

Exhibit 11

Dish Network – My Dish – Movies for Purchase Infringement of the '443 patent	
Claim 24	Evidence
24. A method comprising:	<p>The Dish Network Movies for Purchase feature executing as a client-server application on a Dish Network server and Dish receiver performs a method for purchasing items.</p> <p>For example, the Movies for Purchase feature provides a service that enables a user to purchase movies. [A]</p>
a computing device storing a list that includes one or more items;	<p>The Dish Network Movies for Purchase feature executing as a client-server application on a Dish Network server and Dish receiver forms a computing device that stores a list that includes one or more items.</p> <p>For example, under the Video on Demand menu provided to a user, the user is presented with a list of Movies for Purchase. [A]</p>
the computing device determining whether each item in the list was previously purchased by a user;	<p>The Dish Network Movies for Purchase feature executing as a client-server application on a Dish Network server and Dish receiver forms a computing device that determines whether each item in the list was previously purchased by a user.</p> <p>For example, under the Video on Demand menu provided to a user, the user is presented with a list of My Purchases, which is a list of movies that the user has previously purchased. [A]</p>
the computing device allowing the user to initiate a purchase of an item in the list that has not yet been purchased by the user; and	<p>The Dish Network Movies for Purchase feature executing as a client-server application on a Dish Network server and Dish receiver forms a computing device that allows the user to initiate a purchase of an item in the list that has not yet been purchased by the user.</p> <p>For example, under the Video on Demand menu provided to a user, the user is presented with a list of Movies for Purchase. The user can purchase a movie that has not already been previously purchased by selecting the movie, selecting Buy, and selecting Confirm. The user can use the payment method already on file with Dish Network or select "Add Payment Method" and make a one-time purchase. [A]</p>

<p>the computing device indicating on a display of the computing device that a purchased item has not yet been received by the user.</p>	<p>The Dish Network Movies for Purchase feature executing as a client-server application on a Dish Network server and Dish receiver forms a computing device that indicates on a display of the computing device that a purchased item has not yet been received by the user.</p> <p>For example, under the My Purchases tab of the DISH Anywhere display, purchased movies can be downloaded to any Android or iOS device for offline viewing. The My Purchases tab includes a Downloads Queue where purchased movies selected for downloading are displayed. The received status of a purchased movie changes from 0% or pending (not yet received) to 100% or complete (received) as the downloading process of the purchased movie progresses. [B]</p>
