

# Exhibit 7

US8981933B2 – Claim 13 as applied to Google – Nest Secure Alarm System

13. A security system, comprising:  
a sensor device configured to detect conditions at a site and provide signals indicative of the conditions detected, and  
a headquarters processor configured to receive the signals from the sensor device, wherein the headquarters processor is configured to process the signals to determine an action to be taken if an event has occurred,  
wherein the action includes at least one of notifying a human guard of the event and sending instructions to a human guard.

**Home Security Solutions**

Peace of mind starts at home.

Keep your home safe and sound with the family of Nest security products. The alarm system, cameras, connected lock and video doorbell are designed to work together. So you can know what's happening right from one place – the Nest app.

**Maximum security. And then some.**

Our most comprehensive security package includes the Nest Secure alarm system, our most intelligent indoor and outdoor security cameras, a connected lock, a video doorbell, and four additional Nest Detect sensors.

**Always know what's happening at home.**

If the alarm goes off, you'll get a security alert on your phone.<sup>1</sup> Check the free Nest app to see what triggered the alarm – either a door or window opened or someone entered a room. Then you can call the police or your emergency contacts

Source: <https://nest.com/alarm-system/overview/>

As shown above the Google Nest Secure Alarm System keeps the home safe and sound. With the Nest secure alarm system when alarm goes off the user receives a security alert on their phone.

**US8981933B2 – Claim 13 as applied to Google – Nest Secure Alarm System**

13. A security system, comprising:  
 a sensor device configured to detect conditions at a site and provide signals indicative of the conditions detected, and  
 a headquarters processor configured to receive the signals from the sensor device, wherein the headquarters processor is configured to process the signals to determine an action to be taken if an event has occurred,  
 wherein the action includes at least one of notifying a human guard of the event and sending instructions to a human guard.

**Sensor device**

Our most comprehensive security package includes the **Nest Secure alarm system**, our most intelligent **indoor and outdoor security cameras**, a **connected lock**, a **video doorbell**, and **four additional Nest Detect sensors**.

**Insight for outside.**

Good insight starts with incredible sight. **Nest Cam IQ can detect a person up to 50 feet away**, then alert you with a photo of who's there. With Nest Aware, it can even recognize a familiar face.<sup>1</sup>

Source: <https://nest.com/cameras/nest-cam-iq-outdoor/overview/>

**One sensor can sense two things.**

Stick **Nest Detect on a window**, and you'll know when it opens. Stick it on a wall, and it senses motion in a room. And when you stick it on a door, it can sense both motion and open/close. You can turn motion detection on and off in the Nest app.

 **Senses motion**

 **Senses open/close**

Source: <https://nest.com/alarm-system/overview/>

As shown above the Google - Nest sensors such as Nest Cam can detect a person up to 50 feet away and the Nest Detect which senses motion in a room as well as the opening and closing of doors.

## US8981933B2 – Claim 13 as applied to Google – Nest Secure Alarm System

13. A security system, comprising:  
 a sensor device configured to detect conditions at a site and provide signals indicative of the conditions detected, and  
 a headquarters processor configured to receive the signals from the sensor device, wherein the headquarters processor is configured to process the signals to determine an action to be taken if an event has occurred,  
 wherein the action includes at least one of notifying a human guard of the event and sending instructions to a human guard.

**Nest Aware subscription for your camera**

All Nest cameras have built-in software that detects motion and sound. **When you add a Nest Aware subscription, your camera streams its video to Nest's cloud servers so advanced algorithms can fine-tune your camera's motion and sound detection.** In addition, with Nest Aware you can get specialized alerts that tell you more about what your camera saw or heard. Standard camera features and upgraded Nest Aware features are different depending on which camera you have.

**Add an extra boost of intelligence with a Nest camera**

**What really separates Nest from the pack is the unique, cloud-based intelligence that comes with a Nest Aware subscription.** Nest cameras can go way beyond detecting basic motion and sound. With the help of Nest Aware's powerful algorithms, our cameras can give you insight into what's really going on – not just motion or sound, but what kind and whether it was important. These algorithms can even improve as they receive and process additional data.

Source: <https://nest.com/connected-home/security/how-do-Nest-cameras-give-you-better-activity-alerts>

**Better alerts for motion and sound**

**Nest Aware uses advanced algorithms to send you more intelligent motion and audio alerts,** meaning the alerts you get are more accurate, and you'll get them at more intelligent times. Depending on which Nest camera model you have, you can also get person seen alerts or familiar face alerts. These **alerts let you know when a human – not your pet – has walked in front of your camera.**

Source: <https://nest.com/support/article/What-do-I-get-with-Nest-Aware-for-Nest-Cam#free-about>

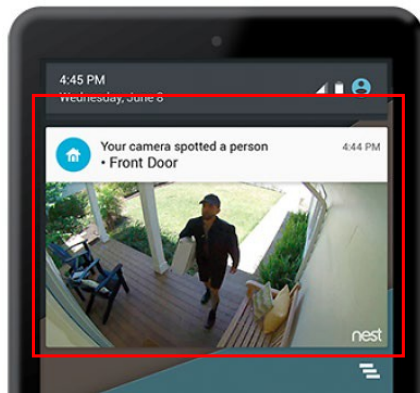

As shown above the camera streams its video to the Nest's cloud ("headquarter processor") to fine tune the video for motion and sound detection. This cloud based intelligence comes with the Nest aware subscription. Nest aware uses advanced algorithms for more intelligent motion and audio alerts.

US8981933B2 – Claim 13 as applied to Google – Nest Secure Alarm System

13. A security system, comprising:  
a sensor device configured to detect conditions at a site and provide signals indicative of the conditions detected, and  
a headquarters processor configured to receive the signals from the sensor device, wherein the headquarters processor is configured to process the signals to determine an action to be taken if an event has occurred,  
wherein the action includes at least one of notifying a human guard of the event and sending instructions to a human guard.

**Better alerts for motion and sound**

Nest Aware uses advanced algorithms to send you more intelligent motion and audio alerts, meaning the alerts you get are more accurate, and you'll get them at more intelligent times. Depending on which Nest camera model you have, you can also get person seen alerts or familiar face alerts. These alerts let you know when a human – not your pet – has walked in front of your camera.

Source: <https://nest.com/support/article/What-do-I-get-with-Nest-Aware-for-Nest-Cam#free-about>

As shown above with the Nest Aware subscription the user gets alerts on their phone when a person is detected at the door.
