investigations. We are involved in various claims and lawsuits related to product design, manufacture and performance liability (including claimed asbestos exposure), contracts, employment issues, environmental matters, intellectual property rights, tax, securities and other legal proceedings that arise in and outside of the ordinary course of our business. The industries in which we operate are also periodically reviewed or investigated by regulators, which could lead to enforcement actions, fines and penalties or the assertion of private litigation claims. It is not possible to predict with certainty the outcome of claims, investigations and lawsuits, and we could in the future incur judgments, fines or penalties or enter into settlements of lawsuits and claims that could have an adverse effect on our reputation, business, results of operations or financial condition in any particular period.

The global and diverse nature of our operations means that legal and compliance risks will continue to exist and additional legal proceedings and other contingencies, the outcome of which cannot be predicted with certainty, may arise from time to time. In addition, subsequent developments in legal proceedings may affect our assessment and estimates of loss contingencies recorded as a reserve and require us to make payments in excess of our reserves. Such payments could have an adverse effect on our reputation, business and results of operations or financial condition.

New regulations or changes in financial services regulation could adversely impact Caterpillar and Cat Financial.

Cat Financial's operations are highly regulated by governmental authorities in the locations where it operates, which can impose significant additional costs and/or restrictions on its business. In the United States, for example, certain Cat Financial activities are subject to the U.S. Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank), which includes extensive provisions regulating the financial services industry. As a result, Cat Financial has become and could continue to become subject to additional regulatory costs that could be significant and have an adverse effect on Cat Financial's and our results of operations and financial condition. Changes in regulations or additional regulations in the United States or internationally impacting the financial services industry could also add significant cost or operational constraints that might have an adverse effect on Cat Financial's and our results of operations and financial condition.

We are subject to stringent environmental laws and regulations that impose significant compliance costs.

Our facilities, operations and products are subject to increasingly stringent environmental laws and regulations globally, including laws and regulations governing emissions to noise, air, releases to soil and discharges to water and the generation, handling, storage, transportation, treatment and disposal of non-hazardous and hazardous waste materials. Some environmental laws impose strict, retroactive and joint and several liability for the remediation of the release of hazardous substances, even for conduct that was lawful at the time it occurred, or for the conduct of, or conditions caused by, prior operators, predecessors or other third parties. Failure to comply with environmental laws could expose us to penalties or clean-up costs, civil or criminal liability and sanctions on certain of our activities, as well as damage to property or natural resources. The potential liabilities, sanctions, damages and remediation efforts related to any non-compliance with such laws and regulations could negatively impact our ability to conduct our operations and our financial condition and results of operations. In

addition, there can be no assurances that we will not be adversely affected by costs, liabilities or claims with respect to existing or subsequently acquired operations or under present laws and regulations or those that may be adopted or imposed in the future.

Environmental laws and regulations may change from time to time, as may related interpretations and other guidance. Changes in environmental laws or regulations could result in higher expenses and payments. Uncertainty relating to environmental laws or regulations may also affect how we conduct our operations and structure our investments and could limit our ability to enforce our rights. Changes in environmental and climate change laws or regulations, including laws relating to greenhouse gas emissions, could lead to new or additional investment in product designs and could increase environmental compliance expenditures. Changes in climate change concerns, or in the regulation of such concerns, including greenhouse gas emissions, could subject us to additional costs and restrictions, including increased energy and raw materials costs. If environmental laws or regulations are either changed or adopted and impose significant operational restrictions and compliance requirements upon us or our products, they could negatively impact our reputation, business, capital expenditures, results of operations, financial condition and competitive position.

The Company's amended and restated bylaws provide that the Court of Chancery of the State of Delaware will be the exclusive forum for certain legal actions between the Company and its shareholders, which could discourage claims or limit the ability of the Company's shareholders to bring a claim in a judicial forum viewed by the shareholders as more favorable for disputes with the Company or the Company's directors, officers or other employees.

The Company's amended and restated bylaws provide to the fullest extent permitted by law that unless the Company consents in writing to the selection of an alternative forum, the Court of Chancery of the State of Delaware will be the sole and exclusive forum for (i) any derivative action or proceeding brought on behalf of the Company, (ii) any action asserting a claim of breach of fiduciary duty owed by any director, officer or other employee of the Company to the Company or the Company's shareholders, (iii) any action asserting a claim against the Company or any director or officer or other employee of the Company arising pursuant to any provision of the Delaware General Corporation Law or the Company's certificate of incorporation or bylaws (as either may be amended from time to time) or (iv) any action asserting a claim against the Company or any director or officer or other employee of the Company governed by the internal affairs doctrine.

The exclusive forum provisions in our bylaws could limit our shareholders' ability to bring a claim in a judicial forum that it finds favorable for disputes with the Company or its directors, officers or other employees. Alternatively, if a court were to find the choice of forum provision contained in the Company's amended and restated bylaws to be inapplicable or unenforceable in an action, the Company may incur additional costs associated with resolving such action in other jurisdictions. The exclusive forum provision in the Company's amended and restated bylaws will not preclude or contract the scope of exclusive federal or concurrent jurisdiction for actions brought under the federal securities laws including the Securities Exchange Act of 1934, as amended, or the Securities Act of 1933, as amended, or the respective rules and regulations promulgated thereunder.

ITEM 1B. Unresolved Staff Comments.

None.

ITEM 1C. Executive Officers of the Registrant.

Name and age	Present Caterpillar Inc. position and date of initial election	Principal positions held during the past five years if other than Caterpillar Inc. position currently held
D. James Umpleby III (63)	Chairman of the Board (2018) and Chief Executive Officer (2017)	Group President (2013-2016)
Andrew R.J. Bonfield (59)	Chief Financial Officer (2018)	Group Chief Financial Officer for a multinational electricity and gas utility company (2010-2018)
Bob De Lange (52)	Group President (2017)	Vice President (2015-2016), Worldwide Product Manager, Medium Wheel Loaders, (2013-2014)
Denise C. Johnson (55)	Group President (2016)	Vice President (2012-2016)
Joseph E. Creed (46)	Group President (2021)	Vice President, Oil & Gas and Marine Division (2019-2020), Interim Chief Financial Officer (2018), Vice President, Finance Services Division (2017), Group Chief Financial Officer, Energy and Transportation (2013-2016)
Anthony D. Fassino (51)	Group President (2021)	Vice President, Building Construction Products (2018-2020), Director of Worldwide Forestry Products (2016-2018)
Suzette M. Long (56)	Chief Legal Officer and General Counsel (2017)	Interim Executive Vice President, Law and Public Policy (2017), Deputy General Counsel (2013-2017)
Cheryl H. Johnson (61)	Chief Human Resources Officer (2017)	Executive Vice President of Human Resources for a global multi-industry aerospace, defense and industrial manufacturing company (2012-2017)
G. Michael Marvel (60)	Chief Accounting Officer (2019)	Director of Corporate Financial Reporting (2018-2019), Chief Financial Officer for Solar Turbines Incorporated (2013-2018)

ITEM 2. Properties.

General Information

Caterpillar's operations are highly integrated. Although the majority of our plants are involved primarily in production relating to our Construction Industries, Resource Industries or Energy & Transportation segments, several plants are involved in manufacturing relating to more than one business segment. In addition, several plants reported in our financial statements under the All Other segment are involved in the manufacturing of components that are used in the assembly of products for more than one business segment. Caterpillar's parts distribution centers are involved in the storage and distribution of parts for Construction Industries, Resource Industries and Energy & Transportation. The research and development activities carried on at our Technical Centers in Aurora and Mossville, Illinois involve products for Construction Industries, Resource Industries and Energy & Transportation.

We believe the properties we own to be generally well maintained and adequate for present use. Through planned capital expenditures, we expect these properties to remain adequate for future needs. Properties we lease are covered by leases expiring over terms of generally one to ten years. We do not anticipate any difficulty in retaining occupancy of any leased facilities, either by renewing leases prior to expiration or by replacing them with equivalent leased facilities.

Headquarters and Other Key Offices

Our corporate headquarters is in a leased office located in Deerfield, Illinois. Our Financial Products business is headquartered in offices in Nashville, Tennessee. Additional key offices are located inside and outside the United States.

Technical Center, Training Centers, Demonstration Areas and Proving Grounds

We operate Technical Centers located in Aurora and Mossville, Illinois; Wuxi, China; and Chennai, India. Our demonstration centers are located in Tinaja Hills, Arizona; Edwards, Illinois; Chichibu, Japan and Malaga, Spain. We have various other technical and training centers, demonstration areas and proving grounds located both inside and outside the United States.

Parts Distribution Centers

Distribution of our parts is conducted from parts distribution centers inside and outside the United States. We operate parts distribution centers in the following locations: Arvin, California; Denver, Colorado; Miami, Florida; Atlanta, Georgia; Morton, Illinois; St. Paul, Minnesota; Clayton, Ohio; York, Pennsylvania; Waco, Texas; Spokane, Washington; Melbourne, Australia; Queensland, Australia; Grimbergen, Belgium; Piracicaba, Brazil; Shanghai, China; Sagami, Japan; San Luis Potosi, Mexico; Singapore, Republic of Singapore; Moscow, Russia; Johannesburg, South Africa; and Dubai, United Arab Emirates. We also own or lease other facilities that support our distribution activities.

Remanufacturing and Components

Remanufacturing of our products is reported in our Energy & Transportation segment and is conducted primarily at the facilities in the following locations: Franklin, Indiana; Bogor, Indonesia; Corinth, Mississippi; Prentiss County, Mississippi; West Fargo, North Dakota; Piracicaba, Brazil; Shanghai, China; and Nuevo Laredo, Mexico.

Component manufacturing is reported in the All Other segment and is conducted primarily at facilities in the following locations: East Peoria, Illinois; Mapleton, Illinois; Peoria, Illinois; Bogor, Indonesia; Menominee, Michigan; Boonville, Missouri; West Plains, Missouri; Goldsboro, North Carolina; Sumter, South Carolina; Tianjin, China; Xuzhou, China; Atessa, Italy; Bazzano, Italy; Frosinone, Italy; San Eusebio, Italy; Ramos Arizpe, Mexico; Pyeongtaek, South Korea; and Skinningrove, United Kingdom.

We also lease or own other facilities that support our remanufacturing and component manufacturing activities.

Manufacturing

Manufacturing of products for our Construction Industries, Resource Industries and Energy & Transportation segments is conducted primarily at the locations listed below. These facilities are believed to be suitable for their intended purposes, with adequate capacities for current and projected needs for existing products.

Our principal manufacturing facilities include those used by the following segments in the following locations:

Segment	U.S. Facilities	Facilities Outside the U.S.
Construction Industries	Arkansas: North Little Rock	Brazil: Campo Largo, Piracicaba
	Georgia: Athens	China: Suzhou, Wujiang, Xuzhou, Qingzhou
	Illinois: Decatur, East Peoria	France: Grenoble, Echirolles
	Kansas: Wamego	Hungary: Godollo
	Minnesota: Brooklyn Park	India: Thiruvallur
	North Carolina: Clayton, Sanford	Indonesia: Jakarta
	Texas: Victoria	Italy: Minerbio, Cattolica
		Japan: Akashi
		Mexico: Torreon
		Netherlands: Den Bosch
		Poland: Janow, Sosnowiec
		Russia: Tosno
		Thailand: Rayong
		United Kingdom: Desford, Stockton
Resource Industries	Illinois: Decatur, East Peoria	China: Qingzhou, Wuxi
	South Carolina: Sumter	Germany: Dortmund, Lunen
	Texas: Denison	India: Thiruvallur
	Wisconsin: South Milwaukee	Indonesia: Batam
		Italy: Jesi
		Mexico: Acuna, Monterrey, Reynosa
Energy & Transportation		Russia: Tosno
		Thailand: Rayong
		United Kingdom: Peterlee, Springvale
	Alabama: Albertville, Montgomery	Australia: Cardiff, Perth, Redbank, Revesby
	California: San Diego	Brazil: Curitiba, Hortolandia, Piracicaba, Sete Lagoas
	Georgia: Griffin, Patterson	China: Tianjin, Wuxi
	Illinois: Mossville, Mapleton, Pontiac	Czech Republic: Zatec, Zebrak
	Indiana: Lafayette, Muncie	Germany: Kiel, Mannheim, Rostock
	Kentucky: Decoursey, Mayfield	India: Aurangabad, Hosur
	Oklahoma: Broken Arrow	Indonesia: Batam
	North Carolina: Winston-Salem	Italy: Pistoria
	Texas: Channelview, DeSoto, Fort Worth, Mabank, San Antonio, Schertz, Seguin, Sherman	Mexico: San Luis Potosi, Tijuana
		United Kingdom: Larne, Peterborough, Sandiacre, South Queensferry, Stafford, Wimborne

ITEM 3. Legal Proceedings.

Certain legal proceedings in which we are involved are discussed in Note 22 — "Environmental and legal matters" of Part II, Item 8 "Financial Statements and Supplementary Data" and should be considered an integral part of Part I, Item 3 "Legal Proceedings", which is hereby incorporated by reference.

ITEM 4. Mine Safety Disclosures.

Not applicable.

PART II

ITEM 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.

Common Stock (NYSE: CAT)

Listing Information: Caterpillar common stock is listed on the New York Stock Exchange in the United States, and on stock exchanges in France and Switzerland.

Number of Shareholders: Shareholders of record at the end of 2021 totaled 22,559, compared with 23,299 at the end of 2020.

Performance Graph: Total Cumulative Shareholder Return for Five-Year Period Ending December 31, 2021

The graph below shows the cumulative shareholder return assuming an investment of \$100 on December 31, 2016, and reinvestment of dividends issued thereafter.

	2016	2017	2018	2019	2020	2021
Caterpillar Inc.	\$ 100.00	\$ 175.03	\$ 144.30	\$ 172.46	\$ 218.96	\$ 253.90
S&P 500	\$ 100.00	\$ 121.83	\$ 116.49	\$ 153.17	\$ 181.35	\$ 233.41
S&P 500 Machinery	\$ 100.00	\$ 133.94	\$ 121.46	\$ 158.26	\$ 195.32	\$ 234.70

Non-U.S. Employee Stock Purchase Plans

As of December 31, 2021, we had 28 employee stock purchase plans (the "EIP Plans") administered outside the United States for our non-U.S. employees, which had approximately 13,000 active participants in the aggregate. During the fourth quarter of 2021, approximately 83,000 shares of Caterpillar common stock were purchased by the EIP Plans pursuant to the terms of such plans.

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased ^{2,3}	Average Price Paid per Share ^{2,3}	Total Number of Shares Purchased as Part of Publicly Announced Program	Approximate Dollar Value of Shares that May Yet be Purchased under the Program (in billions) ¹
October 1-31, 2021	908,433	\$ 195.66	908,433	\$ 2.966
November 1-30, 2021	2,350,143	\$ 205.52	2,350,143	\$ 2.483
December 1-31, 2021	1,956,330	\$ 196.66	1,956,330	\$ 2.099
Total	5,214,906	\$ 200.48	5,214,906	

¹ In July 2018, the Board approved a share repurchase authorization of up to \$10.0 billion of Caterpillar common stock effective January 1, 2019, with no expiration (the 2018 Authorization). As of December 31, 2021, approximately \$2.1 billion remained available under the 2018 Authorization.

² During the fourth quarter of 2021, we entered into an ASR with a third-party financial institution to purchase \$500 million of our common stock. In November 2021, upon payment of the \$500 million to the financial institution, we received 2.0 million shares. In December 2021, upon final settlement of the ASR, we received an additional 0.5 million shares. In total, we repurchased 2.5 million shares under this ASR at an average price per share of \$200.93.

³ In October, November and December of 2021, we repurchased 0.9 million, 0.4 million and 1.4 million shares respectively, for an aggregate of \$545 million in open market transactions at an average price per share of \$195.66, \$205.54 and \$201.33, respectively.

ITEM 6. [Reserved]

ITEM 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

The following Management's Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is intended to provide information that will assist the reader in understanding the company's Consolidated Financial Statements, the changes in certain key items in those financial statements between select periods and the primary factors that accounted for those changes. In addition, we discuss how certain accounting principles, policies and critical estimates affect our Consolidated Financial Statements. Our discussion also contains certain forward looking statements related to future events and expectations. This MD&A should be read in conjunction with our discussion of cautionary statements and significant risks to the company's business under Item 1A. Risk Factors of the 2021 Form 10-K.

Highlights for 2021 include:

- Sales and revenues for 2021 were \$50.971 billion, an increase of 22 percent from 2020. Sales were higher across all regions and in the three primary segments.
- Operating profit as a percent of sales and revenues was 13.5 percent in 2021, compared with 10.9 percent in 2020.
- Profit was \$11.83 per share for 2021, and excluding the items in the table below, **adjusted profit per share** was \$10.81. For 2020, profit was \$5.46 per share, and excluding the items in the table below, adjusted profit per share was \$6.56.
- In order for our results to be more meaningful to our readers, we have separately quantified the impact of several significant items. A detailed reconciliation of GAAP to non-GAAP financial measures is included on page 38.

	Full Year 2021		Full Year 2020	
	Profit Before Taxes	Profit Per Share	Profit Before Taxes	Profit Per Share
(Dollars in millions except per share data)				
Profit	\$ 8,204	\$ 11.83	\$ 3,995	\$ 5.46
Mark-to-market (gains) losses	(833)	(1.17)	383	0.55
Restructuring costs	90	0.15	354	0.55
Adjusted profit	\$ 7,461	\$ 10.81	\$ 4,732	\$ 6.56

- Enterprise operating cash flow was \$7.2 billion in 2021. Caterpillar ended 2021 with \$9.3 billion of enterprise cash.

OVERVIEW

Our sales and revenues for 2021 were \$50.971 billion, an increase of \$9.223 billion, or 22 percent, compared with \$41.748 billion in 2020. The increase was primarily due to higher **sales volume**, driven by higher end-user demand for equipment and **services** and the impact from changes in **dealer inventories**, along with favorable **price realization**. Profit per share was \$11.83 in 2021, compared with profit per share of \$5.46 in 2020. Profit was \$6.489 billion in 2021, compared with \$2.998 billion in 2020. The increase was primarily due to higher sales volume and favorable price realization. Mark-to-market gains for remeasurement of **pension and other postemployment benefit (OPEB)** plans, a lower effective tax rate, favorable impacts from foreign **currency** exchange (gains) losses and lower restructuring expenses were mostly offset by unfavorable **manufacturing costs** and higher selling, general and administrative (SG&A) and research and development (R&D) expenses.

Fourth-quarter 2021 sales and revenues were \$13.798 billion, up \$2.563 billion, or 23 percent, from \$11.235 billion in the fourth quarter of 2020. Fourth-quarter 2021 profit was \$3.91 per share, compared with \$1.42 per share in the fourth quarter of 2020. Fourth-quarter 2021 profit was \$2.120 billion, compared with \$780 million in the fourth quarter of 2020.

Response to COVID-19 and Global Business Conditions:

We continue to monitor a variety of external factors including the ongoing impact of the COVID-19 pandemic around the world and have implemented safeguards in our facilities to protect

team members in line with local governmental requirements and guidance from health authorities.

Operations continue to be impacted by a variety of external factors including the pandemic, supply chain disruptions and associated cost and labor pressures. Areas of particular focus include certain components, transportation and raw materials. Transportation shortages have resulted in delays and increased costs. In addition, our suppliers are dealing with availability issues and freight delays, which leads to delays of production in our facilities. We continue to develop and modify contingency plans to minimize supply chain challenges that may impact our ability to meet increasing customer demand. To help mitigate supply chain challenges, we have proactively redirected components and altered our assembly processes. We continue to assess the environment and are taking appropriate price actions in response to rising costs. We will continue to monitor the situation as conditions remain fluid and evolve, but we expect these challenges to continue this year.

Notes:

- Glossary of terms included on pages 30-31; first occurrence of terms shown in bold italics.
- Information on non-GAAP financial measures is included on page 38.
- Some amounts within this report are rounded to the millions or billions and may not add. In addition, the sum of the components reported across periods may not equal the total amount reported year-to-date due to rounding.

2021 COMPARED WITH 2020

CONSOLIDATED SALES AND REVENUES

The chart above graphically illustrates reasons for the change in consolidated sales and revenues between 2020 (at left) and 2021 (at right). Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees.

Total sales and revenues for 2021 were \$50.971 billion, an increase of \$9.223 billion, or 22 percent, compared with \$41.748 billion in 2020. The increase was primarily due to higher sales volume, driven by higher end-user demand for equipment and services and the impact from changes in dealer inventories, along with favorable price realization. Dealers decreased their inventories about \$2.9 billion in 2020, compared to a decrease of about \$100 million in 2021.

Sales were higher across all regions and in the three primary segments.

North America sales increased 23 percent driven by higher end-user demand for equipment and services, the impact from changes in dealer inventories and favorable price realization. Dealers decreased inventories more during 2020 than during 2021.

Sales increased 51 percent in **Latin America** due to higher end-user demand for equipment and services and the impact from changes in dealer inventories. Dealers decreased inventories during 2020, compared to an increase during 2021.

EAME sales increased 24 percent due to higher end-user demand for equipment and services, the impact of changes in dealer

inventories, favorable currency impacts primarily related to a stronger euro and British pound and favorable price realization. Dealers decreased inventories during 2020, compared to an increase during 2021.

Asia/Pacific sales increased 15 percent driven by higher end-user demand for equipment and services, the impact of changes in dealer inventories and favorable currency impacts related to a stronger Australian dollar and Chinese yuan. Dealers decreased their inventories during 2020, compared to remaining about flat during 2021.

Dealers decreased their inventories about \$2.9 billion in 2020, compared to a decrease of about \$100 million in 2021. Dealers are independent, and the reasons for changes in their inventory levels vary, including their expectations of future demand and product delivery times. Dealers' demand expectations take into account seasonal changes, macroeconomic conditions, machine rental rates and other factors. Delivery times can vary based on availability of product from Caterpillar factories and product distribution centers. We expect dealer inventories to be about flat in 2022 compared to 2021.

¹ Includes revenues from Machinery, Energy & Transportation of \$351 million and \$362 million in 2021 and 2020, respectively.

CONSOLIDATED OPERATING PROFIT

The chart above graphically illustrates reasons for the change in consolidated operating profit between 2020 (at left) and 2021 (at right). Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees. The bar entitled Other includes **consolidating adjustments** and **Machinery, Energy & Transportation other operating (income) expenses**.

Operating profit was \$6.878 billion in 2021, an increase of \$2.325 billion, or 51 percent, compared with \$4.553 billion in 2020. The increase was due to higher sales volume, favorable price realization, higher profit from Financial Products and lower restructuring expenses (included in other), partially offset by unfavorable manufacturing costs and higher SG&A/R&D expenses.

Unfavorable manufacturing costs reflected increased freight and higher material costs. In addition, unfavorable period manufacturing costs were driven by higher short-term incentive compensation expense, which was reinstated in 2021, and higher labor costs. Unfavorable period manufacturing costs were mostly offset by favorable cost absorption and lower warranty expense. Cost absorption was favorable as inventory increased more during 2021 than during 2020.

Higher SG&A/R&D expenses reflected higher short-term incentive compensation expense and investments aligned with the company's strategy for profitable growth, including higher labor costs and acquisition-related expenses.

Short-term incentive compensation expense, which was reinstated in 2021, was \$1.3 billion in 2021, compared to no short-term incentive compensation expense recognized in 2020. Short-term incentive compensation expense is directly related to financial and operational performance, measured against targets set annually. For 2022, we expect short-term incentive compensation expense will be about \$1.0 billion.

Operating profit margin was 13.5 percent in 2021, compared with 10.9 percent in 2020.

Profit (Loss) by Segment

(Millions of dollars)	2021	2020	\$ Change	% Change
Construction Industries	\$ 3,706	\$ 2,373	\$ 1,333	56%
Resource Industries	1,291	896	395	44%

Corporate Items and Eliminations	(92)	(53)	(39)	
Financial Products	816	537	279	52%
Consolidating Adjustments	(301)	(305)	4	
Consolidated Operating Profit	\$ 6,878	\$ 4,553	\$ 2,325	51%

Other Profit/Loss and Tax Items

- Interest expense excluding Financial Products in 2021 was \$488 million, compared with \$514 million in 2020. The decrease was due to lower average debt outstanding during 2021, compared with 2020.

Other income/expense in 2021 was income of \$1.814 billion, compared with expense of \$44 million in 2020. The change was primarily due to mark-to-market gains for remeasurement of pension and other postretirement benefit (OPEB) plans in 2021, compared with mark-to-market losses in 2020. Favorable impacts from foreign currency exchange gains (losses) and lower pension and OPEB plan costs also contributed to the change.

The company experienced foreign currency exchange net losses in 2020, compared with net gains in 2021.

- The provision for income taxes for 2021 reflected an annual effective tax rate of 22.9 percent compared with 27.8 percent for 2020, excluding the discrete items discussed in the following paragraph. The decrease from 2020 was primarily related to changes in the geographic mix of profits from a tax perspective.

The provision for income taxes for 2021 also included the following:

- o A tax charge of \$190 million related to \$833 million of pension and OPEB mark-to-market gains in 2021, compared to a \$82 million tax benefit related to \$383 million of mark-to-market losses in 2020.
- o A tax benefit of \$36 million to reflect changes in estimates related to prior year's U.S. taxes in 2021 compared to \$80 million in 2020.
- o A tax benefit of \$63 million in 2021, compared with \$49 million in 2020, for the settlement of stock-based compensation awards with associated tax deductions in excess of cumulative U.S. GAAP compensation expense.
- o A tax benefit of \$38 million in 2021 to recognize U.S. capital losses.

