(21) Appl. No.: **09/710,654**

(57) **ABSTRACT**

(22) Filed: **Nov. 10, 2000**

(51) **Int. Cl.**
G06F 15/16 (2006.01)

(52) **U.S. Cl.** **709/219; 709/201; 715/704**

(58) **Field of Classification Search** **709/200–203, 709/217–229; 719/310; 700/23, 88, 94; 715/704, 500.1, 712**

See application file for complete search history.

A method and apparatus for creating and posting media is provided. For example, the invention allows a user to quickly create, signal process, encode, and transfer media files to a server for storage, posting, distribution, and retrieval. Thus, media such as audio, video, display, photo, spreadsheet, Web Clips, and HTML pages can be combined into a media file for uploading to a server and accessed from listings posted at web sites. In accordance with embodiments, a user downloads and installs a plug-in at the user's client computer. The user then registers and logs onto the server to perform various tasks. For example, the user can create a combined audio and photo media file at the client computer, in accordance with server based control parameters received from the system server. The plug-in then allows the user to perform digital signal processing and encoding of the media file at the client computer. After the file is encoded, it may be uploaded to a server for storage, posting, distribution, and retrieval. A file management system provides copies and listings of the file to other servers and web sites as permitted. Thus, other user having access to the database or web site lists via other client computers may select the file for retrieval. In accordance with another aspect of the invention, an information management system provides file and file list rankings based upon selection or click through of files and file listings.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
