Voip-Pal.com, Inc. v. Facebook, Inc.,

EXHIBIT 2

Patent 10,218,606	**The WhatsApp System**
1. A method for routing communications in a packet switched communication system between a first participant device associated with a first participant and a second participant device associated with a second participant, the first and second participant devices being associated with first and second network elements of the communication system, respectively, the method comprising:	The WhatsApp System routes a communication in a packet switched communication system between a first participant device associated with a first participant and a second participant device associated with a second participant, the first and second participant devices being associated with first and second network elements. The first participant device and the second participant device each comprise a mobile device running a version of the WhatsApp application. These mobile devices are coupled to a network of servers and gateways controlled by WhatsApp. The WhatsApp System consists of multiple servers in clusters each connected to multiple mobile devices and networked via local and wide area networks. The WhatsApp System allows a mobile device running the WhatsApp application to send a communication to another mobile device that is also running the WhatsApp application.

receiving, by at least one processor, a second participant identifier associated with the second participant device, in response to initiation of a communication from the first participant device to the second participant device, the first participant device being associated with a first participant identifier;	The WhatsApp System includes processing by the mobile application, running on the mobile device as well as processing by one or more WhatsApp servers. One or more of the processors on the mobile device receives an input from the user to select the second participant. The user input, which may consist of a partial name or a partial number input into the contact list search box, and/or an input on a touch screen displaying contacts constitutes the second participant identifier. The first participant is registered with WhatsApp and has a WhatsApp username and phone number, which may constitute a first participant identifier. https://www.wikihow.tech/Find-Someone-on-WhatsApp

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS
Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS
Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS
Sync your system to PACER to automate legal marketing.