Construction Industries

Construction Industries' total sales were \$22.106 billion in 2021, an increase of \$5.188 billion, or 31 percent, compared with \$16.918 billion in 2020. The increase was due to higher sales volume, favorable price realization and favorable currency impacts related to the Chinese yuan, euro and Australian dollar. The increase in sales volume was driven by higher end-user demand for equipment and aftermarket parts and the impact from changes in dealer inventories. Dealers decreased inventories during 2020, compared with dealer inventories that were about flat during 2021.

- In North America, sales increased due to higher end-user demand, the impact from changes in dealer inventories and favorable price realization. Dealers decreased inventories more in 2020 than in 2021.
- Sales increased in Latin America primarily due to the impact from changes in dealer inventories, higher end-user demand and favorable price realization. Dealers increased inventories during 2021, compared with a decrease in 2020.

- In EAME, sales increased due to higher end-user demand, the impact from changes in dealer inventories and favorable currency impacts from a stronger euro and British pound. Dealers increased inventories during 2021, compared with a decrease in 2020.
- Sales increased in Asia/Pacific due to the impact from changes in dealer inventories and favorable currency impacts related to the Chinese yuan and Australian dollar. Dealers decreased inventories during 2020, compared with a slight increase in 2021.

Construction Industries' profit was \$3.706 billion in 2021, an increase of \$1.333 billion, or 56 percent, compared with \$2.373 billion in 2020. The increase was mainly due to higher sales volume and favorable price realization, partially offset by unfavorable manufacturing costs and higher SG&A/R&D expenses.

Unfavorable manufacturing costs reflected higher material costs, increased variable labor and burden, primarily freight, and higher period manufacturing costs. The increase in period manufacturing costs was driven by higher short-term incentive compensation expense and higher labor costs.

Higher SG&A/R&D expenses were driven primarily by higher short-term incentive compensation expense.

Construction Industries' profit as a percent of total sales was 16.8 percent in 2021, compared with 14.0 percent in 2020.

Resource Industries

Resource Industries' total sales were \$9.963 billion in 2021, an increase of \$2.057 billion, or 26 percent, compared with \$7.906 billion in 2020. The increase was due to higher sales volume driven by higher end-user demand for equipment and aftermarket parts and the impact from changes in dealer inventories. End-user demand was higher in mining as well as heavy construction and quarry and aggregates. Dealers decreased inventories more during 2020 than during 2021.

Resource Industries' profit was \$1.291 billion in 2021, an increase of \$395 million, or 44 percent, compared with \$896 million in 2020. The increase was mainly due to higher sales volume and favorable price realization, partially offset by unfavorable manufacturing costs and higher SG&A/R&D expenses.

Unfavorable manufacturing costs reflected higher variable labor and burden, primarily freight, as well as higher material and period manufacturing costs, partially offset by the favorable impact of cost absorption. Higher period manufacturing costs were driven by higher short-term incentive compensation expense. Cost absorption was favorable as inventory increased during 2021, compared with a decrease during 2020.

Higher SG&A/R&D expenses were driven primarily by higher short-term incentive compensation expense and investments aligned with growth initiatives, primarily labor costs.

Resource Industries' profit as a percent of total sales was 13.0 percent for 2021, compared with 11.3 percent for 2020.

Energy & Transportation

Sales by Application

(Millions of dollars)	2021	2020	\$ Change	% Change
Oil and Gas	\$ 4,460	\$ 3,701	\$ 759	21%
Power Generation	4,292	3,963	329	8%
Industrial	3,612	2,945	667	23%
Transportation	4,306	4,055	251	6%
External Sales	16,670	14,664	2,006	14%
Inter-Segment	3,617	2,806	811	29%
Total Sales	<u>\$ 20,287</u>	<u>\$ 17,470</u>	<u>\$ 2,817</u>	16%

Energy & Transportation's total sales were \$20.287 billion in 2021, an increase of \$2.817 billion, or 16 percent, compared with \$17.470 billion in 2020. Sales increased across all applications and inter-segment sales.

- Oil and Gas – Sales increased mainly due to higher sales of reciprocating engine aftermarket parts in all regions as well as higher sales in turbines and turbine-related services.
- Power Generation – Sales increased due to higher sales of aftermarket parts and large reciprocating engines, primarily data centers. Sales also increased due to favorable currency impacts.
- Industrial – Sales increased due to higher demand across all regions.
- Transportation – Sales increased due to higher deliveries of locomotives, which were primarily international, and rail services. Sales also increased due to favorable currency impacts.

Energy & Transportation's profit was \$2.768 billion in 2021, an increase of \$363 million, or 15 percent, compared with \$2.405 billion in 2020. The increase was due to higher sales volume and favorable price realization, partially offset by unfavorable manufacturing costs and higher SG&A/R&D expenses. Increased manufacturing costs were mainly driven by higher period manufacturing costs and higher variable labor and burden, primarily freight. In addition, segment profit was favorably impacted by lower other operating expense.

Both SG&A/R&D expenses and period manufacturing costs were driven by higher short-term incentive compensation expense and investments aligned with growth initiatives, including acquisition-related expenses.

Energy & Transportation's profit as a percent of total sales was 13.6 percent in 2021, compared with 13.8 percent in 2020.

Financial Products Segment

Financial Products' segment revenues were \$3.073 billion in 2021, an increase of \$29 million, or 1 percent, from 2020.

Financial Products' segment profit was \$908 million in 2021, an increase of \$318 million, or 54 percent, compared with \$590 million in 2020. The increase was primarily due to lower provision for credit losses at Cat Financial, a favorable impact from returned or repossessed equipment and a favorable impact from equity securities in Insurance Services. These favorable impacts were partially offset by an increase in SG&A expenses primarily due to higher short-term incentive compensation expense.

At the end of 2021, past dues at Cat Financial were 1.95 percent, compared with 3.49 percent at the end of 2020. Past dues decreased across all portfolio segments as global markets generally improved. Write-offs, net of recoveries, were \$205 million for 2021, compared with \$222 million for 2020. As of December 31, 2021, Cat Financial's allowance for credit losses totaled \$337 million, or 1.22 percent of finance receivables, compared with \$479 million, or 1.77 percent of finance receivables at December 31, 2020.

Corporate Items and Eliminations

Expense for corporate items and eliminations was \$1.480 billion in 2021, a slight increase of \$46 million from 2020.

FOURTH QUARTER 2021 COMPARED WITH FOURTH QUARTER 2020

CONSOLIDATED SALES AND REVENUES

The chart above graphically illustrates reasons for the change in consolidated sales and revenues between the fourth quarter of 2020 (at left) and the fourth quarter of 2021 (at right). Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees.

Total sales and revenues for the fourth quarter of 2021 were \$13.798 billion, an increase of \$2.563 billion, or 23 percent, compared with \$11.235 billion in the fourth quarter of 2020. The increase was mostly due to higher sales volume, driven by higher end-user demand for equipment and services and the impact from changes in dealer inventories, along with favorable price realization. Dealers decreased inventories during the fourth quarter of 2020, compared to remaining about flat during the fourth quarter of 2021.

Sales were higher across the three primary segments.

North America sales increased 29 percent due to the impact from changes in dealer inventories, higher end-user demand for services and favorable price realization. Dealers decreased inventories during the fourth quarter of 2020, compared with dealer inventories that were about flat during the fourth quarter of 2021.

Sales increased 40 percent in Latin America primarily due to higher end-user demand for equipment and services and favorable price realization.

EAME sales increased 24 percent primarily due to higher end-user demand for equipment and services and the impact from changes in dealer inventories. Dealers decreased inventories more during the fourth quarter of 2020 than during the fourth quarter of 2021.

Asia/Pacific sales increased 9 percent primarily due to the impact from changes in dealer inventories, higher end-user demand for equipment and services and favorable price realization. Dealers decreased inventories during the fourth quarter of 2020, compared with an increase during the fourth quarter of 2021.

Dealers decreased inventories about \$1.100 billion during the fourth quarter of 2020, compared to a decrease of about \$100 million during the fourth quarter of 2021. Dealers are independent, and the reasons for changes in their inventory levels vary, including their expectations of future demand and product delivery times. Dealers' demand expectations take into account seasonal changes, macroeconomic conditions, machine rental rates and other factors. Delivery times can vary based on availability of product from Caterpillar factories and product distribution centers.

Sales and Revenues by Segment

(Millions of dollars)	Fourth Quarter 2020	Sales Volume	Price Realization	Currency	Inter- Segment/ Other	Fourth Quarter 2021	\$ Change	% Change

CONSOLIDATED OPERATING PROFIT

The chart above graphically illustrates reasons for the change in consolidated operating profit between the fourth quarter of 2020 (at left) and the fourth quarter of 2021 (at right). Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees. The bar entitled Other includes consolidating adjustments and Machinery, Energy & Transportation other operating (income) expenses.

Operating profit for the fourth quarter of 2021 was \$1.611 billion, an increase of \$231 million, or 17 percent, compared with \$1.380 billion in the fourth quarter of 2020. Higher manufacturing costs and selling, general and administrative (SG&A) and research and development (R&D) expenses were more than offset by higher sales volume, favorable price realization and net restructuring income due to a gain on the sale of a facility.

Unfavorable manufacturing costs reflected higher variable labor and burden, primarily freight, and higher material costs.

The increase in SG&A/R&D expenses was driven by higher short-term incentive compensation expense, which was reinstated

in 2021, higher labor costs due to increased headcount and investments aligned with the company's strategy for profitable growth, including acquisition-related expenses.

Short-term incentive compensation expense, which was reinstated in 2021, was about \$200 million in the fourth quarter of 2021, compared to no short-term incentive compensation expense recognized in the fourth quarter of 2020.

Operating profit margin was 11.7 percent for the fourth quarter of 2021, compared with 12.3 percent for the fourth quarter of 2020.

Profit (Loss) by Segment

(Millions of dollars)	Fourth Quarter 2021	Fourth Quarter 2020	\$ Change	% Change
Construction Industries	\$ 788	\$ 630	\$ 158	25%
Resource Industries	305	273	32	12%
Energy & Transportation	675	687	(12)	(2%)

Corporate Items and Eliminations	(281)	(281)	—	
Machinery, Energy & Transportation	1,475	1,306	169	13%
Financial Products Segment	248	195	53	27%
Corporate Items and Eliminations	(37)	(47)	10	
Financial Products	211	148	63	43%
Consolidating Adjustments	(75)	(74)	(1)	
Consolidated Operating Profit	\$ 1,611	\$ 1,380	\$ 231	17%

Other Profit/Loss and Tax Items

- Interest expense excluding Financial Products in the fourth quarter of 2021 was \$112 million, compared with \$130 million in the fourth quarter of 2020. The decrease was due to lower average debt outstanding during the fourth quarter of 2021, compared with the fourth quarter of 2020.
- Other income (expense) in the fourth quarter of 2021 was income of \$1.063 billion, compared with expense of \$309 million in the fourth quarter of 2020. The change was primarily driven by mark-to-market gains for remeasurement of pension and OPEB plans in the fourth quarter of 2021, compared with mark-to-market losses in the fourth quarter of 2020.
- The provision for income taxes for the fourth quarter of 2021 reflected an annual effective tax rate of 22.9 percent, compared with 27.8 percent for the fourth quarter of 2020, excluding the discrete items discussed in the following paragraph. The decrease from 2020 was primarily related to changes in the geographic mix of profits from a tax perspective.

The provision for income taxes for the fourth quarter of 2021 also included the following:

- o A tax benefit of \$118 million for the change from the third-quarter estimated annual tax rate of 25 percent, compared to a \$96 million benefit for the reduction in the annual effective tax rate in the fourth quarter of 2020.
- o A tax charge of \$190 million related to \$833 million of pension and OPEB mark-to-market gains in the fourth quarter of 2021, compared to a \$92 million tax benefit related to \$438 million of mark-to-market losses in the fourth quarter of 2020.
- o A tax benefit of \$40 million in the fourth quarter of 2021 primarily related to recognition of U.S. capital losses compared to \$28 million in the fourth quarter of 2020 for the settlement of stock-based compensation awards with associated tax deductions in excess of cumulative U.S. GAAP compensation expense.

Construction Industries

Construction Industries' total sales were \$5.736 billion in the fourth quarter of 2021, an increase of \$1.228 billion, or 27 percent, compared with \$4.508 billion in the fourth quarter of 2020. The increase was due to higher sales volume, driven by the impact from changes in dealer inventories and higher end-user demand, along with favorable price realization. Dealers decreased inventories more during the fourth quarter of 2020 than during the fourth quarter of 2021.

- In North America, sales increased due to higher sales volume and favorable price realization. Higher sales volume was driven by the impact from changes in dealer inventories as dealers decreased inventories more during the fourth quarter of 2020 than during the fourth quarter of 2021.
- Sales increased in Latin America primarily due to higher sales volume and favorable price realization. Higher sales volume was

driven by higher end-user demand and the impact from changes in dealer inventories. Dealers increased inventories during the fourth quarter of 2021, compared to a decrease during the fourth quarter of 2020.

- In EAME, sales increased due to higher sales volume from higher end-user demand and the impact of changes in dealer inventories. Dealers decreased inventories more during the fourth quarter of 2020 than during the fourth quarter of 2021.
- Sales decreased in Asia/Pacific primarily due to lower sales volume, partially offset by favorable price realization. Decreased sales volume reflected lower end-user demand, partially offset by the impact from changes in dealer inventories. Lower sales in China, driven by lower end-user demand, were partially offset by higher sales across most of the rest of the region. Dealers decreased inventories during the fourth quarter of 2020, compared to an increase during the fourth quarter of 2021.

Construction Industries' profit was \$788 million in the fourth quarter of 2021, an increase of \$158 million, or 25 percent, compared with \$630 million in the fourth quarter of 2020. Higher manufacturing costs and SG&A/R&D expenses were more than offset by higher sales volume and favorable price realization. Increased manufacturing costs reflected higher variable labor and burden, primarily freight, as well as higher material costs.

The increase in SG&A/R&D expenses was driven by higher short-term incentive compensation expense.

Construction Industries' profit as a percent of total sales was 13.7 percent in the fourth quarter of 2021, compared with 14.0 percent in the fourth quarter of 2020.

Resource Industries

Resource Industries' total sales were \$2.762 billion in the fourth quarter of 2021, an increase of \$582 million, or 27 percent, compared with \$2.180 billion in the fourth quarter of 2020. The increase was primarily due to higher sales volume, driven by higher end-user demand for equipment and aftermarket parts, and favorable price realization. End-user demand was higher in mining as well as heavy construction and quarry and aggregates.

Resource Industries' profit was \$305 million in the fourth quarter of 2021, an increase of \$32 million, or 12 percent, compared with \$273 million in the fourth quarter of 2020. Increased manufacturing costs and SG&A/R&D expenses were more than offset by higher sales volume and favorable price realization. Unfavorable manufacturing costs reflected higher variable labor and burden, primarily freight, and material costs.

The increase in SG&A/R&D expenses was driven by investments aligned with growth initiatives, primarily labor, and higher short-term incentive compensation expense.

Resource Industries' profit as a percent of total sales was 11.0 percent in the fourth quarter of 2021, compared with 12.5 percent in the fourth quarter of 2020.

Energy & Transportation

Sales by Application

(Millions of dollars)	Fourth Quarter 2021	Fourth Quarter 2020	\$ Change	% Change
Oil and Gas	\$ 1,320	\$ 1,079	\$ 241	22%
Power Generation	1,267	1,180	87	7%
Industrial	952	736	216	29%
Transportation	1,212	1,035	177	17%
External Sales	4,751	4,030	721	18%
Inter-Segment	977	781	196	25%
Total Sales	<u>\$ 5,728</u>	<u>\$ 4,811</u>	<u>\$ 917</u>	<u>19%</u>

Energy & Transportation's total sales were \$5.728 billion in the fourth quarter of 2021, an increase of \$917 million, or 19 percent, compared with \$4.811 billion in the fourth quarter of 2020. Sales increased across all applications and inter-segment sales.

- Oil and Gas – Sales increased for reciprocating engines aftermarket parts across all regions, turbines and turbine-related services and reciprocating engines used in gas compression.
- Power Generation – Sales rose due to higher sales volume in reciprocating engines aftermarket parts and small reciprocating engine applications.
- Industrial – Sales were up due to higher demand across all regions.
- Transportation – Sales increased due to higher deliveries of locomotives, which were primarily international, and rail services.

Energy & Transportation's profit was \$675 million in the fourth quarter of 2021, a decrease of \$12 million, or 2 percent, compared with \$687 million in the fourth quarter of 2020. The decrease was due to unfavorable manufacturing costs and higher SG&A/R&D expenses, mostly offset by higher sales volume and favorable price realization. Unfavorable manufacturing costs reflected higher variable labor and burden, primarily freight, higher period manufacturing and material costs.

Both SG&A/R&D expenses and period manufacturing costs increased primarily due to higher short-term incentive compensation expense and investments aligned with growth initiatives, including acquisition-related expenses.

Energy & Transportation's profit as a percent of total sales was 11.8 percent in the fourth quarter of 2021, compared with 14.3 percent in the fourth quarter of 2020.

Financial Products Segment

Financial Products' segment revenues were \$776 million in the fourth quarter of 2021, an increase of \$33 million, or 4 percent, from the fourth quarter of 2020.

Financial Products' segment profit was \$248 million in the fourth quarter of 2021, an increase of \$53 million, or 27 percent, compared with \$195 million in the fourth quarter of 2020. The increase was mainly due to a favorable impact from returned or repossessed equipment and lower provision for credit losses at Cat Financial, partially offset by an increase in SG&A expenses primarily due to higher short-term incentive compensation expense.

Corporate Items and Eliminations

Expense for corporate items and eliminations was \$318 million in the fourth quarter of 2021, about flat to the fourth quarter of 2020.

2020 COMPARED WITH 2019

For discussions related to the consolidated sales and revenue and consolidated operating profit between 2020 and 2019, refer to Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations of the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2020, which was filed with the United States Securities and Exchange Commission on February 17, 2021.

RESTRUCTURING COSTS

In 2022, we expect to incur about \$600 million of restructuring costs primarily related to strategic actions to address a small number of products. We expect that prior restructuring actions will result in an incremental benefit to operating costs, primarily Costs of goods sold and SG&A expenses of about \$75 million in 2022 compared with 2021.

Additional information related to restructuring costs is included in Note 25 - "Restructuring Costs" of Part II, Item 8 "Financial Statements and Supplemental Data."

GLOSSARY OF TERMS

1. **Adjusted Operating Profit Margin** – Operating profit excluding restructuring costs as a percent of sales and revenues.
2. **Adjusted Profit Per Share** – Profit per share excluding pension and OPEB mark-to-market gains/losses and restructuring income/costs.
3. **All Other Segment** – Primarily includes activities such as: business strategy; product management and development; manufacturing and sourcing of filters and fluids, undercarriage, ground-engaging tools, fluid transfer products, precision seals, rubber sealing and connecting components primarily for Cat® products; parts distribution; integrated logistics solutions; distribution services responsible for dealer development and administration, including a wholly owned dealer in Japan; dealer portfolio management and ensuring the most efficient and effective distribution of machines, engines and parts; brand management and marketing strategy; and digital investments for new customer and dealer solutions that integrate data analytics with state-of-the-art digital technologies while transforming the buying experience.
4. **Consolidating Adjustments** – Elimination of transactions between Machinery, Energy & Transportation and Financial Products.
5. **Construction Industries** – A segment primarily responsible for supporting customers using machinery in infrastructure and building construction applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes asphalt pavers; backhoe loaders; compactors; cold planers; compact track and multi-terrain loaders; mini, small, medium and large track excavators; motor graders; pipelayers; road reclaimers; skid steer loaders; telehandlers; small and medium track-type tractors; track-type loaders; utility vehicles; wheel excavators; compact, small and medium wheel loaders; and related parts and work tools.
6. **Corporate Items and Eliminations** – Includes corporate-level expenses, timing differences (as some expenses are reported in segment profit on a cash basis), methodology differences between segment and consolidated external reporting, certain restructuring costs and inter-segment eliminations.
7. **Currency** – With respect to sales and revenues, currency represents the translation impact on sales resulting from changes in foreign currency exchange rates versus the U.S. dollar. With respect to operating profit, currency represents the net translation impact on sales and operating costs resulting from changes in foreign currency exchange rates versus the U.S. dollar. Currency only includes the impact on sales and operating profit for the Machinery, Energy & Transportation line of business; currency impacts on Financial Products revenues and operating profit are included in the Financial Products portions of the respective analyses. With respect to other income/expense, currency represents the effects of forward and option contracts entered into by the company to reduce the risk of fluctuations in exchange rates (hedging) and the net effect of changes in foreign currency exchange rates on our foreign currency assets and liabilities for consolidated results (translation).
8. **Dealer Inventories** – Represents dealer machine and engine inventories, excluding aftermarket parts.
9. **EAME** – A geographic region including Europe, Africa, the Middle East and the Commonwealth of Independent States (CIS).
10. **Earning Assets** – Assets consisting primarily of total finance receivables net of unearned income, plus equipment on operating leases, less accumulated depreciation at Cat Financial.
11. **Energy & Transportation** – A segment primarily responsible for supporting customers using reciprocating engines, turbines, diesel-electric locomotives and related services across industries serving Oil and Gas, Power Generation, Industrial and Transportation applications, including marine- and rail-related businesses. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product and services portfolio includes turbines, centrifugal gas compressors, and turbine-related services; reciprocating engine-powered generator sets; integrated systems used in the electric power generation industry; reciprocating engines and integrated systems and solutions for the marine and oil and gas industries; reciprocating engines supplied to the industrial industry as well as Cat machinery; and diesel-electric locomotives and components and other rail-related products and services, including remanufacturing and leasing. Responsibilities also include the remanufacturing of Caterpillar reciprocating engines and components and remanufacturing services for other companies; and product support of on-highway vocational trucks for North America.
12. **Financial Products** – The company defines Financial Products as our finance and insurance subsidiaries, primarily Caterpillar Financial Services Corporation (Cat Financial) and Caterpillar Insurance Holdings Inc. (Insurance Services). Financial Products' information relates to the financing to customers and dealers for the purchase and lease of Caterpillar and other equipment.
13. **Financial Products Segment** – Provides financing alternatives to customers and dealers around the world for Caterpillar products, as well as financing for vehicles, power generation facilities and marine vessels that, in most cases, incorporate Caterpillar products. Financing plans include operating and finance leases, installment sale contracts, repair/rebuild financing, working capital loans and wholesale financing plans. The segment also provides insurance and risk management products and services that help customers and dealers manage their business risk. Insurance and risk management products offered include physical damage insurance, inventory protection plans, extended service coverage and maintenance plans for machines and engines, and dealer property and casualty insurance. The various forms of financing, insurance and risk management products offered to customers and dealers help support the purchase and lease of Caterpillar equipment. The segment also earns revenues from Machinery, Energy & Transportation, but the related costs are not allocated to operating segments. Financial Products' segment profit is determined on a pretax basis and includes other income/expense items.
14. **Latin America** – A geographic region including Central and South American countries and Mexico.
15. **Machinery, Energy & Transportation (ME&T)** – The company defines ME&T as Caterpillar Inc. and its subsidiaries, excluding Financial Products. ME&T's information relates to the design, manufacturing and marketing of its products.
16. **Machinery, Energy & Transportation Other Operating (Income) Expenses** – Comprised primarily of gains/losses on disposal of long-lived assets, gains/losses on divestitures and legal settlements and accruals.
17. **Manufacturing Costs** – Manufacturing costs exclude the impacts of currency and represent the volume-adjusted change for variable costs and the absolute dollar change for period manufacturing costs. Variable manufacturing costs are defined as having a direct relationship with the volume of production. This includes material costs, direct labor and other costs that vary directly with production volume, such as freight, power to operate machines and supplies that are consumed in the

manufacturing process. Period manufacturing costs support production but are defined as generally not having a direct relationship to short-term changes in volume. Examples include machinery and equipment repair, depreciation on manufacturing assets, facility support, procurement, factory scheduling, manufacturing planning and operations management.

18. **Mark-to-market gains/losses** – Represents the net gain or loss of actual results differing from the company's assumptions and the effects of changing assumptions for our defined benefit pension and OPEB plans. These gains and losses are immediately recognized through earnings upon the annual remeasurement in the fourth quarter, or on an interim basis as triggering events warrant remeasurement.
19. **Pension and Other Postemployment Benefits (OPEB)** – The company's defined-benefit pension and postretirement benefit plans.
20. **Price Realization** – The impact of net price changes excluding currency and new product introductions. Price realization includes geographic mix of sales, which is the impact of changes in the relative weighting of sales prices between geographic regions.
21. **Resource Industries** – A segment primarily responsible for supporting customers using machinery in mining, heavy construction and quarry and aggregates. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes large track-type tractors; large mining trucks; hard rock vehicles; longwall miners; electric rope shovels; draglines; hydraulic shovels; rotary drills; large wheel loaders; off-highway trucks; articulated trucks; wheel tractor scrapers; wheel dozers; landfill compactors; soil compactors; select work tools; machinery components; electronics and control systems and related parts. In addition to equipment, Resource Industries also develops and sells technology products and services to provide customers fleet management, equipment management analytics, autonomous machine capabilities, safety services and mining performance solutions. Resource Industries also manages areas that provide services to other parts of the company, including integrated manufacturing, research and development for drivetrains, hydraulic systems, electronics and software for Cat machines and engines.
22. **Restructuring Costs** – May include costs for employee separation, long-lived asset impairments and contract terminations. These costs are included in Other operating (income) expenses except for defined-benefit plan curtailment losses and special termination benefits, which are included in Other income (expense). Restructuring costs also include other exit-related costs, which may consist of accelerated depreciation, inventory write-downs, building demolition, equipment relocation and project management costs and LIFO inventory decrement benefits from inventory liquidations at closed facilities, all of which are primarily included in Cost of goods sold.
23. **Sales Volume** – With respect to sales and revenues, sales volume represents the impact of changes in the quantities sold for Machinery, Energy & Transportation as well as the incremental sales impact of new product introductions, including emissions-related product updates. With respect to operating profit, sales volume represents the impact of changes in the quantities sold for Machinery, Energy & Transportation combined with product mix as well as the net operating profit impact of new product introductions, including emissions-related product updates. Product mix represents the net operating profit impact of changes in the relative weighting of Machinery, Energy & Transportation sales with respect to total sales. The impact of sales volume on segment profit includes inter-segment sales.

24. **Services** – Enterprise services include, but are not limited to, aftermarket parts, Financial Products revenues and other service-related revenues. Machinery, Energy & Transportation segments exclude most Financial Products revenues.

LIQUIDITY AND CAPITAL RESOURCES

Sources of funds

We generate significant capital resources from operating activities, which are the primary source of funding for our ME&T operations. Funding for these businesses is also available from commercial paper and long-term debt issuances. Financial Products' operations are funded primarily from commercial paper, term debt issuances and collections from its existing portfolio. During 2021, we had positive operating cash flow within both our ME&T and Financial Products' operations. On a consolidated basis, we ended 2021 with \$9.25 billion of cash, a decrease of \$98 million from year-end 2020. We intend to maintain a strong cash and liquidity position.

Consolidated operating cash flow for 2021 was \$7.20 billion, up \$871 million compared to 2020. The increase was primarily due to profit before taxes adjusted for non-cash items, including higher accruals for short-term incentive compensation. In addition, lower payments for short-term incentive compensation favorably impacted cash flow. Partially offsetting these items were increased working capital requirements compared to last year. Within working capital, changes in accounts receivable and inventory unfavorably impacted cash flow but were partially offset by favorable changes in accounts payable and accrued expenses. See further discussion of operating cash flow under ME&T and Financial Products.

Total debt as of December 31, 2021 was \$37.79 billion, an increase of \$626 million from year-end 2020. Debt related to ME&T decreased \$1.37 billion in 2021 due to the repayment of maturing debt. In addition, during the first quarter of 2021, we issued \$500 million of ten year bonds at 1.9 percent and utilized the net proceeds to redeem all our \$500 million 2.6 percent notes due in 2022. Debt related to Financial products increased by \$2.01 billion due to portfolio funding requirements.

We have three global credit facilities with a syndicate of banks totaling \$10.50 billion (Credit Facility) available in the aggregate to both Caterpillar and Cat Financial for general liquidity purposes. Based on management's allocation decision, which can be revised from time to time, the portion of the Credit Facility available to ME&T as of December 31, 2021 was \$2.75 billion. Information on our Credit Facility is as follows:

- The 364-day facility of \$3.15 billion (of which \$825 million is available to ME&T) expires on September 1, 2022.
- The three-year facility, as amended and restated in September 2021, of \$2.73 billion (of which \$715 million is available to ME&T) expires in September 2024.
- The five-year facility, as amended and restated in September 2021, of \$4.62 billion (of which \$1.21 billion is available to ME&T) expires in September 2026.

At December 31, 2021, Caterpillar's consolidated net worth was \$16.58 billion, which was above the \$9.00 billion required under the Credit Facility. The consolidated net worth is defined as the consolidated shareholder's equity including preferred stock but excluding the pension and other postretirement benefits balance within Accumulated other comprehensive income (loss).

At December 31, 2021, Cat Financial's covenant interest coverage ratio was 2.51 to 1. This is above the 1.15 to 1 minimum ratio, calculated as (1) profit excluding income taxes, interest expense and net gain/(loss) from interest rate derivatives to (2) interest expense calculated at the end of each calendar quarter for the rolling four quarter period then most recently ended, required by the Credit Facility.

In addition, at December 31, 2021, Cat Financial's six-month covenant leverage ratio was 7.25 to 1 and year-end covenant leverage ratio was 7.91 to 1. This is below the maximum ratio of debt to net worth of 10 to 1, calculated (1) on a monthly basis as the average of the leverage ratios determined on the last day of each of the six preceding calendar months and (2) at each December 31, required by the Credit Facility.

In the event Caterpillar or Cat Financial does not meet one or more of their respective financial covenants under the Credit Facility

Our total credit commitments and available credit as of December 31, 2021 were:

(Millions of dollars)	December 31, 2021		
	Consolidated	Machinery, Energy & Transportation	Financial Products
Credit lines available:			
Global credit facilities	\$ 10,500	\$ 2,750	\$ 7,750
Other external	3,251	184	3,067
Total credit lines available	13,751	2,934	10,817
Less: Commercial paper outstanding	(4,896)	—	(4,896)
Less: Utilized credit	(568)	(9)	(559)
Available credit	\$ 8,287	\$ 2,925	\$ 5,362

The other consolidated credit lines with banks as of December 31, 2021 totaled \$3.25 billion. These committed and uncommitted credit lines, which may be eligible for renewal at various future dates or have no specified expiration date, are used primarily by our subsidiaries for local funding requirements. Caterpillar or Cat Financial may guarantee subsidiary borrowings under these lines.

We receive debt ratings from the major credit rating agencies. Moody's, Fitch and S&P maintain a "mid-A" debt rating. A downgrade of our credit ratings by any of the major credit rating agencies would result in increased borrowing costs and could make access to certain credit markets more difficult. In the event economic conditions deteriorate such that access to debt markets becomes unavailable, ME&T's operations would rely on cash flow from operations, use of existing cash balances, borrowings from Cat Financial and access to our committed credit facilities. Our Financial Products' operations would rely on cash flow from its existing portfolio, existing cash balances, access to our committed credit facilities and other credit line facilities of Cat Financial, and potential borrowings from Caterpillar. In addition, we maintain a support agreement with Cat Financial, which requires Caterpillar to remain the sole owner of Cat Financial and may, under certain circumstances, require Caterpillar to make payments to Cat Financial should Cat Financial fail to maintain certain financial ratios.

We facilitate voluntary supply chain finance programs (the "Programs") through participating financial institutions. The Programs are available to a wide range of suppliers and allows them the option to manage their cash flow. We are not a party to the agreements between the participating financial institutions and the suppliers in connection with the Programs. The range of payment terms we negotiate with our suppliers is consistent, irrespective of whether a supplier participates in the Programs. The amounts payable to participating financial institutions for suppliers who voluntarily participate in the Programs and included in accounts payable in the Consolidated Statement of Financial

in the future (and are unable to obtain a consent or waiver), the syndicate of banks may terminate the commitments allocated to the party that does not meet its covenants. Additionally, in such event, certain of Cat Financial's other lenders under other loan agreements where similar financial covenants or cross default provisions are applicable, may, at their election, choose to pursue remedies under those loan agreements, including accelerating the repayment of outstanding borrowings. At December 31, 2021, there were no borrowings under the Credit Facility.

Position were \$822 million and \$533 million at December 31, 2021 and December 31, 2020, respectively. The amounts settled through the Programs and paid to participating financial institutions were \$4.1 billion and \$3.2 billion in 2021 and 2020, respectively. We account for payments made under the Programs, the same as our other accounts payable, as a reduction to our cash flows from operations. We do not believe that changes in the availability of supply chain financing will have a significant impact on our liquidity.

Material cash requirements for contractual obligations

We believe our balances of cash and cash equivalents of \$9.25 billion and time deposits of \$964 million as of December 31, 2021, along with cash generated by ongoing operations and continued access to debt markets, will be sufficient to satisfy our cash requirements over the next 12 months and beyond.

We have committed cash outflow related to postretirement benefit obligations, long-term debt and operating lease agreements. See Notes 12, 14 and 20, respectively, of Part II, Item 8 "Financial Statements and Supplementary Data" for additional information.

We have short-term obligations related to the purchase of goods and services made in the ordinary course of business. These consist of invoices received and recorded as liabilities as of December 31, 2021, but scheduled for payment in 2022 of \$8.15 billion. In addition, we have contractual obligations for material and services on order at December 31, 2021, but not yet invoiced or delivered, of \$7.28 billion.

We also have long-term contractual obligations primarily for logistics services agreements; systems support, software licenses and development contracts; information technology consulting contracts and outsourcing contracts for benefit plan administration. These obligations total \$1.16 billion, with \$550 million due in the next 12 months.

Machinery, Energy & Transportation

Net cash provided by operating activities was \$7.18 billion in 2021, compared with \$4.05 billion in 2020. The increase was primarily due to higher profit in 2021 adjusted for non-cash items, which included higher accruals for short-term incentive compensation. In addition, lower payments for short-term incentive compensation favorably impacted cash flow. Partially offsetting these items were increased working capital requirements. Within working capital, changes in inventory and accounts receivable unfavorably impacted cash flow but were partially offset by favorable changes in accounts payable and accrued expenses.

Net cash used for investing activities in 2021 was \$1.23 billion, compared with net cash used of \$1.34 billion in 2020. The change was primarily due to increased activity related to intercompany lending with Financial Products, mostly offset by increased investments in securities. During 2021, we invested \$1.19 billion in bank time deposits with varying maturity dates within one year and received proceeds from time deposits that matured of \$225 million. We also acquired the Oil & Gas division of the Weir Group PLC for \$359 million, net of cash acquired in February 2021.

Net cash used for financing activities during 2021 was \$6.30 billion, compared with net cash used of \$1.18 billion in 2020. The change was primarily due to the repayment of debt and lower proceeds from the issuance of debt. In addition, we repurchased \$2.67 billion of Caterpillar common stock in 2021 compared to \$1.13 billion in 2020.

While our short-term priorities for the use of cash may vary from time to time as business needs and conditions dictate, our long-term cash deployment strategy is focused on the following priorities. Our top priority is to maintain a strong financial position in support of a Mid-A rating. Next, we intend to fund operational requirements and commitments. Then, we intend to fund priorities that profitably grow the company and return capital to shareholders through dividend growth and share repurchases. Additional information on cash deployment is as follows:

Strong financial position — Our top priority is to maintain a strong financial position in support of a mid-A rating. We track a diverse group of financial metrics that focus on liquidity, leverage, cash flow and margins which align with our cash deployment actions and the various methodologies used by the major credit rating agencies.

Operational excellence and commitments — Capital expenditures were \$1.13 billion during 2021, compared to \$994 million in 2020. We expect ME&T's capital expenditures in 2022 to be around \$1.4 billion. We made \$340 million of contributions to our OPEB plans during 2021. By comparison, we made \$262 million of contributions to our OPEB plans in 2020. We expect to make approximately \$357 million of contributions to our pension and OPEB plans in 2022.

Fund strategic growth initiatives and return capital to shareholders — We intend to utilize our liquidity and debt capacity to fund targeted investments that drive long-term profitable growth focused in the areas of expanded offerings and services, including acquisitions.

As part of our capital allocation strategy, ME&T free cash flow is a liquidity measure we use to determine the cash generated

and available for financing activities including debt repayments, dividends and share repurchases. We define ME&T free cash flow as cash from ME&T operations excluding discretionary pension and other postretirement benefit plan contributions less capital expenditures. A goal of our capital allocation strategy is to return substantially all ME&T free cash flow to shareholders over time in the form of dividends and share repurchases, while maintaining our mid-A rating.

Our share repurchase plans are subject to the company's cash deployment priorities and are evaluated on an ongoing basis considering the financial condition of the company and the economic outlook, corporate cash flow, the company's liquidity needs and the health and stability of global credit markets. The timing and amount of future repurchases may vary depending on market conditions and investing priorities. In July 2018, the Board of Directors approved an authorization to repurchase up to \$10 billion of Caterpillar common stock (the 2018 Authorization) effective January 1, 2019, with no expiration. In 2021, we repurchased \$2.67 billion of Caterpillar common stock, with \$2.10 billion remaining under the 2018 Authorization as of December 31, 2021. Caterpillar's basic shares outstanding as of December 31, 2021 were approximately 536 million.

Each quarter, our Board of Directors reviews the company's dividend for the applicable quarter. The Board evaluates the financial condition of the company and considers the economic outlook, corporate cash flow, the company's liquidity needs, and the health and stability of global credit markets to determine whether to maintain or change the quarterly dividend. In December 2021, the Board of Directors approved maintaining our quarterly dividend representing \$1.11 per share and we continue to expect our strong financial position to support the dividend. Dividends paid totaled \$2.33 billion in 2021.

Financial Products

Financial Products operating cash flow was \$1.42 billion in 2021, compared with \$1.27 billion in 2020. Net cash used for investing activities was \$1.40 billion in 2021, compared with net cash provided by investing activities of \$791 million in 2020. The change was primarily due to portfolio related activity. Net cash provided by financing activities was \$257 million in 2021, compared with net cash used of \$2.50 billion in 2020. The change was primarily due to higher portfolio funding requirements.

Off-balance sheet arrangements

We are a party to certain off-balance sheet arrangements, primarily in the form of guarantees. Information related to guarantees appears in Note 21 – "Guarantees and product warranty" of Part II, Item 8 "Financial Statements and Supplementary Data."

RECENT ACCOUNTING PRONOUNCEMENTS

For a discussion of recent accounting pronouncements, see Note 1J — "New accounting guidance" of Part II, Item 8 "Financial Statements and Supplementary Data."

CRITICAL ACCOUNTING ESTIMATES

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect reported amounts. The more significant estimates include: residual values for leased assets, fair values for goodwill impairment tests, warranty liability, reserves for product liability and insurance losses, postretirement benefits, post-sale discounts, credit losses and income taxes. We have incorporated many years of data into the determination of each of these estimates and we have not historically experienced significant adjustments. We review these assumptions at least annually with the Audit Committee of the Board of Directors. Following are the methods and assumptions used in determining our estimates and an indication of the risks inherent in each.

Residual values for leased assets – We determine the residual value of Cat Financial's leased equipment based on its estimated end-of-term market value. We estimate the residual value of leased equipment at the inception of the lease based on a number of factors, including historical wholesale market sales prices, past remarketing experience and any known significant market/product trends. We also consider the following critical factors in our residual value estimates: lease term, market size and demand, total expected hours of usage, machine configuration, application, location, model changes, quantities, third-party residual guarantees and contractual customer purchase options.

Upon termination of the lease, the equipment is either purchased by the lessee or sold to a third party, in which case we may record a gain or a loss for the difference between the estimated residual value and the sale price.

During the term of our leases, we monitor residual values. For operating leases, we record adjustments to depreciation expense reflecting changes in residual value estimates prospectively on a straight-line basis. For finance leases, we recognize residual value adjustments through a reduction of finance revenue over the remaining lease term.

We evaluate the carrying value of equipment on operating leases for potential impairment when we determine a triggering event has occurred. When a triggering event occurs, we perform a test for recoverability by comparing projected undiscounted future cash flows to the carrying value of the equipment on operating leases. If the test for recoverability identifies a possible impairment, we measure the fair value of the equipment on operating leases in accordance with the fair value measurement framework. We recognize an impairment charge for the amount by which the carrying value of the equipment on operating leases exceeds its estimated fair value.

At December 31, 2021, the aggregate residual value of equipment on operating leases was \$1.87 billion. Without consideration of other factors such as third-party residual guarantees or contractual customer purchase options, a 10 percent non-temporary decrease in the market value of our equipment subject to operating leases would reduce residual value estimates and result in the recognition of approximately \$85 million of additional annual depreciation expense.

Fair values for goodwill impairment tests – We test goodwill for impairment annually, at the reporting unit level, and whenever events or circumstances make it more likely than not that an impairment may have occurred, such as a significant adverse change in the business climate or a decision to sell all or a portion of a reporting unit. We perform our annual goodwill impairment test as of October 1 and monitor for interim triggering events on an ongoing basis.

We review goodwill for impairment utilizing either a qualitative assessment or a quantitative goodwill impairment test. If we choose to perform a qualitative assessment and determine the fair value more likely than not exceeds the carrying value, no further evaluation is necessary. For reporting units where we perform the quantitative goodwill impairment test, we compare the fair value of each reporting unit, which we primarily determine using an income approach based on the present value of discounted cash flows, to the respective carrying value, which includes goodwill. If the fair value of the reporting unit exceeds its carrying value, we do not consider the goodwill impaired. If the carrying value is higher than the fair value, we recognize the difference as an impairment loss.

For reporting units where we perform a quantitative goodwill impairment test, the process requires valuation of the respective reporting unit, which we primarily determine using an income approach based on a discounted five year forecasted cash flow with a year-five residual value. We compute the residual value using the constant growth method, which values the forecasted cash flows in perpetuity. The assumptions about future cash flows and growth rates are based on each reporting unit's long-term forecast and are subject to review and approval by senior management. A reporting unit's discount rate is a risk-adjusted weighted average cost of capital, which we believe approximates the rate from a market participant's perspective. The estimated fair value could be impacted by changes in market conditions, interest rates, growth rates, tax rates, costs, pricing and capital expenditures. We categorize the fair value determination as Level 3 in the fair value hierarchy due to its use of internal projections and unobservable measurement inputs.

We completed our annual assessment of goodwill in the fourth quarter of 2021 and determined that there was no impairment of goodwill. Caterpillar's market capitalization has remained significantly above the net book value of the Company.

An unfavorable change in our expectations for the financial performance of our reporting units, particularly long-term growth and profitability, would reduce the fair value of our reporting units. The demand for our equipment and related parts is highly cyclical and significantly impacted by commodity prices, although the impact may vary by reporting unit. The energy and mining industries are major users of our products, including the mineral extraction, oil and natural gas industries. Decisions to purchase our products are dependent upon the performance of those industries, which in turn are dependent in part on commodity prices. Lower commodity prices or industry specific circumstances that have a negative impact to the valuation assumptions may reduce the fair value of our reporting units. Should such events occur and it becomes more likely than not that a reporting unit's fair value has fallen below its carrying value, we will perform an interim goodwill impairment test(s), in addition to the annual impairment test. Future impairment tests may result in a goodwill impairment, depending on the outcome of the quantitative impairment test. We would report a goodwill impairment as a non-cash charge to earnings.

Warranty liability – At the time we recognize a sale, we record estimated future warranty costs. We determine the warranty liability by applying historical claim rate experience to the current field population and dealer inventory. Generally, we base historical claim rates on actual warranty experience for each product by machine model/engine size by customer or dealer location (inside or outside North America). We develop specific rates for each product shipment month and update them monthly based on actual warranty claim experience. Warranty costs may differ from those estimated if actual claim rates are higher or lower than our historical rates.

Product liability and insurance loss reserve – We determine these reserves based upon reported claims in process of settlement and actuarial estimates for losses incurred but not reported. Loss reserves, including incurred but not reported reserves, are based on estimates and ultimate settlements may vary significantly from such estimates due to increased claims frequency or severity over historical levels. The amount of these reserves totaled \$1.2 billion at both December 31, 2021 and 2020. The majority of the balance in both 2021 and 2020 consisted of unearned insurance premiums.

Postretirement benefits – We sponsor defined benefit pension plans and/or other postretirement benefit plans (retirement healthcare and life insurance) to employees in many of our locations throughout the world. There are assumptions used in the accounting for these defined benefit plans that include discount rate, expected return on plan assets, expected rate of compensation increase, the future health care trend rate, mortality and other economic and demographic assumptions. The actuarial assumptions we use may change or differ significantly from actual results, which may result in a material impact to our consolidated financial statements.

The effects of actual results differing from our assumptions and the effects of changing assumptions are considered actuarial gains or losses. We utilize a mark-to-market approach in recognizing actuarial gains or losses immediately through earnings upon the annual remeasurement in the fourth quarter, or on an interim basis as triggering events warrant remeasurement.

Primary actuarial assumptions were determined as follows:

- We use the assumed discount rate to discount future benefit obligations back to today's dollars. The U.S. discount rate is based on a benefit cash flow-matching approach and represents the rate at which our benefit obligations could effectively be settled as of our measurement date, December 31. The benefit cash flow-matching approach involves analyzing Caterpillar's projected cash flows against a high quality bond yield curve, calculated using a wide population of corporate Aa bonds available on the measurement date. We use a similar approach to determine the

assumed discount rate for our most significant non-U.S. plans. In estimating the service and interest cost components of net periodic benefit cost, we utilize a full yield curve approach in determining a discount rate. This approach applies the specific spot rates along the yield curve used in the determination of the benefit obligation to the relevant projected cash flows. Discount rates are sensitive to changes in interest rates. A decrease in the discount rate would increase our obligation and future expense.

- The expected long-term rate of return on plan assets is based on our estimate of long-term passive returns for equities and fixed income securities weighted by the allocation of our plan assets. Based on historical performance, we increase the passive returns due to our active management of the plan assets. This rate is impacted by changes in general market conditions, but because it represents a long-term rate, it is not significantly impacted by short-term market swings. Changes in our allocation of plan assets would also impact this rate. For example, a shift to more fixed income securities would lower the rate. A decrease in the rate would increase our expense. The expected return on plan assets is based on the fair value of plan assets allocations as of our measurement date, December 31.
- We use the expected rate of compensation increase to develop benefit obligations using projected pay at retirement. It represents average long-term salary increases. This rate is influenced by our long-term compensation policies. An increase in the rate would increase our obligation and expense.
- The assumed health care trend rate represents the rate at which health care costs are assumed to increase and is based on historical and expected experience. Changes in our projections of future health care costs due to general economic conditions and those specific to health care (e.g., technology driven cost changes) will impact this trend rate. An increase in the trend rate would increase our obligation and expense.
- We use the mortality assumption to estimate the life expectancy of plan participants. An increase in the life expectancy of plan participants will result in an increase in our obligation and expense.

Postretirement Benefit Plan Actuarial Assumptions Sensitivity

The effects of a one percentage-point change in certain actuarial assumptions on 2021 pension and OPEB costs and obligations are as follows:

(Millions of dollars)	2021 Benefit Cost Increase (Decrease)		Year-end Benefit Obligation Increase (Decrease)	
	One percentage- point increase	One percentage- point decrease	One percentage- point increase	One percentage- point decrease
U.S. Pension benefits: ¹				
Assumed discount rate	\$ 115	\$ (149)	\$ (1,910)	\$ 2,329
Expected long-term rate of return on plan assets	(171)	171	—	—
Non-U.S. Pension benefits:				
Assumed discount rate	22	(30)	(591)	756
Expected rate of compensation increase	5	(4)	39	(32)
Expected long-term rate of return on plan assets	(44)	44	—	—
Other postretirement benefits:				
Assumed discount rate	12	(14)	(343)	413
Expected rate of compensation increase	—	—	1	(1)
Expected long-term rate of return on plan assets	(1)	1	—	—

¹ Effective December 31, 2019, all U.S. pension benefits were frozen, and accordingly the expected rate of compensation increase assumption is no longer applicable.

Actuarial Assumptions

	U.S. Pension Benefits			Non-U.S. Pension Benefits			Other Postretirement Benefits		
	2021	2020	2019	2021	2020	2019	2021	2020	2019
Weighted-average assumptions used to determine benefit obligation, end of year:									
Discount rate	2.8%	2.4%	3.2%	1.8%	1.4%	1.9%	2.7%	2.3%	3.2%
Rate of compensation increase ¹	—%	—%	—%	2.0%	2.0%	2.0%	4.0%	4.0%	4.0%
Weighted-average assumptions used to determine net periodic benefit cost:									
Discount rate used to measure service cost ¹	—%	—%	4.3%	1.4%	1.5%	2.5%	2.5%	3.2%	4.1%
Discount rate used to measure interest cost	1.8%	2.8%	3.9%	1.2%	1.7%	2.3%	1.6%	2.8%	3.9%
Expected rate of return on plan assets	4.2%	5.1%	5.9%	2.9%	3.3%	3.8%	6.5%	7.0%	7.2%
Rate of compensation increase ¹	—%	—%	4.0%	2.0%	2.0%	3.0%	4.0%	4.0%	4.1%
Health care cost trend rates at year-end:									
Health care trend rate assumed for next year							5.6%	5.8%	6.1%
Rate that the cost trend rate gradually declines to							5.0%	5.0%	5.0%
Year that the cost trend rate reaches ultimate rate							2025	2025	2025

¹ Effective December 31, 2019, all U.S. pension benefits were frozen, and accordingly this assumption is no longer applicable.

See Note 12 - "Postemployment benefit plans" of Part II, Item 8 "Financial Statement and Supplemental Data" for further information regarding the accounting for postretirement benefits.

Post-sale discount reserve – We provide discounts to dealers through merchandising programs. We have numerous programs that are designed to promote the sale of our products. The most common dealer programs provide a discount when the dealer sells a product to a targeted end user. The amount of accrued post-sale discounts was \$1.4 billion at both December 31, 2021 and 2020. The reserve represents discounts that we expect to pay on previously sold units and is reviewed at least quarterly. We adjust the reserve if discounts paid differ from those estimated. Historically, those adjustments have not been material.

Allowance for credit losses – The allowance for credit losses is management's estimate of expected losses over the life of our finance receivable portfolio calculated using loss forecast models that take into consideration historical credit loss experience, current economic conditions and forecasts and scenarios that capture country and industry-specific economic factors. In addition, we consider qualitative factors not able to be fully captured in our loss forecast models, including borrower-specific and company-specific factors. These qualitative factors are subjective and require a degree of management judgment.

We measure the allowance for credit losses on a collective (pool) basis when similar risk characteristics exist and on an individual basis when we determine that similar risk characteristics do not exist. We identify finance receivables for individual evaluation based on past-due status and information available about the customer, such as financial statements, news reports and published credit ratings, as well as general information regarding industry trends and the economic environment in which our customers operate. The allowance for credit losses attributable to finance receivables that are individually evaluated is based on the present value of expected future cash flows discounted at the receivables' effective interest rate, the fair value of the collateral for collateral-dependent receivables or the observable market price of the receivable. In determining collateral value, we estimate the current fair market value of the collateral less selling costs. We also consider credit enhancements such as additional collateral and contractual third-party guarantees.

While management believes it has exercised prudent judgment and applied reasonable assumptions, there can be no assurance that in the future, changes in economic conditions or other factors would not cause changes in the financial health of our customers.

If the financial health of our customers deteriorates, the timing and level of payments received could be impacted and therefore, could result in a change to our estimated losses.

Income taxes – We are subject to the income tax laws of the many jurisdictions in which we operate. These tax laws are complex, and the manner in which they apply to our facts is sometimes open to interpretation. In establishing the provision for income taxes, we must make judgments about the application of these inherently complex tax laws. Our income tax positions and analysis are based on currently enacted tax law. Future changes in tax law or related interpretations could significantly impact the provision for income taxes, the amount of taxes payable, and the deferred tax asset and liability balances. Changes in tax law are reflected in the period of enactment with related interpretations considered in the period received.

Despite our belief that our tax return positions are consistent with applicable tax laws, we believe that taxing authorities could challenge certain positions. Settlement of any challenge can result in no change, a complete disallowance, or some partial adjustment reached through negotiations or litigation. We record tax benefits for uncertain tax positions based upon management's evaluation of the information available at the reporting date. To be recognized in the financial statements, a tax benefit must be at least more likely than not of being sustained based on technical merits. The benefit for positions meeting the recognition threshold is measured as the largest benefit more likely than not of being realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. Significant judgment is required in making these determinations and adjustments to unrecognized tax benefits may be necessary to reflect actual taxes payable upon settlement. Adjustments related to positions impacting the effective tax rate affect the provision for income taxes. Adjustments related to positions impacting the timing of deductions impact deferred tax assets and liabilities. For tax years 2007 to 2012 including the impact of a loss carryback to 2005, the IRS has proposed to tax in the United States profits earned from certain parts transactions by Caterpillar SARL (CSARL), based on the IRS examination team's application of "substance-over-form" or "assignment-of-income" judicial doctrines. CSARL is primarily taxable locally in Switzerland. We are vigorously contesting the proposed increases to tax and penalties for these years of approximately \$2.3 billion. We believe that the relevant transactions complied with applicable tax laws and did not violate judicial doctrines. The purchase of parts by CSARL from unrelated parties and the subsequent sale of those parts to unrelated dealers outside the United States have substantial legal,

commercial, and economic consequences for the parties involved. Therefore, we have concluded that the largest amount of benefit that is more likely than not to be sustained related to this position is the entire benefit. As a result, no amount related to these IRS adjustments is reflected in unrecognized tax benefits. We have filed U.S. income tax returns on this same basis for years after 2012. We currently believe the ultimate disposition of this matter will not have a material adverse effect on our consolidated financial position, liquidity or results of operations.

Deferred tax assets generally represent tax benefits for tax deductions or credits available in future tax returns. Certain estimates and assumptions are required to determine whether it is more likely than not that all or some portion of the benefit of a deferred tax asset will not be realized. In making this assessment, management analyzes the trend of U.S. GAAP earnings and estimates the impact of future taxable income, reversing temporary differences and available prudent and feasible tax planning strategies. We give less weight in this analysis to mark-to-market adjustments to remeasure our pension and OPEB plans as we do not consider these adjustments indicative of ongoing earnings trends. Should a change in facts or circumstances lead to a change in judgment about the ultimate realizability of a deferred tax asset, we record or adjust the related valuation allowance in the period that the change in facts and circumstances occurs, along with a corresponding increase or decrease in the provision for income taxes.

Additional information related to income taxes is included in Note 6 - "Income taxes" of Part II, Item 8 "Financial statements and Supplementary Data."

OTHER MATTERS

Information related to legal proceedings appears in Note 22—Environmental and Legal Matters of Part II, Item 8 "Financial Statements and Supplementary Data."

RETIREMENT BENEFITS

We recognize mark-to-market gains and losses immediately through earnings upon the remeasurement of our pension and OPEB plans. Mark-to-market gains and losses represent the effects of actual results differing from our assumptions and the effects of changing assumptions. Changes in discount rates and differences between the actual return on plan assets and the expected return on plan assets generally have the largest impact on mark-to-market gains and losses.

The table below summarizes the amounts of net periodic benefit cost recognized for 2021, 2020 and 2019, respectively, and includes expected cost for 2022.

(Millions of dollars)	2022 Expected	2021	2020	2019
U.S. Pension Benefits	\$ (269)	\$ (388)	\$ (309)	\$ (7)
Non-U.S. Pension Benefits	(13)	(19)	18	19
Other Postretirement Benefits	161	118	147	158
Mark-to-market loss (gain)	— ¹	(833)	383	468
Total net periodic benefit cost (benefit)	\$ (121)	\$ (1,122)	\$ 239	\$ 638

¹ Expected net periodic benefit cost (benefit) does not include an estimate for mark-to-market gains or losses.

- **Expected increase in expense in 2022 compared to 2021** – Excluding the impact of mark-to-market gains and losses, our net periodic benefit cost is expected to increase \$168 million in 2022. The expected increase is primarily due to changes in assumptions causing higher interest cost in 2022 as a result of higher discount rates at year-end 2021 (U.S. pension plans discount rate for 2022 interest cost is 2.3% compared to 1.8% for 2021) and lower expected return on plan assets in 2022 (U.S. pension plans expected return on plan assets is 4.0 percent for 2022 compared to 4.2 percent in 2021).
- **Decrease in expense in 2021 compared to 2020** – Primarily due to mark-to-market gains in 2021 compared to mark-to-market losses in 2020 and lower interest cost in 2021 as a result of lower discount rates at year-end 2020.
- **Decrease in expense in 2020 compared to 2019** – Primarily due to lower interest cost in 2020 as a result of lower discount rates at year-end 2019, the elimination of service cost for our U.S. pension plans freezing benefit accruals and lower mark-to-market losses in 2020 compared to 2019.

The primary factors that resulted in mark-to-market losses (gains) for 2021, 2020 and 2019 are described below. We include the net mark-to-market losses (gains) in Other income (expense) in the Results of Operations.

- **2021 net mark-to-market gain of \$833 million** – Primarily due to higher discount rates at the end of 2021 compared to the end of 2020. This was partially offset by various assumption changes and a lower actual return on plan assets compared to the expected return on plan assets (U.S. pension plans had an

actual rate of return of 3.6 percent compared to an expected rate of return of 4.2 percent).

- **2020 net mark-to-market loss of \$383 million** – Primarily due to lower discount rates at the end of 2020 compared to the end of 2019. This was partially offset by a higher actual return on plan assets compared to the expected return on plan assets (U.S. pension plans had an actual rate of return of 16.7 percent compared to an expected rate of return of 5.1 percent).
- **2019 net mark-to-market loss of \$468 million** – Primarily due to lower discount rates at the end of 2019 compared to the end of 2018. This was partially offset by a higher actual return on plan assets compared to the expected return on plan assets (U.S. pension plans had an actual rate of return of 22.3 percent compared to an expected rate of return of 5.9 percent).

SENSITIVITY

Foreign Exchange Rate Sensitivity

ME&T operations use foreign currency forward and option contracts to manage unmatched foreign currency cash inflow and outflow. Our objective is to minimize the risk of exchange rate movements that would reduce the U.S. dollar value of our foreign currency cash flow. Our policy allows for managing anticipated foreign currency cash flow for up to approximately five years. Based on the anticipated and firmly committed cash inflow and outflow for our ME&T operations for the next 12 months and the foreign currency derivative instruments in place at year-end, a hypothetical 10 percent weakening of the U.S. dollar relative to all other currencies would adversely affect our expected 2022

cash flow for our ME&T operations by approximately \$89 million. Last year similar assumptions and calculations yielded a potential \$126 million adverse impact on 2021 cash flow. We determine our net exposures by calculating the difference in cash inflow and outflow by currency and adding or subtracting outstanding foreign currency derivative instruments. We multiply these net amounts by 10 percent to determine the sensitivity.

In managing foreign currency risk for our Financial Products operations, our objective is to minimize earnings volatility resulting from conversion and the remeasurement of net foreign currency balance sheet positions and future transactions denominated in foreign currencies. Since our policy allows the use of foreign currency forward, option and cross currency contracts to offset the risk of currency mismatch between our assets and liabilities and exchange rate risk associated with future transactions denominated in foreign currencies, a 10 percent change in the value of the U.S. dollar relative to all other currencies would not have a material effect on our consolidated financial position, results of operations or cash flow. Neither our policy nor the effect of a 10 percent change in the value of the U.S. dollar has changed from that reported at the end of last year.

The effect of the hypothetical change in exchange rates ignores the effect this movement may have on other variables, including competitive risk. If it were possible to quantify this competitive impact, the results would probably be different from the sensitivity effects shown above. In addition, it is unlikely that all currencies would uniformly strengthen or weaken relative to the U.S. dollar. In reality, some currencies may weaken while others may strengthen. Our primary exposure (excluding competitive risk) is to exchange rate movements in the Australian dollar, Chinese yuan, Euro, Japanese yen and Swiss franc.

Interest Rate Sensitivity

For our ME&T operations, we have the option to use interest rate contracts to lower the cost of borrowed funds by attaching fixed-to-floating interest rate contracts to fixed-rate debt, and by entering into forward rate agreements on future debt issuances. A hypothetical 100 basis point adverse move in interest rates along the entire interest rate yield curve would have a minimal impact to the 2022 pre-tax earnings of ME&T. Last year, similar assumptions and calculations yielded a minimal impact to 2021 pre-tax earnings.

For our Financial Products operations, we use interest rate derivative instruments primarily to meet our match-funding objectives and strategies. We have a match-funding policy that addresses the interest rate risk by aligning the interest rate profile (fixed or floating rate and duration) of our debt portfolio with the interest rate profile of our finance receivable portfolio within a predetermined range on an ongoing basis. In connection with that policy, we use interest rate derivative instruments to modify the debt structure to match

assets within the finance receivable portfolio. Match funding reduces the volatility of margins between interest-bearing assets and interest-bearing liabilities, regardless of which direction interest rates move.

In order to properly manage sensitivity to changes in interest rates, Financial Products measures the potential impact of different interest rate assumptions on pre-tax earnings. All on-balance sheet positions, including derivative financial instruments, are included in the analysis. The primary assumptions included in the analysis are that there are no new fixed rate assets or liabilities, the proportion of fixed rate debt to fixed rate assets remains unchanged and the level of floating rate assets and debt remain constant. An analysis of the December 31, 2021 balance sheet, using these assumptions, estimates the impact of a 100 basis point immediate and sustained adverse change in interest rates to have a minimal impact on 2022 pre-tax earnings. Last year, similar assumptions and calculations yielded a minimal impact to 2021 pre-tax earnings.

This analysis does not necessarily represent our current outlook of future market interest rate movement, nor does it consider any actions management could undertake in response to changes in interest rates. Accordingly, no assurance can be given that actual results would be consistent with the results of our estimate.

NON-GAAP FINANCIAL MEASURES

We provide the following definitions for the non-GAAP financial measures used in this report. These non-GAAP financial measures have no standardized meaning prescribed by U.S. GAAP and therefore are unlikely to be comparable to the calculation of similar measures for other companies. Management does not intend these items to be considered in isolation or as a substitute for the related GAAP measures.

We believe it is important to separately quantify the profit impact of two significant items in order for our results to be meaningful to our readers. These items consist of (i) pension and OPEB mark-to-market (gains) losses resulting from plan remeasurements and (ii) restructuring (income) costs, which were incurred to generate longer-term benefits. We do not consider these items indicative of earnings from ongoing business activities and believe the non-GAAP measures will provide investors with useful perspective on underlying business results and trends and aid with assessing our period-over-period results. In addition, we provide a calculation of ME&T free cash flow as we believe it is an important measure for investors to determine the cash generation available for financing activities including debt repayments, dividends and share repurchases.

Reconciliations of adjusted results to the most directly comparable GAAP measures are as follows:

(Dollars in millions except per share data)	Operating Profit	Operating Profit Margin	Profit Before Taxes	Provision (Benefit) for Income Taxes	Effective Tax Rate	Profit	Profit per Share

Supplemental Consolidating Data

We are providing supplemental consolidating data for the purpose of additional analysis. We have grouped the data as follows:

Consolidated – Caterpillar Inc. and its subsidiaries.

Machinery, Energy & Transportation – We define ME&T as it is presented in the supplemental data as Caterpillar Inc. and its subsidiaries, excluding Financial Products. ME&T's information relates to the design, manufacturing and marketing of our products.

Financial Products – We define Financial Products as it is presented in the supplemental data as our finance and insurance subsidiaries, primarily Caterpillar Financial Services Corporation (Cat Financial) and Cat Insurance Holdings Inc. (Insurance Services). Financial Products' information relates to the financing to customers and dealers for the purchase and lease of Caterpillar and other equipment.

Consolidating Adjustments – Eliminations of transactions between ME&T and Financial Products.

The nature of the ME&T and Financial Products businesses is different, especially with regard to the financial position and cash flow items. Caterpillar management utilizes this presentation internally to highlight these differences. We believe this presentation will assist readers in understanding our business.

Pages 40 to 42 reconcile ME&T and Financial Products to Caterpillar Inc. consolidated financial information. Certain amounts for prior periods have been reclassified to conform to current year presentation.

¹ Elimination of equity profit earned from Financial Products' subsidiaries partially owned by ME&T subsidiaries.

² Elimination of non-cash adjustments and changes in assets and liabilities related to consolidated reporting.

³ Reclassification of Financial Products' cash flow activity from investing to operating for receivables that arose from the sale of inventory.

⁴ Elimination of net proceeds and payments to/from ME&T and Financial Products.

⁵ Elimination of dividend activity between Financial Products and ME&T.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Information required by Item 7A appears in Note 1 — “Operations and summary of significant accounting policies,” Note 4 — “Derivative financial instruments and risk management,” Note 18 — “Fair value disclosures” and Note 19 — “Concentration of credit risk” of Part II, Item 8 “Financial Statements and Supplementary Data.” Other information required by Item 7A is included in Part II, Item 7 “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

Item 8. Financial Statements and Supplementary Data.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Caterpillar Inc. (company) is responsible for establishing and maintaining adequate internal control over financial reporting as such term is defined in Rule 13a-15(f) under the Exchange Act. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of our financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the company's internal control over financial reporting as of December 31, 2021. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in *Internal Control—Integrated Framework* (2013). Based on our assessment we concluded that, as of December 31, 2021, the company's internal control over financial reporting was effective based on those criteria.

The effectiveness of the company's internal control over financial reporting as of December 31, 2021 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm. Their report appears on pages 45-46.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Caterpillar Inc.

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated statement of financial position of Caterpillar Inc. and its subsidiaries (the “Company”) as of December 31, 2021 and 2020, and the related consolidated statements of results of operations, of comprehensive income (loss), of changes in shareholders’ equity and of cash flow for each of the three years in the period ended December 31, 2021, including the related notes (collectively referred to as the “consolidated financial statements”). We also have audited the Company’s internal control over financial reporting as of December 31, 2021, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2021 and 2020, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2021 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2021, based on criteria established in *Internal Control - Integrated Framework* (2013) issued by the COSO.

Basis for Opinions

The Company’s management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control Over Financial Reporting. Our responsibility is to express opinions on the Company’s consolidated financial statements and on the Company’s internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Critical Audit Matters

The critical audit matter communicated below is a matter arising from the current period audit of the consolidated financial statements that was communicated or required to be communicated to the audit committee and that (i) relates to accounts or disclosures that are material to the consolidated financial statements and (ii) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the consolidated financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing a separate opinion on the critical audit matter or on the accounts or disclosures to which it relates.

Uncertain Tax Position - Caterpillar SARL IRS Examination

As described in Note 6 to the consolidated financial statements, as a result of the audits of the Company's U.S. 2007 to 2012 income tax returns, including the impact of a loss carryback to 2005, the Internal Revenue Service ("IRS") has proposed to tax in the U.S. profits earned from certain parts transactions by Caterpillar SARL ("CSARL"). This proposal is based on the IRS examination team's application of the "substance-over-form" or "assignment-of-income" judicial doctrines. As described by management, the Company is vigorously contesting the proposed increases to tax and penalties for these years of approximately \$2.3 billion, as management believes that the relevant transactions complied with applicable tax laws and did not violate judicial doctrines. As disclosed by management, the purchase of parts by CSARL from unrelated parties and the subsequent sale of those parts to unrelated dealers outside the U.S. have substantial legal, commercial, and economic consequences for the parties involved. Management has concluded that the largest amount of benefit that is more likely than not to be sustained related to this position is the entire benefit. As a result, no amount related to these IRS adjustments is reflected in the Company's unrecognized tax benefits. The Company has filed U.S. income tax returns on this same basis for years after 2012.

The principal considerations for our determination that performing procedures relating to the uncertain tax position arising from the CSARL IRS Examination is a critical audit matter are (i) the significant judgment by management in evaluating the amount of the benefit that is more likely than not to be sustained related to the position; (ii) a high degree of auditor judgment, subjectivity and effort in performing procedures and evaluating whether the position was more likely than not to be sustained; and (iii) the audit effort involved the use of professionals with specialized skill and knowledge.

Addressing the matter involved performing procedures and evaluating audit evidence in connection with forming our overall opinion on the consolidated financial statements. These procedures included testing the effectiveness of controls relating to the uncertain tax position arising from the CSARL IRS Examination. These procedures also included, among others (i) evaluating management's process for determining the reasonableness of the uncertain tax position, including reading certain intercompany and third-party agreements which are relevant to evaluating the legal form and substance of the CSARL transaction flows; (ii) evaluating management's assessment of whether the position was more likely than not to produce a tax benefit and the determination by management of the largest amount of benefit that is more likely than not to be sustained related to this position; and (iii) evaluating the Revenue Agent Reports ("RARs") from the IRS and management's protests of the RARs. Professionals with specialized skill and knowledge were used to assist in evaluating the applicable tax laws and judicial doctrines related to this matter as well as changes in relevant tax regulations, rulings, and case law.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Operations and summary of significant accounting policies

A. Nature of operations

Information in our financial statements and related commentary are presented in the following categories:

Machinery, Energy & Transportation (ME&T) – We define ME&T as Caterpillar Inc. and its subsidiaries, excluding Financial Products. ME&T's information relates to the design, manufacturing and marketing of our products.

Financial Products – We define Financial Products as our finance and insurance subsidiaries, primarily Caterpillar Financial Services Corporation (Cat Financial) and Caterpillar Insurance Holdings Inc. (Insurance Services). Financial Products' information relates to the financing to customers and dealers for the purchase and lease of Caterpillar and other equipment.

We sell our products primarily under the brands "Caterpillar," "CAT," design versions of "CAT" and "Caterpillar," "EMD," "FG Wilson," "MaK," "MWM," "Perkins," "Progress Rail," "SEM" and "Solar Turbines."

We conduct operations in our ME&T line of business under highly competitive conditions, including intense price competition. We place great emphasis on the high quality and performance of our products and our dealers' service support. Although no one competitor is believed to produce all of the same types of equipment that we do, there are numerous companies, large and small, which compete with us in the sale of each of our products.

We distribute our machines principally through a worldwide organization of dealers (dealer network), 44 located in the United States and 116 located outside the United States, serving 193 countries. We sell reciprocating engines principally through the dealer network and to other manufacturers for use in products. We also sell some of the reciprocating engines manufactured by our subsidiary Perkins Engines Company Limited through its worldwide network of 90 distributors covering 171 countries. We sell the FG Wilson branded electric power generation systems through its worldwide network of 110 distributors covering 109 countries. We also sell some of the large, medium speed reciprocating engines under the MaK brand through a worldwide network of 20 distributors covering 130 countries. Our dealers do not deal exclusively with our products; however, in most cases sales and servicing of our products are the dealers' principal business. We sell some products, primarily turbines and locomotives, to end customers through sales forces employed by the company. At times, these employees are assisted by independent sales representatives.

The Financial Products line of business also conducts operations under highly competitive conditions. Financing for users of Caterpillar products is available through a variety of competitive sources, principally commercial banks and finance and leasing companies. We offer various financing, insurance and risk management products designed to support sales of our products and generate financing income for our company. We conduct a significant portion of Financial Products activity in North America, with additional offices in Latin America, Asia/Pacific, Europe, Africa and the Middle East.

B. Basis of presentation

The consolidated financial statements include the accounts of Caterpillar Inc. and its subsidiaries where we have a controlling financial interest.

Investments in companies where our ownership exceeds 20 percent and we do not have a controlling interest or where the ownership is less than 20 percent and for which we have a significant influence are accounted for by the equity method.

We consolidate all variable interest entities (VIEs) where Caterpillar Inc. is the primary beneficiary. For VIEs, we assess whether we are the primary beneficiary as prescribed by the accounting guidance on the consolidation of VIEs. The primary beneficiary of a VIE is the party that has both the power to direct the activities that most significantly impact the entity's economic performance and the obligation to absorb losses or the right to receive benefits that could potentially be significant to the VIE. See Note 21 for further discussion on a consolidated VIE.

Cat Financial has end-user customers that are VIEs of which we are not the primary beneficiary. Although we have provided financial support to these entities and therefore have a variable interest, we do not have the power to direct the activities that most significantly impact their economic performance. Our maximum exposure to loss from our involvement with these VIEs is limited to the credit risk inherently present in the financial support that we have provided. These risks were evaluated and reflected in our financial statements as part of our overall portfolio of finance receivables and related allowance for credit losses.

We include shipping and handling costs in Cost of goods sold in Statement 1. Other operating (income) expenses primarily include Cat Financial's depreciation on equipment leased to others, Insurance Services' underwriting expenses, (gains) losses on disposal of long-lived assets, long-lived asset impairment charges, legal settlements and accruals, contract termination costs and employee separation charges.

Prepaid expenses and other current assets in Statement 3 primarily include time deposits, prepaid insurance, contract assets, right of return assets, prepaid and refundable income taxes, assets held for sale, core to be returned for remanufacturing, restricted cash and other short-term investments.

Certain amounts for prior years have been reclassified to conform with the current-year financial statement presentation.

C. Inventories

We state inventories at the lower of cost or net realizable value. We principally determine cost using the last-in, first-out (LIFO) method. The value of inventories on the LIFO basis represented about 60 percent of total inventories at December 31, 2021 and 2020.

If the FIFO (first-in, first-out) method had been in use, inventories would have been \$2,599 million and \$2,132 million higher than reported at December 31, 2021 and 2020, respectively.

D. Depreciation and amortization

We compute depreciation of plant and equipment principally using accelerated methods. We compute depreciation on equipment leased to others, primarily for Financial Products, using the straight-line method over the term of the lease. The depreciable basis is

the original cost of the equipment less the estimated residual value of the equipment at the end of the lease term. In 2021, 2020 and 2019, Cat Financial depreciation on equipment leased to others was \$755 million, \$758 million and \$813 million, respectively, which we include in Other operating (income) expenses in Statement 1. In 2021, 2020 and 2019, consolidated depreciation expense was \$2,050 million, \$2,122 million and \$2,253 million, respectively. We compute amortization of purchased finite-lived intangibles principally using the straight-line method, generally not to exceed a period of 20 years.

E. Foreign currency translation

The functional currency for most of our ME&T consolidated subsidiaries is the U.S. dollar. The functional currency for most of our Financial Products consolidated subsidiaries is the respective local currency. We include gains and losses resulting from the remeasurement of foreign currency amounts to the functional currency in Other income (expense) in Statement 1. We include gains and losses resulting from translating assets and liabilities from the functional currency to U.S. dollars in Accumulated other comprehensive income (loss) (AOCI) in Statement 3.

F. Derivative financial instruments

Our earnings and cash flow are subject to fluctuations due to changes in foreign currency exchange rates, interest rates and commodity prices. Our Risk Management Policy (policy) allows for the use of derivative financial instruments to prudently manage foreign currency exchange rate, interest rate and commodity price exposures. Our policy specifies that derivatives are not to be used for speculative purposes. Derivatives that we use are primarily foreign currency forward, option and cross currency contracts, interest rate contracts and commodity forward and option contracts. All derivatives are recorded at fair value. See Note 4 for more information.

G. Income taxes

We determine the provision for income taxes using the asset and liability approach taking into account guidance related to uncertain tax positions. Tax laws require items to be included in tax filings at different times than the items are reflected in the financial statements. We recognize a current liability for the estimated taxes payable for the current year. Deferred taxes represent the future tax consequences expected to occur when the reported amounts of assets and liabilities are recovered or paid. We adjust deferred taxes for enacted changes in tax rates and tax laws. We record valuation allowances to reduce deferred tax assets when it is more likely than not that a tax benefit will not be realized. See Note 6 for further discussion.

H. Goodwill

For acquisitions accounted for as a business combination, goodwill represents the excess of the cost over the fair value of the net assets acquired. We are required to test goodwill for impairment, at the reporting unit level, annually and when events or circumstances make it more likely than not that an

impairment may have occurred. A reporting unit is an operating segment or one level below an operating segment (referred to as a component) to which goodwill is assigned when initially recorded. We assign goodwill to reporting units based on our integration plans and the expected synergies resulting from the acquisition. Because Caterpillar is a highly integrated company, the businesses we acquire are sometimes combined with or integrated into existing reporting units. When changes occur in the composition of our operating segments or reporting units, we reassign goodwill to the affected reporting units based on their relative fair values.

We perform our annual goodwill impairment test as of October 1 and monitor for interim triggering events on an ongoing basis. We review goodwill for impairment utilizing either a qualitative assessment or a quantitative goodwill impairment test. If we choose to perform a qualitative assessment and determine the fair value more likely than not exceeds the carrying value, no further evaluation is necessary. For reporting units where we perform the quantitative goodwill impairment test, we compare the fair value of each reporting unit, which we primarily determine using an income approach based on the present value of discounted cash flows, to the respective carrying value, which includes goodwill. If the fair value of the reporting unit exceeds its carrying value, we do not consider the goodwill impaired. If the carrying value is higher than the fair value, we would recognize the difference as an impairment loss. See Note 10 for further details.

I. Estimates in financial statements

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect reported amounts. The more significant estimates include: residual values for leased assets; fair values for goodwill impairment tests; warranty liability and reserves for product liability and insurance losses, postretirement benefits, post-sale discounts, credit losses and income taxes.

J. New accounting guidance

A. Adoption of new accounting standards

Reference rate reform (Accounting Standards Update (ASU) 2020-04) – In March 2020, the Financial Accounting Standards Board (FASB) issued accounting guidance to ease the potential burden in accounting for reference rate reform related activities that impact debt, leases, derivatives and other contracts. The guidance is optional and may be elected over time as reference rate reform activities occur between March 12, 2020 through December 31, 2022. In January 2021, we elected to adopt optional expedients impacting our derivative instruments. In addition, in October 2021, we elected to adopt optional expedients for contract modifications. Our adoption of the optional expedients did not have a material impact on our financial statements.

We adopted the following ASUs effective January 1, 2021, none of which had a material impact on our financial statements:

ASU	Description
2020-01	Investments - Equity securities, equity method and joint ventures and derivatives and hedging
2020-08	Codification improvements - Receivables - Nonrefundable fees and other costs
2021-01	Reference rate reform - Scope

B. Accounting standards issued but not yet adopted

We consider the applicability and impact of all ASUs. We assessed ASUs not listed above and determined that they either were not applicable or were not expected to have a material impact on our financial statements.

2. Sales and revenue recognition

A. Sales of Machinery, Energy & Transportation

We recognize sales of ME&T when all the following criteria are satisfied: (i) a contract with an independently owned and operated dealer or an end user exists which has commercial substance; (ii) it is probable we will collect the amount charged to the dealer or end user; and (iii) we have completed our performance obligation whereby the dealer or end user has obtained control of the product. A contract with commercial substance exists once we receive and accept a purchase order under a dealer sales agreement, or once we enter into a contract with an end user. If collectibility is not probable, the sale is deferred and not recognized until collection is probable or payment is received. Control of our products typically transfers when title and risk of ownership of the product has transferred to the dealer or end user. Typically, where product is produced and sold in the same country, title and risk of ownership transfer when we ship the product. Products that are exported from a country for sale typically transfer title and risk of ownership at the border of the destination country.

Our remanufacturing operations are primarily focused on the remanufacture of Cat engines and components and rail related products. In this business, we inspect, clean and remanufacture used engines and related components (core). In connection with the sale of our remanufactured product to dealers, we collect a deposit that is repaid if the dealer returns an acceptable core within a specified time period. Caterpillar owns and has title to the cores when they are returned from dealers. The rebuilt engine or component (the core plus any new content) is then sold as a remanufactured product to dealers and end users. We recognize revenue pursuant to the same transfer of control criteria as ME&T sales noted above. At the time of sale, we recognize the deposit in Other current liabilities in Statement 3, and we recognize the core to be returned as an asset in Prepaid expenses and other current assets in Statement 3 at the estimated replacement cost (based on historical experience with usable cores). Upon receipt of an acceptable core, we repay the deposit and relieve the liability. We then transfer the returned core asset into inventory. In the event that the deposit is forfeited (i.e., upon failure by the dealer to return an acceptable core in the specified time period), we recognize the core deposit and the cost of the core in Sales and Cost of goods sold, respectively.

We provide discounts to dealers through merchandising programs. We have numerous programs that are designed to promote the sale of our products. The most common dealer programs provide a discount when the dealer sells a product to a targeted end user. Generally, we estimate the cost of these discounts for each product by model by geographic region based on historical experience and known changes in merchandising programs. We report the cost of these discounts as a reduction to the transaction price when we recognize the product sale. We accrue a corresponding post-sale discount reserve in Statement 3, which represents discounts we expect to pay on units sold. If discounts paid differ from those estimated, we report the difference as a change in the transaction price.

Except for replacement parts, no right of return exists on the sale of our products. We estimate replacement part returns based on historical experience and recognize a parts return asset in Prepaid expenses and other current assets in Statement 3, which represents our right to recover replacement parts we expect will be returned. We also recognize a refund liability in Other current liabilities in Statement 3 for the refund we expect to pay for returned parts. If actual replacement part returns differ from those estimated, we recognize the difference in the estimated replacement part return asset and refund liability in Cost of goods sold and Sales, respectively.

Our standard dealer invoice terms are established by marketing region. Our invoice terms for end user sales are established by the responsible business unit. Payments from dealers are due shortly after the time of sale. When we make a sale to a dealer, the dealer is responsible for payment even if the product is not sold to an end user. Dealers and end users must make payment within the established invoice terms to avoid potential interest costs. Interest at or above prevailing market rates may be charged on any past due balance, and generally our practice is to not forgive this interest. In addition, Cat Financial provides wholesale inventory financing for a dealer's purchase of inventory. Wholesale inventory receivables have varying payment terms. We include wholesale inventory receivables in Receivables – trade and other and Long-term receivables – trade and other in Statement 3. See Note 7 for further information. We recognize trade receivables from dealers and end users in Receivables - trade and other and Long-term receivables trade and other in Statement 3. Trade receivables from dealers and end users were \$7,267 million, \$6,310 million and \$7,648 million as of December 31, 2021, 2020 and 2019, respectively. Long-term trade receivables from dealers and end users were \$624 million, \$657 million and \$693 million as of December 31, 2021, 2020 and 2019, respectively.

We establish an allowance for credit losses for ME&T receivables when it becomes probable that we will not collect the receivable. Our allowance for credit losses is not significant.

We invoice in advance of recognizing the sale of certain products. We recognize advanced customer payments as a contract liability in Customer advances and Other liabilities in Statement 3. Contract liabilities were \$1,557 million, \$1,526 million and \$1,654 million as of December 31, 2021, 2020 and 2019, respectively. We reduce the contract liability when we recognize revenue. During 2021, we recognized \$903 million of revenue that was recorded as a contract liability at the beginning of 2021. During 2020, we recognized \$1,012 million of revenue that was recorded as a contract liability at the beginning of 2020.

We have elected the practical expedient to not adjust the amount of revenue to be recognized under a contract with a dealer or end user for the effects of time value of money when the timing difference between receipt of payment and recognition of revenue is less than one year.

As of December 31, 2021, we have entered into contracts with dealers and end users for which sales have not been recognized as we have not satisfied our performance obligations and transferred control of the products. The dollar amount of unsatisfied performance obligations for contracts with an original duration greater than one year is \$6.4 billion, with about one-third of the amount expected to be completed and revenue recognized in the twelve months following December 31, 2021. We have elected the practical expedient to not disclose unsatisfied performance obligations with an original contract duration of one year or less. Contracts with an original duration of one year or less are primarily sales to dealers for machinery, engines and replacement parts.

We exclude sales and other related taxes from the transaction price. We account for shipping and handling costs associated with outbound freight after control over a product has transferred as a fulfillment cost which is included in Cost of goods sold.

We provide a standard manufacturer's warranty of our products at no additional cost. At the time we recognize a sale, we record estimated future warranty costs. See Note 21 for further discussion of our product warranty liabilities.

See Note 23 for further disaggregated sales and revenues information.

B. Revenues of Financial Products

Revenues of Financial Products are generated primarily from finance revenue on finance receivables and rental payments on operating leases. We record finance revenue over the life of the related finance receivable using the interest method, including the accretion of certain direct origination costs that are deferred. We recognize revenue from rental payments received on operating leases on a straight-line basis over the term of the lease.

We suspend recognition of finance revenue and operating lease revenue and place the account on non-accrual status when management determines that collection of future income is not probable (generally after 120 days past due). We resume recognition of revenue, and recognize previously suspended income, when we consider collection of remaining amounts to be probable. We write off interest earned but uncollected prior to the receivable being placed on non-accrual status through Provision for credit losses when, in the judgment of management, we consider it to be uncollectible. See Note 7 for more information.

3. Stock-based compensation

Our stock-based compensation plans primarily provide for the granting of stock options, restricted stock units (RSUs) and performance-based restricted stock units (PRSUs) to Officers and other key employees, as well as non-employee Directors. Stock options permit a holder to buy Caterpillar stock at the stock's price when the option was granted. RSUs are agreements to issue shares of Caterpillar stock at the time of vesting. PRSUs are similar to RSUs and include performance conditions in the vesting terms of the award.

Our long-standing practices and policies specify that the Compensation Committee (the Committee) of the Board of Directors approve all stock-based compensation awards. The award approval process specifies the grant date, value and terms of the award. We consistently apply the same terms and conditions to all employee grants, including Officers. The Committee approves all individual Officer grants. We determine the number of stock-based compensation award units included in an individual's award based on the methodology approved by the Committee. The exercise price methodology approved by the Committee is the closing price of the Company stock on the date of the grant. In June of 2014, shareholders approved the Caterpillar Inc. 2014 Long-Term Incentive

Plan (the Plan) under which all new stock-based compensation awards are granted. In June of 2017, shareholders amended and restated the Plan. The Plan initially provided that up to 38,800,000 Common Shares would be reserved for future issuance under the Plan, subject to adjustment in certain events. Subsequent to the shareholder approval of the amendment and restatement of the Plan, an additional 36,000,000 Common Shares became available for all awards under the Plan.

Common stock issued from Treasury stock under the plans totaled 3,571,503 for 2021, 5,317,243 for 2020 and 5,126,379 for 2019. The total number of shares authorized for equity awards under the amended and restated Caterpillar Inc. 2014 Long-Term Incentive Plan is 74,800,000, of which 33,880,674 shares remained available for issuance as of December 31, 2021.

Stock option and RSU awards generally vest according to a three-year graded vesting schedule. One-third of the award will become vested on the first anniversary of the grant date, one-third of the award will become vested on the second anniversary of the grant date and one-third of the award will become vested on the third anniversary of the grant date. PRSU awards generally have a three-year performance period and cliff vest at the end of the period based upon achievement of performance targets established at the time of grant.

Upon separation from service, if the participant is 55 years of age or older with more than five years of service, the participant meets the criteria for a "Long Service Separation." Award terms for stock option and RSU grants allow for continued vesting as of each vesting date specified in the award document for employees who meet the criteria for a "Long Service Separation" and fulfill a requisite service period of six months. We recognize compensation expense for eligible employees for the grants over the period from the grant date to the end date of the six-month requisite service period. For employees who become eligible for a "Long Service Separation" subsequent to the end date of the six-month requisite service period and prior to the completion of the vesting period, we recognized compensation expense over the period from the grant date to the date eligibility is achieved.

Award terms for PRSU grants allow for continued vesting upon achievement of the performance target specified in the award document for employees who meet the criteria for a "Long Service Separation" and fulfill a requisite service period of six months. We recognize compensation expense for the PRSU grants with respect to employees who have met the criteria for a "Long Service Separation" over the period from the grant date to the end of the six-month requisite service period. For employees who become eligible for a "Long Service Separation" subsequent to the end date of the six-month requisite service period and prior to the completion of the vesting period, we recognize compensation expense over the period from the grant date to the date eligibility is achieved.

At grant, option awards have a term life of ten years. For awards granted prior to 2016, if the "Long Service Separation" criteria are met, the vested options have a life that is the lesser of ten years from the original grant date or five years from the separation date. For awards granted beginning in 2016, the vested options have a life equal to ten years from the original grant date.

Accounting guidance on share-based payments requires companies to estimate the fair value of options on the date of grant using an option-pricing model. The fair value of our option grants was estimated using the Black-Scholes option-pricing model. The Black-Scholes option-pricing model considers a range of assumptions related to volatility, risk-free interest rate and historical employee behavior. Expected volatility was based on historical Caterpillar stock price movement and current implied volatilities from traded options on Caterpillar stock. The risk-free interest rate was based

on U.S. Treasury security yields at the time of grant. The weighted-average dividend yield was based on historical information. We determine the expected life from the actual historical employee

exercise behavior. The following table provides the assumptions used in determining the fair value of the Option awards for the years ended December 31, 2021, 2020 and 2019, respectively.

	Grant Year		
	2021	2020	2019
Weighted-average dividend yield	2.6%	2.5%	2.6%
Weighted-average volatility	32.9%	25.7%	29.1%
Range of volatilities	29.2%-45.8%	24.5%-29.7%	25.1%- 38.7%
Range of risk-free interest rates	0.06%-1.41%	1.21%-1.39%	2.48%-2.68%
Weighted-average expected lives	8 years	8 years	7 years

Beginning with the 2018 grant, we credit RSU and PRSU awards with dividend equivalent units on each date that we pay a cash dividend to holders of Common stock. We determine the fair value of the RSU and PRSU awards granted in 2021, 2020 and 2019 as the closing stock price on the date of the grant.

Please refer to Tables I and II below for additional information on our stock-based compensation awards.

TABLE I — Financial Information Related to Stock-based Compensation

	Stock options		RSUs		PRSUs	
	Shares	Weighted-Average Exercise Price	Shares	Weighted-Average Grant Date Fair Value	Shares	Weighted-Average Grant Date Fair Value
Outstanding at January 1, 2021	10,076,983	\$ 109.60	1,327,950	\$ 134.89	727,757	\$ 132.81
Granted to officers and key employees	1,084,821	\$ 219.76	472,698	\$ 216.50	285,056	\$ 215.45
Exercised	(3,399,720)	\$ 103.45	—	\$ —	—	\$ —
Vested	—	\$ —	(665,357)	\$ 138.90	(356,618)	\$ 138.35

	7,722,420		\$ 127.52	\$ 611	4,914,111		\$ 106.36	\$ 493

¹ The difference between a stock award's exercise price and the underlying stock's closing market price at December 31, 2021, for awards with market price greater than the exercise price. Amounts are in millions of dollars.

The computations of weighted-average exercise prices and aggregate intrinsic values are not applicable to RSUs or PRSUs since these awards represent an agreement to issue shares of stock at the time of vesting. At December 31, 2021, there were 1,100,181 outstanding RSUs with a weighted average remaining contractual life of 1.4 years and 645,373 outstanding PRSUs with a weighted-average remaining contractual life of 1.4 years.

TABLE II—Additional Stock-based Award Information

(Dollars in millions except per share data)

	2021	2020	2019
Stock options activity:			
Weighted-average fair value per share of stock awards granted	\$ 56.30	\$ 25.98	\$ 40.98
Intrinsic value of stock awards exercised	\$ 374	\$ 386	\$ 264
Fair value of stock awards vested ¹	\$ 59	\$ 64	\$ 100
Cash received from stock awards exercised	\$ 212	\$ 282	\$ 298
RSUs activity:			
Weighted-average fair value per share of stock awards granted	\$ 216.50	\$ 128.07	\$ 138.61
Fair value of stock awards vested ²	\$ 136	\$ 87	\$ 110
PRsUs activity:			
Weighted-average fair value per share of stock awards granted	\$ 215.45	\$ 128.41	\$ 138.67
Fair value of stock awards vested ²	\$ 74	\$ 59	\$ 59

¹ Based on the grant date fair value.² Based on the underlying stock's closing market price on the vesting date.

In accordance with guidance on share-based payments, stock-based compensation expense is based on the grant date fair value and is classified within Cost of goods sold, Selling, general and administrative expenses and Research and development expenses corresponding to the same line item as the cash compensation paid to respective employees, officers and non-employee directors. We recognize stock-based compensation expense on a straight-line basis over the requisite service period for awards with terms that specify cliff or graded vesting and contain only service conditions. Stock-based compensation expense for PRsUs is based on the probable number of shares expected to vest and is recognized primarily on a straight-line basis.

Before tax, stock-based compensation expense for 2021, 2020 and 2019 was \$200 million, \$202 million and \$205 million, respectively, with a corresponding income tax benefit of \$23 million, \$34 million and \$35 million, respectively.

The amount of stock-based compensation expense capitalized for the years ended December 31, 2021, 2020 and 2019 did not have a significant impact on our financial statements.

At December 31, 2021, there was \$143 million of total unrecognized compensation cost from stock-based compensation arrangements granted under the plans, which is related to non-vested stock-based awards. We expect to recognize the compensation expense over a weighted-average period of approximately 1.7 years.

We currently use shares in Treasury stock to satisfy share award exercises.

The cash tax benefits realized from stock awards exercised for 2021, 2020 and 2019 were \$102 million, \$108 million and \$89 million, respectively. We use the direct only method and tax law ordering approach to calculate the tax effects of stock-based compensation.

4. Derivative financial instruments and risk management

Our earnings and cash flow are subject to fluctuations due to changes in foreign currency exchange rates, interest rates and commodity prices. Our Risk Management Policy (policy) allows for the use of derivative financial instruments to prudently manage foreign currency exchange rate, interest rate and commodity price exposures. Our policy specifies that derivatives are not to be used for speculative purposes. Derivatives that we use are primarily foreign currency forward, option and cross currency contracts, interest rate contracts and commodity forward and option contracts. Our derivative activities are subject to the management, direction and control of our senior financial officers. We present at least annually to the Audit Committee of the Board of Directors

on our risk management practices, including our use of financial derivative instruments.

We recognize all derivatives at their fair value in Statement 3. On the date the derivative contract is entered into, we designate the derivative as (1) a hedge of the fair value of a recognized asset or liability (fair value hedge), (2) a hedge of a forecasted transaction or the variability of cash flow (cash flow hedge) or (3) an undesignated instrument. We record in current earnings changes in the fair value of a derivative that is qualified, designated and highly effective as a fair value hedge, along with the gain or loss on the hedged recognized asset or liability that is attributable to the hedged risk. We record in AOCI changes in the fair value of a derivative that is qualified, designated and highly effective as a cash flow hedge, to the extent effective, in Statement 3 until we reclassify them to earnings in the same period or periods during which the hedged transaction affects earnings. We report changes in the fair value of undesignated derivative instruments in current earnings. We classify cash flows from designated derivative financial instruments within the same category as the item being hedged on Statement 5. We include cash flows from undesignated derivative financial instruments in the investing category on Statement 5.

We formally document all relationships between hedging instruments and hedged items, as well as the risk-management objective and strategy for undertaking various hedge transactions. This process includes linking all derivatives that are designated as fair value hedges to specific assets and liabilities in Statement 3 and linking cash flow hedges to specific forecasted transactions or variability of cash flow.

We also formally assess, both at the hedge's inception and on an ongoing basis, whether the designated derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flow of hedged items. When a derivative is determined not to be highly effective as a hedge or the underlying hedged transaction is no longer probable, we discontinue hedge accounting prospectively, in accordance with the derecognition criteria for hedge accounting.

A. Foreign currency exchange rate risk

Foreign currency exchange rate movements create a degree of risk by affecting the U.S. dollar value of sales made and costs incurred in foreign currencies. Movements in foreign currency rates also affect our competitive position as these changes may affect business practices and/or pricing strategies of non-U.S.-based competitors. Additionally, we have balance sheet positions denominated in foreign currencies, thereby creating exposure to movements in exchange rates.

Our ME&T operations purchase, manufacture and sell products in many locations around the world. As we have a diversified revenue and cost base, we manage our future foreign currency cash flow exposure on a net basis. We use foreign currency forward and option contracts to manage unmatched foreign currency cash inflow and outflow. Our objective is to minimize the risk of exchange rate movements that would reduce the U.S. dollar value of our foreign currency cash flow. Our policy allows for managing anticipated foreign currency cash flow for up to approximately five years. As of December 31, 2021, the maximum term of these outstanding contracts at inception was approximately 60 months.

We generally designate as cash flow hedges at inception of the contract any Australian dollar, Brazilian real, British pound, Canadian dollar, Chinese yuan, Euro, Indian rupee, Japanese yen, Mexican peso, Norwegian Krona, Singapore dollar or Thailand baht forward or option contracts that meet the requirements for hedge accounting and the maturity extends beyond the current quarter-end. We perform designation on a specific exposure basis to support hedge accounting. The remainder of ME&T foreign currency contracts are undesignated.

In managing foreign currency risk for our Financial Products operations, our objective is to minimize earnings volatility resulting from conversion and the remeasurement of net foreign currency balance sheet positions and future transactions denominated in foreign currencies. Our policy allows the use of foreign currency forward, option and cross currency contracts to offset the risk of currency mismatch between our assets and liabilities and exchange rate risk associated with future transactions denominated in foreign currencies. Our foreign currency forward and option contracts are primarily undesignated. We designate fixed-to-fixed cross currency contracts as cash flow hedges to protect against movements in exchange rates on foreign currency fixed-rate assets and liabilities.

B. Interest rate risk

Interest rate movements create a degree of risk by affecting the amount of our interest payments and the value of our fixed-rate debt. Our practice is to use interest rate contracts to manage our exposure to interest rate changes.

Our ME&T operations generally use fixed-rate debt as a source of funding. Our objective is to minimize the cost of borrowed funds. Our policy allows us to enter into fixed-to-floating interest rate contracts and forward rate agreements to meet that objective. We designate fixed-to-floating interest rate contracts as fair value hedges at inception of the contract, and we designate certain

forward rate agreements as cash flow hedges at inception of the contract.

Financial Products operations has a match-funding policy that addresses interest rate risk by aligning the interest rate profile (fixed or floating rate and duration) of Cat Financial's debt portfolio with the interest rate profile of our receivables portfolio within predetermined ranges on an ongoing basis. In connection with that policy, we use interest rate derivative instruments to modify the debt structure to match assets within the receivables portfolio. This matched funding reduces the volatility of margins between interest-bearing assets and interest-bearing liabilities, regardless of which direction interest rates move.

Our policy allows us to use fixed-to-floating, floating-to-fixed and floating-to-floating interest rate contracts to meet the match-funding objective. We designate fixed-to-floating interest rate contracts as fair value hedges to protect debt against changes in fair value due to changes in the benchmark interest rate. We designate most floating-to-fixed interest rate contracts as cash flow hedges to protect against the variability of cash flows due to changes in the benchmark interest rate.

We have, at certain times, liquidated fixed-to-floating and floating-to-fixed interest rate contracts at both ME&T and Financial Products. We amortize the gains or losses associated with these contracts at the time of liquidation into earnings over the original term of the previously designated hedged item.

C. Commodity price risk

Commodity price movements create a degree of risk by affecting the price we must pay for certain raw materials. Our policy is to use commodity forward and option contracts to manage the commodity risk and reduce the cost of purchased materials.

Our ME&T operations purchase base and precious metals embedded in the components we purchase from suppliers. Our suppliers pass on to us price changes in the commodity portion of the component cost. In addition, we are subject to price changes on energy products such as natural gas and diesel fuel purchased for operational use.

Our objective is to minimize volatility in the price of these commodities. Our policy allows us to enter into commodity forward and option contracts to lock in the purchase price of a portion of these commodities within a five-year horizon. All such commodity forward and option contracts are undesignated.

The location and fair value of derivative instruments reported in Statement 3 were as follows:

(Millions of dollars)	Consolidated Statement of Financial Position Location		Asset (Liability) Fair Value	
			Years ended December 31,

We enter into International Swaps and Derivatives Association (ISDA) master netting agreements within ME&T and Financial Products that permit the net settlement of amounts owed under their respective derivative contracts. Under these master netting agreements, net settlement generally permits the company or the counterparty to determine the net amount payable for contracts due on the same date and in the same currency for similar types of derivative transactions. The master netting agreements generally also provide

for net settlement of all outstanding contracts with a counterparty in the case of an event of default or a termination event.

Collateral is generally not required of the counterparties or of our company under the master netting agreements. As of December 31, 2021 and 2020, no cash collateral was received or pledged under the master netting agreements.

The effect of the net settlement provisions of the master netting agreements on our derivative balances upon an event of default or termination event was as follows:

December 31, 2021			Gross Amounts Not Offset in the Statement of Financial Position

6. Income taxes

Reconciliation of the U.S. federal statutory rate to effective rate:

(Millions of dollars)	Years ended December 31,					
	2021		2020		2019	
Taxes at U.S. statutory rate	\$ 1,723	21.0%	\$ 839	21.0%	\$ 1,641	21.0%
(Decreases) increases resulting from:						
Non-U.S. subsidiaries taxed at other than the U.S. rate	211	2.6%	285	7.1%	365	4.7%
State and local taxes, net of federal ¹	28	0.3%	32	0.8%	59	0.8%
Interest and penalties, net of tax	45	0.6%	28	0.7%	34	0.4%
U.S. tax incentives	(123)	(1.5)%	(52)	(1.3)%	(149)	(1.9)%
Net excess tax benefits from stock-based compensation	(63)	(0.8)%	(49)	(1.2)%	(41)	(0.5)%
Prior year tax adjustments	(36)	(0.4)%	(80)	(2.0)%	(178)	(2.3)%
Other—net	(43)	(0.6)%	3	0.1%	15	0.2%
Provision (benefit) for income taxes	<u>\$ 1,742</u>	<u>21.2%</u>	<u>\$ 1,006</u>	<u>25.2%</u>	<u>\$ 1,746</u>	<u>22.4%</u>

¹ Excludes amounts included in net excess tax benefits from stock-based compensation.

Included in the line item above labeled "Non-U.S. subsidiaries taxed at other than the U.S. rate" are the effects of local and U.S. taxes related to earnings of non-U.S. subsidiaries, changes in the amount of unrecognized tax benefits associated with these earnings, losses at non-U.S. subsidiaries without local tax benefits due to valuation allowances and other permanent differences between tax and U.S. GAAP results.

The line item above labeled "Prior year tax adjustments" includes a \$36 million benefit in 2021 to reflect changes in estimates and an \$80 million benefit in 2020 including the impact of regulations received. During 2019, we recorded a \$178 million tax benefit to adjust previously unrecognized tax benefits as a result of receipt of additional guidance related to the calculation of the one-time mandatory deemed repatriation of non-U.S. earnings required by U.S. tax legislation enacted on December 22, 2017.

Distributions of profits from non-U.S. subsidiaries are not expected to cause a significant incremental U.S. tax impact in the future. However, these distributions may be subject to non-U.S. withholding taxes if profits are distributed from certain jurisdictions. Undistributed profits of non-U.S. subsidiaries of approximately

\$15 billion are considered indefinitely reinvested. Determination of the amount of unrecognized deferred tax liability related to indefinitely reinvested profits is not feasible primarily due to our legal entity structure and the complexity of U.S. and local tax laws.

The components of profit (loss) before taxes were:

(Millions of dollars)	Years ended December 31,		
	2021	2020	2019
U.S.	\$ 2,740	\$ 590	\$ 2,888
Non-U.S.	5,464	3,405	4,924
	<u>\$ 8,204</u>	<u>\$ 3,995</u>	<u>\$ 7,812</u>

Profit before taxes, as shown above, is based on the location of the entity to which such earnings are attributable. Where an entity's earnings are subject to taxation, however, may not correlate solely to where an entity is located. Thus, the income tax provision shown below as U.S. or non-U.S. may not correspond to the earnings shown above.

The components of the provision (benefit) for income taxes were:

(Millions of dollars)	Years ended December 31,		
	2021	2020	2019
Current tax provision (benefit):			
U.S. ¹	\$ 766	\$ 18	\$ 405
Non-U.S.	1,283	1,031	1,261
State (U.S.)	76	31	52
	<u>2,125</u>	<u>1,080</u>	<u>1,718</u>
Deferred tax provision (benefit):			
U.S. ¹	(387)	(44)	17
Non-U.S.	54	(34)	(7)
State (U.S.)	(50)	4	18
	<u>(383)</u>	<u>(74)</u>	<u>28</u>
Total provision (benefit) for income taxes	<u>\$ 1,742</u>	<u>\$ 1,006</u>	<u>\$ 1,746</u>

¹ Includes U.S. taxes related to non-U.S. earnings. We account for U.S. taxes on global intangible low-taxed income as a period cost.

We paid net income tax and related interest of \$1,759 million, \$1,311 million and \$1,847 million in 2021, 2020 and 2019, respectively.

Accounting for income taxes under U.S. GAAP requires that individual tax-paying entities of the company offset all deferred tax liabilities and assets within each particular tax jurisdiction

and present them as a noncurrent deferred tax liability or asset in the Consolidated Financial Position. Amounts in different tax jurisdictions cannot be offset against each other. The amount of deferred income taxes at December 31, included on the following lines in Statement 3, were as follows:

(Millions of dollars)	December 31,	
	2021	2020
Assets:		
Noncurrent deferred and refundable income taxes	\$ 1,669	\$ 1,358
Liabilities:		
Other liabilities	412	418
Deferred income taxes—net	<u>\$ 1,257</u>	<u>\$ 940</u>

The components of deferred tax assets and liabilities were:

(Millions of dollars)	December 31,	
	2021	2020
Deferred income tax assets:		
Tax carryforwards	\$ 1,380	\$ 1,346
Postemployment benefits other than pensions	848	919
Employee compensation and benefits	464	267
Research expenditures	415	193
Intercompany prepayments	280	—
Warranty reserves	266	247
Lease obligations	159	154
Post sale discounts	143	153
Pension	111	396
Allowance for credit losses	106	126
Other—net	235	317
	4,407	4,118
Deferred income tax liabilities:		
Capital and intangible assets, including lease basis differences	(1,457)	(1,526)
Other outside basis differences	(264)	(284)
Translation	(188)	(147)
Bond discount	(112)	(117)
Undistributed profits of non-U.S. subsidiaries	(101)	(95)
	(2,122)	(2,169)
Valuation allowance for deferred tax assets	(1,028)	(1,009)
Deferred income taxes—net	\$ 1,257	\$ 940

At December 31, 2021, approximately \$890 million of U.S. state tax net operating losses (NOLs) and \$130 million of U.S. state tax credit carryforwards were available. The state NOLs primarily expire over the next twenty years. The state tax credit carryforwards primarily expire over the next fifteen years, with some credits having an unlimited carryforward period. In total, we have established a valuation allowance of \$150 million related to certain of these carryforwards.

At December 31, 2021, approximately \$790 million of capital losses are available to carryforward on the U.S. federal tax return. These losses have a five-year carryforward period and will expire in 2027.

At December 31, 2021, approximately \$90 million of U.S. foreign tax credits were available to carryforward on the U.S. federal tax return. These credits have a ten-year carryforward period and begin to expire in 2028.

At December 31, 2021, amounts and expiration dates of net operating loss and interest carryforwards in various non-U.S. taxing jurisdictions were:

(Millions of dollars)						
2022	2023	2024	2025-2027	2028-2042	Unlimited	Total
\$ 4	\$ 3	\$ 14	\$ 32	\$ 844	\$ 3,876	\$ 4,773

At December 31, 2021, non-U.S. entities that have not yet demonstrated consistent and/or sustainable profitability to support the realization of net deferred tax assets have recorded valuation allowances of \$770 million, including certain entities in Luxembourg.

A reconciliation of the beginning and ending amount of gross unrecognized tax benefits for uncertain tax positions, including positions impacting only the timing of tax benefits, follows.

Reconciliation of unrecognized tax benefits: ¹

(Millions of dollars)	Years ended December 31,		
	2021	2020	2019
Beginning balance	\$ 1,759	\$ 1,778	\$ 1,796
Additions for tax positions related to current year	141	44	72
Additions for tax positions related to prior years	43	46	112
Reductions for tax positions related to prior years	(30)	(12)	(201)
Reductions for settlements ²	(24)	(94)	—
Reductions for expiration of statute of limitations	(3)	(3)	(1)
Ending balance	\$ 1,886	\$ 1,759	\$ 1,778
Amount that, if recognized, would impact the effective tax rate	\$ 1,688	\$ 1,657	\$ 1,616

¹ Foreign currency impacts are included within each line as applicable.

² Includes cash payment or other reduction of assets to settle liability.

We classify interest and penalties on income taxes as a component of the provision for income taxes. We recognized a net provision for interest and penalties of \$54 million, \$38 million and \$43 million during the years ended December 31, 2021, 2020 and 2019, respectively. The total amount of interest and penalties accrued was \$297 million and \$264 million as of December 31, 2021 and 2020, respectively.

In Revenue Agent's Reports issued at the end of the field examinations of our U.S. income tax returns for 2007 to 2012 including the impact of a loss carryback to 2005, the Internal Revenue Service has proposed to tax in the United States profits earned from certain parts transactions by Caterpillar SARL (CSARL) based on the examination team's application of the "substance-over-form" or "assignment-of-income" judicial doctrines. We are vigorously contesting the proposed increases to tax and penalties for these years of approximately \$2.3 billion. We believe that the relevant transactions complied with applicable tax laws and did not violate judicial doctrines. We have filed U.S. income tax returns on this same basis for years after 2012. Based on the information currently available, we do not anticipate a significant change to our unrecognized tax benefits for this position within the next 12

months. We currently believe the ultimate disposition of this matter will not have a material adverse effect on our consolidated financial position, liquidity or results of operations.

With the exception of a loss carryback to 2005, tax years prior to 2007 are generally no longer subject to U.S. tax assessment. In our major non-U.S. jurisdictions including Australia, Brazil, China, Germany, India, Japan, Mexico, Switzerland, Singapore and the U.K., tax years are typically subject to examination for three to ten years. Due to the uncertainty related to the timing and potential outcome of audits, we cannot estimate the range of reasonably possible change in unrecognized tax benefits in the next 12 months.

7. Cat Financial Financing Activities

A. Wholesale inventory receivables

Wholesale inventory receivables are receivables of Cat Financial that arise when Cat Financial provides financing for a dealer's purchase of inventory and were \$1,098 million and \$1,233 million, at December 31, 2021 and 2020, respectively. We include these receivables in Receivables—trade and other and Long-term receivables—trade and other in Statement 3.

Contractual maturities of outstanding wholesale inventory receivables:

(Millions of dollars)	December 31, 2021		
	Wholesale Loans	Wholesale Leases	Total
Amounts Due In			
2022	\$ 421	\$ 46	\$ 467
2023	237	38	275
2024	117	30	147
2025	56	22	78
2026	21	9	30
Thereafter	5	—	5
Total	857	145	1,002
Guaranteed residual value ¹	68	27	95
Unguaranteed residual value ¹	2	29	31
Less: Unearned income	(11)	(19)	(30)
Total	\$ 916	\$ 182	\$ 1,098

¹ For Wholesale loans, represents residual value on failed sale leasebacks.

Cat Financial's wholesale inventory receivables generally may be repaid or refinanced without penalty prior to contractual maturity.

Please refer to Note 18 for fair value information.

B. Finance receivables

Finance receivables are receivables of Cat Financial and are reported in Statement 3 net of an allowance for credit losses.

Contractual maturities of outstanding finance receivables:

(Millions of dollars)

	December 31, 2021		
	Retail Loans	Retail Leases	Total
Amounts Due In			
2022	\$ 5,839	\$ 3,137	\$ 8,976
2023	3,892	2,070	5,962
2024	2,571	1,101	3,672
2025	1,448	510	1,958
2026	647	217	864
Thereafter	195	34	229
Total	14,592	7,069	21,661
Guaranteed residual value ¹	16	386	402
Unguaranteed residual value ¹	3	720	723
Less: Unearned income	(304)	(554)	(858)
Total	\$ 14,307	\$ 7,621	\$ 21,928

¹ For Retail loans, represents residual value on failed sale leasebacks.

Cat Financial's finance receivables generally may be repaid or refinanced without penalty prior to contractual maturity.

Please refer to Note 18 for fair value information.

C. Allowance for credit losses

Portfolio segments

A portfolio segment is the level at which Cat Financial develops a systematic methodology for determining its allowance for credit losses. Cat Financial's portfolio segments and related methods for estimating expected credit losses are as follows:

Customer

Cat Financial provides loans and finance leases to end-user customers primarily for the purpose of financing new and used Caterpillar machinery, engines and equipment for commercial use, the majority of which operate in construction-related industries. Cat Financial also provides financing for vehicles, power generation facilities and marine vessels that, in most cases, incorporate Caterpillar products. The average original term of Cat Financial's customer finance receivable portfolio was approximately 50 months with an average remaining term of approximately 27 months as of December 31, 2021.

Cat Financial typically maintains a security interest in financed equipment and requires physical damage insurance coverage on the financed equipment, both of which provide Cat Financial with certain rights and protections. If Cat Financial's collection efforts fail to bring a defaulted account current, Cat Financial generally can repossess the financed equipment, after satisfying local legal requirements, and sell it within the Caterpillar dealer network or through third-party auctions.

Cat Financial estimates the allowance for credit losses related to its customer finance receivables based on loss forecast models utilizing probabilities of default and the estimated loss given default based on past loss experience adjusted for current conditions and reasonable and supportable forecasts capturing country and industry-specific economic factors.

During the year ended December 31, 2021, Cat Financial's forecasts for the markets in which it operates reflected a general improvement in economic conditions, which had deteriorated due to the COVID-19 pandemic, resulting from a growing economy, improved unemployment rates and a decrease in delinquencies. The company believes the economic forecasts employed represent reasonable and supportable forecasts, followed by a reversion to long-term trends.

Dealer

Cat Financial provides financing to Caterpillar dealers in the form of wholesale financing plans. Cat Financial's wholesale financing plans provide assistance to dealers by financing their mostly new Caterpillar equipment inventory and rental fleets on a secured and unsecured basis. In addition, Cat Financial provides a variety of secured and unsecured loans to Caterpillar dealers.

Cat Financial estimates the allowance for credit losses for dealer finance receivables based on historical loss rates with consideration of current economic conditions and reasonable and supportable forecasts.

In general, Cat Financial's Dealer portfolio segment has not historically experienced large increases or decreases in credit losses based on changes in economic conditions due to its close working relationships with the dealers and their financial strength. Therefore, Cat Financial made no adjustments to historical loss rates during the year ended December 31, 2021.

Classes of finance receivables

Cat Financial further evaluates portfolio segments by the class of finance receivables, which is defined as a level of information (below a portfolio segment) in which the finance receivables have the same initial measurement attribute and a similar method for assessing and monitoring credit risk. Cat Financial's classes, which align with management reporting for credit losses, are as follows:

- **North America** - Finance receivables originated in the United States and Canada.

- **EAME** - Finance receivables originated in Europe, Africa, the Middle East and the Commonwealth of Independent States.
- **Asia/Pacific** - Finance receivables originated in Australia, New Zealand, China, Japan, Southeast Asia and India.
- **Mining** - Finance receivables related to large mining customers worldwide.
- **Latin America** - Finance receivables originated in Mexico and Central and South American countries.
- **Caterpillar Power Finance** - Finance receivables originated worldwide related to marine vessels with Caterpillar engines

and Caterpillar electrical power generation, gas compression and co-generation systems and non-Caterpillar equipment that is powered by these systems.

Receivable balances, including accrued interest, are written off against the allowance for credit losses when, in the judgment of management, they are considered uncollectible (generally upon repossession of the collateral). Generally, the amount of the write-off is determined by comparing the fair value of the collateral, less cost to sell, to the amortized cost. Subsequent recoveries, if any, are credited to the allowance for credit losses when received.

An analysis of the allowance for credit losses was as follows:

(Millions of dollars)	December 31, 2021		
	Customer	Dealer	Total
Allowance for Credit Losses:			
Beginning balance	\$ 431	\$ 44	\$ 475
Adjustment to adopt new accounting guidance ¹	—	—	—

Credit quality of finance receivables

At origination, Cat Financial evaluates credit risk based on a variety of credit quality factors including prior payment experience, customer financial information, credit ratings, loan-to-value ratios, probabilities of default, industry trends, macroeconomic factors and

other internal metrics. On an ongoing basis, Cat Financial monitors credit quality based on past-due status as there is a meaningful correlation between the past-due status of customers and the risk of loss. In determining past-due status, Cat Financial considers the entire finance receivable past due when any installment is over 30 days past due.

Customer

The tables below summarize the aging category of Cat Financial's amortized cost of finance receivables in the Customer portfolio segment by origination year:

(Millions of dollars)	December 31, 2021								
	2021	2020	2019	2018	2017	Prior	Revolving Finance Receivables	Total Finance Receivables

Finance receivables in the Customer portfolio segment are substantially secured by collateral, primarily in the form of Caterpillar and other equipment. For those contracts where the borrower is experiencing financial difficulty, repayment of the outstanding amounts is generally expected to be provided through the operation or repossession and sale of the equipment.

Dealer

As of December 31, 2021, Cat Financial's total amortized cost of finance receivables within the Dealer portfolio segment was current, with the exception of \$78 million that was 91+ days past due in Latin America, all of which was originated in 2017. As of December 31, 2020, Cat Financial's total amortized cost of finance receivables within the Dealer portfolio segment was current, with the exception of \$81 million that was 91+ days past due in Latin America. Of these past due receivables, \$78 million were originated in 2017 and \$3 million were originated prior to 2016.

Non-accrual finance receivables

Recognition of income is suspended and the finance receivable is placed on non-accrual status when management determines that collection of future income is not probable. Contracts on non-accrual status are generally more than 120 days past due or have been restructured in a troubled debt restructuring (TDR). Recognition is resumed and previously suspended income is recognized when the

collection of remaining amounts is considered probable. Payments received while the finance receivable is on non-accrual status are applied to interest and principal in accordance with the contractual terms. Interest earned but uncollected prior to the receivable being placed on non-accrual status is written off through Provision for credit losses when, in the judgment of management, it is considered uncollectible.

In Cat Financial's Customer portfolio segment, finance receivables which were on non-accrual status and finance receivables over 90 days past due and still accruing income were as follows:

(Millions of dollars)	December 31, 2021		
	Amortized Cost		
	Non-accrual With an Allowance	Non-accrual Without an Allowance	91+ Still Accruing
North America	\$ 47	\$ 9	\$ 12
EAME	18	1	2
Asia/Pacific	19	—	7
Mining	8	1	14
Latin America	52	4	1
Caterpillar Power Finance	40	11	—
Total	\$ 184	\$ 26	\$ 36

(Millions of dollars)	December 31, 2020		
	Amortized Cost		
	Non-accrual With an Allowance	Non-accrual Without an Allowance	91+ Still Accruing
North America	\$ 86	\$ 1	\$ 34
EAME	113	1	1
Asia/Pacific	13	—	13
Mining	21	1	—
Latin America	63	—	1
Caterpillar Power Finance	170	17	—
Total	\$ 466	\$ 20	\$ 49

There was \$12 million, \$12 million and \$28 million of interest income recognized during the years ended December 31, 2021, 2020 and 2019, respectively, for customer finance receivables on non-accrual status.

As of December 31, 2021 and 2020, finance receivables in Cat Financial's Dealer portfolio segment on non-accrual status were \$78 million and \$81 million, respectively, all of which was in Latin America. There were no finance receivables in Cat Financial's Dealer portfolio segment more than 90 days past due and still accruing income as of December 31, 2021 and 2020 and no interest income was recognized on dealer finance receivables on non-accrual status during the years ended December 31, 2021, 2020 and 2019.

Troubled Debt Restructurings

A restructuring of a finance receivable constitutes a TDR when the lender grants a concession it would not otherwise consider to a borrower experiencing financial difficulties. Concessions granted may include extended contract maturities, inclusion of interest only periods, below market interest rates, payment deferrals and reduction of principal and/or accrued interest. Cat Financial individually evaluates TDR contracts and establishes an allowance based on the present value of expected future cash flows discounted at the receivable's effective interest rate, the fair value of the collateral for collateral-dependent receivables or the observable market price of the receivable.

There were no finance receivables modified as TDRs during the years ended December 31, 2021, 2020 and 2019 for the Dealer portfolio segment. Cat Financial's finance receivables in the Customer portfolio segment modified as TDRs for the years ended December 31, were as follows:

(Millions of dollars)	Year ended December 31, 2021		Year ended December 31, 2020		Year ended December 31, 2019	
	Pre-TDR Amortized Cost	Post-TDR Amortized Cost	Pre-TDR Amortized Cost	Post-TDR Amortized Cost	Pre-TDR Amortized Cost	Post-TDR Amortized Cost
Customer						
North America	\$ 6	\$ 6	\$ 13	\$ 13	\$ 11	\$ 11

Latin America	15	1	—
Caterpillar Power Finance	7	18	10
Total	\$ 29	\$ 49	\$ 15

8. Inventories

Inventories (principally using the LIFO method) are comprised of the following:

(Millions of dollars)	December 31,	
	2021	2020
Raw materials	\$ 5,528	\$ 4,021
Work-in-process	1,318	1,052
Finished goods	6,907	6,054
Supplies	285	275
Total inventories	\$ 14,038	\$ 11,402

9. Property, plant and equipment

(Millions of dollars)	Useful Lives (Years)	December 31,	
		2021	2020
Land	—	\$ 648	\$ 681
Buildings and land improvements	20-45	7,113	7,091
Machinery, equipment and other	2-10	12,868	13,004
Software	3-7	1,697	1,679
Equipment leased to others	1-7	5,733	6,077
Construction-in-process	—	812	739
Total property, plant and equipment, at cost		28,871	29,271
Less: Accumulated depreciation		(16,781)	(16,870)
Property, plant and equipment—net		\$ 12,090	\$ 12,401

10. Intangible assets and goodwill

A. Intangible assets

Intangible assets were comprised of the following:

(Millions of dollars)	Weighted Amortizable Life (Years)	December 31, 2021		
		Gross Carrying Amount	Accumulated Amortization	Net
Customer relationships	15	\$ 2,421	\$ (1,709)	\$ 712
Intellectual property	12	1,472	(1,192)	280
Other	14	156	(106)	50
Total finite-lived intangible assets	14	\$ 4,049	\$ (3,007)	\$ 1,042

(Millions of dollars)	Weighted Amortizable Life (Years)	December 31, 2020		
		Gross Carrying Amount	Accumulated Amortization	Net
Customer relationships	15	\$ 2,493	\$ (1,600)	\$ 893
Intellectual property	12	1,439	(1,073)	366
Other	14	164	(115)	49
Total finite-lived intangible assets	14	\$ 4,096	\$ (2,788)	\$ 1,308

Finite-lived intangible assets are amortized over their estimated useful lives and tested for impairment if events or changes in circumstances indicate that the asset may be impaired.

Amortization expense related to intangible assets was \$302 million, \$311 million and \$324 million for 2021, 2020 and 2019, respectively.

As of December 31, 2021, amortization expense related to intangible assets is expected to be:

(Millions of dollars)					
2022	2023	2024	2025	2026	Thereafter
\$ 286	\$ 227	\$ 169	\$ 159	\$ 88	\$ 113

B. Goodwill

There were no goodwill impairments during 2021, 2020 or 2019.

The changes in carrying amount of goodwill by reportable segment for the years ended December 31, 2021 and 2020 were as follows:

(Millions of dollars)	December 31, 2020	Acquisitions	Other Adjustments ¹	December 31, 2021
Construction Industries				
Goodwill	\$ 320	\$ 4	\$ (22)	\$ 302

1 Other adjustments are comprised primarily of foreign currency translation.

2 Includes All Other operating segment (See Note 23).

11. Investments in debt and equity securities

We have investments in certain debt and equity securities, primarily at Insurance Services, which we record at fair value and primarily include in Other assets in Statement 3.

We classify debt securities primarily as available-for-sale. We include the unrealized gains and losses arising from the revaluation of available-for-sale debt securities, net of applicable deferred income taxes, in equity (AOCI in Statement 3). We include the unrealized gains and losses arising from the revaluation of the equity securities in Other income (expense) in Statement 1. We generally determine realized gains and losses on sales of investments using the specific identification method for available-for-sale debt and equity securities and include them in Other income (expense) in Statement 1.

The cost basis and fair value of available-for-sale debt securities with unrealized gains and losses included in equity (AOCI in Statement 3) were as follows:

(Millions of dollars)	December 31, 2021			December 31, 2020		
	Cost Basis	Unrealized Pretax Net Gains (Losses)	Fair Value	Cost Basis	Unrealized Pretax Net Gains (Losses)	Fair Value
Government debt						
U.S. treasury bonds	\$ 10	\$ —	\$ 10	\$ 10	\$ —	\$ 10
Other U.S. and non-U.S. government bonds	61	—	61	58	1	59
Corporate bonds						
Corporate bonds	1,027	19	1,046	962	50	1,012
Asset-backed securities	175	1	176	156	3	159
Mortgage-backed debt securities						
U.S. governmental agency	319	6	325	362	12	374
Residential	4	—	4	5	—	5
Commercial	98	1	99	60	4	64
Total debt securities	\$ 1,694	\$ 27	\$ 1,721	\$ 1,613	\$ 70	\$ 1,683

As of December 31, 2021, the total unrealized losses for available-for-sale investments with net losses in AOCI was \$6 million. As of December 31, 2020, there was no available-for-sale investments with net losses in AOCI.

The cost basis and fair value of available-for-sale debt securities at December 31, 2021, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to prepay and creditors may have the right to call obligations.

(Millions of dollars)	December 31, 2021	
	Cost Basis	Fair Value
Due in one year or less	\$ 120	\$ 121
Due after one year through five years	750	763
Due after five years through ten years	332	337
Due after ten years	71	72
U.S. governmental agency mortgage-backed securities	319	325
Residential mortgage-backed securities	4	4
Commercial mortgage-backed securities	98	99
Total debt securities – available-for-sale	<u>\$ 1,694</u>	<u>\$ 1,721</u>

Sales of available-for-sale debt securities:

(Millions of dollars)	Years Ended December 31,		
	2021	2020	2019
Proceeds from the sale of available-for-sale securities	\$ 454	\$ 290	\$ 260
Gross gains from the sale of available-for-sale securities	\$ 4	\$ 2	\$ 1
Gross losses from the sale of available-for-sale securities	\$ —	\$ 1	\$ 1

In addition, we had \$964 million of investments in time deposits classified as held-to-maturity debt securities as of December 31, 2021. All these investments mature within one year and we include them in Prepaid expenses and other current assets in Statement 3. We did not have any investments classified as held-to-maturity debt securities as of December 31, 2020. We record held-to-maturity debt securities at amortized cost, which approximates fair value. We did not have any unrealized gains or losses on these securities as of December 31, 2021 and 2020.

For the years ended December 31 2021 and 2020, the net unrealized gains (losses) for equity securities held at December 31, 2021 and 2020 were \$105 million and \$47 million, respectively.

12. Postemployment benefit plans

We provide defined benefit pension plans, defined contribution plans and/or other postretirement benefit plans (retirement health care and life insurance) to employees in many of our locations throughout the world. Our defined benefit pension plans provide a benefit based on years of service and/or the employee's average earnings near retirement. Our defined contribution plans allow employees to contribute a portion of their salary to help save for retirement, and in most cases, we provide a matching contribution. The benefit obligation related to our non-U.S. defined benefit pension plans are

for employees located primarily in Europe, Japan and Brazil. For other postretirement benefits (OPEB), substantially all of our benefit obligation is for employees located in the United States.

Our U.S. defined benefit pension plans for support and management employees were frozen for certain employees on December 31, 2010 and were frozen for the remaining employees on December 31, 2019. On the respective transition dates employees moved to a retirement benefit that provided a frozen pension benefit and a 401(k) plan that will include a matching contribution and an annual employer contribution.

A. Obligations, assets and funded status

	U.S. Pension Benefits		Non-U.S. Pension Benefits		Other Postretirement Benefits	
	2021	2020	2021	2020	2021	2020
Weighted-average assumptions used to determine benefit obligation, end of year:						
Discount rate	2.8%	2.4%	1.8%	1.4%	2.7%	2.3%
Rate of compensation increase ¹	—%	—%	2.0%	2.0%	4.0%	4.0%

¹ Effective December 31, 2019, all U.S. pension benefits were frozen, and accordingly this assumption is no longer applicable.

We use the assumed discount rate to discount future benefit obligations back to today's dollars. The U.S. discount rate is based on a benefit cash flow-matching approach and represents the rate at which our benefit obligations could effectively be settled as of our measurement date, December 31. The benefit cash flow-matching approach involves analyzing Caterpillar's projected cash flows

against a high quality bond yield curve, calculated using a wide population of corporate Aa bonds available on the measurement date. We use a similar process to determine the assumed discount rate for our most significant non-U.S. plans. This rate is sensitive to changes in interest rates. A decrease in the discount rate would increase our obligation and future expense.

(Millions of dollars)	U.S. Pension Benefits		Non-U.S. Pension Benefits		Other Postretirement Benefits	
	2021	2020	2021	2020	2021	2020

Net (liability) asset recognized	<u>\$ (668)</u>	<u>\$ (1,588)</u>	<u>\$ 116</u>	<u>\$ (116)</u>	<u>\$ (3,606)</u>	<u>\$ (3,904)</u>
Amounts recognized in Accumulated other comprehensive income (pre-tax) consist of:						
Prior service cost (credit)	\$ —	\$ —	\$ 23	\$ 24	\$ (5)	\$ (46)

¹ Effective December 31, 2019, all U.S. pension benefits were frozen, and accordingly there is no longer any service cost.

² For 2021, Actuarial loss (gain) impacting the benefit obligation was primarily due to higher discount rates at the end of 2021 compared to the end of 2020. For 2020, Actuarial loss (gain) impacting the benefit obligation was primarily due to lower discount rates at the end of 2020 compared to the end of 2019.

³ The Liability for postemployment benefits reported in Statement 3 includes our liability for other postemployment benefits and our liability for non-qualified deferred compensation plans. For 2021, these liabilities were \$67 million and \$538 million, respectively. For 2020, these liabilities were \$63 million and \$491 million, respectively.

(Millions of dollars)	U.S. Pension Benefits		Non-U.S. Pension Benefits	
	2021	2020	2021	2020
Pension plans with projected benefit obligation in excess of plan assets:				
Projected benefit obligation	\$ 14,403	\$ 15,300	\$ 743	\$ 2,171
Fair value of plan assets	\$ 13,143	\$ 13,302	\$ 319	\$ 1,499
Pension plans with accumulated benefit obligation in excess of plan assets:				
Accumulated benefit obligation	\$ 14,403	\$ 15,300	\$ 603	\$ 1,988
Fair value of plan assets	\$ 13,143	\$ 13,302	\$ 234	\$ 1,425

The accumulated postretirement benefit obligation exceeds plan assets for all of our other postretirement benefit plans for all years presented.

B. Net periodic benefit cost

(Millions of dollars)	U.S. Pension Benefits			Non-U.S. Pension Benefits			Other Postretirement Benefits		
	2021	2020	2019	2021	2020	2019	2021	2020	2019
Components of net periodic benefit cost:									
Service cost ¹	\$ —	\$ —	\$ 115	\$ 57	\$ 55	\$ 80	\$ 100	\$ 94	\$ 80
Interest cost	330	483	600	53	68	94	64	103	136
Expected return on plan assets	(718)	(791)	(721)	(128)	(135)	(148)	(6)	(12)	(18)
Curtailments, settlements and termination benefits	—	(1)	(1)	(1)	30	(7)	—	—	—

Other changes in plan assets and benefit obligations recognized in other comprehensive income (pre-tax):									
Current year prior service cost (credit)	\$ —	\$ —	\$ —	\$ —	\$ 8	\$ (4)	\$ —	\$ (7)	\$ 8
Amortization of prior service (cost) credit	—	—	—	—	—	—	40	38	40
Total recognized in other comprehensive income	—	—	—	—	8	(4)	40	31	48
Total recognized in net periodic cost and other comprehensive income	\$ (875)	\$ (147)	\$ 65	\$ (134)	\$ 58	\$ 105	\$ (73)	\$ 367	\$ 512
Weighted-average assumptions used to determine net periodic benefit cost:									
Discount rate used to measure service cost ¹	—%	—%	4.3%	1.4%	1.5%	2.5%	2.5%	3.2%	4.1%
Discount rate used to measure interest cost	1.8%	2.8%	3.9%	1.2%	1.7%	2.3%	1.6%	2.8%	3.9%
Expected rate of return on plan assets ⁴	4.2%	5.1%	5.9%	2.9%	3.3%	3.8%	6.5%	7.0%	7.2%
Rate of compensation increase ¹	—%	—%	4.0%	2.0%	2.0%	3.0%	4.0%	4.0%	4.1%

¹ Effective December 31, 2019, all U.S. pension benefits were frozen, and accordingly there is no longer any service cost and certain assumptions are no longer applicable.

² Actuarial loss (gain) represents the effects of actual results differing from our assumptions and the effects of changing assumptions. We recognize actuarial loss (gain) immediately through earnings upon the annual remeasurement in the fourth quarter, or on an interim basis as triggering events warrant remeasurement.

³ The service cost component is included in Operating costs and all other components are included in Other income (expense) in Statement 1.

⁴ The weighted-average rates for 2022 are 4.0 percent and 3.1 percent for U.S. and non-U.S. pension plans, respectively.

The discount rates used in the determination of our service and interest cost components utilize a full yield curve approach which applies specific spot rates along the yield curve used in the calculation of the benefit obligation to the relevant projected cash flows.

Our U.S. expected long-term rate of return on plan assets is based on our estimate of long-term passive returns for equities and fixed income securities weighted by the allocation of our pension assets. Based on historical performance, we increase the passive returns due to our active management of the plan assets. To arrive at our expected long-term return, the amount added for

active management was 0.35 percent for 2021, and 0.40 percent for 2020 and 2019. We use a similar process to determine this rate for our non-U.S. plans.

The assumed health care trend rate represents the rate at which health care costs are assumed to increase. We assumed a weighted-average increase of 5.8 percent in our calculation of 2021 benefit expense. We expect a weighted-average increase of 5.6 percent during 2022. The 2022 rates are assumed to decrease gradually to the ultimate health care trend rate of 5 percent in 2025. This rate represents 3 percent general inflation plus 2 percent additional health care inflation.

C. Expected contributions and benefit payments

The following table presents information about expected contributions and benefit payments for pension and other postretirement benefit plans:

(Millions of dollars)	2022						
Expected employer contributions:							
U.S. Pension Benefits	\$	46					
Non-U.S. Pension Benefits	\$	55					
Other Postretirement Benefits	\$	256					
Expected benefit payments:	2022	2023	2024	2025	2026	2027-2031	Total
U.S. Pension Benefits	\$ 1,035	\$ 1,020	\$ 1,020	\$ 1,020	\$ 1,020	\$ 4,960	\$ 10,075
Non-U.S. Pension Benefits	\$ 210	\$ 175	\$ 180	\$ 185	\$ 195	\$ 1,045	\$ 1,990
Other Postretirement Benefits	\$ 275	\$ 270	\$ 265	\$ 260	\$ 260	\$ 1,250	\$ 2,580
Expected Medicare Part D subsidy:	\$ 7	\$ 7	\$ 7	\$ 7	\$ 6	\$ 26	\$ 60

The above table reflects the total expected employer contributions and expected benefits to be paid from the plan or from company assets and does not include the participants' share of the cost. The expected benefit payments for our other postretirement benefits include payments for prescription drug benefits. The above table also includes Medicare Part D subsidy amounts expected to be received by the company which will offset other postretirement benefit payments.

D. Plan assets

In general, our strategy for both the U.S. and non-U.S. pensions includes ongoing alignment of our investments to our liabilities, while reducing risk in our portfolio. The current U.S. pension target asset allocation is 85 percent fixed income and 15 percent equities. We will revise this target allocation periodically to ensure it reflects our overall objectives. The non-U.S. pension weighted-average target allocations are 82 percent fixed income, 10 percent equities, 5 percent real estate and 3 percent other. The target allocations for each plan vary based upon local statutory requirements, demographics of plan participants and funded status. We primarily invest the non-U.S. plan assets in non-U.S. securities.

Our target allocation for the other postretirement benefit plans is 70 percent equities and 30 percent fixed income.

We rebalance the U.S. plans to within the appropriate target asset allocation ranges on a monthly basis. The frequency of rebalancing

for the non-U.S. plans varies depending on the plan. As a result of our diversification strategies, there are no significant concentrations of risk within the portfolio of investments.

We permit the use of certain derivative instruments where appropriate and necessary for achieving overall investment policy objectives. The plans do not use derivative contracts for speculative purposes.

The accounting guidance on fair value measurements specifies a fair value hierarchy based upon the observability of inputs used in valuation techniques (Level 1, 2 and 3). Certain assets that are measured at fair value using the net asset value per share (or its equivalent) practical expedient have not been classified in the fair value hierarchy. See Note 18 for a discussion of the fair value hierarchy.

We determine fair values as follows:

- Equity securities are primarily based on valuations for identical instruments in active markets.
- Fixed income securities are primarily based upon models that take into consideration such market-based factors as recent sales, risk-free yield curves and prices of similarly rated bonds.
- Real estate is stated at the fund's net asset value or at appraised value.
- Cash, short-term instruments and other are based on the carrying amount, which approximates fair value, or the fund's net asset value.

The fair value of the pension and other postretirement benefit plan assets by category is summarized below:

(Millions of dollars)	December 31, 2021				
	Level 1	Level 2	Level 3	Measured at NAV	Total Assets at Fair Value

The activity attributable to U.S. pension assets measured at fair value using Level 3 inputs for the years ended December 31, 2021 and 2020 was insignificant. We valued these instruments using pricing models that, in management's judgment, reflect the assumptions a market participant would use.

E. Defined contribution plans

We have both U.S. and non-U.S. employee defined contribution plans to help employees save for retirement. Our primary U.S. 401(k) plan allows eligible employees to contribute a portion of their cash compensation to the plan on a tax-deferred basis. Employees with frozen defined benefit pension accruals are eligible for matching contributions equal to 100 percent of employee contributions to the plan up to 6 percent of cash compensation and an annual employer contribution that ranges from 3 to 5 percent of cash compensation (depending on years of service and age). Employees that were still accruing benefits under a defined benefit pension plan up to December 31, 2019 were eligible for matching contributions equal to 50 percent of employee contributions up to 6 percent of cash compensation. All our U.S. defined benefit pension plans were frozen on December 31, 2019 for remaining employees still accruing a benefit. Starting in 2020, these employees receive matching contributions equal to 100 percent of employee contributions to the plan up to 6 percent of cash compensation and an annual employer contribution that ranges from 3 to 5 percent of cash compensation (depending on years of service and age).

These 401(k) plans include various investment funds, including a non-leveraged employee stock ownership plan (ESOP). As of December 31, 2021 and 2020, the ESOP held 12.4 million and 13.2 million shares, respectively. We allocate all of the shares held by the ESOP to participant accounts. Dividends paid to participants are automatically reinvested into company shares unless the participant elects to have all or a portion of the dividend paid to the participant. Various other U.S. and non-U.S. defined contribution plans generally allow eligible employees to contribute a portion of their cash compensation to the plans, and in most cases, we provide a matching contribution to the funds.

Total company costs related to U.S. and non-U.S. defined contribution plans were as follows:

(Millions of dollars)	2021	2020	2019
U.S. plans	\$ 440	\$ 384	\$ 414
Non-U.S. plans	114	89	83
	<u>\$ 554</u>	<u>\$ 473</u>	<u>\$ 497</u>

13. Short-term borrowings

(Millions of dollars)	December 31,

Financial Products	6,307	5,221	7,129	1,629	1,555
	\$ 6,352	\$ 5,324	\$ 8,142	\$ 1,639	\$ 1,561

The above table includes \$5 million of medium-term notes that can be called at par.

Medium-term notes of \$1.35 billion maturing in the first quarter of 2022 were excluded from the current maturities of long-term debt in Statement 3 as of December 31, 2021 due to a \$2.0 billion issuance of medium-term notes on January 10, 2022 of which \$1.5 billion mature in 2024 and \$500 million mature in 2027. The

preceding maturity table reflects the reclassification of \$1.35 billion from maturities in 2022 to 2024.

Interest paid on short-term and long-term borrowings for 2021, 2020 and 2019 was \$920 million, \$1,089 million and \$1,057 million, respectively.

Please refer to Note 18 for fair value information on long-term debt.

15. Credit commitments

(Millions of dollars)	December 31, 2021		
	Consolidated	Machinery, Energy & Transportation	Financial Products
Credit lines available:			
Global credit facilities	\$ 10,500	\$ 2,750	\$ 7,750
Other external	3,251	184	3,067
Total credit lines available	13,751	2,934	10,817
Less: Commercial paper outstanding	(4,896)	—	(4,896)
Less: Utilized credit	(568)	(9)	(559)
Available credit	<u>\$ 8,287</u>	<u>\$ 2,925</u>	<u>\$ 5,362</u>

We have three global credit facilities with a syndicate of banks totaling \$10.50 billion (Credit Facility) available in the aggregate to both Caterpillar and Cat Financial for general liquidity purposes. Based on management's allocation decision, which can be revised from time to time, the portion of the Credit Facility available to ME&T as of December 31, 2021 was \$2.75 billion. Information on our Credit Facility is as follows:

- The 364-day facility of \$3.15 billion (of which \$825 million is available to ME&T) expires on September 1, 2022.
- The three-year facility, as amended and restated in September 2021, of \$2.73 billion (of which \$715 million is available to ME&T) expires in September 2024.
- The five-year facility, as amended and restated in September 2021, of \$4.62 billion (of which \$1.21 billion is available to ME&T) expires in September 2026.

Other consolidated credit lines with banks as of December 31, 2021 totaled \$3.25 billion. These committed and uncommitted credit lines, which may be eligible for renewal at various future dates or have no specified expiration date, are used primarily by our subsidiaries for local funding requirements. Caterpillar or Cat Financial may guarantee subsidiary borrowings under these lines.

At December 31, 2021, Caterpillar's consolidated net worth was \$16.58 billion, which was above the \$9.00 billion required under the Credit Facility. The consolidated net worth is defined as the consolidated shareholders' equity including preferred stock but excluding the pension and other postretirement benefits balance within AOCI.

At December 31, 2021, Cat Financial's covenant interest coverage ratio was 2.51 to 1. This is above the 1.15 to 1 minimum ratio, calculated as (1) profit excluding income taxes, interest expense and net gain/(loss) from interest rate derivatives to (2) interest expense calculated at the end of each calendar quarter for the rolling four quarter period then most recently ended, required by the Credit Facility.

In addition, at December 31, 2021, Cat Financial's six-month covenant leverage ratio was 7.25 to 1 and year-end covenant leverage ratio was 7.91 to 1. This is below the maximum ratio of debt to net worth of 10 to 1, calculated (1) on a monthly basis as the average of the leverage ratios determined on the last day of each of the six preceding calendar months and (2) at each December 31, required by the Credit Facility.

In the event Caterpillar or Cat Financial does not meet one or more of their respective financial covenants under the Credit Facility in the future (and are unable to obtain a consent or waiver), the syndicate of banks may terminate the commitments allocated to the party that does not meet its covenants. Additionally, in such event, certain of Cat Financial's other lenders under other loan agreements where similar financial covenants or cross default provisions are applicable may, at their election, choose to pursue remedies under those loan agreements, including accelerating the repayment of outstanding borrowings. At December 31, 2021, there were no borrowings under the Credit Facility.

16. Profit per share

Computations of profit per share:

(Dollars in millions except per share data)	2021	2020	2019
Profit for the period (A) ¹	\$ 6,489	\$ 2,998	\$ 6,093
Determination of shares (in millions):			
Weighted average number of common shares outstanding (B)	544.0	544.1	561.6
Shares issuable on exercise of stock awards, net of shares assumed to be purchased out of proceeds at average market price	4.5	4.5	5.9
Average common shares outstanding for fully diluted computation (C) ²	548.5	548.6	567.5
Profit per share of common stock:			
Assuming no dilution (A/B)	\$ 11.93	\$ 5.51	\$ 10.85
Assuming full dilution (A/C) ²	\$ 11.83	\$ 5.46	\$ 10.74
Shares outstanding as of December 31 (in millions)	535.9	545.3	550.1

¹ Profit attributable to common shareholders.

² Diluted by assumed exercise of stock-based compensation awards using the treasury stock method.

For the year ended December 31, 2021, 2020 and 2019, we excluded 1.1 million, 4.6 million and 3.0 million outstanding stock options, respectively, from the computation of diluted earnings per share because the effect would have been antidilutive.

In July 2018, the Board approved a share repurchase authorization (the 2018 Authorization) of up to \$10.0 billion of Caterpillar common stock effective January 1, 2019, with no expiration. As of

December 31, 2021, approximately \$2.1 billion remained available under the 2018 Authorization.

During 2021, 2020 and 2019, we repurchased 13.0 million, 10.1 million and 30.6 million shares of Caterpillar common stock, respectively, at an aggregate cost of \$2.7 billion, \$1.3 billion and \$4.0 billion respectively. We made these purchases through a combination of accelerated stock repurchase agreements with third-party financial institutions and open market transactions.

17. Accumulated other comprehensive income (loss)

We present comprehensive income and its components in Statement 2. Changes in the balances for each component of Accumulated other comprehensive income (loss) were as follows:

(Millions of dollars)	2021	2020	2019
Foreign currency translation:			
Beginning balance	\$ (910)	\$ (1,487)	\$ (1,601)
Adjustments to adopt new accounting guidance related to reclassification of certain tax effects from AOCI	—	—	98

Ending balance	\$ 20	\$ 54	\$ 20
Total AOCI Ending Balance at December 31	\$ (1,553)	\$ (888)	\$ (1,567)

18. Fair value disclosures

A. Fair value measurements

The guidance on fair value measurements defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants. This guidance also specifies a fair value hierarchy based upon the observability of inputs used in valuation techniques. Observable inputs (highest level) reflect market data obtained from independent sources, while unobservable inputs (lowest level) reflect internally developed market assumptions. In accordance with this guidance, fair value measurements are classified under the following hierarchy:

- **Level 1** – Quoted prices for identical instruments in active markets.
- **Level 2** – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs or significant value-drivers are observable in active markets.
- **Level 3** – Model-derived valuations in which one or more significant inputs or significant value-drivers are unobservable.

When available, we use quoted market prices to determine fair value, and we classify such measurements within Level 1. In some cases where market prices are not available, we make use of observable market based inputs to calculate fair value, in which case the measurements are classified within Level 2. If quoted or observable market prices are not available, fair value is based upon valuations in which one or more significant inputs are unobservable, including internally developed models that use, where possible, current market-based parameters such as interest rates, yield curves and currency rates. These measurements are classified within Level 3.

We classify fair value measurements according to the lowest level input or value-driver that is significant to the valuation. We may therefore classify a measurement within Level 3 even though there may be significant inputs that are readily observable.

Fair value measurement includes the consideration of nonperformance risk. Nonperformance risk refers to the risk that an obligation (either by a counterparty or Caterpillar) will not

be fulfilled. For financial assets traded in an active market, the nonperformance risk is included in the market price. For certain other financial assets and liabilities, our fair value calculations have been adjusted accordingly.

Investments in debt and equity securities

We have investments in certain debt and equity securities, primarily at Insurance Services, that are recorded at fair value. Fair values for our U.S. treasury bonds and large capitalization value and smaller company growth equity securities are based upon valuations for identical instruments in active markets. Fair values for other government bonds, corporate bonds and mortgage-backed debt securities are based upon models that take into consideration such market-based factors as recent sales, risk-free yield curves and prices of similarly rated bonds.

We also have investments in time deposits classified as held-to-maturity debt securities. The fair value of these investments is based upon valuations observed in less active markets than Level 1. These investments have a maturity of less than one year and are recorded at amortized costs, which approximate fair value.

In addition, Insurance Services has an equity investment in a real estate investment trust (REIT) which is recorded at fair value based on the net asset value (NAV) of the investment and is not classified within the fair value hierarchy.

See Note 11 for additional information on our investments in debt and equity securities.

Derivative financial instruments

The fair value of interest rate contracts is primarily based on a standard industry accepted valuation model that utilizes the appropriate market-based forward swap curves and zero-coupon interest rates to determine discounted cash flows. The fair value of foreign currency and commodity forward, option and cross currency contracts is based on standard industry accepted valuation models that discount cash flows resulting from the differential between the contract price and the market-based forward rate.

See Note 4 for additional information.

Assets and liabilities measured on a recurring basis at fair value, primarily related to Financial Products, included in Statement 3 as of December 31, 2021 and 2020 were as follows:

	December 31, 2021

In addition to the amounts above, certain Cat Financial loans are subject to measurement at fair value on a nonrecurring basis and are classified as Level 3 measurements. A loan is measured at fair value when management determines that collection of contractual amounts due is not probable and the loan is individually evaluated. In these cases, an allowance for credit losses may be established based either on the present value of expected future cash flows discounted at the receivables' effective interest rate, the fair value of the collateral for collateral-dependent receivables, or the observable market price of the receivable. In determining collateral value, Cat Financial estimates the current fair market value of the collateral less selling costs. Cat Financial had loans carried at fair value of \$100 million and \$243 million as of December 31, 2021 and 2020, respectively.

B. Fair values of financial instruments

In addition to the methods and assumptions we use to record the fair value of financial instruments as discussed in the Fair value measurements section above, we used the following methods and assumptions to estimate the fair value of our financial instruments:

Cash and cash equivalents

Carrying amount approximates fair value. We classify cash and cash equivalents as Level 1. See Statement 3.

Restricted cash and short-term investments

Carrying amount approximates fair value. We include restricted cash and short-term investments in Prepaid expenses and other current assets in Statement 3. We classify these instruments as

Our financial instruments not carried at fair value were as follows:

Level 1 except for time deposits which are Level 2. See Note 11 for additional information.

Finance receivables

We estimate fair value by discounting the future cash flows using current rates, representative of receivables with similar remaining maturities.

Wholesale inventory receivables

We estimate fair value by discounting the future cash flows using current rates, representative of receivables with similar remaining maturities.

Short-term borrowings

Carrying amount approximates fair value. We classify short-term borrowings as Level 1. See Note 13 for additional information.

Long-term debt

We estimate fair value for fixed and floating rate debt based on quoted market prices.

Guarantees

The fair value of guarantees is based upon our estimate of the premium a market participant would require to issue the same guarantee in a stand-alone arms-length transaction with an unrelated party. If quoted or observable market prices are not available, fair value is based upon internally developed models that utilize current market-based assumptions. We classify guarantees as Level 3. See Note 21 for additional information.

(Millions of dollars)	2021		2020		Fair Value Levels	Reference
	Carrying Amount	Fair Value	Carrying Amount	Fair Value		
Assets at December 31,						
Finance receivables–net (excluding finance leases) ¹	\$ 13,837	\$ 13,836	\$ 14,028	\$ 14,357	3	Notes 7 & 19

¹ Represents finance leases and failed sale leasebacks of \$8,083 million and \$7,961 million at December 31, 2021 and 2020, respectively.

¹ Represents finance leases and failed sale leasebacks of \$8,083 million and \$7,961 million at December 31, 2021 and 2020, respectively.

19. Concentration of credit risk

Financial instruments with potential credit risk consist primarily of trade and finance receivables and short-term and long-term investments. Additionally, to a lesser extent, we have a potential credit risk associated with counterparties to derivative contracts.

Trade receivables are primarily short-term receivables from independently owned and operated dealers and customers which arise in the normal course of business. We perform regular credit evaluations of our dealers and customers. Collateral generally is not required, and the majority of our trade receivables are unsecured. We do, however, when deemed necessary, make use of various devices such as security agreements and letters of credit to protect our interests. No single dealer or customer represents a significant concentration of credit risk.

Finance receivables and wholesale inventory receivables primarily represent receivables under installment sales contracts, receivables

arising from leasing transactions and notes receivable. We typically maintain a security interest in retail financed equipment and, in some instances, wholesale financed equipment. We also typically require physical damage insurance coverage on financed equipment. No single customer or dealer represented a significant concentration of credit risk.

Short-term and long-term investments are held with high quality institutions and, by policy, the amount of credit exposure to any one institution is limited. Long-term investments, primarily included in Other assets in Statement 3, are comprised primarily of available-for-sale debt securities and equity securities at Insurance Services.

For derivative contracts, collateral is generally not required of the counterparties or of our company. The company generally enters into International Swaps and Derivatives Association (ISDA) master netting agreements within ME&T and Financial Products that permit the net settlement of amounts owed under their respective derivative contracts. Our exposure to credit loss in the event of

nonperformance by the counterparties is limited to only those gains that we have recorded, but for which we have not yet received cash payment. The master netting agreements reduce the amount of loss the company would incur should the counterparties fail to meet their obligations. At December 31, 2021 and 2020, the maximum exposure to credit loss was \$342 million and \$281 million, respectively, before the application of any master netting agreements.

Please refer to Note 18 above for fair value information.

20. Leases

A. Lessee arrangements

We lease certain property, information technology equipment, warehouse equipment, vehicles and other equipment through operating leases. We recognize a lease liability and corresponding right-of-use asset based on the present value of lease payments.

To determine the present value of lease payments for most of our leases, we use our incremental borrowing rate based on information available on the lease commencement date. For certain property and information technology equipment leases, we have elected to separate payments for lease components from non-lease components. For all other leases, we have elected not to separate payments for lease and non-lease components. Our lease agreements may include options to extend or terminate the lease. When it is reasonably certain that we will exercise that option, we have included the option in the recognition of right-of-use assets and lease liabilities. We have elected not to recognize right-of-use assets or lease liabilities for leases with a term of twelve months or less.

Our finance leases are not significant and therefore are not included in the following disclosures.

The components of lease costs were as follows:

(Millions of dollars)	Year Ended December 31,	
	2021	2020
Operating lease cost	\$ 214	\$ 204
Short-term lease cost	\$ 46	\$ 50

We recognize operating lease right-of-use assets in Other assets in Statement 3. We recognize the operating lease liabilities in Other current liabilities and Other liabilities.

Supplemental information related to leases was as follows:

(Millions of dollars)	December 31, 2021	December 31, 2020
Operating Leases		
Other assets	\$ 625	\$ 603
Other current liabilities	\$ 158	\$ 163
Other liabilities	\$ 484	\$ 457
Weighted average remaining lease term		
Operating leases	7 years	7 years
Weighted average discount rates		
Operating leases	2%	2%

Maturities of operating lease liabilities were as follows:

(Millions of dollars)	December 31, 2021
Amounts Due In	
2022	\$ 165
2023	126
2024	94
2025	69
2026	51
Thereafter	190
Total lease payments	695
Less: Imputed interest	(53)
Total	\$ 642

Supplemental cash flow information related to leases was as follows:

(Millions of dollars)	Year ended December 31	
	2021	2020
Cash paid for amounts included in the measurement of lease liabilities		
Operating cash flows from operating leases	\$ 206	\$ 201
Right-of-use assets obtained in exchange for lease obligations:		
Operating leases	\$ 238	\$ 178

B. Lessor arrangements

We lease Caterpillar machinery, engines and other equipment to customers and dealers around the world, primarily through Cat Financial. Cat Financial leases to customers primarily through sales-type (non-tax) leases, where the lessee for tax purposes is considered to be the owner of the equipment during the term of the lease. Cat Financial also offers tax leases that are classified as either operating or direct finance leases for financial accounting purposes, depending on the characteristics of the lease. For tax purposes, Cat Financial is considered the owner of the equipment. Our lease agreements may include options for the lessee to purchase the underlying asset at the end of the lease term for either a stated fixed price or fair market value.

We determine the residual value of Cat Financial's leased equipment based on its estimated end-of-term market value. We estimate the residual value of leased equipment at the inception of the lease

The carrying amount of equipment leased to others, included in Property, plant and equipment - net in Statement 3, under operating leases was as follows:

based on a number of factors, including historical wholesale market sales prices, past remarketing experience and any known significant market/product trends. We also consider the following critical factors in our residual value estimates: lease term, market size and demand, total expected hours of usage, machine configuration, application, location, model changes, quantities, third-party residual guarantees and contractual customer purchase options.

During the term of our leases, we monitor residual values. For operating leases, we record adjustments to depreciation expense reflecting changes in residual value estimates prospectively on a straight-line basis. For finance leases, we recognize residual value adjustments through a reduction of finance revenue over the remaining lease term.

See Note 7 for contractual maturities of finance lease receivables (sales-type and direct finance leases).

(Millions of dollars)	December 31,	
	2021	2020
Equipment leased to others - at original cost	\$ 5,733	\$ 6,077
Less: Accumulated depreciation	(1,870)	(2,035)
Equipment leased to others - net	\$ 3,863	\$ 4,042

Payments due for operating leases as of December 31, 2021, were as follows:

(Millions of dollars)	2022	2023	2024	2025	2026	Thereafter	Total
	\$ 761	\$ 478	\$ 272	\$ 145	\$ 56	\$ 28	\$ 1,740

Revenues from finance and operating leases, primarily included in Revenues of Financial Products on Statement 1, were as follows:

(Millions of dollars)	Year ended December 31	
	2021	2020
Finance lease revenue	\$ 485	\$ 492
Operating lease revenue	1,128	1,124
Total	\$ 1,613	\$ 1,616

We present revenues net of sales and other related taxes.

21. Guarantees and product warranty

Caterpillar dealer performance guarantees

We have provided an indemnity to a third-party insurance company for potential losses related to performance bonds issued on behalf of Caterpillar dealers. The bonds have varying terms and are issued to insure governmental agencies against nonperformance by certain dealers. We also provided guarantees to third-parties related to the performance of contractual obligations by certain Caterpillar dealers. These guarantees have varying terms and cover potential financial losses incurred by the third parties resulting from the dealers' nonperformance.

In 2016, we provided a guarantee to an end user related to the performance of contractual obligations by a Caterpillar dealer. Under the guarantee, which expires in 2025, non-performance by the Caterpillar dealer could require Caterpillar to satisfy the contractual obligations by providing goods, services or financial compensation to the end user up to an annual designated cap.

Supplier consortium performance guarantee

We have provided a guarantee to a customer in Europe related to the performance of contractual obligations by a supplier consortium to which one of our Caterpillar subsidiaries is a member. The

guarantee covers potential damages incurred by the customer resulting from the supplier consortium's non-performance. The damages are capped except for failure of the consortium to meet certain obligations outlined in the contract in the normal course of business. The guarantee will expire when the supplier consortium performs all of its contractual obligations, which is expected to be completed in 2022.

We have dealer performance guarantees and third-party performance guarantees that do not limit potential payment to end users related to indemnities and other commercial contractual obligations. In addition, we have entered into contracts involving industry standard indemnifications that do not limit potential payment. For these unlimited guarantees, we are unable to estimate a maximum potential amount of future payments that could result from claims made.

No significant loss has been experienced or is anticipated under any of these guarantees. At both December 31, 2021 and 2020, the related recorded liability was \$5 million. The maximum potential amount of future payments (undiscounted and without reduction for any amounts that may possibly be recovered under recourse or collateralized provisions) we could be required to make under the guarantees at December 31 was as follows:

(Millions of dollars)	2021	2020
Caterpillar dealer performance guarantees	\$ 747	\$ 993
Supplier consortium performance guarantee	242	258
Other guarantees	232	234
Total guarantees	<u>\$ 1,221</u>	<u>\$ 1,485</u>

Cat Financial provides guarantees to purchase certain loans of Caterpillar dealers from a special-purpose corporation (SPC) that qualifies as a variable interest entity. The purpose of the SPC is to provide short-term working capital loans to Caterpillar dealers. This SPC issues commercial paper and uses the proceeds to fund its loan program. Cat Financial receives a fee for providing this guarantee. Cat Financial is the primary beneficiary of the SPC as its guarantees result in Cat Financial having both the power to direct the activities that most significantly impact the SPC's economic performance and the obligation to absorb losses, and therefore Cat Financial has consolidated the financial statements of the SPC. As of December 31, 2021 and 2020, the SPC's assets of \$888 million and \$1,026 million, respectively, were primarily comprised of loans to dealers, and the SPC's liabilities of \$888 million and \$1,025 million, respectively, were primarily comprised of commercial paper. The assets of the SPC are not available to pay Cat Financial's creditors. Cat Financial may be obligated to perform under the guarantee if the SPC experiences losses. No loss has been experienced or is anticipated under this loan purchase agreement.

Cat Financial has commitments to extend credit to customers and Caterpillar dealers through lines of credit and other pre-approved

credit arrangements. Cat Financial applies the same credit policies and approval process for these commitments to extend credit as we do for other financing. Collateral is not required for these commitments, but if credit is extended, collateral may be required upon funding. The amount of unused commitments to extend credit to Caterpillar dealers was \$10.71 billion at December 31, 2021. Cat Financial generally has the right to unconditionally cancel, alter, or amend the terms of these dealer commitments at any time. The amount of unused commitments to extend credit to customers was \$641 million at December 31, 2021. A significant portion of these commitments is not expected to be fully drawn upon; therefore, the total commitment amounts do not represent a future cash requirement.

We determine our product warranty liability by applying historical claim rate experience to the current field population and dealer inventory. Generally, we base historical claim rates on actual warranty experience for each product by machine model/engine size by customer or dealer location (inside or outside North America). We develop specific rates for each product shipment month and update them monthly based on actual warranty claim experience.

The reconciliation of the change in our product warranty liability balances for the years ended December 31 was as follows:

(Millions of dollars)	2021	2020
Warranty liability, beginning of period	\$ 1,612	\$ 1,541
Reduction in liability (payments)	(854)	(897)
Increase in liability (new warranties)	931	968
Warranty liability, end of period	<u>\$ 1,689</u>	<u>\$ 1,612</u>

22. Environmental and legal matters

The Company is regulated by federal, state and international environmental laws governing its use, transport and disposal of substances and control of emissions. In addition to governing our manufacturing and other operations, these laws often impact the development of our products, including, but not limited to, required compliance with air emissions standards applicable to internal combustion engines. We have made, and will continue to make, significant research and development and capital expenditures to comply with these emissions standards.

We are engaged in remedial activities at a number of locations, often with other companies, pursuant to federal and state laws. When it is probable we will pay remedial costs at a site, and those costs can be reasonably estimated, we accrue the investigation, remediation, and operating and maintenance costs against our earnings. We accrue costs based on consideration of currently available data and information with respect to each individual site, including available technologies, current applicable laws and regulations, and prior remediation experience. Where no amount within a range of estimates is more likely, we accrue the minimum. Where multiple potentially responsible parties are involved, we consider our proportionate share of the probable costs. In formulating the estimate of probable costs, we do not consider amounts expected to be recovered from insurance companies or others. We reassess these accrued amounts on a quarterly basis. The amount recorded for environmental remediation is not material and is included in Accrued expenses. We believe there is no more than a remote chance that a material amount for remedial activities at any individual site, or at all the sites in the aggregate, will be required.

On January 27, 2020, the Brazilian Federal Environmental Agency ("IBAMA") issued Caterpillar Brasil Ltda a notice of violation regarding allegations around the requirements for use of imported oils at the Piracicaba, Brazil facility. We have instituted processes to address the allegations. While we are still discussing resolution of these allegations with IBAMA, the initial notice from IBAMA included a proposed fine of approximately \$300,000. We do not expect this fine or our response to address the allegations to have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

On January 7, 2015, the Company received a grand jury subpoena from the U.S. District Court for the Central District of Illinois. The subpoena requested documents and information from the Company relating to, among other things, financial information concerning U.S. and non-U.S. Caterpillar subsidiaries (including undistributed profits of non-U.S. subsidiaries and the movement of cash among U.S. and non-U.S. subsidiaries). The Company has received additional subpoenas relating to this investigation requesting additional documents and information relating to, among other things, the purchase and resale of replacement parts by Caterpillar Inc. and non-U.S. Caterpillar subsidiaries, dividend distributions of certain non-U.S. Caterpillar subsidiaries, and Caterpillar SARL (CSARL) and related structures. On March 2-3, 2017, agents with the Department of Commerce, the Federal Deposit Insurance Corporation and the Internal Revenue Service executed search and seizure warrants at three facilities of the Company in the Peoria, Illinois area, including its former corporate headquarters. The warrants identify, and agents seized, documents and information related to, among other things, the export of products from the United States, the movement of products between the United States and Switzerland, the relationship between Caterpillar Inc. and CSARL, and sales outside the United States. It is the Company's understanding that the warrants, which concern both tax and export activities, are related to the ongoing grand jury investigation. The Company is continuing to cooperate with this investigation. The Company is unable to predict the outcome or reasonably estimate any potential

loss; however, we currently believe that this matter will not have a material adverse effect on the Company's consolidated results of operations, financial position or liquidity.

In addition, we are involved in other unresolved legal actions that arise in the normal course of business. The most prevalent of these unresolved actions involve disputes related to product design, manufacture and performance liability (including claimed asbestos exposure), contracts, employment issues, environmental matters, intellectual property rights, taxes (other than income taxes) and securities laws. The aggregate range of reasonably possible losses in excess of accrued liabilities, if any, associated with these unresolved legal actions is not material. In some cases, we cannot reasonably estimate a range of loss because there is insufficient information regarding the matter. However, we believe there is no more than a remote chance that any liability arising from these matters would be material. Although it is not possible to predict with certainty the outcome of these unresolved legal actions, we believe that these actions will not individually or in the aggregate have a material adverse effect on our consolidated results of operations, financial position or liquidity.

23. Segment information

A. Basis for segment information

Our Executive Office is comprised of a Chief Executive Officer (CEO), four Group Presidents, a Chief Financial Officer (CFO), a Chief Legal Officer and General Counsel and a Chief Human Resources Officer. The Group Presidents and CFO are accountable for a related set of end-to-end businesses that they manage. The Chief Legal Officer and General Counsel leads the Law, Security and Public Policy Division. The Chief Human Resources Officer leads the Human Resources Organization. The CEO allocates resources and manages performance at the Group President/CFO level. As such, the CEO serves as our Chief Operating Decision Maker, and operating segments are primarily based on the Group President/CFO reporting structure.

Three of our operating segments, Construction Industries, Resource Industries and Energy & Transportation are led by Group Presidents. One operating segment, Financial Products, is led by the CFO who also has responsibility for Corporate Services. Corporate Services is a cost center primarily responsible for the performance of certain support functions globally and to provide centralized services; it does not meet the definition of an operating segment. One Group President leads one smaller operating segment that is included in the All Other operating segment. The Law, Security and Public Policy Division and the Human Resources Organization are cost centers and do not meet the definition of an operating segment.

B. Description of segments

We have five operating segments, of which four are reportable segments. Following is a brief description of our reportable segments and the business activities included in the All Other operating segment:

Construction Industries: A segment primarily responsible for supporting customers using machinery in infrastructure and building construction applications. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes asphalt pavers; backhoe loaders; compactors; cold planers; compact track and multi-terrain loaders; mini, small, medium and large track excavators; motor graders; pipelayers; road reclaimers; skid steer loaders; telehandlers; small and medium track-type tractors; track-type loaders; utility vehicles; wheel excavators; compact, small and medium wheel loaders; and related parts and work tools. Inter-segment sales are a source of revenue for this segment.

Resource Industries: A segment primarily responsible for supporting customers using machinery in mining, heavy construction and quarry and aggregates. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product portfolio includes large track-type tractors; large mining trucks; hard rock vehicles; longwall miners; electric rope shovels; draglines; hydraulic shovels; rotary drills; large wheel loaders; off-highway trucks; articulated trucks; wheel tractor scrapers; wheel dozers; landfill compactors; soil compactors; select work tools; machinery components; electronics and control systems and related parts. In addition to equipment, Resource Industries also develops and sells technology products and services to provide customers fleet management, equipment management analytics, autonomous machine capabilities, safety services and mining performance solutions. Resource Industries also manages areas that provide services to other parts of the company, including integrated manufacturing, research and development for drivetrains, hydraulic systems, electronics and software for Cat machines and engines. Inter-segment sales are a source of revenue for this segment.

Energy & Transportation: A segment primarily responsible for supporting customers using reciprocating engines, turbines, diesel-electric locomotives and related services across industries serving Oil and Gas, Power Generation, Industrial and Transportation applications, including marine- and rail-related businesses. Responsibilities include business strategy, product design, product management and development, manufacturing, marketing and sales and product support. The product and services portfolio includes turbines, centrifugal gas compressors, and turbine-related services; reciprocating engine-powered generator sets; integrated systems used in the electric power generation industry; reciprocating engines and integrated systems and solutions for the marine and oil and gas industries; reciprocating engines supplied to the industrial industry as well as Cat machinery; and diesel-electric locomotives and components and other rail-related products and services, including remanufacturing and leasing. Responsibilities also include the remanufacturing of Caterpillar reciprocating engines and components and remanufacturing services for other companies; and product support of on-highway vocational trucks for North America. Inter-segment sales are a source of revenue for this segment.

Financial Products Segment: Provides financing alternatives to customers and dealers around the world for Caterpillar products, as well as financing for vehicles, power generation facilities and marine vessels that, in most cases, incorporate Caterpillar products. Financing plans include operating and finance leases, installment sale contracts, repair/rebuild financing, working capital loans and wholesale financing plans. The segment also provides insurance and risk management products and services that help customers and dealers manage their business risk. Insurance and risk management products offered include physical damage insurance, inventory protection plans, extended service coverage and maintenance plans for machines and engines, and dealer property and casualty insurance. The various forms of financing, insurance and risk management products offered to customers and dealers help support the purchase and lease of Caterpillar equipment. The segment also earns revenues from ME&T, but the related costs are not allocated to operating segments. Financial Products' segment profit is determined on a pretax basis and includes other income/expense items.

All Other operating segment: Primarily includes activities such as: business strategy; product management and development; manufacturing and sourcing of filters and fluids, undercarriage, ground-engaging tools, fluid transfer products, precision seals, rubber sealing and connecting components primarily for Caterpillar products; parts distribution; integrated logistics solutions;

distribution services responsible for dealer development and administration, including one wholly owned dealer in Japan; dealer portfolio management and ensuring the most efficient and effective distribution of machines, engines and parts; brand management and marketing strategy; and digital investments for new customer and dealer solutions that integrate data analytics with state-of-the-art digital technologies while transforming the buying experience. Results for the All Other operating segment are included as a reconciling item between reportable segments and consolidated external reporting.

C. Segment measurement and reconciliations

There are several methodology differences between our segment reporting and our external reporting. The following is a list of the more significant methodology differences:

- ME&T segment net assets generally include inventories, receivables, property, plant and equipment, goodwill, intangibles, accounts payable and customer advances. We generally manage at the corporate level liabilities other than accounts payable and customer advances, and we do not include these in segment operations. Financial Products Segment assets generally include all categories of assets.
- We value segment inventories and cost of sales using a current cost methodology.
- We amortize goodwill allocated to segments using a fixed amount based on a 20-year useful life. This methodology difference only impacts segment assets. We do not include goodwill amortization expense in segment profit. In addition, we have allocated to segments only a portion of goodwill for certain acquisitions made in 2011 or later.
- We generally manage currency exposures for ME&T at the corporate level and do not include in segment profit the effects of changes in exchange rates on results of operations within the year. We report the net difference created in the translation of revenues and costs between exchange rates used for U.S. GAAP reporting and exchange rates used for segment reporting as a methodology difference.
- We do not include stock-based compensation expense in segment profit.
- Postretirement benefit expenses are split; segments are generally responsible for service costs, with the remaining elements of net periodic benefit cost included as a methodology difference.
- We determine ME&T segment profit on a pretax basis and exclude interest expense and most other income/expense items. We determine Financial Products Segment profit on a pretax basis and include other income/expense items.

Reconciling items are created based on accounting differences between segment reporting and our consolidated external reporting. Please refer to pages 93 to 95 for financial information regarding significant reconciling items. Most of our reconciling items are self-explanatory given the above explanations. For the reconciliation of profit, we have grouped the reconciling items as follows:

- **Corporate costs:** These costs are related to corporate requirements primarily for compliance and legal functions for the benefit of the entire organization.
- **Restructuring costs:** May include costs for employee separation, long-lived asset impairments and contract terminations. These costs are included in Other operating (income) expenses except for defined-benefit plan curtailment losses and special termination benefits, which are included in Other income (expense). Restructuring costs also include other exit-related costs, which may consist of accelerated depreciation, inventory write-downs, building demolition, equipment relocation and project management costs and LIFO inventory decrement

benefits from inventory liquidations at closed facilities, all of which are primarily included in Cost of goods sold. Only certain restructuring costs in 2020 and 2019 were excluded from segment profit. See Note 25 for more information.

- **Methodology differences:** See previous discussion of significant accounting differences between segment reporting and consolidated external reporting.

- **Timing:** Timing differences in the recognition of costs between segment reporting and consolidated external reporting. For example, we report certain costs on the cash basis for segment reporting and the accrual basis for consolidated external reporting.

For the years ended December 31, 2021, 2020 and 2019, sales and revenues by geographic region reconciled to consolidated sales and revenues were as follows:

Sales and Revenues by Geographic Region

(Millions of dollars)	North America	Latin America	EAME	Asia/Pacific	External Sales and Revenues	Intersegment Sales and Revenues	Total Sales and Revenues

¹ Sales of ME&T are based on dealer or customer location. Revenues from services provided are based on where service is rendered.

24. Acquisitions**SPM Oil & Gas**

On February 1, 2021, Caterpillar completed the acquisition of varying equity interests and assets of the Weir Group PLC, collectively known as SPM Oil & Gas (SPM). Headquartered near Fort Worth, Texas, SPM Oil & Gas produces a full line of pumps, flow iron, consumable parts, wellhead and pressure control products that are offered via an extensive global network of service centers. This acquisition, included in the Energy & Transportation segment, is consistent with our strategy of providing our customers expanded offerings and services which will now be one of the broadest in the well service industry. The purchase price, net of \$22 million of acquired cash, was approximately \$359 million.

We financed the transaction with available cash. Tangible assets as of the acquisition date were \$520 million, recorded at their fair values, and primarily included cash of \$22 million, receivables of \$106 million, inventories of \$159 million, leased assets of \$105 million, and property, plant, and equipment of \$117 million. Finite-lived intangible assets acquired of \$23 million included developed technology and trade names and will be amortized on a straight-line basis over a weighted-average amortization period of approximately 8 years. Liabilities assumed as of the acquisition date were \$192 million, recorded at their fair values, and primarily included lease liabilities of \$105 million and accounts payable of \$33 million. Goodwill of \$30 million represented the excess of the consideration transferred over the net assets acquired. Assuming this transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

25. Restructuring costs

Our accounting for employee separations is dependent upon how the particular program is designed. For voluntary programs, we recognize eligible separation costs at the time of employee acceptance unless the acceptance requires explicit approval by the company. For involuntary programs, we recognize eligible costs when management has approved the program, the affected employees have been properly notified and the costs are estimable.

Restructuring costs for 2021, 2020 and 2019 were as follows:

(Millions of dollars)	2021	2020	2019
Employee separations ¹	\$ 92	\$ 271	\$ 48
Contract terminations ¹	2	2	1
Long-lived asset impairments ¹	(63)	38	65
Other ²	59	43	122
Total restructuring costs	\$ 90	\$ 354	\$ 236
¹ Recognized in Other operating (income) expenses.			
² Represents costs related to our restructuring programs, primarily for accelerated depreciation, inventory write-downs, project management, equipment relocation and building demolition, all of which are primarily included in Cost of goods sold.			

The restructuring costs in 2021 were primarily related to actions across the company including strategic actions to address certain products, which were partially offset by a gain on the sale of a manufacturing facility that had been closed. The restructuring costs in 2020 were primarily related to various voluntary and involuntary employee separation programs implemented across the company and strategic actions to address certain products, which were partially offset by a gain on the sale of a manufacturing facility that had been closed. Both the gains in 2021 and 2020 were included in Long-lived asset impairments in the table above. The restructuring costs in 2019 were primarily related to restructuring actions across the company.

In 2021, all restructuring costs are excluded from segment profit. In 2020 and 2019, only certain restructuring costs were excluded from segment profit. Restructuring costs included in segment profit were as follows:

(Millions of dollars)	2021	2020	2019
Construction Industries	\$ —	\$ 13	\$ 4
Resource Industries	—	19	5
Energy & Transportation	—	55	7
Financial Products Segment	—	—	—

The following table summarizes the 2021 and 2020 employee separation activity:

(Millions of dollars)	2021	2020
Liability balance, beginning of period	\$ 164	\$ 48
Increase in liability (separation charges)	92	271
Reduction in liability (payments)	(195)	(155)
Liability balance, end of period	\$ 61	\$ 164

Most of the remaining liability balance as of December 31, 2021 is expected to be paid in 2022.

In September 2015, we announced a large scale restructuring plan (the Plan) including a voluntary retirement enhancement program for qualifying U.S. employees, several voluntary separation programs outside of the United States, additional involuntary programs throughout the company and manufacturing facility consolidations and closures. The largest action among those included in the Plan was related to our European manufacturing footprint which led to the Gosselies, Belgium facility closure. We incurred \$43 million of restructuring costs associated with these actions in 2019. The Plan concluded in 2019, and total restructuring costs incurred since inception of the Plan were \$1,831 million.

ITEM 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure.

Not Applicable.

ITEM 9A. Controls and Procedures.

Disclosure Controls and Procedures

An evaluation was performed under the supervision and with the participation of the company's management, including the Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of the design and operation of the company's disclosure controls and procedures, as that term is defined in

Rule 13a-15(e) under the Exchange Act, as of the end of the period covered by this annual report. Based on that evaluation, the CEO and CFO concluded that the company's disclosure controls and procedures were effective as of the end of the period covered by this annual report.

Management's Report on Internal Control Over Financial Reporting

Management's report on the company's internal control over financial reporting as of December 31, 2021 is included on page 44 of Part II, Item 8 "Financial Statements and Supplementary Data." The effectiveness of the company's internal control over

financial reporting as of December 31, 2021 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm. Their report appears on pages 45-46 of Part II, Item 8 "Financial Statements and Supplementary Data."

Changes in Internal Control over Financial Reporting

During the last fiscal quarter, there has been no significant change in the company's internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

ITEM 9B. Other Information.

Disclosures Required Pursuant to Section 13(r) of the Securities Exchange Act of 1934

During the six months ended June 30, 2021, Caterpillar Eurasia LLC, one of our affiliates, engaged in limited transactions or dealings with the Federal Security Service of Russia (the "FSB"). Specifically, Caterpillar Eurasia LLC, from time to time, directly or indirectly, made required submissions to and received regulatory authorizations from the FSB related to the importation of software

used in the on-board telematics and control systems of Caterpillar machines that were imported into Russia. Caterpillar Eurasia LLC did not generate any net revenue or net profits from such approval activity and does not make any sales to or have other dealings with the FSB. Caterpillar Eurasia LLC plans to continue these activities as long as it remains lawful to do so.

ITEM 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections.

Not Applicable.

PART III

ITEM 10. Directors, Executive Officers and Corporate Governance.

Identification of Directors and Business Experience

Information required by this Item is incorporated by reference from the 2022 Proxy Statement.

Identification of Executive Officers and Business Experience

Information required by this Item appears in Item 1C of this Form 10-K.
